The sale of tickets will be on a strictly cash basis, absolutely no credit being granted. MEN'S FURNISHINGS

Are men better typists than women? This interesting social question has been submitted to scientific analysis, and an article on the subject appears in the Scientific American for October 25th. Various tests are prescribed for individuals to determine their acuteness of touch, memory, audition, etc., to test the tactile sense and an ingenious device known as a Webber compass is used. This is an instrument for touching one or two points with an equal pressure on various portions of the body and then finding the minimum distance which they can be separated and still produce a distinct double impression on the brain. The distance of course varies greatly with the part of the body and its nerve development. Try this yourself, or, rather, have someone try it on you, for perception and muscular sensitivity is tested by ability to accurately detect differences between nearly equal weights. As an answer to the above question, it was found that with the comparatively few individuals examined, that the men were on the whole superior.

The estimated value of the gold produced in the Alaska portion of the Yukon basin in 1912 was $4,454,000, compared with $9,050,000 in 1911. This decrease is due to the falling off of the output from the Fairbanks and Hot Springs districts, for the other Yukon camps either held their own or somewhat increased their output compared with the preceding year.

The Fairbanks district continues to be the largest producer of placer gold in the Yukon country. It can not maintain this position long, however, without a radical change in mining conditions which will make it possible to exploit profitably its extensive bodies of low-grade placers.

ALTERATIONS OF SECOND-HAND UNIFORMS

A representative of the uniform contractors will be at the Armory during the Wednesday drill periods, Oct. 22 and Oct. 29, to take charge of all parts of uniforms requiring alteration as to fit or ornamentation. Students are at liberty to have the work done anywhere providing it is done properly but arrangement has been made to have this work done by the contractor at rates which are reasonable and probably cheaper than those charged elsewhere. This work should be attended to at once as when the new uniforms arrive the workmen will have all their time occupied by work on them and excuses will not be accepted for work delayed through carelessness. The address of the tailor employed for this work is James Greatorex, No. 27 Causeway St. You can go there, but will save trouble by turning in the articles at the Armory not later than October 29th, and better still on the 22d.
