

THE TECH

VOL. XXXIII. NO. 82.

BOSTON, MASS., FRIDAY, NOVEMBER 21, 1913.

PRICE TWO CENTS

INTERESTING TALK BY REV. MR. WILLIAMS

Conditions Of "The Underworld" Spoken Of By The Speaker.

The Union was practically filled yesterday noon, when the Rev. Mr. A. R. Williams, pastor of Maverick Church, East Boston, began his talk on "Glimpses of the Underworld." Mr. Williams said at the outset that little things out of the ordinary in the world attracted very much attention, and that such things as his topic suggested, aroused unusual interest. It would be his desire he continued, to limit the word "Underworld" more narrowly, and to confine his talk to that part of the underworld which constitutes one of the most difficult problems with which the social workers have to cope, namely, the unemployed.

In his many and varied experiences as news reporter in large cities both here and abroad, and as parson in East Boston during the last few years, Mr. Williams said that he found that the unemployed man was not considered in the right light by the general public. East Boston's former population of more respectable people, and of people of higher social position have gradually deserted the island, and in its place has come a population consisting of the lower classes, mostly laborers. Rather than let the Maverick Church go to ruin, a congregation of these people has been built up, and the pastor said that among these working men are to be found men more honest, more trustworthy, and more fair than many of the average men of the higher classes.

The workingman's uncouth exterior should be forgiven, and there will be found in him a heart which is too fair, too just, and too contented. The trouble is, said the parson, that the laborer is too good-hearted, and does not feel the sense of injustice, and of discontent enough.

Mr. Williams then told of some of his experiences several years ago, when, with a colleague, he went in
(Continued on page 4.)

SOUTHERN CLUB

Meeting In Rogers This Noon.

The meeting of the Technology Southern Club that is to be held in 21 Rogers today will be a short business meeting where the policy of the club for the year will be discussed and the plans for social activity taken up. All the members are urged to attend the meeting and give their ideas on the different matters discussed.

The Southern Club is a recent organization at Technology made up of men from the Southern States and is one which has as its object the development of the social side of Institute life. Last year the club gave a series of very successful dances and will probably continue the idea this year.

CROSS-COUNTRY TEAM LEAVES FOR RACE

Those Not In Freshman Or Varsity Races To Work At Field Tomorrow.

Yesterday evening at 6 o'clock the Varsity Cross-Country Team left for New York via the Fall River Line. The Back Bay station was the scene of an overwhelming ovation by an enthusiastic and sincere crowd of six men.

All the men were in a confident mood and, as Coach Kanaly stepped on the train, he said he had high hopes of the team's showing up well. The men have been working regularly this week and are in the best of trim. With the rest tomorrow, excepting the easy walk over the course, the team should be in the pink of condition by Saturday at 3 o'clock, when the race begins.

For the cross-country men who do not run at Andover today, a squad will be formed at the Field at about 3 o'clock tomorrow. These men will take a rest today, as the work will consist of a rather long road run.

CONCERT TICKETS

On Sale By The Members Of The Clubs.

Tickets are now on sale by the members of the Musical Clubs for the concert on the twenty-eighth of November in which the combined clubs of Technology and Wesleyan take part. Last year Tech did not combine with any other club to give a concert and it is doubtful if there will be any other time this season where they will combine. The concert is to be given in Jordan Hall in the building of the New England Conservatory of Music.

A good, live program has been arranged and the first concert of the year is sure to be a success from a musical standpoint. The combined Technology Clubs will spring an innovation by having one number on the program in which all the men take part. Formerly each club gave selections in turn, and there have been no numbers where everyone took part. In the number to be given, the Glee, Banjo and Mandolin Clubs will work together for the enjoyment of all present.

BOYLSTON STREET CARS

Former Service On Boylston Street In Operation Soon.

It has been announced through the Boston papers that the former car service on Boylston Street will be resumed in the near future, some stating the first of December and other, the tenth of the month as the date. The opening of the car service through Boylston Street has been brought about by the active work of the merchants of the district who claim that their usual Christmas trade will be affected unless former conditions are restored by the first of the month.

FRESHMAN TEAM IN ANDOVER MEET

Cross-Country Run At Andover Today For Freshman Teams.

While the Varsity cross-country men are in New York today looking over the course for the I. C. A. A. A. A. run, the Freshman team from the Institute will be running in the Intercollegiate Freshman Cross-Country Meet at Andover. In the race are teams representing many of the colleges, including Harvard, Dartmouth and other of the larger colleges that have Freshman teams.

