E. E. TRIPS—FRIDAY'S LIST NEARLY COMPLETE

Only Chances To See A General Electric Plant—Schenectady Excluded.

The Electrical Engineering Society will leave the Library at 12.30 sharp this afternoon. The room is reserved for several more on this trip, but the list for Friday is almost complete with the exception of one or two names which may be added. The committee feels that it is highly desirable that all men take this trip if it is possible for them to arrange it, since this will be the only chance to see one of the General Electric Plants. Schenectady has been definitely selected as the regular meeting place for this annual trip. There will be special guides to take the party through the works.

INSTITUTE COMMITTEE

Reports Of Regular And Special Committees Will Be Read

There will be a regular meeting of the Institute Committee on Thursday afternoon at 4.15. A number of reports of the different committees will be read and other important matters will be discussed. The reports of the following standing committees are due at this meeting: Union, Point System, and Bulletin Board. The question of the proposed change in the constitution of the Co-operative Society will be discussed and the results of the Committee on the Uniform Standards for All Classes will be heard. The report of the Special Committee appointed for the purpose of bringing about closer relations between the Musical Clubs and the Institute Committee will also be read.

1916 PIPE COMMITTEE

Chairman, J. P. Ullinger announces a meeting of the 1916 Class Pipe Committee to be held today at four at 225 Newbury street.

SANJO CLUB

The members of the Banjo Club are now practising regularly for the Winter Concert. A number of men, who will be unable to play in the joint concert, are practising regularly for the purpose of bringing about closer relations between the Musical Clubs and the Institute Committee.

CERCLE FRANCAIS

Last night the Cercle Francais held its second regular meeting this year. About a dozen members were present and they enjoyed themselves in hearing of the foreign experience of the different members. Of the members present only one forgot himself and used English, thereby incurring a fine. Because of the Christmas holidays the next meeting will be in January.

WEATHER

For Boston and vicinity: Fair, moderate west and northwest winds.

Wisconsin has organized an Archibald Club.

CIVILS WILL VISIT INSTRUMENT FACTORY

Trip to Factory of Berger and Sons Aranged For Next Friday.

The Civil Engineering Society has arranged a trip to the instrument factory of C. L. Berger and Sons to take place next Friday afternoon. The men will be divided into two parties, and the name of the person who wishes to go will have an equal opportunity to see the whole factory. The parties will start from the Union, one at two and the other at three.

The firm of Berger and Sons is the successor to Buff and Berger, which was founded in 1871. C. L. Berger himself is the original company, later with his two sons took over the entire management of the business which now goes by his name. Mr. Berger obtained his experience in manufacturing instruments in Germany and London.

The company makes mainly civil engineering instruments, and these are of the best grade produced in this country. The factory is not large, but the aim of Mr. Berger is rather towards quality than quantity. Besides transit instruments, gravimetric, pendulums for the geodetic survey are made, as well as magnetic instruments for the United States Government and the Carnegie Institute. Astronomical instruments for Lane Observatory and the Mexican Government as well as cameras for photographic surveys are also produced.

Mr. Berger has a large collection of instruments of different kinds which will be shown to the visitors, and he feels that they will prove of great interest to prospective engineers.

This trip will afford an excellent opportunity to learn the different instruments which they must use constantly in their profession.

MIDWINTER CONCERT

Reserved Seats On Sale In The Union At 1 P. M.

The tickets for the Midwinter Concert next Tuesday evening can be exchanged for reserved seats at one o'clock in the Union today. If any of the men have not yet procured tickets, they can do so at that time. Leader Tallman of the Glee Club wishes the men to remember that the rehearsal next Friday will be at 4.30 instead of the usual time. The tickets for the "Drinking Song" will be at the Cage by Thursday morning, and the members of the Club must have the music learned by the time of the rehearsal on Friday.

SOPHOMORE FOOTBALL

The Manager of the 1916 Football Team wants to notify the men that their sweaters are ready for them, and can be obtained at the Cage.

There is a balance due on these sweaters, the amount of which can be learned at the Cage. This balance must be paid before the sweaters will be delivered.

