"A Royal Johnnie" Appears
With Many Special Dancing Features

Student Singing and Cheering --- F. Hastings
Smythe Stars as Heroine

The book, "A Royal Johnnie," was written by Edgar L. Kaula, '16. It is in two acts, one of which takes place in the Gummy Phi fraternity house at Rahton College, and the other in the F. O'Hara house. Bloodthirsty anarchists are early introduced and affairs are further complicated by the interference of Russian politics. The fertile mind of the millionaire's son who has taken for the evening have been purchased largely by alumni and while many of them have long since emerged from the undergraduate state, they will grove tonight they have not lost their Tech spirit. At both performances the words of the Tech Songs will be thrown on the screen during the in

Anarchists there is promise of a remarkable course of events. Two months of persistent and active preparation and elaborate direction numbers have gone to make Tech Show, 1914 one of the liveliest performances ever given.

The Show has already had one very successful performance. It was given Tuesday night at Northampton before an audience which consisted mainly of Smith College girls, and was very well received.

"A Royal Johnnie" carries with it a suggestion of gay court life, with an air of modernness about it that is altogether pleasing. Nor are names lacking to stimulate our imaginations and make us wonder what it is all going to be like, for with Polyhemia, Vika-vudlero, and the First and Second toast idea and keeping up the good work succeeded in turning out what is without doubt the best Technique that has ever been published.

the leaders. Loomis made a fine showing in the 329 last Saturday, and may beat out all the other sprint men at this distance. Capt. T. H. Greathig, '14, the mainstay of the team in the quarter, is again the favorite, but will be pushed by Thomas, Cady and Williams of the Freshman team. In Dean, '16, and A. Penzler, '14.

C. T. Greathig looks the best of the half milers, with J. J. Donnelly, '17, the possible winner. Stowell, '17, Wilkins, Peasley, '14, and S. Benson, '16, M. G. Graff, '16, H. Al- len, '17, A. C. Litchfield and a dozen more cross country men are all run- ning well.

If the record mark in the two mile is not lowered, track men will be dis- appointed, for F. L. Cook, '16, the in- door distance star, is believed to be good for much faster than ten minutes. Nearly all the milers are capable of doing creditable times at the two mile distance and a big field will start.

The hurdles have a new comer in P. Atwood, '14, A. B. Curtis, '14, and T. H. Huf, '16, and in 229, '15, and Sullivan, '15, are the chief contestants in the high jump. In the broad jump, Fox, '14, Reil, '14, and Colley, '15, if he competes, are the favorites. The weights have Leslie, Wols, '15, Stevens, '17, Seymoure, '17, Sewall, '17, Conway, '15, Curtis, '17, MacNeal, '15, Gores, '17, and Mac- Leod, '17. Lawrence is the best man at the pole vault.

The big feature of the meet will be the Field Day relay, to be run be- tween all four classes. A cup will be given the winning team. Some men have not yet taken their trials, but the probable lineup will be as follows: 1914: Dorrance, Atwood, White, Smith, Hayter, Zinn male, Kennedy, Fox, Wilkins, Penzler, Wilson and Greathig.

(Continued on page 9)

EVERYTHING READY FOR JUNIOR PROM.
(Continued from page 1.)

Both the large halls, as well as the other hall, Saturday, at the Plaza Hotel, have been secured for the en- tertainment. The guests will enter from the Trinity Place side, and will be received by the Matrons, Mrs. Jasper Whiting, Mrs. Charles Mister, and Mrs. Jason Mister. Mrs. R. Mac- murd will of course be unable to re- ceive, and Mrs. Everett Morse, who was also to have been one of the guests, will also be obliged to be absent.

The large ball room is to be used for the dancing. Around the walls will be arranged groups of letters to guide the dancers in finding their partners. The gentlemen whose names begins with a lower letter of the alphabet will seek the one having the higher letter. The small front hall will be used as a lounging room. The Com- mittee has decided not to have any special decorations in the halls, be- lieving that the architecture of the rooms is already sufficiently attrac- tive.

At eight thirty the reception will begin, the dancing will start soon af- ter. The music will be by Urquidi's orchestra. The intermission dance is the Junior Prize Waltz, composed by G. H. Calder. Supper will be served at 22 P. M., either in the Tea Room or the Dining Room.

