

THE TECH

VOL. XXXIV. NO. 100.

BOSTON, MASS., WEDNESDAY, MARCH 17, 1915.

PRICE THREE CENTS

BUY THAT TICKET NOW!

Only Three More Days Before Niemand Zu Hause.

Well, what did we tell you? Our representative to New York successfully combated the claims of the agency that almost put Niemand zu Hause out of business and the performance is to be given as planned in Huntington Hall on Friday evening of this week at eight o'clock. The dance that is to follow will be given as per schedule.

Moreover, an extra attraction has been secured, and it will be a corker! All the doings of the Faculty in their secret meetings are to be divulged. No longer will these meetings which decide the fate of so many ambitious students remain as dark, mysterious secrets. Inside information of the conduct of these momentous meetings has been secured and the whole thing will be presented for the benefit of the student body. You can't afford to miss this.

By the way, have you bought that ticket or those tickets yet? If not, you had better get a hustle on for the demand is very great. Everybody seems to want to get as many as they can and to date all that are available have been given out for distribution. Don't wait; for it may be too late. Buy from the next man who asks you or get your ticket at the Cage. Eddie has a few left which he is ready to sell at the regular price of fifty cents each for the show only, or seventy-five cents apiece for the show and dance.

There is one surprise that has been withheld until this late date which will surely add to the attractiveness of the whole entertainment. That is the program that has been prepared at great expense and labor exclusively for this production. Honest, Mabel, it is a scream! The wording of the thing will cause a

(Continued on Page Six)

TICKET-SELLERS MEET

All men selling Niemand zu Hause tickets are asked to be sure and report in the lower Tech Office either at one or five o'clock today. It is very important that every man who has tickets be ready at this time to give a complete report of progress to date.

CLASS DAY COMMITTEE

Starting today, the Senior Class Day Committee will meet every Wednesday at 4.30 p. m. in 11 Eng. B. All members are requested to arrange to be present at each meeting.

TECHNIQUE TO BE RIGIDLY CENSORED

Nothing Will Appear Which May Prevent Giving Her A Copy.

The techniquers are started off in all the buildings of the Institute, and a lot of men who never before got a sight of such a thing as a sign-up are now being gratified by plenty of invitations to part with a small portion of their incomes. There is considerable sentiment among the undergraduates in favor of getting two books apiece, one to keep, and one for "her." It is only fair to warn everyone who intends to bring a girl to any of the events of Junior week that his friend will probably expect a present of "One of those beautiful Techniques," as a souvenir. The Board is seriously considering the advisability of printing a flier in the small copy of The Tech that will go in the show program, saying "Has He Given You a Technique Yet?" Therefore, to be prepared, every one who is going to the Show can safely get two sign-ups. They may be needed.

In order that there may be no possible obstacle in the way of presenting Technique 1916 to any lady the book has been carefully censored. The art work is to be of the best quality, but entirely proper. The grinds will be chock full of fun, but will contain nothing which can call a blush to the cheek of the most fastidious. Even the "Scandal in the

(Continued on Page Four)

FRESHMAN BASEBALL

Thirty Men Are Out For Team Meeting Tomorrow.

Last Friday the first meeting of candidates for the freshman baseball team was held and thirty men signified their intention of coming out. Saturday afternoon battery practice was held at the gym and five pitchers and two catchers showed up.

Mr. W. F. Odom, an instructor in chemistry at the Institute, has been secured to coach the team. Mr. Odom has played professional baseball in the position of catcher for two years and last year coached the Lehigh University freshmen. There

(Continued on Page Three)

WALNUT HILL RANGE

The opening of the outdoor range attracted so many members of the Rifle Club to the shoot last Saturday that another chance for scoring will be offered to the marksmen on next Friday afternoon. Those who intend to go are requested to give their names to Dunn or Parsons.

SUCCESSFUL TRIPS BY MUSICAL CLUBS

Combined Clubs Give Concert At Lynn and So. Hadley This Week.

On Monday evening the Combined Musical Clubs went to Lynn, Mass., where they presented a concert before a very large audience at the Lynn Classical High School. The concert was held under the auspices of the Lynn Educational Association and was a marked success, all the numbers being liberally applauded. The singing of H. W. Williamson was especially well received as were also the readings by Howard Leslie Mann, the club reader.

