NOTED OFFICIALS FOR TRACK MEET

Well Known Athletic Men To Be Judges for Meet With Holy Cross.

In the list of officials that have been secured for the M. I. T.-Holy Cross meet, there are many men who are famous in the athletic world, either through their connection as managers of various teams or through their athletic ability. The complete list is as follows:—

Referee:

D. S. Alder, Brookline Gymnasium Association.

Starter:

J. R. Ryder, B. A. A.

Judges-at-the-finish:

W. C. Prout, I. A. A. A.

G. V. Brown, B. A. A.

R. C. Floyd, H. A. A.

J. F. Conway, H. C. A. A.

Timers:

H. O. von Schuchman, B. A. A.

A. J. Lill, Pres. A. A. U.

R. Steinert, D. C. A. A.

C. H. Carter, B. A. A.

Chief Field Judge:

G. B. Billings, B. A. A.

Clerk of the Course:

B. B. Osthus, C. A. A. A.

Asst. Clerk of the Course:

E. K. Briggs, 1917.

J. N. Uhlinger, 1916.

Chief Marshal:

J. M. White, Mgr. M. I. T. Track Team, 1913.

Marshals:

A. C. Dorrance, 1914.

D. L. Sutherland, 1914.

Field Judges:

High Jump—H. Barwise, B. A. A.

Shot Put—F. X. McGrath.

Hammer and Discus—T. J. Flaherty, H. C. A. A.

Broad Jump—Carl Gram, B. A. A.

Pole Vault—J. Frank Facey.

Measurers:

SOPHS PLAY TODAY

Boston English High Expected To Put Up Stiff Game.

The Sophomore baseball team goes up against Boston English High this afternoon at the Field at four o'clock. Several shifts have been made in the line-up of the Sophomores and will be tried out today and may be used, if successful, against the Freshmen in the next game of the interclass series. Today's battery will be Lovejoy in the box with Guething behind the bat. This will be Guething's first tryout and it is hoped that it will strengthen the weak spot in the team. Tapley will cover shortstop and Merritt will be shifted to third sack. Holmbeig, Krigger and Ross will hold down the field positions. The remainder of the line-up will be as usual.

CREW CAPTAINS ELECTED YESTERDAY AFTERNOON

Shake-Up in Soph First Boat for the Best—Juniors Well Balanced.

At an interesting crew meeting held yesterday afternoon in the B. A. A. boathouse on the Charles River, the various classes elected crew-captains for the ensuing year. S. C. Dunning, who rows at two, was elected from the Freshman class. The Juniors elected C. V. Mumford, who was stroke of last year's crew, and who now fills the position of stroke of the present Junior boat. S. Ross Berkowitz, stroke of last year's Freshman crew, and stroke of the present Sophomore boat, received the captainship of the 1916 crew. Although the three other classes elected their class captains, the Seniors did not follow suit.

In a race between the two Sopho-

(Continued on Page Four)

INSPECTION OF CADETS

Efficiency of Regiment To Be Judged by Army Officer.

Yesterday's drill was the last before the Government inspection, which comes next Wednesday. At that time the Cadet Corps will be reviewed and inspected by Capt. S. J. B. Schindel, of the General Staff of the army. The standing of the Institute in military instruction will be based upon his report.

All men who have not been permanently excused from all drill by the Faculty are expected to be present in uniform next Wednesday. Those having physical disability will not be obliged to take part in the drill, but they must be present, unless actually too sick to attend classes that day. A doctor's certificate of disability will not be accepted as excuse for absence. Those who are too ill to be present must submit an excuse the same day.

The inspecting officer will observe the drill of the men, and will also conduct a regular inspection of each individual in the corps. He will probably ask questions on the parts of the rifle, its range, weight, etc.

On Friday evening, May 15, the annual prize drill of the Regiment will be held. Each company will drill separately, and a medal will be awarded to the captain of the best one. The members of the winning company will be given a dinner. There will also be an individual prize drill in the manual of arms. Three men chosen from each company will compete. Medals will be given for first and second places. Tickets to the drill may be had from the officers of the corps, or from the first sergeants, at twenty-five cents each.

OFFICERS CHOSEN FOR NEXT YEAR'S FRESHMEN

First Officers Under New Constitution—Point Committee Reports at Meeting.

At the meeting of the Institute Committee yesterday the following men were appointed from the present Sophomore class to act as temporary officers for the class of 1918:

Chairman, C. W. Loomis;
Treasurer, K. M. Sully;
Football manager, P. H. Buxton;
Track manager, J. P. Uhlinger;
Tug-of-War manager, H. L. Bickford.