The guests are requested to keep their orders with them during the dance, to serve as a sort of identification. Each person will be given a special ticket, which he or she will be requested to sign, and these will be tallied for at the supper room.

The Committee, consisting of F. F. Scully, chairman, M. B. Dalton, J. B. Franks, C. W. Howell, J. D. McMa- man, H. R. Place and McGowen Wer- itch, have carried out all their origi- nal plans for the Prom. Nothing that has been planned will be curtailed in any way.

The following have consented to act as Matrons, Mrs. Robert P. Big- low, Mrs. Alfred H. Burdon, Mrs. Ed- win T. Cole, Mrs. C. V. Dalton, Mrs. H. P. Davis, Mrs. C. M. Howlett, Mrs. Frank McGivney, Mrs. John J. Scully, Mrs. Charles M. Spofford, Mrs. Harry P. Talbot, Mrs. H. Werlich.

CONSTRUCTION WORK ON NEW SITE PROGRESSING FAST

Field Divided Into Eight Independent Sections — Several Foundations in Place

Above and on the adjoining page is presented a panoramic view showing the New Site as it looks to-day from the top of the main office of the Stone and Webster Engineering Corporation which is located about two-thirds the length of the lot from the river, and near Massachusetts Avenue. Although the general supervision is carried on from this main office the whole will be divided up into eight divisions, or units, in order to keep each unit independ- ent each is to be provided with its own engineers and staff, and its own body of laborers and skilled workmen. Each has to have its equipment of tower, mixer, storage bins, crane, cement house, inclined railway and car, and its own tools and stock. Each of which will be entirely inde- pendent of the others, and is to have an office of its own from which the details of its section will be carried out. These offices are large wooden buildings which may be easily picked out in the picture.

Referring to the view shown on the right hand page, it was from the tow- er dimly showing at the right of the one directly above the white horses, between it and the pile-driver, that one week ago Tuesday, concrete was first poured in the New Technology build- ings beyond the Charles. The tower in question is in the eastern lateral court, and the buildings which it con- trols are those of General Studies. The reason the tower is so indistinct in the picture is because it is fully a quarter of a mile distant from the camera. In the view of the East Lateral Court the tower may be located, for it would stand between the foun- dation and the door. The construc- tion began opposite it, although on the more distant wall of the building.

Today the concrete foundations above the piles have been carried to the corners and around them in both directions. The outer wall founda- tions of the buildings of General Stud- ies (two sides of the court) and Bi- ology, (the third side) are in place. There are six of the concrete towers shown in the picture and these mark six of the eight construction units. The other two will soon be crooked, one at the terrace and building in the right corner of the left hand picture—the library unit,—and one outside the picture to the left, for the boiler plant.

Before the end of April concrete will be poured in five of the eight units.

The detail in the picture is so great that it is not possible to do more here, than touch on the larger items. The grounds are about fifteen hundred feet square, two-thirds of the length being in view along Massachusetts Avenue, where the men are walking. The trenches in the foreground along the avenue are for Mechanical Engineering. The foundations turn at right angles towards the Library. The driveway in the New Technology build- ings beyond the Charles. The tower in question is in the eastern lateral court, and the buildings which it con- trols are those of General Studies. The reason the tower is so indistinct in the picture is because it is fully a quarter of a mile distant from the camera. In the view of the East Lateral Court the tower may be located, for it would stand between the foun- dation and the door. The construc- tion began opposite it, although on the more distant wall of the building.

Field Divided Into Eight Independent Sections — Several Foundations in Place

In order to keep each unit independ- ent each is to be provided with its own engineers and staff, and its own body of laborers and skilled workmen. Each has to have its equipment of tower, mixer, storage bins, crane, cement house, inclined railway and car, and its own tools and stock. Each of which will be entirely inde- pendent of the others, and is to have an office of its own from which the details of its section will be carried out. These offices are large wooden buildings which may be easily picked out in the picture.
Panoramic View of Site for New Buildings of Institute “Across the River.”

The white building to the left is the round house, for a Stone and Webster engine lives on the grounds, and recently has had for its companion a self-propelling railroad crane. The engine has a mile and a half of track to run on, five parallel lines passing down the lot, with seven hundred and fifty feet of trestle for the bins. The railway lines permit of delivery at the unit or at the desired building of supplies, and when heavy these may be taken there in the cars on which they were originally shipped. The crane can handle heavy pieces like concrete mixers or the engines of the pile-drivers, so that the railroad outfit means much in the way of economy.

