

THE TECH

VOL. XXXIII. NO. 9

BOSTON, MASS., FRIDAY, APRIL 11, 1913

PRICE TWO CENTS

TECHNIQUE ELECTORAL COM COMPETITION

Assistant Art Editor For Next Year's Edition of Technique.

Technique, 1915, is to hold a competition for Assistant Art Editor. This contest is open to all members of the Sophomore class, from which there are to be two chosen.

Two drawings are to be made: one, a full page heading for "Fraternalities," the drawing to be 9x13 inches, and the second "a Track Team" heading, to be 3x9 inches. Both of these are to be done in black waterproof ink upon four-ply Strathmore Water Color Board. In addition to this a rough color scheme is to be made upon tracing paper for the first drawing.

The committee in charge of the competition wishes it announced that the drawings will be judged: first, the adaptation of the drawing to the subject; second, the line and tone values, and third, the general neatness and appearance.

All drawings are to be handed in to O. R. Freeman, in Room 43 Pierce, before 4.30 on Saturday, April 26. Any who desire further information may obtain it from O. R. Freeman between 2 and 4.30 o'clock on any day but Saturday, in the same room.

C. E. NOMINATIONS.

Offices Now Open to Juniors and Sophomores.

The nominations for the Civil Engineering Society offices are now due, and they are to be left at the Cage (Box No. 1) before Thursday, April 24, at 4 P. M. The nominations must be in writing, and should be signed by at least ten members of the society.

The following officers are to be chosen from the third year class: President, Vice-President, Treasurer, three members of the Executive Committee, and two members of the Program Committee. The officers to be chosen from the second year class are: Secretary, Assistant Treasurer and two members of the Program Committee. It is hoped that a good list of nominations will be received, and the men are requested to start the nomination papers now while there is sufficient time.

ST. ANDREW'S SERVICE.

The date for the Corporate Communion Service of the Technology Chapter of the Brotherhood of St. Andrew has been changed to Sunday, April 13, at 8 A. M., at Trinity Church. This date has been selected since the third Sunday in the month is rather inconvenient for Tech men. All Episcopalian students at the Institute are heartily invited to join the Brotherhood men at this service.

INSTITUTE COMMITTEE.

A special meeting of the Institute Committee is to be held in Room 8, Eng. C, at 4.15 today. All of the members of the committee are requested to be present. This meeting is very important, as it is called to consider some vital matters connected with Tech Show.

The Union looks like a fair with all the tables and signs of the various activities.

SHOW TO START FOR NORTHAMPTON TODAY

"Tech Show Special" Leaves at 3.15 From Trinity Place Station.

The whole Tech Show cast starts on its Northampton trip this afternoon. The management wants all to be at the Trinity Place Station by 3.10, as the train leaves promptly at 3.15. This is the "Tech Show Special," and is the train everybody is going to take. Large "Tech Show" banners have been provided with which to decorate the sides of the cars. Anyone who misses this train is expected to take the next one and get to Northampton as soon as possible.

SOPH TRACK LEADERS.

Curtis to Captain Team, Thomas Appointed Manager.

A. B. Curtis was appointed captain of the Sophomore track team by the class Governing Board at its meeting yesterday. W. S. Thomas was appointed manager of the team. Curtis has been a member of the class relay team for the past two years a member of the Varsity track team last Spring, and ran on the mile relay team during the recent indoor season. Thomas is at present Assistant Manager of the Varsity team, and was a member of the class relay team this year.

The members of the Governing Board decided that radical action must be taken to create enthusiasm for the coming Freshman-Sophomore meet.

WRESTLING MEET.

Novices Will Grapple Tonight in Gym—Many Good Bouts.

The big event to be held this evening in Boston is the Novice Wrestling Meet in the Gym at 8 o'clock. The list of entries, although not very large, is composed of the best wrestlers in the Institute who have not competed in Varsity meets. Many of the men have been practicing hard under the instruction of Mr. Gracey and members of the Varsity team. In the 145-pound class there is sure to be a hot contest.

The Japanese wrestling will also be an exciting feature, and will be sure to furnish much amusement. Any member of the audience will be allowed to enter these bouts, and it is rumored that several private disputes will be settled in this gentle manner.

In classes in which three or more men are entered there will be preliminary rounds. The men to go on in the preliminaries will be picked by tossing a coin. The men to enter the semi-finals will be selected in the same manner, if necessary. Ribbons will be given to the victors in the various classes.

The management hopes that a large crowd will turn out to watch the meet, in order that the competitors will not have to be assessed to pay the expenses. The tickets are 25 cents, and may be obtained at the Cage or from members of the Freshman wrestling class.

A large crowd will undoubtedly be at the Freshman-Sophomore meet Saturday. The admission is free.

