ATHLETIC ADVISOR GIVES MUCH VALUABLE ADVICE TO THE FRESHMEN.

Yesterday at 3 Dr. Rockwell gave an instructive address to the Freshmen class concerning personal hygiene. In a few well chosen words he gave the new men some valuable advice about a very important matter.

Dr. Rockwell is a graduate of the Institute in the class of ’896. While here he was active in all school activities and especially in athletics, holding the record for the quarter mile.

This was the first of a series of four lectures. The next one is to be given in Huntington Hall at 4 P.M. Wednesday, October 15. All Freshmen are to attend these lectures.

SUMMER CAMPERs TO MEET.

Saturday Evening In The Union—Entertainment Concluded.

Saturday evening at 8 P.M. was a very interesting meeting will be held in the Union. This will be for those members of Courses I, III, and XI who attended the summer surveying camp at East Machias, Me. The gathering is for the purpose of having a general good time, and it will be the first of a series of reunions of the summer campers.

The President and Instructors of these courses will be on hand and several of them will speak.

The entertainment will be of a good character, and the refreshments will be fine. The refreshments will be light, but delicate. "Pogo" Wood will sing several solos in his usual manner, while McIntyre and McGurk, the black-faced comedians who were a feature of the camp minstrel show, will present several of those popular songs which are so pleasing. Bob Schmucker will tell of the Miners’ trip to Nova Scotia during the last week of camp. Scully and Cooper will conduct the entertainment with several charming floor-Schmucker selections.

Many photographs were taken at camp, and these will be brought to the meeting and a number of them projected on the screen. Pickering, Assistant Art Editor of Technic 1915 took a great picture at camp, and this will also be shown.

F. C. Foote and G. T. Rooney are in charge of the affair, and the former says: "Splendid Eats."

ST. ANDREW CONFERENCE.

There will be a conference of the Technology Chapter of the Brothers of St. Andrew next Tuesday at 2:15 P.M. The subject for the occasion is "Evolution and Christianity."

WEATHER.

For Boston and vicinity: Probable rain; increasing easterly winds.

Several tests showed that the tempest strength of the sandblasts at the E. E. Reception was remarkably great.

RIFLE CLUB TO START PRACTICE NEXT WEEK.

Election of New Officers at First Meeting—Match with Harvard Expected.

The Rifle Club will begin activities for the new term the first of next week and at a meeting, the time of which will be announced later, will elect officers for the new year and discuss plans for the coming indoor season.

This year the Rifle Team will again be affiliated with the Indoor League and the men expect to equal if not better their rating of last year, when the finished in fourth place out of a total of fourteen teams. Only three matches are set for the season. The next one is to be given especially in athletics, holding the record for the quarter mile.

For the quarter mile.

Thirty-five men attended the meeting of the musical clubs in the Union yesterday afternoon. This meeting was called to give new men an idea of what was expected of them and incidentally to give the leaders a line on the new members.

A new reader is wanted, as H. G. Mann, last year’s reader, will be unable to take that place this year.

Dr. Salisbury, general manager, said that no western trip was possible this year, because the amount of funds that the money should go toward the indoor question. Nothing definite has been decided about the other trips, although one to Northampton is almost certain, and there will probably be trips to Spring field, Pittsfield and Newport, aside from the various short trips around Boston.

The rifle club needs a drummer also basemen and guitarists. The Mendon Club needs first tenors and second basemen but practically, there is a good chance for anyone who can sing.

The trials for the Mendon Club will be held at 4:15 today in the Union; those for the Banjo Club at 5 today, and for the Gle Club at 4:15 tomorrow.

INDUSTRIAL CONVENTION.

Pennsylvania State Government In New Venture.

The new State Department of Labor and Industry in Pennsylvania is calling a convention to enable the heads of the state departments, engineers, manufacturers and industrial managers to discuss together topics of industrial welfare and efficiency and to suggest legislation and other means of bettering modern industrial conditions. As far as is known this is the first venture of this kind that has ever been made.

The convention will be under the auspices of the Engineers’ Society of Pennsylvania who will also have charge of the manufacturers’ exhibits to be held in connection with the convention. If the efforts of this convention are successful it is probable that inter-dependent of engineer and manufacturer will be more fully appreciated than ever before.

SOHOMORE ELECTIONS.

Nomination PAPERS DEAD NEXT THURSDAY-Ballot Committee Selected.

The nomination papers for the Sophomore officers are due at 5 P.M. at the Cage a week from today. Papers signed by at least ten men must be made out for the following officers: President, Vice-President, Secretary. Treasurer, men to the Executive Council and two to the Institute Committee and two to the Athletic Association. Every Sophomore who has not paid his class dues should do so before next Thursday in order to be able to vote for these officers.

The Ballot Committee has been selected and will be ready before the papers are due.

ELECTRICAL ENGINEERS HOLD FIRST MEETING.

Prof. Jackson and Pender Address Large Gathering in Union.

Last night at 8 o’clock the Electrical Engineering Department, was opened with the speech of the relation of the Society to Technological Students. The work in the course is mostly devoted to the subjects of things in electrical work, and the practical is to be well taken up. Practical knowledge is gained by the use of eyes and hands and here the work of the Society comes in, for it is from the speakers and the trips that this is gained. Boston, he said, is an ideal place for the location of a technical school, because so many big engineering organizations are situated here. The opinion of many of the field of electrical engineering is increasing and advancing much faster than thirty years ago.