It is the intention of the contractors, the Stone and Webster Engineering Corporation, to take such views as this one from time to time, and by comparing these one may have an idea of the progress made in this one of the remarkable building constructions of the times.

TECH ATHLETIC FIELD TO BE ONE OF BEST IN COUNTRY

No Expense Spared on New Technology Field — Plans are Completed in Detail

Plans for the athletic field across the river have recently been received from one of the foremost track constructors of the world, Mr. F. W. Ruben, of New York. He has already reconstructed the tracks at both the St. Louis and Jamestown Expositions, and is now being engaged by the Institute to construct what seems possible of being the best athletic field in the country. These possibilities lie chiefly in the ideal location and in amount of space that is available.

It will be remembered that the Institute grounds are bounded on the north by Vassar St., running parallel to the river and on the east by Tech St., running parallel to Massachusetts Avenue. The field is located in this corner with its long dimension parallel to Tech St. The stadium that is being considered is immediately east of Tech St. It is of concrete construction and will have a seating capacity of four thousand. It is three hundred feet long, fifty-two feet wide at one end and eighty feet wide at the other. This means that it will be possible in the near future for every man in the Institute to attend. The entrance to the stadium will not be much longer; the 220 yard straightaway will be wide enough to accommodate five runners instead of four in the hurdle races. A concrete curb around the inside of the track will be one of the particular features of modern construction.

The field will be enclosed by a fence. Space reserved for the high jump, shot put, and other events directly in front of the stadium. There will also be ample room for a baseball diamond. Probably the vacant lots which are reserved for future extension will be laid off into two other diamonds. Space for tennis courts have been provided for between the dormitories and the gymnasium.

The track at the new field will represent the best that can be had, in addition to which it will have two distinct advantages over Harvard's track; the amount of space will allow the curves to be much longer; the 220 yard straightaway will be wide enough to accommodate five runners instead of four in the hurdle races. A concrete curb around the inside of the track will be one of the particular features of modern construction.

Inside the track will be the gridiron, with space reserved for the high jump, shot put, and other events directly in front of the stadium. There will also be ample room for a baseball diamond. Probably the vacant lots which are reserved for future extension will be laid off into two other diamonds. Space for tennis courts have been provided for between the dormitories and the gymnasium.

One thing that makes the Tech Show so widely known is the fact all the girls' parts are taken by men, and this year they are particularly good. The Tech Show orchestra is conducted by Mr. William Howard, who

(Continued on page 9)
SPRING CONCERT GIVEN LAST EVENING AT THE COLEY PLAZA

Large and enthusiastic audience hears excellent concert of musical clubs.

Last evening the annual Spring Concert given by the combined Technology Musical Clubs was held in the ball room of the Copley-Plaza at 8:30 o'clock. All the numbers were very well given and were well received.

The first number, which was "The Song of The Cannibal," was given by the Glee Club with much expression. "Three Fliers" was sung as an encore. The second number, "Brazilian Dreams," was a piece which was arranged by Surls '14 especially for the Mandolin Club. "Song of The Boatmen on the Volga" by Dvorak was given for an encore.

In the third number the Glee Club quartet showed up to good advantage in the efficient way they handled the different types of songs. The first number, "Colored Promenade," was well applauded and was followed by a "Chinese Serenade." The last selection before intermission was one by the Banjo Club. "Dreams" was a piece which was arranged by Surls '14 especially for the Mandolin Club. "Song of The Boatmen on the Volga" by Dvorak was given for an encore.

The last piece on the program was "The Stein Song" given by the combined clubs, with the audience standing and a few joining in. Dancing began at 10 o'clock and continued until 2 this morning. The list of dances was very carefully made, but the first number was given much more prominence than the others. The list of dances was as follows: "Jubilee Summer," "Get Out and Get Under," "I love D'Amour," "Tupper Pol," "Too Much Ginger," "Little Highness," "Le Gigot," "Some Smokes," "Scrambled Eggs," "Marriage Market," "Tuppchen," "You're Here and I'm Here," "Fingaling," "The Little Cafe," "All for the Girls," "Tres Chico," "Nights of Gladness," "Never Too Much," "While They Were Dancing Around," and "Adoles." The matrons for the evening were Mrs. Alfred E. Burton, Mrs. Henry P. Talbot, Mrs. Delahay, Mrs. J. Frank Duryea and Mrs. Samuel Bresk.

