

THE TECH

VIL. XXXIII. NO. 93.

BOSTON, MASS., FRIDAY, DECEMBER 5, 1913.

PRICE TWO CENTS

LARGE CROWD HEARS REV. STOCKDALE

Speaker Gives His Impressions Of "The Inside Of The Cup," Very Clearly.

One of the largest crowds of the year met in the Union yesterday noon to hear Rev. A. A. Stockdale give his interpretation and impressions of Winston Churchill's recent book, "The Inside of the Cup." This book is a criticism of the ministry and of the churches of today; but unlike other criticisms of religious movements it is both constructive and revolutionary.

Mr. Stockdale expressed his opinion that the author had the help of someone more directly connected with the clergy in writing the books; that the ideas expressed were those of a man who understood the situation. He said that it was a timely book—written under pressure of the times and the spirit of the day. The conditions in this country are such as would produce a book of this kind, as well as increase the feelings therein expressed.

"No harm can come of such criticism," said the speaker. "It has long been the tendency to take religion and churches as they are without a thought of their possible improvement. We have had plenty criticisms of business methods, of scientific movements, and of social relations; but heretofore we have had no real criticism of churches, of ministers, and of religion as a progressive movement.

The people are accustomed to inherit religious beliefs and set them down as, final; and what is worse, they resent any innovation. But religion is open to criticism as much as any progressive movement. The preachers themselves who resent this criticism are not living up to the ideals already set. The minister should not be afraid of criticism, but should welcome it.

Speaking of "The Inside of the Cup," Mr. Stockdale expressed his opinion of the literary merit of the work. It is, he said, with few exceptions, very well written. The addition of the last chapter dealing with divorce is rather out of place. It seems as if the author had been prompted to put it there because he thought it necessary and still could not find room for it anywhere else. It not only spoils the effect of the work, but produces a sort of anticlimax. The book renders a very

(Continued on page 3.)

WRESTLING AT BROWN

Brown University is, for the first time to have a Varsity wrestling team. Heretofore wrestling has been confined to interclass meets with an occasional intercollegiate contest, but the wrestling team has never had a definite schedule.

The call for candidates was issued last Monday, and about twenty reported for practice. Next week the men will be pitted against each other according to their weights, and training will begin in earnest. It is probable that a match will be obtained with M. I. T.

WINTER CONCERT OF COMBINED MUSICAL CLUBS

Preliminary Dance Orders Now Ready—Tickets Selling Rapidly.

The advance dance orders for the Winter Concert of the Combined Musical Clubs are now out and may be had at the Cage. There are twenty numbers as follows:—

1. T. S.—Peg o' My Heart.
 2. W.—Daddy Has a Sweetheart.
 3. T. S.—Marriette.
 4. W.—Dream Girl.
 5. T. S.—Mammy Jinny's Jubilee.
 6. T. S.—Little Girl at Home.
 7. T. S.—International Rag.
 8. W.—Nights of Gladness.
 9. T. S.—Get Out and Get Under.
 10. W.—Venus Waltz.
- Intermission.
11. T. S.—Chesapeake Bay.
 12. W.—Sympathy.
 13. T. S.—Somebody's Coming to My House.
 14. S.—I Never Heard of Anybody Dying from Kissing.
 15. T. S.—Junk Man Rag.
 16. W.—Princess of Far Away.
 17. T. S.—Tres Moutarde.
 18. W.—Dreaming.
 19. T. S.—Honeymoon Lane.
 20. W.—Blue Danube.

The advance sale of tickets is now going on and they may be secured from any one of the members of the Combined Clubs.

These can be exchanged next Tuesday for reserved seats. There is only a limited number of tickets and they are going fast at a dollar and a half apiece.

MEETING OF CERCLE

French Club Will Elect Officers This Evening.

The Cercle Francaise is to hold its first meeting of the present term this evening at 8 o'clock in Room A of the Union, for the purpose of electing officers for the ensuing year. A proposal to change the object of the society will also probably be acted upon, and for these reasons all active members are urged to attend.

A cordial invitation to the meeting is also extended to all those in the Institute who are interested in the Cercle and desire membership in it.

EDITORIALS DUE

The next editorials submitted in the Pi Delta Epsilon contest are due today, and must be on the subject "Christmas for Tech Men." So far, not many suitable articles have been received for the contest, and it is desired that some new men try their ability this time.

HARVARD SOCCER OVER

Harvard has discontinued fall soccer practice and cancelled the last game because the call for candidates for hockey has drawn so many of the soccer men into the winter sport.

