THE TECH

PLANS FOR SPECIAL ISSUES ANNOUNCED

THE TECH To Run Field Day Issue

New Institute Special The Next Day.

At the meeting of the men on THE TECH Saturday noon, the plans for two special issues were announced one on Field Day, similar to last year's issue on that day, and the other next day, covering the complete plans of the New Institute.

The Field Day issue will contain the pictures of all the teams, the lineup for the football game, and the order of presentation for all the other events, bearing the "official official score card" of the day. This will be on sale at the Field Day.

The second special issue is expected to surpass anything that the board has ever attempted. Cars will be run showing the proposed buildings, a detailed account of the plans as they now stand will be given, and for the first time the undergraduate will be asked to call for the necessary understanding of the New Institute as it is to be. The issue will possess a definite and permanent value, and will be the first announcement made, the Boston papers not getting the news until the night.

The meeting was addressed by W. W. Mayhew, the Advertising Manager, and Knowles, the Advertising Manager, all of whom impressed on the men the need of securing tickets for the show, to be run showing the proposed buildings. The plans of the New Institute will be run showing the proposed buildings. The plans of the New Institute.

COSMOPOLITAN CLUB

A special meeting of the members and officers of the Cosmopolitan Club will be held at 5 P.M. Wednesday, Nov. 5, in 8 Engineering C. This meeting is to decide to get a magazine on the various class teams is requested to call at this table and get the information arrangements are being made by the committee appointed by the class directors to make arrangements for the Senior Class. If tickets have been hired, contracts are out for a band, and a staff of printers and students are engaged in making the insignia which every man will wear and which will turn the verdant green of the Freshman to a bilious green of envy.

As this is the last Field Day which the Seniors can enjoy as a class, the men are being approached on the subject are very enthusiastic.

The price will be merely nominal and is due to the elaborate arrangements in the undergraduate exchequer. Cars will leave for the Field in front of the Copley Plaza on the street at 2 P.M. sharp, next Friday, and in them will be the majority of the Senior Class. If tickets are not on hand, the committee on arrangements says is true. Tickets will be on sale soon.

FRESHMAN WIN FALL HANDICAP METR

Huff '15 is Individual Star With Wilson '14 Next—Nye Springs Great Surprise.

The Freshman Class scored a sensational victory at Tech Field Satur-day afternoon, taking the Fall Handi-cap meet by generous margins. With no strong individual stars but a wel-lbalanced team, the Freshmen scored an emphatic victory.

T. H. Huff '15 scored the greatest number of points, taking first and a second. Louis Wilson furnished the most interesting part of the events by coming through in both dashes in remarkable style. His injured leg made it difficult for him to train for this season of 1914 is now apparently in fine condition and thereby Tech-nology's hopes of a good varsity team are greatly increased.

Wilson lead the field by three yards at the finish, after running in both dashes in remarkable style. His injured leg made it difficult for him to train for this season of 1914 is now apparently in fine condition and thereby Technology's hopes of a good varsity team are greatly increased.

AFRICAN NEGRO TO SPEAK

Graduate of Hampden Institute Next T. C. A. Speaker.

Captain Mandinka Qandiyani Ciele, a talented African negro who recently graduated from Hampden Institute, is to be the T. C. A. speaker in the Union next Thursday noon.

Captain Ciele was sent to this country nine years ago by his father, who was at one time the chief of one of the principal Zulu tribes, to prepare himself for missionary work. He spent three years at the Slater Institute and seven at Hampton, one of the two greatest negro schools in the country, ranking with Booker T. Washington's Tuskegee College. The Hampton the Captain was one of the leaders of the school, being president of the local Y. M. C. A., and captain of the first company in the Hampton Battalions. He was also active in athletics, playing left guard on the football team.

Progressive Club

There will be a meeting at 1:00 P.M. today in Room A in the Union of all Progressives who will assist the party in work at the polls. The work will consist principally in the checking of the voting list of the voters as they cast their ballots. Men are needed in the precincts of wards ten and eleven. Several men have already signified their intention of doing this work, and the meeting is for the purpose of giving these men instructions regarding the time and place to work the paper and to get out more men.

Field Day tickets will be on sale soon.

SOCHEMORER RELAY

The twelve members and two substitutes of the 1916 relay team will meet at the Field today for the election of a captain and measures for suits. The manager wishes to im-mprove the appearance of the squad in-activeness of practice in flag passing, if the team maintains any hopes of breaking the record.

FIELD DAY TICKETS

Grandstand tickets for Field Day will be on sale in Rogers Corrers this noon from 1 to 2. Managers of the various class teams are requested to call at this table and get the competition tickets for their teams.

PRICE TWO CENTS
THE TECH

Entered as second-class matter Sept. 16, 1911, at the post-office at Boston, Mass., under the Act of March 3, 1879.

Published daily, except Sunday. During the college year by students of the Massachusetts Institute of Technology.

Managing Board:
S. H. Taylor, '14, General Manager
H. Rogers, '15, Associate Manager
P. C. Box, '16, Managing Editor
H. I. Knowles, '15, Associate Editor-in-Chief
A. Palmer, '16, Treasurer

News Board:
H. Rogers, '16, Chief News Editor
J. K. Heller, '16, Associate News Editor
G. W. Wyman, '16, Managing Editor
C. W. Loomis, '16, Associate Editor-in-Chief
W. T. Knieszner, '16, Institute Editor
H. I. Knowles, '15, Advertising Manager
S. H. Taylor, '14, General Manager

THE TECH depends for the bulk of its work, as well as for material out of which to evolve future editors and managers, on the Freshmen on the paper. The contest is fast approaching a close, and is bound to bring out the best all the Freshmen have to offer.