BIG CONVOCATION NEXT WEDNESDAY

Jasper Whiting, '89, President of Alumni Association. To Speak.

An important student's Convocation is called for Wednesday next, April 22, in Huntington Hall at 2:30, where the principal speaker will be Jasper Whiting, '89, President of the Alumni Association. The occasion will be a novel one for any college, since no where else has there been established any comparable relationships between the Alumni and undergraduates.

Every institute student knows somewhat of the student supervision of activities by the Institute Committee and of the link between this and the Alumni through the advisors of the Finance Committee. It is also well known that President Maclaurin has been fortunate in uniting the Alumni body of the Institute into a great sympathetic force for the good of the Technology. President Whiting is interested in exerting this influence further and for most direct benefit of municipality and state.

PREPARE FOR THE INSTITUTE AT Chauncy Hall School

The only school, confining itself wholly to preparing men for the Institute of Technology.

Our candidates not only pass their entrance examinations, but maintain high standing at the Institute.

Tech men are invited to attend the school, or to write for particulars.

FRATERNITIES BEGIN WEEK FESTIVITIES

Many House Parties, Teas, and Dance Figures in Junior Week Programs.

The Technology Fraternal Societies have made elaborate preparations for the entertainment of the students during the Junior Week. In most cases the festivities start today and continue throughout the week. Alpha Tau Omegas will attend the Show and Spring Concert in a body. Dinners will be held every night and Wednesday and Saturday will be ladies' night. Delta Tau Delta will hold a tea at 5:00 o'clock this afternoon, Delta Upsilon will hold one tomorrow afternoon.

 Theta Delta Chi will hold a house party extending until Tuesday. A pressing informal dance will be held at the Chapter House. Sigma Alpha Epsilon will present "The Hunt," at the Terrors this afternoon from 4:30 to 7:00 p.m. A house party will be held on April 28th, and an additional Tea will be held on April 29th. Theta Chi will hold a house party throughout the week and Phi Psi will hold a Tea this afternoon from 4:30 to 6:00.

MONTHLY SUCCEEDS IN ITS PURPOSE

Technical and General Articles Meet with Decided Favor.

Up to the present time there has been some question in the minds of students, faculty and alumni of the Institute as to the exact position assumed by the new Technology Monthly. The need of a publication of this kind has been evident for some time; and on several occasions during the past few years, organizations have been formed for the purpose of turning a literary magazine; but it was not until the Technology Monthly appeared in March eleventh, and the policy of the magazine was outlined by the editor as follows: "In view of the position occupied by the Magazine in the Technological literature of the country, is a notable fact that no suitable outlet has ever existed for the literary potentiality which must exist among her undergraduates. It is this lack of opportunity for the expression and circulation of ideas among alumni and undergraduates which the Technology Monthly aims to aid in the great work of transition from the present towards the new Technology.

That the Technology Monthly has met the need referred to is shown by the favorable comments of the students, faculty and alumni. The policy of the magazine is obviously progressive; but it is not so radical as to awaken any adverse feelings. The Monthly aims to aid in the great work of transition from the present towards the new Technology.

The 1916-17 dual meet uncovered several promising men for the track team.

CLASS CREWS START WORK WITH BIG SQUADS

Sport Put on Firm Basis by Large Donations from Alumni.

After slightly over one week of practice the Tech crews are rounding into good shape, and although the plans for this year provide for interclass rowing, in the main the quality of the material that has turned out will assure a fast variety crew for next year. The men have worked consistently almost every afternoon in the last week of the season, the fund of which were contributed by the Alumni, and the shells of the Boston Athletic Association. Between fifty and sixty men have reported, about twenty-five of whom are Freshmen.

Coach E. L. Stevens has not found much trouble in selecting his men for the Junior and Senior crews. W. C. Treat, E. F. Freeman, H. A. Affel will row three, H. A. Sweet or A. E. Tomp, in two, E. H. O'Brien, T. P. Karns in single. The managers will present a comparatively weak aggregation unless some new men come out and fill the line of coxwains the Freshmen are able to whip the present men into better shape. At present it appears as if N. V. Mansfield would stroke, C. B. Siftowt row three, H. B. Cahn, two, J. S. Howells, one, and A. H. Anderson, coxswain.

