

THE TECH

VOL. XXXIII. NO. 96.

BOSTON, MASS., TUESDAY, DECEMBER 9, 1913.

PRICE TWO CENTS

TWO TRIPS THIS WEEK FOR THE ELECTRICALS

Mid-Year Trip Arranged With The Assistance Of Faculty Members.

Two trips to the plant of the General Electric Company are planned by the Electrical Engineering Society for the present week: one for Wednesday and one for Friday afternoon. Because of the great length of time required to reach Lynn from this city it will be necessary for the men who go to leave early, and arrangements have been made for a start at 1.25 sharp in the afternoon. The sign-up sheet is posted on the Society's bulletin board in Lowell. The parties will assemble in the Electrical Library in Lowell. As the mid-year trip is not to include Schenectady, the officers feel that it is important for all men who wish to see a General Electric plant to go on one of these excursions.

The mid-year trip is now practically a certainty, according to a statement issued to THE TECH yesterday by President Richmond; for twenty men have signed up already, and more are expected to do so. Of these twenty, thirteen are Seniors, five are Juniors, and two are Sophomores. The committee in charge of the trip is rather surprised that so few of the Juniors and Sophomores have signified their intention of going, since it is felt that they have more time at their disposal than the 1914 men. Usually, says the committee, the lower class men fail to realize how comparatively easy it is for them to go on trips such as this, and they consequently neglect an opportunity whose value they do not fully appreciate.

The committee hopes that at least twenty more men will sign up. The faculty have been kind enough to give their aid in the planning of the trip, and it is felt that the fellows should show their appreciation to the greatest possible extent.

JUNIOR PROM. COMMITTEE

Nominations For Committee Now Open And Are Due Saturday.

Nominations for the Junior Prom. Committee open today, and the time for handing the papers in will close next Saturday at four o'clock. All of the nominations submitted must be signed by at least ten men of the class. Since elections must be made before the Christmas recess, it becomes necessary to hurry the nominations as much as possible. It is therefore urged by the Ballot Committee that the matter be given prompt attention.

1915 EXECUTIVE COMMITTEE

There will be a meeting of the Executive Committee of the Class of 1915 today at 1.30 in 22 Rogers. Matters relating to the Junior Dinner Saturday, and the coming Junior Prom. are to be brought up.

Purdue University's recently formed rifle club is planning a series of intercollegiate shoots.

CERCLE FRANCAIS MEETS THIS EVENING

Gathering Will Be So Arranged As Not To Break Up Evening.

At eight o'clock this evening the Cercle Francais will hold a short meeting in Room A of the Union. As was planned for at the previous meeting last Friday, this will be more like a social gathering than those which the Cercle has been holding, and as informal as possible. Men who have not yet come out are invited to do so at this time, and to bring with them ideas for the conduct of the club. The committee in charge of these discussion gatherings is endeavoring to make them as varied and as interesting as it can, and desires, with this end in view, suggestions from every member. One of the matters considered at the present meeting will be live topics and new ideas for the next, and every man will be called upon for his opinion. Suggestions will be wanted for the book which is to be used at the next meeting.

The time for the meeting will be limited, so that all who wish to do so may study before and after it without a serious break in the evening. In order that this object may be best attained, the committee hopes that every man will be on time.

SENIOR PORTFOLIO

Nominations for the Senior Portfolio Committee are due Thursday. Up to date, only two nominations have been handed in, and it is earnestly hoped that more will be made and turned in. The nominations are for a committee of five men, and the committee feels that the importance and necessity of the nominations must have been lost sight of entirely, as the interest shown has been so slight.

LYRIC COMPETITION

Completed Verses Must Be Handed In Before 4 O'clock Today.

The lyric competition of the Show closes this afternoon at four o'clock. By that time all competitors must have handed in their completed verses at the office of the Show. It will be impossible for the results of the contest to be made known as early as was hoped for, because of the fact that Coach Sanger is now in New York; but the lyrics will be sent to him at once, and those accepted should be in Boston by Saturday.

The music competition will open next week—probably by Thursday. Notice will appear later in THE TECH.

