PRICE TWO CENTS

TECH TEAM MEETS BOWDOIN TODAY

Fast Times at Brunswick Promises Exciting Contests This Afternoon.

This afternoon the Track team holds its dual meet with Bowdoin at Brunswick, Maine. As they were leaving the North Station yesterday noon the men felt confident of victory, despite the fact that O'Hara is unable to run.

The track at Bowdoin is reputed fast and very good times are expected by Coach Kanaly if it does not rain before the races. Loomis and Wilson are looked upon as sure winners in the furlong and will undoubtedly place in the 100. Captain Guething is in good trim and the Maine quarter-milers will have to hustle if they expect to win this event.

The long distance men have been showing up well in practice but the outcome of the races is doubtful as the Bowdoin team is quite strong in this division of the Track events.

The jumps are strong but the weights and pole are Tech's weakest points and herein may lie the deciding factor of the meet.

INTERCLASS BASEBALL Sophomores Play Freshmen Today — Tech-Technique Game Also.

This afternoon at 3 o'clock, the Sophomores and Freshmen will play the first game of their annual series to decide the lower class baseball supremacy of the Institute. The game will take place at Tech Field. The price of admission is twenty-five cents. Tickets may be obtained at the Cage and from the members of both ball teams. Smart and Miller will probably start the game as the Sophomore battery, and Cady and Kendall for the Freshmen. At the same time as the game the trials for the Holy Cross meet will be held and the annual game between Tech and Technique will take place.

TRIP POSTPONED President Maclaurin Unable To Make Proposed Western Tour.

The trip to the West which President Maclaurin had planned to take this spring has been postponed, owing to other duties which the President believes to be more important. The work on the New Institute is progressing so rapidly that his presence is required in Boston for conferences with the architects and other work connected with the building operations.

The President had planned to visit Denver, Portland, Seattle, and other cities of the West, where he was to be entertained by the Alumni. He will probably make the journey next fall.

ADVISES STUDENTS NOT TO VOLUNTEER

Maj. Cole Says Men Not Yet Badly Needed — Students May Get Commissions.

A number of students have recently asked Major Cole about volunteering for service in Mexico. He does not believe there is now any great need of men, and thinks the emergency is not great enough to make it worth while for any Tech men to volunteer as privates.

For those who are anxious to go, however, an opportunity may offer to secure commissions in the volunteer regiments. The new military bill gives President Wilson the power to appoint such officers and it is probable that Major Cole may be called upon to recommend some of the students for the positions.

Any man who wishes to be considered, in case the Major is called on to make recommendations, should immediately apply formally, stating his course, class and military experience. He should also confer personally with Major Cole as soon as possible. Previous military experience is not necessarily required.

FOURTH DIMENSION

Prof. Wilson To Speak Before Chem. Society Wednesday.

The next meeting of the Chemical Society will be held next Wednesday evening at 7.45 in the Union, at which time Prof. E. B. Wilson of the Mathematics Department will give a talk on "The Fourth Dimension." Prof. Wilson is one of the authorities of the world on this subject, and the society considers itself particularly fortunate in securing him to speak. The meeting was postponed several days ago to take place last night, but was postponed in order not to conflict with the meeting of the American Chemical Society which was scheduled for the same date.

CHAUNCY HALL BALLOTS

Last night showed no more names added to the list of those who had turned in Chauncy Hall Club Ballots. This means, perhaps, that the club will have to go out of existence, for but one-eighth of the enrolled membership have taken any active interest in the election. Chairman Wall of the ballot committee and those interested in the existence of the club feel that perhaps the members have been too busy with the events of Junior week to attend to this matter, but they earnestly hope that more of the fellows will wake up and keep the club alive, by getting their ballots in by five tonight.

TECH "ARMY" HOLDS ITS FIRST DRILL

"Volunteers" Parade Boston Streets After a Big "War Meeting."

Under the leadership of General "Rusty" (Feo) White the War Meeting was held last evening exactly as announced in yesterday's issue of THE TECH. At precisely 6.59 the orders were given by Head Bugler Fry to blow the "Fall In." As no other members of the band were then present he executed the command himself. By 7 o'clock the recruits could be seen hastening out of houses and other hiding places.

After a stirring speech by the General, the men formed and marched down Newbury, across Arlington, up Boylston to the Union, back to the square, up Huntington, across Massachusetts avenue, down Boylston, and across Fairfield to the starting place. Several of the various placards were: "Tech Is Ready," "Remember the Alamo," "To Hell With Huerta," etc.