In the Sophomore squad there are at least ten or twelve men that are making strong strides for positions on the first crew. These men are E. W. Lucas, coxswain; J. R. G. Huestes, cox; Charles H. Duff, e; Nelson Jowse, r; and S. Ross Derkowits, stroke. Roosevelt has been given a chance at stroke. Duff has switched from the port to the starboard side and Berlowitz has had a couple of tries at two. Lucas Hill has also been given a chance at stroke and has kept the men in back of him rowing smoothly. Marston looks like a fixture at three, number two seat, which is still unsettled, and Duff is not positive of holding down number permanent, which was the position last year is still after H. Lucas, last year's cox, will probably cux this year. Other Sophomores that look promising are C. S. Makepeace, K. B. Chapman, D. L. Fatch, H. G. Haas and C. C. Fuller.

The Freshmen have a board of good material. H. J. MacDonald, C. Durning, E. R. Trow and W. F. Tuttle, all of whom have rowed previously on crew of the Rindge Tech and in Cambridge, should come up well in the competition for places. R. Beaver will make a good man as soon as he can be broken of a peculiar English stroke that he learned in South Africa. O'Brien will make another good Freshman oarsman. In the coxswains of the Freshmen are exceptionally well supplied. They have three men, A. T. Canby, M. E. Berkowitz and L. B. Salt, all of whom have rowed previously on crew of the Rindge Tech. All three men have been do-

EXPOSITION BUILDINGS

Director-General H. O. Davis of the San Diego exposition declares that all the buildings for exhibition of the arts and industries which were contributed by the Alumni, and the shells of the Boston Athletic Association. Between fifty and sixty men have reported, about twenty-five of whom are Freshmen.

The wonderful band—it really was wonderful, but not as a band—mounted to its gasoline chariot and the parade began, across Clarendon up Newton, back across Boston down Brighton, through Copsey Square went the comparatively serpentine.

AT THE "LITTLE WINDOW."

As early as eleven o'clock the mass of people around the vicinity of the battle-ground was distinctly noticeable even to a disinterested passerby. The Technician Board had started their preparations long before this and the erection of the death house, the bandstand, and the various other features of the event, as well as the luminous scenic effects were completed in due order. By the time the twenty miles were carefully inspected through the side door the tops of the ground and the Plaza had been decorated by a crowd of those who wanted to see it all and consequently could not risk turning in the parade.

The wonderful band—it really was wonderful, but not as a band—mounted to its gasoline chariot and the parade began, across Clarendon up Newton, back across Boston down Brighton, through Copsey Square went the comparatively serpentine.

You smoke a 'Better' Tobacco — Why Not Smoke the Best?

The tobacco you now smoke you consider 'better tobacco than you ever smoked before.' Naturally, you kept trying until you found a 'better' one.

But it stands to reason that since there is a difference in tobaccos, you may be missing still greater pleasure in a still better smoke — in the best smoke, in fact.

Tuxedo is the best smoke because no better tobacco leaf grows.

**Tuxedo**

The Perfect Tobacco for Pipe and Cigarette

Tuxedo is treated by the famous original Tuxedo Process for removing the sting and bite of the natural vegetable oils. Tuxedo was born in 1904. Its first imitator appeared two years later. Since then a host of imitations have sprung up.

No other tobacco can give the unique pleasure of Tuxedo because no other maker has yet been able to equal the Tuxedo quality.

**TRACK OUTLOOK BRIGHT FOR SPRING SEASON**

Team Has Chance to Finish First In N. E. I. C. A. A. Championships. Features.

Under the instruction of Major Cole, Cadet-Colonel L. F. Hamilton and his staff of officers the M. T. Regiment has attained a higher degree of efficiency than was secured during any previous year. A week ago the first of the big events of the year took place, the Inspection of the Regiment by President Maclaurin, and at this time the commissions and warrants were distributed. There still remains the Interscholastic Drill, the Inspection by the Government officer and the Final Prize Drill.

The first of these, the Interscholastic Drill will take place April 22nd and is a prize drill between teams sent in by High Schools from neighboring cities. The teams entered will consist of three men each who will be drilled in three rounds, eight men to participate in the last round. There will be three prizes awarded, two individuals and one team prize. The prizes are awarded according to the point made in the last round, the first man getting 8 points the second, 7 points and so on down the list, the team getting the largest number of points in the last round.