Last year Benson of Tech was the individual winner, making considerably faster time than any other man that ran, and finishing nearly a quarter of a mile ahead of the second man in. The remainder of the team, however, did not come up to expectations, as they allowed four or five teams to score ahead of them. This year the team is fairly well balanced with Donnelly, the old Exeter star, as the leader, and Parker and Brock fighting for second place on the team. The rest of the team is comparatively unknown, so it is impossible to tell how they will finish.

The team is to leave the North Station for Andover on the 12.25 train. The men on the team are requested to eat a light lunch before starting. Those who are to take the trip are M. C. Brock, J. J. Donnelly, J. P. Gardner, T. Z. Hairl, W. Harrington, A. C. Litchfield, and D. H. Parker.

A TECH LAMPOON?

Rumor Of The Possibility Of Such Paper.

It has been rumored about the Institute that some of the members of the Senior Class and some of the Faculty are considering the publication of a weekly or monthly. The idea seems to be to have a sort of humorous or comic magazine, something of the style of the Lampon which is published at Harvard. No definite steps have been taken as yet in regard to the actual publication or the actual formation of the staff of the paper, so it is far from being an assured thing.

SOPHOMORE BALLOTS

The Sophomore Class ballots will be due at the Cage next Tuesday afternoon, November 25, at 4 o'clock. No ballot will be accepted after this time. If there are any who have not paid their class dues they may hand in the necessary amount, \$1.50, in an envelope with their name on it, along with the ballot.

As the time for Harvard-Yale game approaches the Harvard men are tending to approach even money as the limit of betting. The odds differ by infinitesimals of the higher order.

CANDIDATES FOR THE TECH MEET THIS NOON

Advantages Of Positions To Be Out- lined—New Policy Adopted.

Freshmen and Sophomores (not to mention the upper classmen) are reminded of the meeting of candidates for THE TECH to be held this noon in the lower office in the Union. The head of each department will be there to explain the nature and details of his branch of work, and each applicant will be made fully acquainted with the general routine of the paper.

The chief benefit conferred by work on the paper, aside from those mentioned in preceding issues, is the number of men with whom it brings one in contact. There is no surer way of increasing one's acquaintance with men worth knowing, and thereby getting into line for various positions of responsibility and honors at the Institute and in after life.

As if THE TECH were not already doing enough for its workers, the policy was adopted at a meeting of the Managing Board yesterday afternoon, of showing them more little attentions and courtesies than heretofore. From now on, every man who makes the staff will be presented with a distinctive pin, the design of which is now under consideration by a committee of the Board. The men will also be given official "shingles" stating the positions they have held on the paper.

Also, the dinners given by THE TECH to the members of its staff will be made a special feature, one being given probably every month. The first one will be something very special, partly to make up for the failure to hold a break-up dinner last term. The financial condition of the paper is encouraging enough to warrant these expenditures.

WEATHER

For Boston and Vicinity: Generally fair, somewhat colder.

CALENDAR

Friday, November 21, 1913.

12.25—Freshmen leave North Station for Andover Race.
1.00—Southern Club.
1.20—Candidates for THE TECH—Lower Office.
2.05—C. E. Trip—Leave Rowe's Wharf.
8.00—Lowell Institute Lecture—Huntington Hall.

Saturday, November 23, 1913.

3.00—Cross-Country—Field.
I. C. A. A. A. Cross-Country Meet at New York.

Harvard and Cornell are the favorites in the I. C. A. A. A. run on Saturday. Tech has a fighting chance for fourth place and hopes to beat out Dartmouth.

A clean-up of Boylston Street sounds good.

Meeting of Candidates for THE TECH 1.30

THE TECH

Entered as second-class matter, Sept. 15, 1911, at the postoffice at Boston, Mass., under the act of Congress of March 3, 1879.

Published daily, except Sunday, during the college year by students of the Massachusetts Institute of Technology.

FRIDAY, NOVEMBER 21, 1913.

In Charge of This Issue:

Editor—C. W. Hawes '16.
Assistants—H. P. Gray '16, A. Pierce '17.

Are you coming to the meeting this noon to learn how the paper is run and to decide whether you want to come out for it? Honestly, we don't know any way a half hour could be better spent. We don't say this just to get men out; we wouldn't any of us be on the paper now if we were not convinced that it is "worth the candle."

How many "human clams" do you see in going to the various classes? I trust you know the type we mean. How long do you think they would stay that way if they should get into an activity and become well acquainted with some real live men?

"But," you say, "my time is all taken up already." Do you know that it is the general experience of men who go out for activities, that they learn to make so much better and more efficient use of their time that they actually have more leisure than before? When you are out of Tech and earning your living, you will have to use your time efficiently or you will be a failure. Why not learn now?

