Mr. Henry A. Morse '93 to be Speaker Tomorrow--Everybody Invited.

On Tuesday evening the Electrical Engineering Society will have as speaker Mr. Henry A. Morse '93, the Superintendent of the Simplex Wire and Cable Co., who will give an illustrated talk on "The Manufacture of Insulated Wires and Cables." This is expected to prove a very interesting subject and the seniors taking the course in the subject "Power" will find the lecture directly in line with the subject of "Transmission System" now being discussed in class. The talk will include the mechanical parts of his line pound used for insulating material used on the wires, as well as the actual construction of the wires and cables.

There will be three excursions on the days following the smoke talk, and on these trips the simplex factory at Cambridge will be inspected. The excursions will leave the Lowell Building at 2:30 P.M. and all those who wish to see the factory should be at the meeting tomorrow evening so that the plans may be completely completed. The excursions will leave from the wires in place of the old style wood casings. His talk is expected to be of great interest to all attending.

CHEMICAL SOCIETY

On Friday evening, November 14, the Chemical Society is to hold a meeting at 7:15 P.M. in the Cabot medal. The speaker of the evening will be Mr. W. W. Duncan of the Hood Rubber Company, and all men interested, especially the members of the Society are urged to attend, a very good time being promised. As members of the Society are to be present, the meeting may be opened by the President, Dr. R. W. Rockwell, and an interest and discussion will be had upon the above-mentioned subjects several important matter are to be disposed of, especially the mid-year trip to be made by the Course VI men.

FIELD DAY DINNER HELD SATURDAY

Event Married By Necessity For Brevity--Football Given To Sophomores.

The annual Field Day dinner was held at the Union on Saturday night with an attendance of close to a hundred. The dinner as usual was given by the Advisory Council on Athletics, Dr. Rockwell being toastmaster, and all those connected with the events of Field Day were invited. President Macaulay, in his address, discussed the manufacture of the cables, and the subject of his talk was expressed how Tech was entering from anything of this sort, her danger lying in the other extreme. He proceeded to announce the Cabot medals, an accident preventing the usual presentation at this time.

Dr. Blackstein completed the list of speakers, telling his impressions of American athletics, and making several comparisons with the German system. He was loudly cheered when he finished.

Owing to the lack of time caused by the approaching convocation, the usual speeches of the captains of the teams were omitted, all of the talks having been very brief. All six captains were called to the front, and the football was presented to the Sophomores. Jeffert accepting it for the team in the absence of Captain Hill. The meeting closed after the Field Day Cup had been passed around each man giving his name, class, and home town as the cup came to him. Coach Kanaly was loudly cheered when he announced himself as "Ka- naly, Unclassified."

JUNIOR BASEBALL

Tomorrow at 1 o'clock noon there will be a special meeting of the 1915 Baseball Team in Rogers, Room 21, and at that time the men will be dressed for sweaters. The members of the Society will be the Captain of the team after they are selected. The meeting will be held at the meeting since it is a very important one.

Though some of us are poor let us all be gentry.

GREAT CONVOCATION SATURDAY NIGHT

Wild Enthusiasm When Plans for New Institution Are Shown.

Saturday evening, at about 8:30, President Macaulay will present the plans for the new institution to the students. The Presidential party will be composed of Mr. Henry A. Morse '93, Mr. Isaac W. Litchfield '85, and Dr. A. W. Rockwell '96, roasting "M. J. T." yelling, with three "Macaulains" on the end, went up, and the enthusiasm and spirit shown in that yell was typical of the general feeling of the occasion. Snow then briefly introduced Dr. Macaulay as the first speaker of the evening.

The Educational Buildings.

President Macaulay began with a few introductory remarks, in which he explained the purpose of the evening—to give the fellows an opportunity to hear from the men in charge of the work just what is being done. Saturday's issue of THE TECH, he said, gave a very full and accurate account of the plans and several views of the New Technology, and he congratulated the board on the good work. The hall was then darkened and pictures similar to those in the special issue of THE TECH were thrown on the screen. Pres. Macaulay proceeded to explain the views. The first was a general view of the lot, which covers 50 acres, and is practically divided in the center, half on Massachusetts Avenue being devoted to the educational buildings, the other half to athletics, dormitories and the Walker Memorial. (Continued on page 3.)

MUSICAL CLUBS

The first Combined Musical Clubs Concert will be held tomorrow evening in the Franklin Square House at 7:45 P.M. The House is about a twenty-minute walk down West Newton street towards Washington street, and is located in Franklin Square on the corner of East Newton and Washington street. All three clubs will play and the club quartet will render selections.