**TECH ATHLETIC FIELD TO BE ONE OF BEST IN COUNTRY**

(Continued from page 4.)

be through this gate but direct from Tech St.

With all this in view the future for athletes promises to be a bright one.

With the track completed next fall there will be unprecedented rivalry between the sophomores and freshmen on Field Day for the honor of being the first winners on the new field. The stadium and enclosure will of course be completed at this time, but the novelty and bearing of the field should draw larger numbers than have ever appeared before. Probably the greatest impetus will be received when the Institute itself is completed. The field will become the favorite loosing place for the students who wish to spend a half hour or so out in the air. Many who do not now find time to travel back and forth to the present field for their recreation will have ample opportunity to don their suits and spend a probable half-hour to half-hour for some event. Even those who follow on the side lines will be influenced into going out and attempting to edice some of their friends who are putting the shot or running the half mile.

**STUDENT REGIMENT NEARS PERFECTION**

High School Drill and Regiment Inspection Remaining. Features.

The spring season will commence tomorrow with the Inter-class Spring Meet. Saturday, the 26th, the team goes to Brunswick, Maine, to participate in a dual meet with Bowdoin, and on Saturday, May 2d, Holy Cross comes to Tech Field. Technology is exceedingly fortunate this year in being so close to the Stadium, where both the New England Interscholastic Meet and the big Intercollegiate meet will take place. This year's team is more than capable of holding its own in any contest and the men of the team are determined to make the team getting the largest number of points in the last round.

**TRUCK OPPORTUNITY**

Each year horses worth $1,000,000 die in New York City, according to figures collected by the New York Board of Health. The money has never been sold the money received would have bought 1,000 electric trucks, each truck would have been used for ten years against the fourever life of the horse.

One of the Wandering Corses

Accompany: Edward C. Craft

There are over thirty taking part in the chorus, which consists of the Russian Ballet, Pony Ballet, and chorus of men and girls. The members are:

Pony Ballet—Charles A. Higwell, Duf- low H. Hal, Vicente P. Coker, Ningan, A. Whitside, Edward G. Corder, Bumell, and many others who have been with the company for several years.

PROFESSOR DOGALD C. JACKSON TO GIVE DINNER.

Professor D. C. Jackson, head of the Electrical Engineering Department, has invited the members of the Electrical Engineering Society to be his guests at a dinner to be given on Tuesday evening, April 25th. Because of the unusual interest shown in the society this year, it has been a rather difficult problem to find a suitable place to hold this dinner and accordingly it is impossible at this time to announce the place. The Engineers Club, where the mid-year dinner of the Society was so successfully held, will not be large enough to again accommodate the society.

Mr. E. W. Rice, president of the General Electric Company will be the honorary guest of the evening and will give the members an informal talk on his early work in electrical engineering. He was associated with the Thomson-Houston works at Lynn when the industry was in its infancy. This was the time when a 100 kilowatt generator was looked upon as the eighth wonder of the world. Turbo-penconitors are now being built in sizes of 90,000 K. W. It is expected that Mr. Rice will have many interesting tales to tell about the olden days.

At this meeting the election of next year's officers of the society will be announced and the president will formally turn over his office to the new head, at the same time giving a retrospect of the year.

AST AND CLOSE RACES EXPECTED AT MEET.

(Continued from page 3.)

There is expected to be a large attendance of men and girls, the members being:

Whether coaches should swear at the members of a team between halves in order to put "pep" into the players, said to be a custom in many schools, is the question asked by Dean F. W. Johnson of the University High School, Chicago, in his exposition entitled "The Problems of Boyhood."

"The highest possible tribute to a man's character," he states, "is the refusal of the man's friends to tell him a vulgar story." The application of this to college coaches is not discussed.

Work has been begun on the amphitheater which is to be used in the basement of the new Geology building at the University of Chicago, now in course of construction. The machine will be equipped to record earth tremors throughout the globe. There are at present but five seismological laboratories in the country and Leland Stanford is the only university having such a plant. Continuing the expansion movement for this year, which includes the investment of three quarters of a million in a new classical building, a new Geology building, and the Ida Noyes Memorial Women's Building, the University has announced that the block between Maryland and Cottage Grove Avenues fronting the Midway is to be converted into the University of Chicago Botanical Garden. The plans call for an elaborate arrangement of the grounds which will supplement the present small Horticultural Gardens.