Come to the Union this noon, and follow the crowd.

We regret the necessity for discontinuing Soccer, but we are glad the managers know when they are up against a stone wall. The sport will stand a much better chance in the spring, starting out with a boom, than if it had dragged along half-heartedly during the interim.

We hope all who play the game or are interested in learning it will bear it in mind and arrange to come out in the spring, lest other colleges think that Technology lacks spirit to support a team.

COLLEGE NOTES

The Harvard Crimson has recently compiled a list of the preparatory schools where the Freshman class came from. There are 579 new students, and of these 288 came from public schools and 276 from private schools. Fifteen were either self prepared or had been under the care of private tutors. There are 14 schools that sent more than ten men to enter Harvard as Freshmen. Boston Latin Schools heads the list as it did last year, with a total of 44, while Exeter sent 33. The following is the list of schools with the number of men sent:

Boston Latin	44
Exeter	33
Noble and Greenough	27
Cambridge High and Latin	25
Milton Academy	22
Middlesex	17
Brookline High	16
Newton High	16
Andover	15
Boston English High	14
St. Marks	13
Groton	12
St. Paul's	10
Volkman	10

At Pennsylvania a new system in gym work will be tried out, beginning December 1st. Basketball and track work will excuse a man from the gym classes that men of all classes. Senior as well as Freshman, are obliged to take. Students that are substituting track and field work are required to pass examinations before they can enter the upper classes. A man must pass in two track and one field event or in two field events and one track event.

M. A. H. S. MEN

Mechanic Arts High School men in the Institute are notified that arrangements are under way for the reservation of a section of the grand stand at the Thanksgiving Day game between Mechanic Arts and Dorchester High School football teams. The demand for these tickets by the public are very heavy, due to the excellence of the Mechanics team, and an unprecedented attendance is looked for at the field on Dunbar Avenue in Dorchester. It is desired that the number of men who intend to attend this game this year shall signify their desire by leaving a note at the Cage for M. Paris '14.

GARDNER PALACE

Mrs. John L. Gardner has invited the public to visit Fenway Court next week to view her collection of world-wide famous paintings and magnificent display that is said to be a fair-land of bloom. Excepting Thanksgiving, the court will be open to visitors every day beginning Monday, from 12 to 3. The attendance is limited to 200 daily.

There were exactly six men besides the manager out to see the cross-country team off last night. We say this with shame, knowing that this paper will be read at other colleges. We say it in the hope of arousing some proper remorse on the part of those who ought to have been there. True, the time of leaving was not announced until late—we could not get it in time for yesterday's issue—but the poster was up all day in the Union, where a large part of the students must have seen it. Let us do better next time.

We take pleasure in announcing the election of C. W. Lacy to the position of Advertising Manager, to fill the vacancy left by the resignation of H. I. Knowles.

CIVIL ENGINEERS TO MAKE TRIP TO LYNN

Trip To Be Conducted By Prof.
C. B. Breed—Leave Rowe's
Wharf At 2.05.

This afternoon the C. E. Society will make a trip to Lynn to look over the work in progress toward the abolition of the grade crossings there. The trip will be personally conducted by Prof. C. B. Breed. Professor Breed is Consulting Engineer for the city of Lynn on this work which is one of the most stupendous of its kind. The prominent type of construction used is the covering of structural steel with concrete. Several weeks ago Prof. Breed delivered an illustrated lecture in the Union on this work.

Between twenty and thirty men are planning to take the trip. They will leave Rowe's Wharf on the East Boston ferry at 2.05, and from there will take the train to West Lynn.

LOWELL LECTURE

A large crowd assembled in Huntington Hall last evening to listen to the fourth lecture of the Lowell Institute series by Dr. Alfred Noyes. Dr. Noyes comes from Rottingdean, England, and is the author of "Poems" and "The Enchanted Island". He is presenting a series of lectures on "The Sea in English Poetry." Last evening's study was in Byron and in Coleridge. Dr. Noyes is speaking one lecture in advance of his schedule on account of the shortness of Shelley, which he combined with his last lecture. The next talk will take place Monday evening at 8.00.

CARNEGIE PENSIONS

It was announced early in the week that four hundred and four professors or widows of professors had received pensions during the last fiscal year from the Carnegie Foundation for the Advancement of Teaching. The pensions totalled \$618,000. Thirty-three names were added to the pension list during the year. The endowment fund now amounts to \$15,325,000 and the income annually from this is \$694,000.

FACULTY NOTICE

Monday, November 17th, will be the beginning of the last eight weeks.

Exercises scheduled on the tabular view to be held the last eight weeks will begin during the week of November 17th.