LARGE ATTENDANCE AT T. C. A. MEETING

Rev. Nicholas Van der Pyl Gave Interesting Talk on Labor Conditions.

In spite of the fact that the weather outside was ideal and that this was the opening day of big league baseball in this city, an unusually large crowd was present in the Union yesterday noon to hear the Rev. Nicholas Van der Pyl speak on some of the phases of the present industrial problems.

He began with the statement that the world is at the present moment passing through one of the most critical periods in its entire history. The strife between capital and labor, the so-called social unrest is at the bottom of the trouble, and this is the problem that will have to be solved. It may mean a change of the political situation of the world and perhaps civil wars, whatever the result the syndicalistic movement will have to be dealt with.

This movement, so common in Europe, is new to the United States, especially New England. The West and Southwestern part of this country has had its experience with the I. W. W., which is the form in which it has asserted itself here. Last winter New England got its first experience with the I. W. W. in that epoch making strike at Lawrence. This episode will go down in history as the first sign of real social unrest in New England.

The entire problem centers about the question of low wages. The laborers are underpaid and unskilled, and as was found by an investigating committee, 27,000 men having families to support were paid wages that averaged only \$8.76 per week. Chapin, a noted student of economic conditions, stated that in order for a man and woman to live an economic existence it is necessary for them to have \$9 a week, and \$3 more is necessary for each minor child. This is far more than the ordinary unskilled laborer gets, and this raises a difficulty. It is a noteworthy fact that the poorer the family the more children there are likely to be in it. It is therefore the duty of the State to help bring up these children, for they are born with the same inalienable rights that are given to all.

One of the greatest difficulties that arises in dealing with this problem is the difficulty that American citizens find in taking the point of view of the labor agitator. Most of the labor outbreaks are among the aliens, men of different nationality, unable to speak English and unacquainted with the ethics and ideals of the English race. (Continued to Page 3, Col. 1.)

E. E. SOCIETY.

The Electrical Engineering Society has passed out nomination blanks for next year's officers. These nominations must be signed by at least five active members and handed in at the "Cage" not later than Tuesday, April 15th, at 5 P. M. The officers to be elected are president, vice-president, secretary and treasurer.

The term "active members" is to be construed as "paid up members." Those who have not paid up may enclose dues with nominations or see W. A. Ready, '13; G. R. Pardey, '13; F. C. Weiss, '13; H. B. Richmond, '14; H. A. Affel, '14; C. E. Hadley, '14.

ASSESSMENTS FOR SENIOR CLASS DAY

Copley Square Hotel Chosen For Class Dinner—Dance at Somerset.

At a meeting of the Senior Class Day Committee, held yesterday afternoon, several important matters were discussed, among which were the amount of a Class Day assessment and the choice of dates and places for the dinner and dance.

The Class Day assessment, which is to be six dollars, will pay for the class dinner, the engraved programs and the dance. Each man will be allowed to bring two guests, both of which may be ladies, to the dance. The Copley Square Hotel has been once more selected for the Senior dinner. This hotel was the scene of the dinner of the Class of 1912, and from the expressions of satisfaction which have been made by the members of that class the committee feels the selection to be a good one. A similar selection was made in the choice of the hall for the class dance, which is to be at the Somerset.

COURSE IV SMOKER.

Prominent Chicago Architect to Give Talk This Evening.

This evening, at 8 o'clock, the Architectural Society will hold a meeting and smoker in the rooms of the department on the fourth floor of Pierce. They have secured Mr. Irving K. Pond, a prominent architect of this country, as speaker, and although the subject of his talk has not yet been announced it will be sure to interest all the Course IV men. There will also be the usual plentiful supply of refreshments and a general good time is promised those who attend. Tickets may be obtained from the officers for 35 cents apiece.

Mr. Pond is a member of the architectural firm of Pond & Pond, Chicago, and last year was the President of the American Institute of Architects—an honor bestowed only on the foremost architects.

As he is in the East only on a short business trip the society is very fortunate in being able to secure him and the officers wish all the members to attend.

Thursday marked the beginning of big league baseball. The World's Champs met the White Elephants. A really scientific game, however, will be that between THE TECH and Technique. All the science will be exhibited, it is needless to say, by THE TECH team.

The Freshman gymnasts are some contortionists. Rooney asked them the other day to come to a sitting position on the stomach.

The weather is so poor the night editor refused to run it.

CALENDAR.

Friday, April 11, 1913.

4.15—Crew Practice, B. A. A. Boat House.

4.15—Mandolin Club Rehearsal.

Saturday, April 12, 1913.

2.30—Freshman—Sophomore Track Meet, Field.

7.00—Freshman Dinner, Union.

FRIDAY, APRIL 11, 1913

We have been criticizing and "roasting" in this column for a week, and by way of variety, behold, O readers, a little "let up" in the form of praise. Not mere flattery but deep-seated and deserved praise.