Yesterday afternoon at 2 o'clock the members of the clubs left Trinity Place Station on a special car attached to the 2 o'clock limited for South Hadley, where they presented a concert under the auspices of the Sophomore Class of Mount Holyoke College. On their arrival at South Hadley the men were tendered a reception and then made the guests of a dinner party at the Croysdale Inn, where some of the girls of the class acted as hostesses.

The concert, which began at 8.30, was given in the College Chapel, and was enthusiastically received, the popularity of the Banjo Club's selections being very noticeable. After the concert the men made the rounds of the campus, serenading the girls in the dormitories and sorority houses. Some of the men passed the evening at their chapter houses at the Agricultural College in Holyoke

(Continued on Page Six)

M. I. T. A. A.

"T" Recommended For Fletcher—Manager's Report.

At the meeting of the M. I. T. A. A. held yesterday, it was voted to recommend that R. L. Fletcher be given a "T." L. E. Best spoke on the advisability of omitting the pole vault from future indoor meets, and, after some discussion, it was decided to omit the pole vault hereafter.

Manager Morse of the Wrestling Team reported that the scheduled B. Y. M. C. U. meet had been cancelled on account of skin disease, but that the three remaining freshman meets would be held. Manager Hudson of the Basketball Team reported an indebtedness of \$148.05, incurred by the disbanding of the team and the consequent broken contracts.

FRESHMAN RELAY

There will be a meeting of the Freshman Relay Team in the Track office at 1 o'clock today.

SPRING TRACK SEASON OPENED LAST MONDAY

Plans For Work To Be Discussed At Meeting Next Friday Afternoon.

The spring track season for the Institute began in earnest on last Monday afternoon. A number of men tried out the track and found it in good condition with the exception of a little softness. To remedy this slight defect it is hoped that the track may be rolled by a steam roller borrowed from the City of Cambridge. Coach Kanaly gave only light work to the men for the first time, but a good start was made.

In order that all men who are in any way interested in the success of the track team may learn full details and prospects of the coming season, a meeting has been called for Friday afternoon at 5 p. m., in 11 Eng. B. The coach and officials of the team will explain matters and it is hoped that a goodly number of students will be present to offer suggestions or opinions.

M. E. SOCIETY TRIP

Visit B. F. Sturtevant Co. Plant. Second Trip Today.

Yesterday afternoon, a party of twenty-five members of the M. E. Society visited the plant of the B. F. Sturtevant Company. The men were shown through the pattern shop, pattern storage room, foundry, power plant and boiler house first. Then they were taken through the machine department where Riley stokers, fans,

WEDNESDAY, MARCH 17, 1915.

IN CHARGE OF THIS ISSUE.

Editor: J. M. DeBell, '17.
Assistants: A. H. Wenzel, '17; A. R. Brooks, '17; K. M. Lane, '17; J. W. Damon, '18.

The question raised in the Institute Committee as to whether the Technology Monthly shall continue to exist, is one which should be settled in accordance with the sentiment of the Institute at large. To ascertain this consensus of opinion is a difficult problem, for the solution of which we propose to print, in the near future, a ballot to be cut out, marked, signed and left at the Cage. If all who are interested in this question one way or the other will express their views by this means, the Institute Committee will have a substantial basis for making its decision.

Once more we call attention to the fact that notices and other material for publication must conform, in order to receive consideration, to the obvious rules of journalism and common sense. Direct address, editorial statements and manifest exaggerations cannot be permitted to masquerade as news. We trust that the activities will keep this in mind when they prepare articles for publication.

COMMUNICATION

To the Editor of The Tech:

Judging from the murmurs which appear after each election here at the Institute, the dissatisfaction among the student body with the present method of conducting elections seems to be very widespread. The principal objections seem to be two. First, the elections are usually conducted by the "procrastination system," there being little advertising in The Tech, none on the bulletin boards, and "ballots being received at the Cage" for several days, which means that there is no outward sign of an election and few beside personal friends of candidates remember to vote. Second, secrecy is violated by having the voter's name on the ballot, rendering it possible for those counting the votes to see the preferences of each man. This was aggravated in at least one election this year by the counting of votes by those in charge as they were handed in, and in one election last year ballots were received after the polls were legally closed.