New York University has added courses in journalism and medicine to its curriculum.

FORTY-TWO LYRICS IN FOR 1914 TECH SHOW

Some Numbers Still Open For Competition—All Are Due Next Tuesday.

Forty-two lyrics were handed in at the Tech Show Lyric Competition, held yesterday afternoon. More lyrics are desired for the following numbers, as none of those handed in were entirely acceptable:—

Good Bye to Dear Old Rahton.
Every Little Burg Has Its Gay White Way.
I Hate to Blow About Myself.
Meet Me at Four at Huyler's.
I've Been Looking for a Job.
Royal Family Tree.
You Can't Get Away With It.
There's More Than One Way to Paint a Face.

No lyrics were received for the last number, although it was thought that it offered excellent opportunities for a good song.

The Stage Manager wishes to meet the following men in the Show Office, at five o'clock today, to offer them suggestions for revising some of their lyrics: F. A. County, P. L. Small, and a man who signs himself W. G. A.

The competition will be finally closed next Tuesday at four o'clock and all lyrics will be sent to Coach Sanger, who will make the final choice

MINING GIFTS

Several New Pieces Donated To Mining Laboratories.

There have been several recent additions to the equipment of the metallurgical laboratories. Allen H. Rogers '90 has contributed a laboratory unit of the Hyde Flotation apparatus and the Huff Separator Co. have loaned an Elmore laboratory flotation outfit, so that the Institute is well equipped for testing ores by the new and rapidly growing methods of flotation. Professor Richards has presented a hindered settling, open-spigot classifier; H. B. Curtis, a classifier, and Sturtevant laboratory crusher with accessories; and the Power and Mining Machinery Co., a laboratory McCully breaker. These items will be stored till the new laboratories are ready. The department is about to install a Halberger electric furnace with a capacity of eight pounds of copper.

PROF. HOFMAN'S TREATISE

Professor Hofman's new treatise on General Metallurgy is to be translated into German, while the manuscript on his new treatise on the Metallurgy of Copper goes to the publishers this month.

FRESHMEN HOCKEY

Freshmen who are substituting hockey for Gym work should see Mr. Kanaly as soon as possible to find out if any cuts have been registered against them. If there are any they should be fixed up.

LIVE TALK AT C. E. SOCIETY SMOKER

Mr. Rourke To Attentive Crowd And Outlined Work Of His Department.

The meeting of the Civil Engineering Society held in the Union last night was very interesting and instructive to the fifty men who came out. The speaker of the evening was Mr. L. K. Rourke, Superintendent of Public Work for the City of Boston, and a Tech man of the class of 1895. He spoke on the work in his department of the City and told of the present organization of the department and its operation.

In June, 1910, Mr. Rourke was called from Panama to be Superintendent of Streets for the City of Boston. When he came, the engineering work of the city was in charge of three departments whose heads were political appointees, and a City Engineer who acted only in an advisory capacity to them. Soon after Mr. Rourke went into the Street Department, he saw an opportunity to help reorganize the city's engineering works. Under the new scheme, the office of Superintendent of Public Works was created with Mr. Rourke as the first superintendent. His department was directly responsible for all engineering work undertaken in the city.

He has divided his department into three divisions. One is in charge of all underground construction, except subways; one has charge of street work and above-ground construction; the third has supervision over bridges and ferries. He has for the heads of these divisions engineers of experience in the lines they have to take care of. He himself is appointed and removable by the Mayor, but every man under him is a civil service man. This adds to the efficiency of the men, as their whole energies can be directed to the work in hand rather than to the jobs they hold.

His department spent \$7,300,000 last year in new construction and maintenance work. Yearly street work is paid for out of the year's tax levy, but permanent structures, as bridges, are bonded improvements.

He advised Tech men not to start into municipal service at first as the limited hours of work tend to get a man in a rut and to keep him from doing all the work he is capable of and thus improving. Some men it

Nominations

Nominations for the Senior Portfolio Committee may be handed in any time between now and next Thursday. While this is an exceedingly important election, it is not one which appeals to popular enthusiasm and it has sometimes lacked the careful attention from the body of the class which is necessary to secure good results.

Seniors that know anyone who would make a faithful and efficient member of this committee should get busy and nominate him. If you leave it to someone else, you are letting your class be run by a small minority—namely, those who do nominate their candidates,—thus forfeiting true representative government.