After a short powwow it was de-

(Continued on Page 3.)

CREW PRACTICE

List of Men Who Must Report Regularly for Practice.

For the first time this week the crew was favored with smooth water for its practice. The men took advantage of the favorable conditions and all the first and second crew men had long workouts. As announced yesterday, the time of the races is not far away and the crews must have the necessary practice of rowing together. The list of the names of the men who must report in the afternoon stated is again printed. They are as follows: Seniors, Affel, Short, Freeman, Upham, Todd and Karns on Monday, Thursday and Saturday; Juniors, Howkins, Mumford, Sabin, Sifton and Anderson on Tuesday, Friday and Saturday; Sophomores, MacRae, Hill, Duff, Bousquet, Berkowitz, Makepeace, Gaus, Wellington, Lucas and Harrington on Monday, Wednesday, Friday and Saturday; and Freshmen, MacDonald, Lee, Toye, Dunning, Beaver, Tuttle, Bertelsen, Brooks, Ferguson, Canby, Demond, Salt and Gillespie on Monday, Tuesday, Thursday, Friday and Saturday.

MUSICAL CLUB CONCERT

The combined Musical Clubs will give a concert at Hingham at 8 o'clock this evening. The concert will be followed by a dance to which all the members are invited. The men will leave the South Station at 6.16 on a special car which will be attached to the regular train.

CROWELL ELECTED WRESTLING CAPTAIN

Morse Is Manager—Dean Burton Congratulated Men on Fine Showing.

That the wrestling Team has for the last two seasons been the most successful athletic team representing the Institute, was the statement made by Dean Burton at the Wrestling Banquet given last evening at the Union. He went on to say that the greatest of praise was due to the wrestlers and especially those who were instrumental in first getting the sport under way. The Dean expressed his opinion that the cleanest and most wholesome fellows in any school were to be found interested in athletics and that this fact was no where more noticeable than in the case of the Wrestling Team. Not only does wrestling develop the whole body more than any other form of athletics, said the speaker, but it gives a man a certain confidence when in contact with his fellowmen which nothing else can approach. Dean Burton closed by offering his most sincere congratulations to a team which had won the Eastern interscholastic Wrestling Championship for two consecutive seasons.

Following the Dean, Captain Kelly, Manager S. Martin, Treat, Blodgett, Loc, and Captain Hoffman of the Freshman Squad spoke of the success of the past season and prospects of the coming year. A report of the state of the Team's finances was made and it was also announced that a new mat has been procured for

(Continued on Page 4)

FACULTY NOTICE

Mr. Smith's Monday Freshman English class will meet next Monday.

CALENDAR

Saturday, April 25, 1914.

SATURDAY APRIL 25, 1914.

The objection to anonymous contributions expressed in a communication in this issue is in the main justified; the withholding of the author's name does detract from the weight of his argument. On the other hand, his name is always known to the proper authorities and can ordinarily be ascertained in case of necessity. Modesty, we think, not unwillingness to stand by their statements, prompts the great majority of anonymous communicants.

While yesterday's critic of Technique did undoubtedly take too seriously a humorous part of the book and a part printed expressly as an echo of times past, we think his objections nevertheless have some foundation. Readers of the book do not stop to consider the way in which each page is intended to be taken; they take each unit as it stands, and the song and cartoons referred to certainly give the impression of caustic criticisms of the President's policy.

The critic takes a viewpoint which is out of all reason in his intimations that Technique "confuses the present cooperation with regrettable negotiations of the dim past." or that it seeks deliberately to express dissatisfaction with the cooperative agreement; also in his suggestions for censorship of future Techniques. We

ENGINEERING AND SCIENTIFIC NOTES

Mercury Turbines.

In a paper recently read before the American Institute of Electrical Engineers, there were described some interesting experiments to test the feasibility of employing mercury as the working agent in heat engines. Mercury boils under one atmosphere at a temperature of 677 deg. Fahr. and in a 28 inch vacuum it will condense at 455 deg. Fahr. It is proposed to use the mercury vapor to drive a turbine and to utilize the heat from the exhaust in generating steam to drive a steam turbine. Despite the poisonous character of the vapor and the comparatively high cost of mercury, the liquid has several physical properties admirably suited for this purpose. Its high temperature is associated with very moderate pressure, it is clean in use and does not wet nor corrode the blades, while its high density makes possible a very moderate blade speed, —an important factor. As to the question of cost, it has been estimated that the mercury would not cost more than a maximum of ten dollars per kilowatt output and, of course, the same mercury could be used repeatedly. It is claimed that a tandem mercury and steam plant would show a gain of 44 per cent on output per pound of fuel. A boiler of considerable size is now under construction in order to test such a plant on a large scale.