A number of men have suggested to me that the system in use at the University of Southern California be brought to the attention of the student body, and the time seems opportune to do so. There is nothing new about this system. Registered voters will recognize it as the Australian Ballot applied to school politics. It, however, brings to the election uniformity and order, secrecy when desired by the voter, freedom from ballot box stuffing, and convenience.

Consider this system applied to a general class election at M. I. T. Nominations will have been made as usual and the election advertised on each bulletin board. On the day of the election the polls will be open in the Union from 9 a. m. to 5 p. m., where will be found a table for each class with a representative of the Institute Committee in charge of each. He will have a list of all members of the class whose election he is conducting. A man coming to vote signs his name, and if his dues are paid is then given a ballot stamped with a number in one corner. This number is entered opposite his name on the class roll, and he is then free to

(Continued on Page Four)

We are in receipt of a communication, which, as it is unsigned, we cannot publish, criticising in general terms the course in Precision of Measurements, as now given. While we think that this, like most Institute courses, is capable of improvement, we also think that criticisms, to help in accomplishing this end, should be constructive in spirit and precise and definite in statements. Open-minded criticism of this nature can be objectionable to none, and may be of considerable use in preparing the way for improvements.

TECH UNION DINING ROOM

**BIG REVIVAL MEETING
OF CHEMICAL SOCIETY**

Attempt Will Be Made To Arouse Interest In Student Activities.

As an aftermath of the Alumni Convention at Pittsburg, with the attendant criticism of the makeup of the average student of the Chemical courses at the Institute, the Chemical Society has taken a new lease of life and will endeavor to infuse a little spirit into the lab men.

Professor Walker has taken an active interest in the movement and the program so far has been largely due to his efforts. The first treatment will be in the form of a sort of a "revival meeting" in the Union on Tuesday, March 23rd, at 7.30. Several of the professors who have been for several years outside the pale of student activities are to be on hand and all have promised to bear an active part in the discussion. Dr. Moore, from the Organic department, will be the chief speaker of the evening. The names of the other speakers will be published later.

A new publicity committee has been appointed by Pres. Spear. E. L. Kaula, 1916, chairman; John Gore, 1916, and G. A. Sweet, 1916, will have charge of the advertising in the future.

HARE AND HOUNDS

Next Run At Hyde Park—Annual Underclass Meet Soon.

The next Hare and Hounds run will be held Saturday afternoon at Hyde Park, and a general call has been made for all men interested in this work to come out. This applies to the freshman class particularly, as the annual cross-country run of the two under classes will take place Saturday, March 27th. The only run intervening between Saturday's and the annual meet is a probable run next Wednesday afternoon at Franklin Park.

Good provision will be made for the men at Hyde Park on Saturday as the start is from the Y. M. C. A. there and the much appreciated showers and lockers are available. The length of the course is between five and six miles.

At the time of the annual freshman-Sophomore run, the annual Inter-Course run will be held; and cross-country men of all classes will have an opportunity to participate.

FRESHMAN BASEBALL
(Continued from Page One)

will be a meeting of candidates tomorrow at one-thirty in the Union. As the oval has just been seeded, it has not yet been decided where practice will be held. The provisional schedule is as follows:

Rindge Technical School	April 3
1917	April 21
Wentworth Institute	April 24
1917	May 3
Lynn Classical High	May 5
Dorchester High	May 8
Exeter	May 21
1917	May 22

**ASSISTANTS PICKED
FOR "GETTING A-CROSS"**

Executive Staff For This Year's Show Complete As Result Of Competitions.

The management for the Tech Show 1915 is now complete, the assistants in the various departments having been chosen after a lively competition. The men have been chosen impartially by the two managers, and the management feels sure that the best of the available material has been chosen in each instance.

The successful candidates, and the departments in which they are to serve, are:

Business Department, First Assistants: Claudius H. M. Roberts, '17; Harrison P. Eddy, '17; H. Nelson Keene, '17.

Second Assistants: George B. Hutchings, Jr., '18; J. T. Leonard, '18; F. A. Washburn, '18.

Stage Department, First Assistant: William B. Hunter, '18.

Second Assistants: James deG. May, '18; R. H. Wells, '18.