The Technique, 1914, Board is the first that has ever sold its complete edition before the "rush," and its edition is the largest that the book has ever had. There are not three men in the Institute who haven't been asked to "sign up," and the committee has been in evidence everywhere, proclaiming the merits of their great book. That is the sort of work that counts and the result is the certain financial success of this year's Technique.

Yesterday's news article regarding the plans for the "rush" told of the band which has been engaged and the change made in the regulations of the event, both of which will make the contest more interesting for the participants and more spectacular for the onlookers. The "rush" is an ancient and honorable tradition, but it needed revising and the committee did it at the right time.

When a spirit of hard work is combined with the progressive spirit the result is inevitable, and we believe that Technique, 1914, will be up to the expectations of the most critical.

Owing to a mistake in the makeup of yesterday's paper the communication concerning a telephone bulletin in the Union, which received editorial comment, was omitted. We repeat the editorial and print the communication in today's issue.

A SUGGESTION.

The communication in this issue of THE TECH concerning a telephone bulletin in the Union offers a very good suggestion to the Union Committee. The Union ought to be and is the headquarters of Institute men, especially those who live at too great a distance from the Institute to be able to go home at noon or during free hours. The suggested bulletin will be a convenience to these men, and it will, therefore, be an asset to the efficiency of the Union.

LYNN STUDENTS HOLD IMPORTANT MEETING

Provisional Constitution For New High School Club Discussed.

Yesterday afternoon, at 1.30, the Tech students who are residents of Lynn and its suburbs, held their second meeting in 22 Rogers. The gathering was presided over by C. L. Cowles, the chairman of the committee on the constitution. The provisional draft of the constitution was discussed and a few changes were made.

The meeting opened with a discussion as to just which of the many towns around Lynn should be considered to be suburbs. It was finally decided that the name of the organization should be "The Greater Lynn Club," and that the residents of Lynn, Swampscott, Nahant, Saugus and Lynnfield would be eligible for membership. The sections of the constitution were taken up severally, a few changes being made here and there, but on the whole the original draft met with the approval of all present.

Owing to the limited amount of time the meeting had to adjourn before the whole constitution had been accepted, but a meeting will be held in the near future to adopt the constitution and to elect permanent officers.

COMMUNICATION.

To the Editor of THE TECH:

There has apparently been a misunderstanding. The Track management has no representative on the Institute Committee, as one might be led to believe from the communication signed "Knocker," in yesterday's issue of THE TECH.

A statement was also made in the same communication that the advertising of Field Day was left to the leaders of the two lower classes. It was of vital importance for these men to get their own classes interested, but it was the work of the Track management to get the Institute interested. To do this posters were placed on every important bulletin board two weeks ahead of the meet; Field Day was mentioned in every large lecture during the week; President MacLaurin mentioned it in the largest convocation of the year; THE TECH was kept informed of the work of all the teams, and tickets for the grandstand and bleachers were on sale every day for over a week in the Union.

As to the Brown-Tech dual track meet of last Spring, posters were on the bulletin boards two weeks before the meet, every day THE TECH was given news in regard to the work of the men and tickets were on sale for a week in full view of everybody in the Union, a statement to this effect having been placed in THE TECH, and on the bulletin boards. Only ten tickets were sold. Was this the fault of the management?

The management was very glad to receive suggestions and will give them careful consideration, but gross misrepresentation of facts is uncalled for.
James M. White,
Mgr. Track Team.

CREW PRACTICE.

Yesterday afternoon the crew candidates took two trips, one in the four-oared shell and the other in the eight-oared boat. Many candidates were out, but only a part of them were able to row. On the trip with the four-oared shell the make-up of the crew was: Pierce bow; Haggkvist, 2; Robertson, 3; Wellington, stroke; Macey, coxswain. In the larger shell the men were seated as follows: McRea, bow; Wellington, 2; Robertson, 3; Haggkvist, 4; Gere, 5; Jewett, 6; Marton, 7; Berkowitz, stroke; Macey, coxswain.

APPLICATIONS FOR SCHOLARSHIPS DUE

Solicitations to Be Honored Must Be Filed Today at Office.

Today is positively the last opportunity for candidates for a scholarship for the ensuing year (except a State scholarship), to hand in their application blanks at the Registrar's office. With the name, state the class, course and all free hours available for consultation. Each applicant will be notified by mail of the date selected for consultation.

Those who desire State scholarships are required by the State Board of Education to fill out blanks, which are furnished at the State House, before the first day of July. While the State Board of Education has full control of the award of its scholarships, it is advisable for all students intending to apply for these to notify the Registrar to that effect and to have their standing endorsed.

T. C. A. TALK.

(Continued from Page 1.)