REV. MR. S. G. TREXLER

The Rev. Mr. S. G. Trexler, of New York, the student pastor of the Lutheran Church, will be at the office of the T. C. A. on Friday from 12 o'clock to 1.30, in order to meet any students of the Lutheran faith. Mr. Trexler was at the Institute on a similar mission last year, and many of the students called at the office to meet him.

FIRST HOCKEY GAME ON NEXT WEDNESDAY

To Play The Pilgrim A. A. At The Arena—To Play Tufts On Friday.

Wednesday evening the first hockey game of the season will be played with the Pilgrim A. A. at the Arena. Manager E. B. Goodell has announced that tickets will be on sale at the Cage all day today and until the late afternoon tomorrow. They may also be had in the corridor of Rogers Building between one o'clock and one-thirty today and tomorrow. It is planned to have a cheering section and for this purpose tickets will be sold at fifty cents. The regular price of these tickets is one dollar.

On Friday evening the team will play Tufts, and tickets for this game will be on sale at the Cage Thursday and Friday and in the corridor of Rogers Building after one o'clock of these days. Cheering section seats for this game will also be sold at fifty cents.

The big game of the early season comes on Wednesday of next week when Tech plays Harvard at the Arena. This date has been advanced from Friday where it was first placed. Preparations are already in progress to bring out a number of Tech men. Seats will be one sale during the two days preceding the game. In order to get the fraternity men to come to all the games as announced, a special representative of the manager will call at the fraternity houses the evening before each game.

"THE TECH" MEN TO DINE

Result Of The Managing Editor Contest To Be Announced.

Tomorrow evening the members of THE TECH will have a dinner at the American House. The dinner will be at the expense of THE TECH and will be for the purpose of getting the men together in a social way to talk over the plans for the coming year. Speakers from the instructing staff have been invited.

A feature of the evening will be the announcement of the elections to the office staff of the paper, and the result of the Managing Editor Contest.

CHAUNCEY HALL CLUB

First Of Series Of Smokers To Be Held Friday Evening.

The first of the Chauncey Hall Club Smokers for this year is to be held this Friday evening, December 12, in the Union. This meeting will serve to welcome the new men, of whom there is a large number this year.

It is planned to have a series of smokers this year, as well as the regular annual banquet which is always a big event. All Chauncey Hall men here at the Institute are invited to attend these meetings, as well as a limited number of men still at the Hall, the Club being a factor in the life at both schools.

1916 won the annual "flour rush" at University of Pennsylvania.

SOUTHERN CLUB DANCE AT COPLEY PLAZA

Reception Precedes Affair—Ladies Of Faculty Are Patronesses.

The Technology Southern Club held a very successful dance last evening at the Copley Plaza Hotel. Over fifty couples were in attendance. At eight o'clock a reception was held, lasting until nine, at which time the dance itself was begun. This arrangement was made in order that that fraternity men could attend their chapter meetings without missing the affair. The Club secured the regular dancing salon of the hotel, and in addition to it the refreshment room. The two were thrown into one, and the whole beautifully decorated.

On the dance committee for the Club were: A. R. Williams, chairman; J. T. Bauer, J. D. MacIntyre, A. U. Walter, C. A. Coleman, G. H. Lynott, and J. A. Steele.

Among the patrons and patronesses were Prof. and Mrs. Talbot, Mrs. Burton, and Mrs. Gates, who is President of the Southern Club of Boston.

The list of dances was as follows: "The International Rag," "España Waltz," "Puppchen," "All for the Ladies," "Barcarole," "Le Gigot," "Get Out and Get Under," "Nights of Gladness," "The Horse Trot," "Bobbin' Up and Down," "La Belle Argentine," "Mammy Jinny's Jubilee," "Honeymoon Lane," "Good Bye Everybody," "Tres Moutarde," "Where Did You Get That Girl?"

Four dances were omitted from the end of the program, and no extras were run.