TUESDAY, NOVEMBER 3, 1913

In Charge of This Issue

MAJOR COLE’S OFFER

We take pleasure in announcing that Major Cole has repeated the offer he made last year, of an honorary price of five dollars, to be awarded at the end of the year to the Freshmen who, in the opinion of the Managing Board of THE TECH, shall have done most during the year for the paper. There are no restrictions on the contest except that the Freshmen shall be doing regular work on the paper.

We feel that this prize fills a distinct need. We have been disappointed by exclusion from the grounds. Of course it would be impossible to submit the general public to the premises, but some provision should be made for Freshmen who desire to visit them. We think the suggestion offered is worth serious consideration.

Several Tech men, among them our correspondent at this time, are working daily, excepting Sunday, on this issue, and we feel that the extra effort will more than offset the inconsiderateness of the Freshmen who have been taken in some localities to prevent waste. This is still going on.

The utilization of waste gas from the oil wells in different parts of the United States has been an important means of conserving this fuel, and the increasing number of plants erected and being erected for the extraction of gasoline from this "casing-head gas" was one of the most important features of the natural-gas industry in the year 1912.

The year was one of greatest prosperity to the natural-gas producers and a record-breaker for output, according to Mr. Hill, of the United States Geological Survey. The total estimated consumption of natural gas in the United States in 1912 was 562,500,000,000 cubic feet, valued at $49,500,000, an average price of 15.04 cents per 100 cubic feet.

For the year 1911, the estimated consumption of natural gas was 512,993,021,000 cubic feet, valued at 15.5 cents, an average price of 14.76 cents.

The increase in consumption during the year 1912 was equivalent to approximately 20,000,000 tons of coal.

One feature of peculiar interest is the completion of the pipe line which is to carry natural gas from the Bureau Hills, of Kern County, Cal. to consumers of City of Los Angeles and the surrounding towns. This pipe line was built under great difficulties and at tremendous cost. It is expected to secure choice patterns to the Freshmen who wish to visit them.

In the semi-finals Hurlburt and Fay defeated Warren and Polley. The first match will be between Hurlburt and Fay and Warren and Polley. The first two are Seniors, while Warren is a Junior and his partner a Freshman. The content will be three out of five advantage sets.

The doubles of the tennis tournament are fast approaching a close, the second match in the semi-final round having been played Sunday afternoon. Some time this week the finals will be played on the Jarvis Field courts and Harvard. The match will be between Hurlburt and Fay and Warren and Polley. The first two are Seniors, while Warren is a Junior and his partner a Freshman. The contest will be three out of five advantage sets.

In the semi-finals Hurlburt and Fay defeated Kingsbury and Rorit in the upper bracket and in the lower side Warren and Polley defeated Blakney and Carr.

Do this—and you'll have no regrets

See us today about that overcoat you'll need. Why? Because—you won't be able to secure choice patterns much longer. Again why? Because—of tariff changes resulting in a short woolen supply—and even our large stock, carefully provided, going rapidly.

Today's the day to order.
Prices—$25.00 to $60.00.

The Boston Sunday Commons held a volleyball game in Huntington Hall yesterday afternoon, at which Dr. Charles Fleischer gave a short talk on the subject, "New Relations." Miss Helen Todd first spoke on the regulation of the women voters in California, the enaction of the child labor law in Illinois and other states, and the general tendency of people to recognize and work for community rather than individual rights. Mr. Hayes sang two appropriate solos.

After first explaining the object of the Sunday Common, Dr. Fleischer went on to develop the idea which had been illustrated by Miss Todd. He said that, in the first place, every new relationship involves new standards and it is only by individual realization of these ideals that the relationship will prove a success. True social and social democracy is coming more and more to the front through the enactment of minimum wage laws, child labor laws, and humanitarian legislation in general. It is the duty of each individual to play his part in the abolition of poverty and discrimination and to do so can be done only by developing and cherishing a love for mankind in general. Dr. Fleischer does not advocate Socialism, but makes the individual responsible to cooperate with those of the community, but rather believes in the co-operation of individuals to secure the desired result. He believes that as men help and trust each other more and more, conditions will be infinitely bettered, and trust each other more and more, believing in the co-operation of individuals to secure the desired result; and this can be done only by developing and cherishing a love for mankind in general. At this period, it is the duty of us to give the New Technology for the use of Huntington Hall, and expressing his thanks to the high school for its help in securing the watchman and some of the other officials there that he was actually an instituting man.

A suggestion was made that Mr. Humphreys, the Registrar, arrange with the contractors so that by using his registration card a student may be allowed to enter without having to go through the red tape of securing a pass. The argument may be brought up that this will permit too many individuals free access to the grounds and thereby interfere with the work; but I feel sure that those who are interested enough to want to go over there will not prove a nuisance to the contractor. On the contrary, by going over there, as no doubt many will they will obtain correct information concerning the progress on the New Technology and are likely to spread it around, thus stimulating interest in it not only among the student body, but also among the alumni, from whom much of the money is expected. If the present condition is allowed to exist, few will notice the project. As the New Technology will come into its own "unembellished and unsung" when it ought to be the prime factor in the "Boston 1915" movement now on foot.

Thanking you for this space, I am Yours sincerely,