Underground Wires.

Another step towards the safety and surety of railroad operation during storms has been taken by the Pennsylvania Railroad in a recent decision to run its telegraph, telephone, and signal wires in conduits underground. The move is the result of the havoc with the overhead wires produced by a recent storm which severely crippled the service.

Tar as Fuel.

The Indiana Steel Company has adopted the economical procedure of utilizing, as the fuel of some of its open hearth furnaces, the tar which is obtained as a byproduct of their coke ovens. The tar is heated until quite fluid and then ejected under the boilers with a blast of steam to atomize the tar. It burns much like a jet of oil and steam.

DRILL HOURS CHANGED

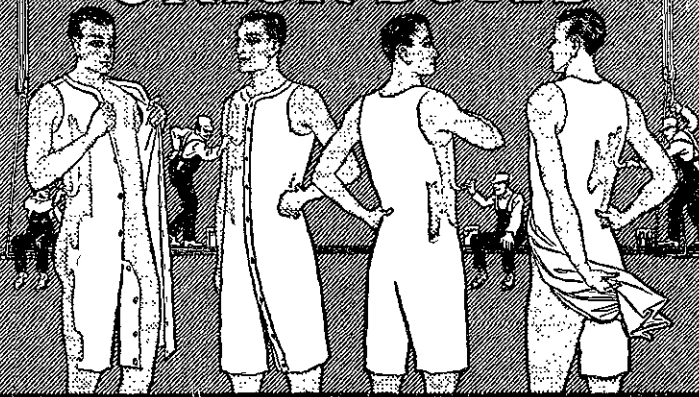

Next week the Regiment will have special drill to prepare for the inspection, which will be held May 6. The regular Monday battalion will drill Monday from 2 to 3, the whole regiment will drill Wednesday from 3 to 5, and the Thursday battalion will work as formerly, from 2 to 3 Thursday. All men who, since the 2-hour drill on Wednesdays began, have been transferred to another battalion, will go with their old companies on the Monday or Thursday drill.

are, however, inclined to think with him that an error of judgment was committed.

A MIERE VENEIER

OLUS

UNION SUITS

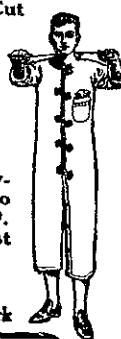

Simplicity—The Secret of OLUS Superiority

THE first layer of comfort is your underwear. It's an unbroken, smooth-setting layer if it's an Olus Loose-Fitting Coat Cut Union Suit with closed back and permanently closed crotch, protecting the body at every point. Only one thickness of cloth anywhere. Made in sixteen plain and fancy woven fabrics, also plain and mesh knitted. **Price \$1.00 to \$3.00.**

OLUS one-piece PAJAMA is made on the same principle as the OLUS Union Suit—coat cut, closed crotch, closed back, and only one layer of material anywhere.

Being one-piece, there is no working-up, sliding-down annoyance—no string nuisance because OLUS PAJAMAS have no strings to tighten or come loose. **Prices \$1.50 to \$8.50.** When you buy Underwear or Pajamas, think of OLUS, insist on OLUS at your dealer.

Important Booklet on Request.
To Dealers—Your Wholesale Distributor Carries OLUS.

NATURAL HISTORY SOCIETIES MEETING

Exhibit of Twenty-five Museums at Boston Museum—Elect Officers Today.

The annual meeting of the New England Federation of Natural History Societies, which was started yesterday, is being continued today, at the house of the Boston Society of Natural History, corner of Boylston and Berkeley streets.

All yesterday there was the customary exhibition, to which the twenty-five or more societies contributed. Last evening was devoted to a demonstration of exhibits and to short papers, describing the work of the different associations.

This morning at ten o'clock will be the election of officers, roll call, and reading of reports, together with a continuation of the exhibition. In the afternoon various trips to points of interest to natural history will be taken.

The field meeting of the Federation is set for the first week in July, with headquarters at the Glen House, from which the fauna and flora of the gulfs and slopes of the Presidential Range, in the White Mountains, will be the objects of study for a week.