(Continued on page 2.)
DR. G. A. CRAWFORD TO BEGIN T. C. A. TALKS

Retired Chaplain of U. S. N. Will Speak on "Why Doesn't God Forgive Everyone?"

This noon, at 1:30, in the Union, the Freshmen will be given their first opportunity of hearing the weekly talks held by the Technology Christian Association. In the last two years these talks have held a very important place in undergraduate life at the Institute. They have received the attention that it was well worth while to continue these weekly meetings in the Union. At a late date, they have become firmly established in Institute life and they are looked forward to by many Tech men. Dr. George A. Crawford, Chaplain U. S. N. (Retired), will hold the distinction of being the first speaker for the T. C. A. meetings this year, and he will speak on the subject: "Why Doesn't God Forgive Everyone?" This will not, however, be the first time that Rev. Mr. Crawford has spoken at Technology, as he will be well remembered by many men who heard his talk last year on "An Unanswerable Argument."

The vice-president of the Society has been chosen to introduce the speaker, and the Freshmen, as well as the upper classmen, will attend these Thursday noon meetings in large numbers and will thereby give the Association their support. Today's talk will be given at 1:30 in the Union as usual.

E. E. SOCIETY RECEPTION

(Continued from page 1.)

call for engineers is very great. To really get the most out of the Course here, Prof. Bragg says that the men must do more than take the course; they must become familiar with the subject matter, the ethical code of the engineer, the scientific background, and the history of the subject. He must work things out for himself, or he will be merely "a hool." He must bear in mind that education is not the process of having facts driven in, but of sorting and sifting the facts himself, or he is merely "a sewage disposal plant."

The officers of the Society have made arrangements with the Civil Engineering Society by which any member may attend meetings of that Society. The T. C. A. arrangement will probably be made with the Mechanical Engineering Society. As a Vice-president of that Society has not returned this year so the office is left vacant. Nominations for this office will be made at the next meeting. Nominations for ten paid up members will be held Tuesday, October 14, at 4 P.M., and are to be left with Miss Payson in 14 Lowell.

H. C. Mason of the Entertainment Committee gave the following dates and speakers for future meetings:

Oct. 9—Smoker—Speaker, Mr. Howard of General Electric Company.

Nov. 11—Smoker—Speakers, Mr. Morse of the Simplex Company and Mr. Hidgins of the Teledyne Service Company.

Nov. 16—Smoker—Speaker, Mr. Edson of the Edison Company.

Jan. 9—Dinner, probably outside—Speaker, Mr. Smith of the Boston Elevated Railway Company.

L. V. Travis of the Excursion Committee spoke of various trips made during the last two weeks and as often as the fellows will get together, they will make the places to be visited, such as Lincoln, Wharf, Elevated Power Station, Simplex Electric Company, Campfell, General Electric Company, and the Forest River Ship Yards in Quincy. Last year a trip to Niagara was proposed, but did not get on the ground and the matter was again brought up.

Prof. Pender suggested a trip to Philadelphia and L. H. Wheeler spoke.

REGISTRAR ADOPTS NEW NUMBER SYSTEM

Subjects Arranged so That Their Numbers Show Classification

The Registrar has installed a new system of numbering the courses this year, which is contrived so that the principle that one of the number of each subject shall convey some information about the subject. The figure representing the hundreds in each new number or the letter placed before the number indicates the general classification of the subject, either by course or department. The figure shows in what year the subject comes, and the last figure shows in what term it is given. If it comes in the first term the unit figure is odd; if in the second term, even. The system is not, however, rigidly followed out. In some of the course names it has been found impossible to make every figure correspond to the system:

FINANCE COMMITTEE DINNER

Tonight, at 6:30, in the Union, there will be a dinner for the members of the Finance Committee. A meeting of the committee will follow the dinner at 7:30, at which the reports to October 1, 1913, of treasurer and auditor will be read. It is important that each treasurer, and any treasurer who has just been elected over his accounts, be present. Those who cannot attend the dinner are requested to notify Hadley, 14, at the Cage before noon. The price will be fifty cents.

R. E. SOCIETY RECEPTION
(Continued from page 2.)
of his experiences on this trip which he
took a couple of years ago. It took
a week and was well worth the time
and expense according to his statement.
The party of which he was a member
visited the electric works of the New
Haven road, the Edison Water Side Sta-
tions in New York and then went to
Harrison, New Jersey, where they
visited the General Electric Company
plant and saw the method of making
lamp filaments and also motors and
dynamics. They also visited the Crocker
& Wheeler Company, the Hudson Man-
shen Power Company, New Jersey,
the Bell Telephone Company, the Inter-
borough Transit Company plant and
the N. Y. C. Power Station at Fort Morris.
The trip was considered a very enjoy-
able one and Webber recommended it
for consideration as a mid-year trip.

The Secret of Good Batting
is similar to the secret of good business—it happens
to some and just misses the others.

If there ever was a commercial home run it’s
Fatima, the Turkish-blend cigarette. The expert
who conceived this blend was some baffle! Fatima
was first lined out in the college towns—the student
body quickly proclaimed them winners. Today
Fatima is the biggest selling cigarette in this country.
The secret is—pure, good, choice tobacco—no
expense in the package—quality all in the smoke
—Twenty.