Those scheduled for the last seven weeks will begin during the week of November 24th.

WALTER HUMPHREYS,
Registrar.

FACULTY NOTICE

Problems in Physics Heat 802 are due Dec. 1, 1913, at 9.00 A. M. in 4 Walker. The numbers in the old edition of the problem book were announced in the lecture. The corresponding numbers in the new edition are: 8, 15, 28, 35, 45, 57, 59, 65, (72 and 73), 80, 87, 99, 101, 102, and 104.

**ECONOMICS CLUB
NOW "M. I. T. FORUM"**

**New Name Adopted In Order To
Avoid Confusion With
Department.**

The Economics Club met in a spirited session yesterday afternoon. It was voted, in view of the facts which the President laid before the members, that the name be changed from Economics Club to M. I. T. Forum. The old name, it was pointed out, might cause outsiders or non-members to infer a connection between the Club and the Department of Economics, wholly at variance with facts; and although many of those present felt that the matter should receive still further consideration, the final vote showed that the majority were in favor not only of the name adopted, but of an immediate change as opposed to a delay.

The discussion occupied the greater part of the hour. It was felt by some that the new name ought to be almost exactly indicative of the nature of the organization, and these forced the rest into an outspoken expression of their views. The sentiment of the meeting seemed to be that the purpose of the Club was to interest Institute men, not alone in Socialism, but in all of the larger economic and social questions which would prove engaging to the thought of a broad-minded man. Re-emphasis was laid on the fact that the Club, owing to the unfavorable atmosphere which Tech presented to extended work in cultural subjects, should not attempt to do much on a large scale, but should confine itself to an amount of activity which could be well and efficiently carried on. The name, Forum, was felt to correspond sufficiently closely to the nature of the organization so that no great misinterpretation was likely to arise from the continued use of it and at the same time to be so broad as to afford considerable intellectual leeway in the choice of topics for consideration.

At the close of the business meeting President Kuttner read and commented upon an article which he had clipped from a Boston Transcript of recent date. The article was a review of the recent election results in New York City, with particular reference to the growth of the Socialist vote. It emphasized mainly the facts that the number of "intellectuals" in the Socialist ranks is constantly increasing, and that this increase, as well as that in the total number of Socialist voters, is largely due to the indifference or ignorance of the older parties concerning the economic significance of the Socialist party—an ignorance which loses for those guilty of it the respect of many thoughtful seekers of truth.

The next meeting—of the Forum will probably be addressed by some outside speaker. Several of these are under consideration, and an announcement will be published in THE TECH.

T. C. A. TALK

(Continued from page 1.)

search of a job, ready to do anything in order to find out just what chances the unemployed man had. He told how, at Lynn, the ministers could not or would not help him, how the police refused to offer any assistance unless, perhaps, he threw a brick through a window. He was finally referred to the Salvation Army, and then he told of the wretched conditions under which men are given a night's lodging and food.

The common parasite is not objectionable in itself, but its method of getting a living is the disagreeable feature. So, also, with the parasite of society, as he called the unemployed, the public should find fault not with the man himself, but with his means of getting a living.

Mr. Williams said that it was no wonder that the unemployed man is found frequenting saloons to such a large extent, for, if one should imagine himself in his position, the first thing one would do would be to "make a break" for a saloon, and get some alcoholic stimulant. But it is a wonder, the speaker continued, how the unemployed keeps himself as honest, sober, and as patient as he does under the circumstances. He has little pity for himself, or for his fellow-sufferer. Perseverance is one quality which seems to be predominant in the unemployed, and the man looking for a job persists and keeps at it in spite of all misfortune, where the average man would lose heart and give up.

The minister then told of his adventures in seeking employment in New York City. He tried all employment agencies, many churches, and more individuals, but to no avail. Finally, he found a job in a saloon, in the "Poor Man's Club," where everyone was on the same level, and was given a fair chance. The frequenters of the American saloon, said Mr. Williams, formed one great national organization—the Poor Man's Club,—a social institution which helps them out more than any other agency. It is an atmosphere of fellowship, where one helps the other, and where their own circumstances are discussed and remedies are suggested.

When the question of the unemployed will be solved, said Mr. Williams, a problem which touches a large number of the most vital problems of society will be done away with, and this can be done only by acquiring the ability "to get into the game" and to consider the unemployed and the laborer from the right point of view.

At next Thursday's meeting, the Rev. Mr. Allan A. Stockdale, of the Union Congregational Church of this city, will be the speaker. Mr. Stockdale, who has been a regular T. C. A. speaker, has resigned his position at the Union Church to go West. Next Thursday will, perhaps, be the last time that Tech men will have the opportunity to hear him.