A representative from the Walker Club dropped into the office the other noon to consult our calendar, in order that, in arranging a date for his Club, he might not conflict with some other activity. THE TECH will be glad to help activities in this manner until the Calendar Committee becomes able to take care of its own affairs, for some such arrangement is imperative. We think, however, that the Committee should act as quickly as possible, for it is always better for work to be done by persons who can make a specialty of it.

Efficiency should, so far as possible, be the watchword about the Institute. Such is not the case at the baths behind the Engineering buildings. A man going from the Union to Lowell is treated to a shower which is, we doubt not, of unusual excellence; but its excellence is completely masked by the lack of the little things which we are accustomed to regard as necessary to the proper enjoyment of the bath.

Better provision for dressing-rooms and an improved towel service would

WALKER MEMORIAL COMMITTEE MEETS

Undergraduate Committee Takes Up Consideration of Proposed Student Building.

The undergraduate Walker Memorial Committee held its first meeting of the year last night at the Union. The committee as recently elected by the Institute Committee, is composed of C. E. Fox '14, E. C. Taylor '14, L. W. Snow '14, E. B. Goodell '15, P. M. Werlich '15 and H. P. Sabin '15, and met yesterday to become familiar with its duties and outline its work.

In 1912 Pres. MacLaurin appointed a committee from the faculty, consisting of Dr. Tyler, chairman; Drs. Noyes and Rockwell and Dean Burton, for the purpose of investigating the needs of the Institute student body for such a building as the Walker Memorial. This committee completed its report and submitted it to the president about a month ago. The report has been published in substance in the Technology Review and elsewhere.

The faculty committee decided during its investigations that it would be advisable to have the counsel of an undergraduate committee. Acting accordingly, last year's Institute Committee appointed men to serve on such a committee, to which the present committee is a successor.

At the meeting yesterday C. E. Fox was elected chairman and H. P. Sabin secretary. The principal duties of the committee will be to go over the plans which the faculty has submitted for the proposed Walker Memorial Building, approving them or suggesting changes and improvements. The nature of the committee's criticisms will be the determination of the allotment of space to the different student organizations, and in the event of expansion to foresee the demands which may be presented by societies as yet unformed.

The committee will take its work more definitely under consideration in the near future, and Secretary Sabin will notify the members of the date of the next meeting.

TECHNIQUE

Call For Candidates Meets Little Response.

Yesterday the office of Technique 1915 was open to receive candidates for the position of Assistant Business Manager. The small number of men who have reported is scarcely creditable to the Junior Class. Technique 1915 is wholly a class affair, and as such should be supported by the whole class. The quality of Technique is considered by outsiders as representative of the worth of the class. Business Manager George Urquhart announces that he will be pleased to meet any additional candidates in the Technique office any day at 5.00 P. M.

PORTFOLIO COMMITTEE

Nomination for the Senior Portfolio Committee opened yesterday, and so far one nomination has been received at the Cage. The nominations close next Thursday.

The question of whether or not the Portfolio is to be incorporated with Technique will be decided by the class, after the five men who compose the Portfolio Committee have been chosen.

do much to make the bath more enjoyable and probably more widely patronized. Lack of these little comforts at the present time is a source no little annoyance.

ENGINEERING AND SCIENTIFIC NOTES

In a paper entitled "The Art of Enameling" which was read before the American Society of Mechanical Engineers by Mr. R. F. Nailler, an interesting discussion of the processes of coating steel and iron with glass. The author defines an enamel as "a glass fusible at low temperatures and usually compounded of borates and silicates. This mixture, originally colorless, combines with greatest ease with metallic oxides under the influence of pyrotechnic operations thereby acquiring various colors according to the nature of the oxide." Those interested are referred to the Scientific American Supplement for Nov. 29, 1913, where the paper is printed in full.

T. C. A. TALK

(Continued from page 1.)

great service to literature, however, in giving us a new type of preacher who is merely a filler. "The Inside of the Cup" gives us a type of strong manhood worthy of his position. It presents a man who knows the magnitude of the problems that lie before him, and who is not afraid of them.

The speaker then contrasted the well known book by Wright, "The Calling of Dan Mathews" with Winston Churchill's book. The effect was obvious: the book deals with a man who became acquainted with the problems of the ministry, who obtained a good working knowledge of conditions, and who, then, turned his back on all of it and sneaked out to later become identified with the mining profession where he could make more money. The opposite conditions are depicted in "The Inside of the Cup." The conditions are recognized and then met.

Rev. Mr. Stockdale then protested against those churches now in existence claiming exclusiveness and wealth. He said that a church having riches ought to be the most inclusive of all. Those churches closed to the parishioners ought to be opened wide. They ought to be made to serve the needs of the community, and in so far as they do not accomplish this they are failures.