The corporation of Washington University has decided to appoint a field secretary whose duties shall be to visit high schools, make public addresses at educational gatherings as representative of the University, and in touch with the high school principals and students and in and about St. Louis and through the south-west. This is in the line of the progressiveness of the western colleges.

Institute Team Favorites in Nearly All Running Events.

Tech meets Bowdoin in the first dual track meet of the season to be held at Brunswick a week from Saturday. This is the first time the In-stitute Nu (the Maine college) is a dual meet for several years and all indications point to a victory for Tech. Over seventy men have been working out with Coach Kanally at the field, and in spite of unfavorable weather conditions at the start of the season, most of the men are already in good form.

Track work at Bowdoin has received a decided impetus by the construction of their new gymnasium which contains an indoor cinder track. All of the Maine colleges have been handicapped during previous seasons by cold weather which prevented them from starting their spring training until the other colleges had been on the track several weeks, but the Bow- doin men have been training under cover for over a month and will be in fine as good shape as the Tech men.

From present indications, Tech should capture first places in the majority of the running events with Benson the strongest ter, while Thompson will give Guething is a sure winner in the quarter of the race will have to run close Crosby of Bowdoin has been clocked Tech man in the mile which will be believed that he will be saved for good half-miler in Crosby, but it is Fighting for first. Bowdoin has a The half also looks like all Tech est in the pole vault, broad jump and weight events. In both dashes Tech should capture first places with O'Hara, Wilson and Loomis. O'Hara looks good for first in the hundred, while Wilson should take the twenty. Loomis has been run- ning in good style and either he or Esposito has a good show of taking the second place in both events. Tom Guething is a sure winner in the quar- ter, while Thompson will give Graft a good rub for the second position. The half also looks like all Tech with C. J. Guething and Dommity Pighting for first. Bowdoin has a good half-miler in Creeby, but it is believed that he will be saved for the mile. Benson is the strongest Tech man in the mile which will be the best contested race of the day. Crosby of Bowdoin has been clocked in 1:03.40 indoors and the winner of the race will have to run close to the 4.60 mark. Brown should take the third place for Tech. "Doc" Cook has the two mile " nailed" and if the track at Brunswick is in good shape should have an even chance of breaking the present Tech record for the distance. Cook has been caught in less than ten minutes indoors and should reach 9.45 on a cinder track.

Brown has been doing twenty feet consistently in the broad jump and will make for the first position. Colley is the best broad jumper in the Institute but is likely gilbe to the intercollegiates so will probably not be used at all this year. Loudbeard heaved the shot 77 feet and McIlvain made 33 feet in the pole vault at the Bowdoin indoor meet, so close competition is promised in both events. Sullivan looks good for first in the high jump while the second and third places are a toss-up. Beggsley, the hammer and discus is not known, but Ted will be very weak in both these events.

New England Wild

Athletic Event of the Year Staged Today At Tech Field.

By the time this issue is in the hands of its readers (God bless 'em) the feature athletic event of the Tech week will have commenced. In spite of praise and malodorous statements to the effect that the team of veteran track-slingers representing THE TECH would not appear on the scene we have witnessed and can positively state that they were consigned in charge of the conductor on the 8.40 Jamaica Plain car. Furthermore, the last lines of the Boston American announce that the umpire has begun to argue.

THE TECH'S final rehearsal for the Autor take place at four this morning in the Union dining room immediately after the last form was locked and the papers placed on the press. Signals were discussed and a definite organization of the lineup perfected. The first ball will be pitched jointly by both pitchers, so that disputes as to who caused "it" will be prevented. During the process of technique's inevitable journey toward the scorecrusher the score by lineups will be posted on the Union Bulletin Board. Thieves take notice; the lineup will be under surveillance the whole morning! As to rules at the Field; no admission will be charged to holders of complimentary tickets, spectators are requested to keep out of the ring; the players must not be interfered with; no book agents, dogs, Ford's or other nuisances are to be tolerated.

Technique is out yesterday
(Continued from page 1.)

The greatest problem to be solved by the whole board was the question of the dedication. After much discussion the board finally came to the conclusion that the students with whom the student body one person in the whole sphere of the dedication. After much discus-...