SOCORR PRACTICE

Practice will be this afternoon at the Field for all men who are candidates for the Socrer Team. The dates can report at any time, as there will be someone in charge all of the afternoon.

PRESIDENT'S GYM

All freshmen taking Gymnastics who wish to substitute Athletics for their regular work may go to the gym before 9 o'clock, and report to Mr. Kanaly today from 4 to 5 at the Gym.

KOMMERS DINNER THURSDAY NIGHT

Everybody Invited--Dean Barton and Mr. Litchfield To Speak.

On Thursday evening, November 13, the annual Kommers Dinner will be given in the Union. This dinner is an annual entertainment given by the Tech Show, and is open to the public. The program includes the usual presentation at this time.

The price of the dinner will be the nominal sum of 20 cents. This charge is merely to pay expenses, and the more men that come the better the dinner will be. Mr. Colton always gives the following address after the dinner, and invites the members of the meeting that more than this number be present.

The success of the mass meeting, Saturday night, rests greatly upon both the student body and the Walker Club. The occasion, which burned bright when the general view of the great New Technology was thrown on the screen, coupled with the large crowd which turned out for a late Saturday night meeting, prove beyond a doubt the growth of that spirit which is to be one of the greatest features of this splendid school. Tech's thanks to the Walker Club.

One and only one jarring note was evident at the conviction Saturday. When the music was called upon to sing the Tech songs it was painfully evident that they did not know them. Here lies an excellent opportunity for improvement, and this can be best accomplished by more "All Technology" gatherings.

The unusual success of Field Day, marked by close sportsmanship and the hard, close fight, was another new forward. A Freshman class which can defend their laurels as 1915 did, is certainly to be congratulated, and may be expected to furnish satisfactions to members of the New Institute, where they, as upper classmen, will get the class together and foster

INTERESTING TALK IN HUNTINGTON HALL

Dr. Fleischer delivers fine lecture on the subject "New Virtue.

Yesterday afternoon in Huntington Hall Dr. Charles Fleischer gave a second talk on the relation of religion and everyday life. His subject was "New Virtue," referring particularly to the love of truth. Before the address proper, Dr. Fleischer reviewed the recent elections, expressing his satisfaction that a party which existed merely for its own interest had been defeated in New York City. As on last Sunday, Mr. Hayes sang two of the Tech songs.

In the beginning of his discourse, Dr. Fleischer quoted from Wallace, the Editor of Harvard, to the effect that new religion and the practical application of science foster a love of truth for truth's sake; and that the ultimate result of this search for knowledge will be a great betterment of human conditions. He said that this great moral change was strikingly illustrated in the life of Alfred R. Wallace himself, who wrote out the theory of the "survival of the fittest" at the same time as Darwin; but because Darwin had first proposed the theory, he did not take advantage of this opportunity to immortalize himself. This spirit is prophetic of an era to come, in which the scientific knowledge-seeking attitude will entirely replace the blind traditional attitude of the past. After a few generations of scientists, the "accidents," open-mindedness, impartiality, the intellectual habit, and the love of truth for truth's sake, will give a new type of human being.

Dr. Fleischer's talk was an admirable presentation of the hypothesis advanced by some that science and religion are irreconcilable. The meeting next Sunday promises to be fully as interesting, as an address is to be given by Dr. Stephen Wise.

SOPHOMORE NOMINATIONS

The Sophomore Nominations were opened last Saturday and will close next Saturday at 4 o'clock. The nominations which were returned by the former committee will be accepted. All nominations must be signed by at least ten members of the class. Pay of dues is necessary to allow a member to vote, but is not necessary in signing the nomination papers.

FOUND ARTICLES

The following articles have been found and may be obtained at the office of the Supt. of Bldg. and Power, Trinity Place: 3 Pairs of Gloves, 6 Books, 1 Rain Coat, 2 T Squares, 1 Fountain Pen, 1 Cloth Bag, 2 Leather Bags, 2 Note Books.

Herbert H. Barnes, Proprietor.
ConvoCATION

(Continued from page 1.)

The shape of the buildings was considered of great importance, and the plan of having everything under one roof was finally decided upon because of convenience and low cost of maintenance. The scheme of grouping was worked out from the number of hours spent by the men in the various departments. As an example, he took the upper classes of the Electrical Engineering Course. The men of these classes spend most of their time in the Electrical, Mechanical and Physical laboratories, and for this reason these were placed near each other. The Freshmen general studies and Chemistry were grouped together on the same principle, and so on throughout the whole building. The laboratories, he said, were the parts which would expand most, so these were placed at the rear, in order that they may be easily enlarged as more room is needed. With the growth of the Institute the buildings may grow till they occupy

CONVOCATION

(Continued from page 3.)

twice as much space as those to be
immediately erected.