The president of the Federation is John Ritchie, Jr.; its secretary, Professor J. H. Emerton and its treasurer, Miss Delia I. Griffin, curator of the Children's Museum at Pine Bank, Jamaica Pond. The Federation cordially invites those interested to its exhibition and its meetings.

COMMUNICATION

To the Editor of THE TECH,

The numerous anonymous communications to THE TECH printed this year seem to show that their authors lack the courage to stand sponsor to their convictions. When a man attacks, as in today's THE TECH, an Institute activity, whether his sentiments are good or bad, his attack is valueless in the eyes of the student body, when no recognized name is attached.

In the arguments, that an anonymous contributor arouses, it is easy and perhaps fairly correct, to call him a sneak, for his work, good or bad, is done underhandedly. Surely a contributor to THE TECH has no cause to fear that he will not be given a square deal by the student body.

Yours truly,
F. B. HASTIE,
A. C. LIEBER, Jr.

ELECTRICALS TO DINE

Next Tuesday at 6.15 the members of the Electrical Engineering Society will enjoy the annual dinner given by Prof. Jackson. It is understood, however, that the payment of dues to the Society is a condition imposed upon those desirous of attending. The banquet will be held at the Engineers Club, and to add to the interest of the occasion, Pres. Rice of the General Electric Company will address the gathering.

DESIGNER OF MUSEUM ADDRESSES STUDENTS

Noted Architect Begins Series of Talks on Landscape Architecture.

Mr. Guy Lowell, '94, architect, designer of the Boston Museum of Fine Arts and winner of the competition for the New York County Court House with his circular building which caused so much comment at the time, Wednesday delivered the first of a series of three lectures on landscape architecture to the students of the architectural department. He said that the architect must possess and express two main qualities: the power to invent or conceive, and the power to arrange or compose. He said that the painter could paint what he would and the sculptor chisel as his fancy led him, but that the architect always had a problem to solve, that he always had to make his ideas conform to the limitations of his problem.

The problem of the architect, according to Mr. Lowell, is to reconcile the practical to the beautiful where possible, and he cited instances where the very practical nature of things sometimes made them beautiful. To his idea of architecture he traced the influence of the surroundings upon the design and showed how the selection of the site for the house was the first great question to be solved. So broad was the field of landscape architecture, he said, that his lectures would only deal with the gardening connected with the country house.

TECH "ARMY" PARADES

(Continued from Page 1.)

ecided to go down to the Common and see that the crowd kept in order during the speeches. Everyone reached a good position near the bandstand but after hearing Mayor Curley's talk the numbers became considerably reduced in spite of officers' attempts to quell the mutiny. The deserters were later reorganized through the efficiency of a wandering marine and the command reformed with the addition of recruits from South Boston and Chelsea.

Further drill announcements will be made in this paper. The official roster of the regiment follows:

- General "Rusty" White.
- Colonel P. H. Taylor.
- Major L. H. Bailey.
- Chief Bugler and Drum Major Pro Tem C. W. Fry.
- Snare Drums, C. A. Coleman and Ray Walters.
- Bass Drums, A. D. Baker and H. O. Whitney.
- Banjo, F. E. Dunn.
- Bugle, G. H. Petit.
- Color Sergeant, H. E. Lobdell.
- Color Guard, L. S. Wright and E. K. Briggs.

Others desiring their names printed kindly hand them in today. Captains and lieutenants will kindly refrain from this, however, as they were too numerous to mention.

Velvet

THE SMOOTHEST TOBACCO

LUCKY is the Junior who has found Velvet! The tender middle leaf—hung up in the warehouse for over two years—maturing—getting rid of the harshness of the green leaf—mellowed to a point where the bite has dropped out—and where the flavor is good and smooth. That's Velvet. Numerous red tins of Velvet decorate the 5 foot shelf—it's part of a liberal education—the best in the land—this Velvet. Some friend, or ten cents at any dealer's will give you the pleasure.

NEW BULLETIN BOARD

**Elaborate Device Will Prevent
Conflicting Dates.**

There is now, at the first landing of the stairs in the Union, a bulletin board for the student activities. There will be recorded in advance all those affairs which concern the whole or any part of the student body.