T. C. A. SPEAKER

B. Y. M. C. A. Social Secretary To Speak Thursday Noon.

Mr. David M. Claghorn will be the speaker at the regular weekly T. C. A. meeting in the Union next Thursday noon, and will speak on the topic, "The Weight of a Man's Word." Mr. Claghorn is the Social Secretary of the Boston Y. M. C. A., and also Secretary of the Army and Navy Branch of the B. Y. M. C. A. He is one of the most popular of the secretaries of the local association and as a speaker is much in demand.

WEATHER

For Boston and vicinity: Clear and cold; moderate winds.

CALENDAR

Tuesday, December 9, 1913.

7.00—Hockey Practice.
4.00—1916 Tug-of-War Sweaters—Union.

The Right Spirit

The hockey team is showing a great deal of life. When a team which draws so largely on men from out of town can hold a practice at seven o'clock in the morning, it is evident that it means business and that its members place the interest of Technology's athletic reputation above their personal comfort.

There is a difference between having the best team and having the best kind of a team. Our hockey men are proving by their work this morning that we have the latter. Let us try by our support to make them the best team in this section of the country.

The Chemical Society holds a smoker on Friday night. The T. C. A. gives a social on Friday night. Tech plays Tufts on Friday night. The Chauncey Hall Club has a dinner on Friday night. Nuff ced?

That the stereopticon views of the New Technology are being enthusiastically received by the Alumni is but another indication of the spirit with which the graduates stand behind the Institute. The unselfishness with which these men have contributed time, money and effort to aid Tech in its present environment is one of the most inspiring facts in connection with this greatest venture in the history of the school. The altruistic instinct has contributed more than any other to the development of society, and there is no truer criterion of the possession of this spirit than the willingness to give when there is no hope of receiving return. The New Tech will stand as a tribute to many men and many organizations, but to nothing greater than the spirit of Technology's Alumni.

ENGINEERING AND SCIENTIFIC NOTES

The Canadian government has recently started work on new terminal docks at Vancouver and North Vancouver, British Columbia, to take care of the Panama Canal next year. The contract for the first of the docks has been let and work started. The other three will be started the first of the year. The docks are 1,000 feet long and 260 feet wide, and the slip between them is 180 feet wide and to be dredged to a depth of 36 feet below mean low tide level. The contractors are equipping the most modern dredge on the Pacific Coast for this work. The dredge rests on four spuds, each fitted with its own hoisting engine. The drills used will be fifty feet long and will be operated with a compensating guide attached close to the head.

The first dock is to be of heavy timber walls protected under water by concrete, but the floor of the dock will be of concrete beams and slabs. The other three docks are to be built as a reinforced concrete shell, the towed to place and sunk, after which the shell will be rock-filled. The timber for the forms of the docks can be used over each time with practically no loss, as the shell is built in sections and the forms taken off in section units.

Sir Joseph John Thomson, Cavendish professor of experimental Physics at Cambridge University, announces that he has discovered a new gas which seems to bear the same relation to hydrogen that ozone does to oxygen.

A new instrument of defensive warfare has been brought out by Mr. Gibson a New York inventor. It consists of an electrically operated gun which is capable of projecting a powerful beam of ultra-violet light for at least a mile. Such a beam of light, according to the claims of the inventor, would be capable of locating and exploding charges of powder from such a distance.

"My invention," says Mr. Gibson, "will form the best known means of coast defense. In modern warfare on land the most feared weapon is the aeroplane, with its store of explosives, which can be dropped to the ground with devastating effects. The invention will prove a means of destroying these combustibles, I believe, at heights too great to be reached by projectiles now in use."

No details of the apparatus have been published, and experiments with it are conducted in extreme secrecy. It seems that an Italian inventor is working upon a similar apparatus, but employing the invisible rays at the other end of the spectrum, namely the infra-red.

PROF. D. C. JACKSON

Appointed As Specialist To Study Fall River Street Traffic.