The New Technology will be a big "tile-city" of limestone and not as is erroneously believed by many, of the忽视 suggesting being due to the offer of the alumnum to furnish all the concrete necessary for construction. The lighting of the rooms was an important factor in the designing of the building and, as planned, will be exceedingly well cared for. The big center part of the structure will be used for administrative purposes and a general library; this one library to include practically all the department libraries of the university.

Next, Mr. Litchfield emphasized this point in the plant to trees in the courts and thus make them appear less stiff and formal. The center of the side on Massachusetts Avenue will be occupied by the Pratt School of Architecture building, to be constructed with the Pratt Fund. This, however, is not yet settled, for, according to the provisions of the will, the sum must reach three quarters of a million dollars.

After his talk, Pres. MacLaurin was given a bouquet of flowers with "three MacLaurins" on the end. V. M. Tillman "74 then led in the singing of "The Good Old Greyhounds." The Student Buildings.

Mr. I. W. Litchfield '85 was the next speaker. He told of the Walker Memorial and the student buildings at the New Site. It began by saying that he knew really nothing at all about the Alumni, but that he had found that no one else did. The architects had been so busy in perfecting the plans that the Alumni, and different ideas were presented. Some of the best of these were published in the special issue of THE TECH last year. Mr. Litchfield said that the Alumni Committee charge of the plans had made an exhaustive study of the best arrangement for dormitories, dining rooms, libraries, billiard rooms, etc. They have decided that the dormitories and the Memorial should be governed by the same plan; that the Memorial should be supported by a tax on the undergraduates and by funds from the Alumni as care to become members. The dormitories are to be of the stair type; that is, they will have the rooms arranged in groups, with no access from one group to another, like houses on a city block.

After the plans had been shown several views were thrown up upon the screen representing student buildings at different colleges in this country. Each committee made a careful study of the best features of the other colleges before making its plans for the New Technology.

In conclusion, Mr. Litchfield declared that the success of the Walker Memorial will depend largely upon the active interest of the undergraduates. It will have new responsibilities at the New Institute and facilities of much greater importance than at present. It must strengthen its relations with the activities and the undergraduates, so that it will be a fit leader for the student body in the years to come.

Athletic Facilities.

After Mr. Litchfield had been given a regular M. J. T. Snow presented Dr. J. Arnold Rockwell '95, the Industrial Medical Adviser, as the third speaker, saying that the speaker will conduct his talk to athletics, as they will be at the New Technology.

In 1896 the Institute Committee founded the Advisory Board on Athletics, which, in the intervening years has gradually evolved a system of athletics suitable to the New Technology. At first the attempt was made to compete with the various leading colleges in the East, but it was soon found that the Institute Committee had been so busy in perfecting the new system that the distance to the field, as at present, for the athletic fields and other purposes to be used as close to the general buildings as could be desired. The conditions attending athletics have been carefully studied. Various plans of gymnasia and athletic fields at some of the leading schools in the country and universities in this country and Canada have been investigated and considered in connection with the plans for the New Institute. Mr. Rockwell gave his analysis of the every possible thing for the best was being done to give the new system just the thing that was suitable for it. The plans, as yet, are only tentative, for most of the time has been spent in the careful study and arrangement of the educational buildings and, the athletic side of the New Institute has not yet reached its consideration.

A large number of slides were then shown, giving the various plans as they have been proposed by the faculty, by different men of the faculty and by some of the students. These plans conveyed an excellent idea to the students of how the gymnasium, the field and the track will probably appear. Half of the total site has been devoted to student life entirely, and the other has been planned for the disposal of athletics. The slides showed the field, with a quarter mile track, including a 220 yards straight-away, and two baseball diamonds. The two diamonds were Majors Briggs' suggestion. Considerable space will be given to tennis courts. One of the plans for the gymnasium building provided for a 12 lap track on the ground floor, for use in inclement weather, with locker rooms and shower baths on one side, and swimming pool on the other. In the center of the oval, a floor for general gym work was provided. The main Building for class gym and drill work was in the second story, with lockers on the Johnson side of the baths, a small lecture room or meeting place, a fencing room, and handball courts on either side.

After Dr. Rockwell concluded he was given a spirited "M. J. T." and some pictures of the writing committee in the Field Day contest, together with those of the Sixth "squads" were thrown on the screen. After the singing of the Stein Song and a enthusiastic clapping of the crowd, the evening was concluded with a "regular M. J. T. with three "Smiths" on the end.