Loomis is president of the Sophomore class and editor-in-chief of *Technique* 1916. Sully was manager of the 1916 tug-of-war and Uhlinger and Buxton managed the Sophomore track and football teams, respectively, this past season. Bickford was manager of the Freshman 1916 tug-of-war.

The point system committee reported the following ratings of the *Technology* Monthly officers:

Editor-in-chief, Managing editor, Business manager, 8 points; Advertising manager, Circulation manager, Treasurer, and Feature editor, 6 points; Assistant Editor-in-chief, Assistant Managing editor, 5 points; Exchange editor, 3 points.

The Committee decided to remove E. B. Goodell from the Walker Memorial Committee for neglecting to attend meetings and do his share of the work. G. R. Urquhart was appointed to fill the vacancy.

The newly elected officers of the Mechanical Eng. Society were approved.

C. W. Howlett and J. M. White were absent. The meeting adjourned at 6.00.

COMMUNICATION

To the Editor of THE TECH,
Dear Sir:

As a visitor at the Institute Committee meeting yesterday I was very much astounded at the way things were carried on. The main business of the meeting was the election of temporary officers for the Freshman class. This election started out a new system, the main object of which, it seemed to me, was to eliminate the rather objectionable character of Freshman elections as formerly conducted. So far as I could see the present system is far worse than was the old. Little or no interest was shown in the elections. Just after listening to a report from the point system committee, a man who already holds an office which according to the point system when correctly applied, did not entitle him to hold any other office, was elected to a high position. This same gentleman advanced as

PLANS SUBMITTED FOR TECH "POP" CONCERT

Acceptance of Senior Class To Be Accompanied with More Ceremony This Year.

Plans for the Tech "Pop" concert have been presented to the Alumni Council which indicate that the festival will be quite a little different from those of past years. Something more will be done to give the evening a distinctive character in the eyes of Tech men. Last year the experiment was made of transferring the activities to the vast expanses of Mechanics Hall, but the committee has decided that Symphony Hall is much more cosy for the purpose. Following a concert during which the "grads" will be busy greeting one another, the stage will be cleared, and the acceptance of the class of '14, graduated that afternoon, will be more formal than in past years, and it may be said, more in the nature of an initiation, although mystery surrounds the precise nature of the ceremonies. There will be other features in this part of the program. The chairman of the committee is George B. Glidden, '91, under whose management the recent musical events of the Alumni have been given. The date of the Tech "Pop" is Tuesday evening, June 9, and the graduates take possession of the entire hall.

SUFFRAGE CONVOCATION

There will be a Woman Suffrage Convocation in Huntington Hall today from 1.30 to 2 under the auspices of the M. I. T. Forum. The purpose of the Convocation will be to get as many Institute men as possible to join in the Suffragette Parade on May 2nd. The principal speaker will be Mrs. Ernest C. Moore, the wife of Professor Moore of Harvard.

1917 EXECUTIVE BOARD

At 4.00 o'clock today in the Union, there will be a meeting of the Freshman Executive Board. All members are requested to be present, as matters of importance in regard to the Freshman Track Team will be taken up.

WEATHER

For Boston and Vicinity: Fair, continues cool, tonight and Friday; moderate northerly winds.

CALENDAR

Friday, May 1, 1914.

1.30—Suffragist Convocation. Huntington Hall.

4.00—1917 Executive Board.

Saturday, May 2, 1914.

2.30—Holy Cross Track Meet. Field.

THE TECH

Entered as second-class matter, Sept. 15, 1911, at the postoffice at Boston, Mass., under the act of Congress of March 3, 1879.

Published daily, except Sunday, during the college year by students of the Massachusetts Institute of Technology.

IN CHARGE OF THIS ISSUE

Editors: H. P. Gray, '16; E. F. Hewins, '16.

Assistants: J. G. Fairfield, '16; A. D. Nute, '17; N. E. Tourtellotte, '17.

On rather short notice there has been called a meeting to be held in Huntington Hall in the interest of equal suffrage. Other Eastern Colleges have gone so far as to form equal suffrage clubs and Tech should not be backward in proving itself abreast of the times. Regardless of a man's belief on the subject, a spirit of fair play should make him want to attend the meeting this noon and hear what the speakers have to say. The success attained by the suffrage party thus far in Massachusetts gives promise of final victory for the cause and it were a shame if an institution like Tech should not be interested enough in the matter to take an active part with the other institutions of the community. The spirit of open discussion of all up-to-date topics is a spirit to be encouraged and one which is certainly indicative of Tech and its progressive ideals.