In closing, Mr. Stockdale spoke of the difference between being a spectator at an operation and being one of the helpers. He said that while a person can aid in an operation, for instance, he cannot stand, in most cases, to be merely an observer. The sight is too painful for him and usually he succumbs to it sooner or later. But the man who enters into the activity of reform, who really participates in it, does not experience any discomfort. "The healing of the broken bone," he said, "is not nearly so important as the healing of the broken soul." It is with this in view that the revolutionary book, "The Inside of the Cup" was written.

C. E. SMOKER

(Continued from page 1.)

does not effect this way, but most men it does. He also states that so many engineers fail to make good because they do not realize the value of the executive ability a construction engineer needs.

At the conclusion of his talk the meeting was opened for any questions the men wanted to ask him, and some of them took advantage of the opportunity. A trip to the factory of the Breger Instrument Company was announced for next Friday, details of which will be announced later.

**MINING COURSE
ATTRACTS RUSSIANS**

Students Have Had Active Work In Mines In The Ural Mountains.

Among the registrations this year at the Institute are two Russians who are already experienced in mining and Metallurgy. As graduates of Russian institutions they have been sent here by the Russian government to get the advanced methods of ore-dressing and mining specialties as taught in the Institute.

The young men are Nicholas S. Penn and Michael T. Ortin. The latter is a graduate of the Polytechnic Institute of Tomak, Siberia, and has a few years of practical experience behind him. Mr. Penn is a graduate of the Technological Institute at St. Petersburg, and for several years has had practical work in the Ural Mountains. There he became acquainted with a Tech man, Frederick W. Draper '95, who influenced him a great deal in coming to M. I. T.

It is interesting to note how America is advancing as an engineering center. In former years all the foremost engineers finished their education at some European institution. But now the European countries are recognizing the more advanced institutions of America and are sending their students here to learn the up-to-date methods of engineering. M. I. T. is doubtless foremost in these American institutions, and all nations are sending their students here thus showing that Tech has in its Faculty perhaps the best experts in engineering in the world.

1917 BASKETBALL

Plans Completed For New Hampshire Trip In February.

The 1917 Basketball Team will have the distinction of being the first class team to go on a long trip. On Saturday, February 21, the team will leave for Hanover, N. H., where they will play the Dartmouth Freshmen that evening. On Monday evening, which will be celebrated as Washington's Birthday, the team will play Colby Academy at New London, N. H. Both of these teams are known to be strong aggregations, but nevertheless the Freshmen expect to bring back a double victory despite the fact that they were defeated in their last game with North Abington Y. M. C. A. North Abington is considered one of the strongest teams in the state, and the Freshman team was handicapped by illness of some of its members. At present the Freshmen have lost one game and won one.

FACULTY NOTICE

Professor Bates will be out of town on Saturday, December 6, and unable to meet his class in XVIII Century Literature.

**FINANCE COMMITTEE
HOLDS MEETING**

Mr. Green Talks To Members On Methods Of Auditing And Book-keeping.

A meeting of the Institute Finance Committee was held at 5 o'clock yesterday in the Tech Show Office. This committee consists of the Treasurers of the various Institute activities, and its purpose in general is to keep in touch with the methods of accounting and auditing which are used by the different activities.

E. E. Dawson acted as chairman of the committee and outlined briefly the methods of auditing and accounting which have been used in the past. Mr. Green, a representative of one of Boston's banks, and auditor of last year's Tech Show, explained in extreme detail a method of book-keeping and auditing. This method as described is to be used by the business management of this year's Show.

NEW HOCKEY DATES

Manager Goodell has now definitely announced that the hockey game that was to have been played with the Tufts team tomorrow evening as stated in the Boston papers has been postponed to Friday evening, December 12. The game with Harvard as announced for December 13 has also been changed so as to obviate the conflict with the Junior Class dinner. The new date for the Harvard game is Friday evening, December 19.

COLLEGE NEWS

Cornell trimmed Penn for the first time in twelve years.

Yale will have but five of her regulars back next fall. Princeton and Harvard will have nine and eight respectively.

There are seventy candidates out for Freshman basketball at Penn

The faculty of Ohio State unanimously voted to do away with the custom of addressing them by their official titles. Students will now say "Mister" instead of "Professor."

Harvard and Washington and Jefferson were the only big teams who finished without a defeat this season. Harvard scored 225 points against 21 of its opponents. W. and J. scored 347 and held its opponents down to 13.