Of the men selected, three Sophomores have had previous training, as assistants in their respective departments of Tech Show 1914. Hunter was appointed without competition, stepping up from his position of last year. Roberts and Eddy were assistants in the business department last year, but it was necessary to hold another competition.

The case of the freshmen this year was different, as there were no experienced men from whom to choose. Lively competitions have been in progress for some time, terminating only last week. The men working for the business department have been working the longest. Their call came a week before the Kommerz Dinner, their first duty being the selling of tickets for this affair. Since that time, the candidates have been getting ads for the Show Program, and in this way have had an opportunity to demonstrate their business ability.

The call for stage assistants was issued on February 12th, and has run for about five weeks. In this competition written examination was given in connection with the music, and the candidates were also required to interview numerous costumers, wig-makers and others. The management feel that the Show should have its most prosperous year with this corps of picked assistants, who have given evidence, so far, of being thoroughly capable of handling their work.

PATRONIZE TECH ADVERTISERS

COMMUNICATION (Continued from Page Two)

take his ballot where he chooses and mark it in public or in private. To vote, he simply returns the ballot to the table, folded so that only the number shows. The election officer compares this with the number as recorded on the class roll, checks the latter as "voted," tears the number from the ballot thus removing identification marks, and deposits it in the ballot box. If the voter spoils his first ballot and desires a new one, the spoiled one must be returned to the election officer who will issue a new one, recording the new number on the class roll. At the closing of the polls, the number of ballots in the ballot box must agree with the number marked "voted," and the spoiled and unused ballots must be returned to the Institute Committee. For this the election officer is personally responsible.

As is easily seen, this system is applicable to any election, whether class or professional society, and insures its being conducted in an orderly manner. The numbering of, and making the election officer responsible for every ballot, absolutely prevents ballot box stuffing, the numbering being done in a very few minutes by the proper officials with an automatic stamp which serves for all elections. The absence of identifying marks on the ballot insures secrecy when desired by the voter, and having the polls open but one day, when coupled with the proper publicity, has been found at other colleges to cause more interest to be taken in the elections. Lastly, requiring the voter to come in person for his ballot necessitates that he show a slight personal interest in the election, which is as it should be, and prevents one man obtaining and marking a number of ballots and then getting other men to sign them, as is now sometimes the case.

R. B. STRINGFIELD, M. I. T., '15,
A. B. Univ. of So. Cal., '13.

TECHNIQUE SIGN-UPS (Continued from Page One)

Chem. Lab." has been sternly suppressed.

All students will certainly want to sign up for the books when the first chance is offered to do so. Many are the beauties to be disclosed when the "little painted shack" opens to the rush in Junior Week. From the fact that this news is hereby given to the studes, it is expected that the signers-up will have a busy time.

M. E. TRIP

(Continued from Page One)
blowers, turbines and engines were seen in all stages of development. The gasoline engine, vacuum cleaner, and electrical departments were next inspected and the trip ended in the testing room where several engines and turbines were being tried out. The guides were very courteous and answered all questions so well that the trip was very interesting.

A second party will visit the plant today, starting from Back Bay station at one-thirty, in charge of F. G. Purinton.

RECLAMATION AND THE IRRIGATION ENGINEER

Mr. F. H. Newell Tells Of Benefits To The Arid West From Conservation.

The Civil Engineering Society was addressed in the Union last night by Mr. F. H. Newell, the director of the United States Reclamation Service, which has done so much in recent years in rendering hitherto useless lands productive. Mr. Newell was introduced by Professor Porter, who sketched the speaker's career since he left the Institute in 1895. Mr. Newell was first identified with the Geological Survey, and in 1892, when the Reclamation Service was started, he undertook that work, rising to the position of director. He has had under his supervision, the expenditure of many millions of dollars, and the handling of thousands of men, so that he is well qualified to advise the future engineer.

Mr. Newell prefaced his talk by emphasizing the importance of being able to estimate and control human nature, since this is even more vital to an engineer than strength of materials. He also spoke of the value of a constructive imagination to an engineer. It requires a large vision into the future to plan works of such magnitude as the Reclamation Service undertakes.