In this respect labor troubles in Europe differ from those in this country, for in the former the strikers have the sympathy of the general public and their 'ot is not a bad one.

One of the saddest facts connected with the subject of the low wage is that the unskilled laborer is in most cases only worth what he gets, and it would be business suicide for the manufacturer to raise their wages. The labor union leaders are ever contending for more pay and shorter hours without looking ahead very much, but the I. W. W. leader is far more far-seeing, for with all his anarchistic methods of procedure he is socialistic in his final thoughts.

These laborers who are inefficient economically have great possibilities, and this is evidenced by the phenomenal success of the second generation, for in many cases they are making up the better class of today.

To come down to possible remedies to relieve the situation, it must be evident that it is a human problem after all, and the only way to solve it is to deal with the individual. The first thing that is needed is an educational cleaning out process, which will take much time. It is the especial function of this country to lead the world in this change for the better and the ideal, a thing which causes the entire civilized world to focus its eyes on the United States in order to see what we are going to do with the solution of the labor problem.

COMMUNICATION:

To the Editor of THE TECH:

Dear Sir:—A short time ago I was caused a great inconvenience, due to the following circumstances: A certain party, desirous of reaching me at the Institute by phone, left an important message for me at the "Cage." As I was not expecting the same, I did not call at the "Cage" and, accordingly, never received it. This, as I stated above, caused me no little inconvenience, and I do not doubt that other fellows have been in a similar "fix." So I beg to suggest a little remedy which I think would tend to reduce further trouble in this respect. Could not the Union Committee post a small bulletin board in a conspicuous position in the vestibule by the "Cage" and place upon it, under the heading:

"Phone Message at Cage For" the names of any persons who chance to receive telephone messages in this way? I trust the committee will make such arrangements shortly, for I am confident that many fellows would thereby be benefited from time to time. I shall be grateful if you will favor this communication with space in THE TECH.

Very truly yours,
H. W. L., '15.

SOPHOMORES TO PLAY FIRST GAME SATURDAY

Opens Season at Allen School —Line-Up of Team Decided.

The Sophomores will play their first scheduled game on Saturday, when they meet the strong Allen School team at Newton. The team has had two hard practices this week and is right on edge for the game. For the past three weeks its work has been mainly practice in fielding and batting, with a short game with the second team. The fellows have been keyed up by these games and feel confident that they have a good chance of being the victors on Saturday. Sears and Delano seem to be the best of the candidates for pitcher. Although Captain Caffrey thinks there is but little choice between the two men, he intends at present to start off with Sears. Langdon, one of the promising men who have come out recently, will probably be given a chance to show the quality of his work at this time. H. J. Murphy, who has shown up well in practice, will doubtless have an opportunity to get into the game.

The following is the probable line-up and batting order: Thomas, r.f.; Franks, 3 b.; Morse, l.f.; Caffrey, s.s.; Bauer, 1 b.; McIntyre, c.f.; Place, 2 b.; Hall, c. and Sears, p.

THE TECH TEAM PICKED.

Mgr. Workofhits Predicts Easy Victory Over Technique

(By A. Mutt. Special Correspondent for THE TECH.)

Nusite, Georgia.—During the warm weather of the past week Manager Workofhits has been putting THE TECH all-star aggregation through strenuous practice in preparation for the opening game of the season with technique.

The pitchers are now rounding into fine shape under the able tutelage of Mike-Patrick Rogers. At present the mainstay in the box is Minevitch, a young southpaw recently imported from the wilds of the Public Gardens. This youngster has all kinds of speed and curves, and has all THE TECH batters guessing. It is said by reliable authorities that he puts such a curve on the ball that it goes around the batter, to the keg on third, and returns to the box unaided. It is not expected, however, that he will have to be used the entire game, and Manager Workofhits intends to send in several other promising men, so as to give them a chance to win a T T (which will be awarded to each member of the team who participates in the game with technique). "Cambridge" Allen and Sneezzer are the best of these men.

The infield has already been picked for the big game. "Legs" Feet will hold down the initial sack, with "Montana Mike" Heller as a substitute. In case Heller plays, his position as water-boy will be taken by "Haw" Hawes, the society swell. "Gray" Hound is slated for second base, with Hans Schabacker, the Irish comedian, playing short. Third base was a much desired position, for self-evident reasons, but after considering the matter fully Manager Workofhits decided that "Ox plus" Carr was the safest man for the position.

The outfield is composed of "T. C. A." Jewett, "All C's" Millis, "Tuffy" Burkhart and "Always-on-the-job" Wyman.

"Sammie" and George, the bat boys will join the team at Back Bay station on the return trip. They are reported to be in the pink of condition.

The first consignment of the newly invented ball has not yet arrived, but is expected soon. This ball has been adopted by both the American and the National Leagues, and "Legs" Feet is receiving an enormous royalty for his discovery.