Prof. D. C. Jackson of the Electrical Engineering Department was recently appointed by the Chamber of Commerce of Fall River as a specialist to investigate and study the street traffic congestion of that city. Some discussion was raised with the Bay State Street Railway Company as to how the trouble might be avoided. The railroad men said they could not employ the services of an expert and so the Chamber of Commerce took up the matter. The cost of the investigation will be paid by public subscription. This comes under the department of the New Electrical Research Laboratory to find out how far a passenger may ride for a nickel.

CHEMICAL SMOKER WILL BE HELD FRIDAY NIGHT

Mr. H. C. Lythgoe, Chemist For The State Board of Health Will Speak.

The next meeting of the Chemical Society will be held in the Union next Friday evening, December 12th, at 7.30. The speaker of the evening will be Mr. H. C. Lythgoe, Chemist for the State Board of Health, and he will address the men on "A Study of five hundred samples of milk of known purity examined by the Massachusetts Board of Health."

Mr. Lythgoe is a graduate of the Institute, being a member of the class of 1896 and Course V. He is one of the most prominent food analysts of this part of the country, is said to be both a very attractive man personally and a very delightful speaker.

The meeting will be informal as usual, and plenty of free "smokes" will be provided. The Faculty and members of Course VII are cordially invited to be present; and it is hoped that a large crowd will turn out.

COSMOPOLITAN CLUB

A business meeting of the Cosmopolitan Club will be held in 8 Engineering C at five o'clock next Wednesday afternoon. The affairs to be taken up are as follows: First, the report on the Chinese Night; second, discussion of the report of the program committee for the British Night; third, a discussion of the convention which the Association of Cosmopolitan Clubs is to hold at Iowa City during the Christmas vacation.

EPISCOPALIANS MEET

The Brotherhood of St. Andrew will hold its weekly meeting this evening at the Trinity House, 93 St. James avenue. This will be the fifth discussion meeting, and the subject of discussion will be, "Why I am an Episcopalian." The discussion will be led by Mr. A. B. Parson of this city. Mr. Parson is a deacon at St. Paul's, the newly-created cathedral in this diocese. He has spoken at these meetings before.

The meeting will be open to all Tech men, as usual.

Brown is having much trouble organizing its inter-class basketball league. Thus far the Sophomores are the only class which has been organized.

REV. KIRSOPP LAKE DELIVERS FIRST LECTURE

Gives A Very Interesting Talk On "The Growth Of Christianity."

Rev. Kirsopp Lake, D. D., Professor of Early Christian Literature in the University of Leyden, Holland, delivered the first of a series of five free public lectures on "The Growth of Christianity" yesterday afternoon in King's Chapel. The lectures are under the auspices of the Lowell Institute.

Rev. Lake spoke of the early Christian missionaries. He traced the movement that led to the division of Christians into beliefs and showed that the cause for the lack of coherence so noticeable to students of Bible history is chiefly the misuse of the terms by the missionaries to convey the ideas they wished to express.

Two classes of Christians existed subsequent to the introduction of Christianity into the Roman Empire. First, those who looked forward to the catastrophic idea, a revolution followed by the establishment of a new system of society, hoped for the resurrection and the advent of a Messiah. This Messiah they expected to be a king, a ruler of the new society. Those who, on the other hand, accepted Jesus as the Messiah and who were satisfied to accept the sacramental idea, Rev. Lake placed in a separate class.

The type of religion that characterized the Greeks was a system of creeds leading to a satisfaction. The Greeks were desirous of obtaining merely a security that they would reach heaven. They were willing to accept the teachings even to the extent that they interfered with their previous beliefs. The Jews objected to the profoundness of the creeds. They wished to abide by the letter of the law, but were averse to accepting Christianity in so far as it concerned their conduct and thoughts. They were willing to abide by outward things by means of which people obtain the strength they are looking for, and also hoped for the same immortality that they desire today.

1916 TUG-OF-WAR

The sweaters for the 1916 Tug-of-War Team will be at the Union at 4 P. M. today. Manager Sully especially requests that all men be present to get the sweaters at this time, in order that the distribution may be effected with as little trouble as possible.

Oxford University has announced its intention of entering a four-mile relay team in the big relay games to be held at Penn next spring. Taber, formerly of Brown University, will probably run for Oxford.