TECHNOLOGY HOCKEY SEASON OPENS TONIGHT

Team Plays Pilgrims At Arena—Game Starts At 6.15—Squad Cut.

This evening the Technology Hockey Team will play that of the Pilgrim A. C. It is the first game that Tech has played this season, and from the appearances of the squad the game ought to be fast and even. The tickets are on sale at the Cage in the Union at fifteen cents apiece. The game will start at 8.15 in the Arena on St. Botolph street.

Yesterday morning a considerable number of the candidates turned out for practice at 7 o'clock. For an hour and a half the men were lined up in teams against the teams that opens the game tonight. The practice was rough and the men showed up well.

WRESTLING TEAM GOES TO BEVERLY SATURDAY

Match With Y. M. C. A.—Men In Good Condition For Boston's First Meet.

Saturday the wrestling team goes to Beverly, where Tech will meet Y. M. C. A. in the first duals of the year. M. I. T. won every game on the schedule last year and Captain Kelly hopes to do the same this year. The following men will compose the team:

115-pound class—Lon. C. A. trip.
125-pound class—Means Manager Martin, Captain Kelly, Durkee.
145-pound class—Trot. C. A. trip.
158-pound class—Walton, Goodell, Heavyweight class—Leslie, Crowell.

Durkee, Goodell and Leslie are the men who made such a good showing at the Y. M. C. A. novice meet last Saturday evening, and Captain Kelly is confident that they will make good in their first match against more experienced men.

TECH MEN AT Y. M. C. A.

Students To Give Entertainment For Association Members.

An arrangement has been made with the Boston Y. M. C. A. for an entertainment to be given at the Association Building by members of the Technology Glee Club and Tech Show. The performance will be in the nature of a vaudeville show, and will be presented in the Jacob P. Bates Hall, Saturday, January 3, 1914.

The program has not yet been made up, but the present idea is to have about half a dozen numbers by the Tech Special Orchestra and two selections by the Quartet of the Glee Club. It is also planned to put on two or three specialty dances or vaudeville stunts. The admission will be ten cents; tickets obtainable at the door.

CALENDAR

Wednesday, December 10, 1913.
1.30—E. E. Trip to Lynn—E. E. Library.
5.00—Cosmopolitan Club—Esqu. C.
8.00—Hockey, Tech vs. Pilgrim A. A.—Arena.
Thursday, December 11, 1913.
1.30—E. E. A. Speaker—Union.
8.00—Walker Club Meeting—Technology Club.
1917 Basketball at Holliston H. S. —Hollister.
Friday, December 12, 1913.
1.30—E. E. Trip, Lynn—E. E. Library.
2.00 and 3.00—E. E. Trip, Berger Instrument Factory—Union.
8.00—Hockey, Tech vs. Tufts—Arena.
8.00—T. C. A. Socialite—H. H.
8.00—Cheaney Hall Club Meeting—Union.
THE TECH, BOSTON, MASS., DECEMBER 10, 1913.

THE TECH NEWS

William M. Sullivan of Brown has been selected as one of the Rhodes Scholars for Oxford in 1914. He is a Phi Beta Kappa man and won his letter in basketball.

The annual triangular debates between Cornell, Columbia, Syracuse, Pennsylvania and Tulane will open early in January at Syracuse. The second debates will be held at Penn in the latter part of the month. Both of these dates mentioned will be on the question of “The Minimum Wage.”

The base of Yale's great stadium is gradually assuming its natural proportions and it is expected that the entire structure will be completed in time for the Harvard game of next year. The “bowl,” as it is termed at New Haven, is to be nearly a thousand feet long and 750 feet wide. It will be a half-mile around the top, on which it is to be a walk fifteen feet wide. The thirty entrance tunnels, each of which will accommodate 2,000 persons at a time, were finished last week. In their construction alone over 50,000 bags of cement were used. Over $62,000 has been subscribed so far, and additional sums are coming in daily. By a special arrangement of the Yale corporation, anyone contributing a thousand dollars to the fund has the privilege of securing each year a block of ten seats in the reserved section.

We announce the receipt of the first number of Volume XXXX of the Literary Supplement of the Queen's University Journal. Queen's University has one of the best hockey teams in Ontario.