The lecture was illustrated by a large number of slides showing the construction of several of the larger dams and irrigating projects throughout the west. The first mentioned was the Roosevelt Dam, in Arizona, which impounds a body of water twenty-five miles long at the head of South River, and irrigates 200,000 acres of land, by means of a network of canals. This dam is an illustration of the way scientific conservation acts. These 200,000 acres, formerly barren and cactus ridden, are now producing incredibly large crops of many kinds, especially alfalfa. The lands are worth several hundred dollars an acre for orchard use. Mr. Newell emphasized the point that the Reclamation Service was not primarily a commercial project, or an engineering feat alone, but its end and aim is to furnish homes and additional means of gaining a livelihood to thousands of citizens of the United States. The question is not one of creating anything new, but simply of bringing together the vast quantities of land and of water in the west, each of which is useless without the other. Incidentally he said that this work was furnishing a partial solution of the Indian problem. On the Roosevelt dam, large numbers of Apache Indians were employed with profit to all concerned. The Apaches have hitherto been the worst of the "bad" Indians, but their employment on labor to which they are suited, has quieted their discontent.

The pictures showed many interesting phases in the construction of many of the dams. One example was the Grandison River, in Colorado. The river runs in a canyon with rock walls 2000 feet high. It was necessary to lead the water into
(Continued on Page Six)

**BUSINESS PROSPECTS
GIVEN BY MR. BABSON**

**Saturday Evening Post Writer
Has Article In Technology
Monthly.**

Undergraduate appeal is made the issue in the April number of the Technology Monthly which will appear later this week. All but one of the articles have been written by Institute men. The table of contents includes "Are these Reactions?" by a Junior, "Militarism and Patriotism versus Jingoism" by a freshman, "Twenty Years Studying the Sun" by the director of the Smithsonian Astrophysical Observatory who is a Technology Graduate, and "How to anticipate Business Conditions" by Roger W. Babson, who is also a graduate of the Institute. Mr. Babson is the President of the Babson Statistical Organization, and his articles in the Saturday Evening Post, to which he is a regular contributor, have been the subject of much comment and interest.

Very rarely does a college magazine obtain such an article as "How to anticipate Business Conditions" and in this case, especially is this important as right now the question of what to do after the school year is finished is one that appeals to Institute men. Mr. Babson's experience along this line is unparalleled and his article is of value to all technical and business men. Bound in this issue of the Monthly is a map depicting, graphically, the status of business at the present time. The map is printed in three colors and is self-explanatory. Every Tech man should study it in order to get an idea of what his chances will be when he graduates.

At the present time the Monthly Board are desirous of knowing just what the attitude of the students is toward the publication. It has been so well received outside of the Institute, having a subscription list including most of the large libraries and colleges of the country, and many institutions and private persons in foreign countries, that the question of student interest is one to be settled immediately. The Monthly has been self-supporting so far and has been a good publicity agent for the Institute. Very little active support on the part of the students will make sure the existence of the magazine for the coming year. The question requires considerable thought by the students and the management of the Monthly welcomes communications on the subject. The matter will be up before the Institute Committee at its meeting tomorrow afternoon.

DOCENT SERVICE

Next Sunday at 3.15 p. m., at the Museum of Fine Arts, Professor H. L. Seaver of the English Department will speak on "The Greek Dead" in the Fifth Century room. At 4.00 p. m. Mr. Kuno Francke, Director of the Germanic Museum of Harvard University, will give a talk on "Durer's Biblical Illustrations," in the lecture hall.

**LECTURE ON PRESENT
CONDITION OF TURKEY**

**Mr. Brewer Eddy Will Give Talk
Illustrated By Excellent
Slides.**

"What Next in Turkey," the title of Mr. Eddy's book, expresses a question of supreme interest at this time when the Allied fleets are storming Dardanelles. In the illustrated lecture on Thursday at five, 11 Eng. B, Mr. Eddy will present not only the present situation in that country but also the engineering, historical and political background of the Turks. Mr. Eddy, besides writing a book on this subject, has been in the very closest touch with the situation since the war broke out through his connection with the work of sending money and supplies to American missionaries in Turkey. He brings a set of slides showing the Dardanelles, the famous mosques and churches of Constantinople, and scenes from the lives of the people.