Up to this time there has been little visible evidence of the good to be derived by filling out a card and leaving it at the Cage for any student happening. As a result of this seeming useless procedure, many who did not realize fully the importance of recording events have paid no attention to the requests of the Union Committee, with the result that THE TECH has had to continually call the attention of the school and the Institute Committee to the fact that there was more than one event taking place on the same night which involved the interest of the whole or the greater part of the school. Now that this board has been provided and ample provision made for the accurate and immediate recording of all events, there will no longer be an opportunity for conflicting dates and evident mismanagement in the running of student entertainments. Beside the board there is a box in which all announcements are to be deposited.

CROWELL ELECTED
(Continued from Page 1.)

wrestling, largely through the efforts of Dean Burton. The possibility of hanging a picture of this year's Championship Team in the Union, was suggested and a committee of three, namely Treat, Durkee and Blodgett, was appointed to look after this matter.

The business of electing next year's officers was then taken up, after Kelly had declared that under no circumstances would he accept the position of captain for a second time. As a result of a vote by ballot, Harold R. Crowell of Los Angeles, Cal., was elected captain. Crowell has been a valuable member of the Wrestling Team for the last two years, working in the heavy-weight class. He was editor-in-chief of the 1915 Technique and is a D. K. E. man.

Henry G. Morse '16, was elected manager for the coming season. He resides in Dorchester, Mass., and has been assistant manager of the Team for the last year. He worked in the 145-pound class.

The dinner served was most enjoyable and by the quantities of food consumed everybody evidently got their money's worth. After the dinner the men gathered about the piano and made the room ring to the tunes of Tech songs. Before the meeting adjourned, cheers were given for Kelly, S.-Martin, Treat, Means, Morse, Team and Technology.

MUSICAL CLUBS

Members of the Musical Clubs who have not yet obtained their pictures of the Clubs may do so by applying at the office in the Union between 1.30 and 2.00 p. m. this noon.

COMMUNICATION

Editor of THE TECH

Dear Sir,
In answer to the communication appearing in your issue of the twenty-fourth I should like to state that the individual writing either knows little of Tech or else is not particularly gifted with that quality called, a sense of humor. When a drawing appears in a book and has stamped over it a picture which shows that it is in the joke department of the publication, it is not customary, that is for the average individual, to assume that it was meant to be taken seriously. The drawing referred to especially was photographed from the blackboard in one of the rooms of the Institute where it was placed as a joke to cause merriment in the department. There are, nevertheless those individuals who find life such a tough proposition that to smile is difficult and such persons are likely to be pained by those things which cause mirth for the majority. For such individuals there is little or no remedy and it were better that they just glued those pages of the book together and passed along their weary little way.

As for the poem, every Tech man who has really taken any great interest in Tech affairs and who has attended the all-Technology events has without doubt heard the poem recited time and time again. It has on all occasions been recited by a man highly respected by the student body, and has at all times been well received. This happens to be the first time that the poem was ever written down. All previous attempts to secure the poem in writing were fruitless, until it was realized that in the present instance it afforded a great opportunity to contrast the attitude of the past students with the view of the matter taken at present. To bring out the idea that the ideas expressed in the verses were not those of the present the poem was called "A SONG OF THE OLD DAYS". It was inferred that everyone reading the title would naturally reach the conclusion that when an idea was called old it did not imply that that idea was the latest idea on the subject. In fact if the

reader will but note the last drawing in the series relating the history of Technology, he will there find this difference between the new and the old idea of union clearly brought out. It may be however that our communicant was a member of a typical old Boston family and if such were the case, then without doubt the very fact that the verse was called old would mean that it was the very most appropriate thing to apply to the present, for to such that which is new is defiling in its nature. If such be our informer's fate, he is again hopelessly lost and it were really better that he return the book than be further pained by having it in his possession.

Yours truly,
O. R. F.

**CASSELMAN HEAD
OF RIFLE CLUB**

**Haslam Wins Re-entry Match—
—Club Shoots at Walnut Hill
This Afternoon.**

At a meeting of the Rifle Club held yesterday noon in 21 Rogers, E. J. Casselman was elected President to succeed G. G. Haslam, who resigned in order to give more time to studies. A new constitution, differing in a few minor respects from the old one, was adopted. The prospects for the present outdoor season were shown to be the finest in the history of the Club.

The results of the re-entry match for the pistol prize were announced, G. G. Haslam winning the pistol with a score of 97. Dunn was second with 96, and Macdonald third with 94.

Today the entire squad will go to Walnut Hill, leaving the North Station at 2 o'clock. Orders for rifles may be obtained from E. J. Casselman. It is hoped that all the men will take advantage of this opportunity to spend an enjoyable afternoon as well as to get good practice.