CIVIL ENGINEERING SOCIETY

(Continued from page 1.)

The students will be shown every part of the factory, and everything will be explained. All persons who wish to go must be on hand Friday, as it is not likely they will be allowed to come again.

CHAUNCY HALL CLUB

Election Of Officers For The Comming Year Held.

At the Chauncy Hall 1913 Club meeting last night the following officers were elected to serve for the ensuing year:

The purpose of this Club is for the promotion of Tech and Chauncy Hall spirit. It will be remembered that this Club gave a six-foot banner for the best yell for Field Day and Tech Night, and also took the initiative in getting the band for Field Day.

The poultry department at Purdue contains a prize hen. She weighs three-and-a-half pounds and during the last two years has produced 443 eggs weighing 413 pounds. The eggs sold at an average price of 27.4 cents and cost 5.2 cents to manufacture.

Tables For Steel Detailing

And Designing

By J. A. AUBIN

These Tables are for the draftsman and designer of steel structures comprised from the cold rolled and steel structural shapes as noted above. These tables are ideal for the draftsman and designer of steel structures and will make the job of designing and detailing steel structures an easy and pleasant job. The tables are contained in a thin black binder or leatherette and are made in standard sizes to meet every requirement.

JUNIOR CLASS DINNER SATURDAY
Several Innovations Planned For Annual Event—Speakers Announced.

Next Saturday the Junior Class will hold its annual banquet in the Union at six P. M. The committee in charge has spared no pains in making the dinner a success, and has prepared several surprises for those present. Moreover, to prevent a whole evening being wasted arrangements have been made to have the dinner over by eight o'clock. This precludes any conflict of engagements and should result in a large gathering.

The speakers at the dinner will be Prof. A. Bates, in charge of the English Department, and Prof. E. F. Miller, in charge of the Mechanical Engineering Department. Professor Bates is well known as a very interesting speaker, and Professor Miller has also won a reputation by his entertaining talks at various dinners. Professor Miller has been closely identified with the technical side of Institute life, while Professor Bates takes more interest in the cultural side; so the speakers should be well able to reflect the different aspects of Technology.

HOCKEY GAME
(Continued from page 1)

B. A. A. OUTDOOR TRACK
The new owner of the ground adjacent to the Armory has consented to the laying of a board running track by the B. A. A. The M. I. T. track squad will have the use of the track once a week. There had been serious doubt as to the laying of this track, but suitable arrangements have just been completed.

Coach Kransky is very glad to have the opportunity of giving the men outdoor track work, for he considers this a vital part of the training. Practice is now going on regularly on Mondays, Wednesdays, Thursdays and Saturdays and a good number are out.

Queen's University has planned an extensive trip for its hockey team during the Christmas vacation. The program includes a number of Canadian colleges and the Intercollegiate Series at New York.

BOSTON SCIENTIFIC SOCIETY MEETING
Dr. E. H. Slack gives interesting talk on "Controlling of Diseases."

Last night Dr. E. H. Slack spoke at the meeting of the Boston Scientific Society. The speaker is the secretary of the Boston Health Department, and therefore well equipped to speak on the "Controlling of Diseases."

Dr. Slack began by laying out his plans. He compared the use of the African living on the Nile with the smaller use of horsechestnuts and like objects by the people of this country. He then went on to the subject of bacteria. He deprecated the disinfection of rooms, etc., claiming that the dangers of infection from the air are negligible. Germs, he said, can be boiled and yet exist.

The chief source of infection, Dr. Slack continued, was contact with the patient or his excreta, spray of the mouth in talking, and the habit of putting the hand in the mouth. Besides this contact, the chief danger lay in water, food, flies, and milk. - Dr. Slack expressed himself strongly in favor of vaccination, especially in the case of typhoid.

Then the speaker went on to the spread of diseases by insects such as the mosquito, which brings yellow fever and malaria, and the stable flies, the mosquito, which brings yellow fever and malaria, and the stable flies, the mosquito, which brings yellow fever and malaria.

Other diseases are transferred mechanically, such as typhoid and diphtheria. Figures, Dr. Slack stated, show that one death in every ten is caused by tuberculosis.