From the viewpoint of the architect these pictures of the finest products of Mohammedan work are of interest. Each type of architecture expresses, in a way, the feeling of the people, and in a large way the speaker will bring out the Mohammedan situation of the present day. Has the country resources for engineering and industrial development? If freed from Turkish rule will the development of the country be faster?

This is the last of the series of meetings carried on by the Discussion Group on Foreign Engineering Conditions. The meeting will be more of a lecture than formerly, and yet time will be left for questions and discussion of any points which may interest those present. All students are welcome.

T. C. A. TALK

**Mr. Charles R. Drum To Speak
On "Independence."**

At the next T. C. A. talk in the Union Thursday noon Mr. Charles R. Drum will speak on the subject of "Independence." Mr. Drum has been principal of a high school for twelve years in one of the leading schools of Syracuse, N. Y. He has been

MR. CHARLES R. DRUM

very active in special work connected with large industrial concerns, supervising the work in these lines. He has recently spent some time in the Canal Zone where he carried on Y. M. C. A. work among the people of Panama. His close contact with many classes of men will enable him to give a very interesting talk.

WELL dressed and discriminating men realize that Coes & Young shoes reflect a certain individuality that is most essential in lending character and distinction to their appearance

IRRIGATION TALK
(Continued from Page Four)

an adjacent valley, so a tunnel was drilled from the side of the canyon, for six miles underground, bringing the water out on the side of a hill. The apparently hard rock of the hill, upon weathering, turned to soft clay, thus upsetting all the calculations, and necessitating a concrete spillway for the canal.

About nine-tenths of all irrigation work is by gravity, but Mr. Newell cited one instance of a development on the Snake River in Idaho. The water which runs through is utilized for irrigation pumping four months out of the year, and the rest of the time is sold to the people at absurdly low rates, to be used for cooking, heating and similar domestic uses.

One case was cited where arid lands had been irrigated, and then swamped by over-irrigation, so that the Service is now engaged in reclaiming it a second time from the wasteful use of the water. This, however, must be overcome by educating the inhabitants in the utilization of the water.

*Needn't be
careful with
Moore's*

'Course not—Moore's is a pen to work with—not to nurse. Use it any way you like—carry it any way you like—tucked in a book or dropped in a purse—it's SAFE any way. For it's the original "won't leak" pen.

Starts writing at a touch—and shuts up bottle-tight when you close it. Always writes RIGHT. See the 127 styles, \$2.50 up.

laugh from start to finish. It has been said by those who have already read it that it alone is worth the price of admission. There can be no doubt but that it is one of the funniest things that has ever been written for such an occasion.

So taking it all and all there is no doubt but that you will miss one of the best parties of the year if you don't turn out on Friday night. And remember that upon the success or failure of Niemand zu Hause rests to a large extent the future of athletics this year. BUY YOUR TICKET TODAY.

MUSICAL CLUBS

(Continued from Page One)

while others put up at the Croysdale Inn. The return train will leave Holyoke at 7.20 this morning and is due in Boston at 11.58.

GYM TEAM

There will be a meeting of the Gym Team at 5 o'clock today at the Gym for the purpose of nominating a manager for next season. After the meeting the regular practice will be held.

George Randolph Chester

Famous Author, says:

"Why shouldn't a man be willing to recommend a tobacco which gives as cool, sweet and satisfying a smoke as Tuxedo?"

George Randolph Chester

**For Mentally Alert Men—Tuxedo**

George Randolph Chester's "Get-Rich-Quick Wallingford" stories have delighted thousands through the mental alertness, good humor and keen mind shown by the wily promoter.

When George Randolph Chester writes of things typically American he knows what he is talking about; and when he endorses Tuxedo—the typically American tobacco—his endorsement carries great weight with the keen-minded, alert and brainy smokers of this country.

Tuxedo
The Perfect Tobacco for Pipe and Cigarette

is made especially to maintain the American spirit of good humor. Its constant use benefits a man in mind and body, by keeping him happy and physically fit.

Tuxedo is the finest Kentucky Burley—the world's premier smoking-tobacco leaf—made absolutely non-biting by the original "Tuxedo Process" that has never been successfully imitated. Tuxedo is delightfully mild, fragrant, rich, and gives a cool and satisfying smoke. Tuxedo is in a class by itself.