Yesterday by the action of the Institute Committee there was set in operation that machinery which in theory eliminates all sense of unfairness in the selection of those men who have charge of the Freshman

COMMUNICATION (Continued from Page One)

sufficient reason for non-election in the case of another man the fact that he held a position with even fewer points than held in his own case. The matter of nomination seemed to have been assumed by one individual, there in but one case being three nominees, in one or two of the others two, and in some only one. There seemed to be a deplorable tendency to establish "precedents" which would arbitrarily make certain men the only ones eligible for office, which system would be entirely destructive of any sense of fairness, and certainly be most deplorable as it would merely sanction under the name of the Institute Committee the matter of election without the consent of the student body, the very thing which it seemed that this action of the committee was supposed to eliminate. Yet, according to one of the gentlemen who spoke, the original intention of the ruling was to make it possible to do this grand shifting act, where, with the least amount of exertion and the appearance of propriety the old practices could be indulged in. The Institute Committee is a fine thing, (in theory), but in action it is a most peculiar affair, and certainly as an institution supposed to represent the student body and to act for them, some of their doings appear most weird. I should advise more men to visit some of the meetings and get better acquainted with the way that their all powerful representatives conduct affairs. Their meetings are both interesting and instructive, and it might be possible that with greater interest in the Institute Committee the men when voting for the men on that committee would be sure that they were choosing men who had the interest of the class as a whole at heart and did not merely consider the question of their own personal advancement or the interests of an association of which they happened to be a member.

Yours truly,
A. VISITOR.

class. Such a policy is in keeping with the attitude of advance that has been expressed throughout all the Institute this year. We say in theory, for there seemed to be a decided lack of interest displayed by the members of the committee in the work which they had at hand, lack of thorough discussion of candidates and possibilities, and the apparent attempt to establish certain arbitrary elections as "precedents." These elections do, however, afford the incoming class an opportunity to get acquainted with their own men before having to vote for them, and thus eliminates the great element of chance which seemed in former years to place men in office because of their affiliations rather than their ability. This gives the future classes an opportunity to play the game square and it is the appreciation of this sense of fairness on the part of the Institute Committee that is to be commended.

ENGINEERING AND SCIENTIFIC NOTES

A Single Boat Davit.

Many catastrophes on the sea have illustrated the inefficiency and danger of the system of lowering life boats by a system of two davits. The two tackles being totally independent, it is no easy matter to lower both at the same rate during a confusion and thus keep the keel of the boat level and to quickly and surely disengage the tackle the instant the water is reached. With a view of eliminating these dangers, a Glasgow shipmaster has designed a single davit to handle a 28-foot boat weighing one and three-quarters tons. The davit has a swivel bearing on the promenade deck and passes through a gland to the boat deck. The lifeboat is hoisted by a chain, which if desired may be attached to an electric motor, and which is fitted with an automatic device for insuring a level keel and disengagement as soon as the water is reached. Two men can lower a boat in fifty seconds. No hauling is necessary and no fouling is possible. This new davit has been subjected to exhaustive tests by the British Board of Trade, and has been given a certificate of approval for passenger vessels.

American Radium.

A chemical manufacturing company of Pittsburg has just announced its manufacture and sale of the first pure radium salt produced in America. The amount was 133 milligrams of pure radium element in the form of anhydrous radium chloride. At \$120,000 a gram, this is a very respectable start for the new industry. The salt was extracted from Colorado carnotite deposits which are considered by the United States Bureau of Mines to be the largest deposits of radium ores in the world.

Opening of the Canal.

According to the latest reports, Col. Goethals announces that the Panama Canal will be opened for commercial vessels about July first unless unforeseen difficulties arise. He states that the Atlantic fortifications are about completed while those on the Pacific are about two-thirds finished.

LARGE GATHERING OF FRESHMEN ADVISERS

Dean Burton and Talbot Give Short Addresses Outlining Future Plans.

Over sixty men handed in their names at the meeting of the T. C. A. yesterday noon signifying their willingness to act as advisers to new students next year. The aim of the Association is to have 100 such advisers, and to extend the work beyond that already done.

Dean Burton spoke briefly at the meeting, expressing his hearty approval of the plans and urging the men present to do all in their power to make the way of the new student smooth during the registration period. He said that the men who did this work were of valuable assistance. The Dean invited advisers to procure as many copies of "Concerning M. I. T." as they were able to use and to send them to the new students assigned to them and any other sub-Freshmen whom they thought had any possible chance of coming to the Institute.

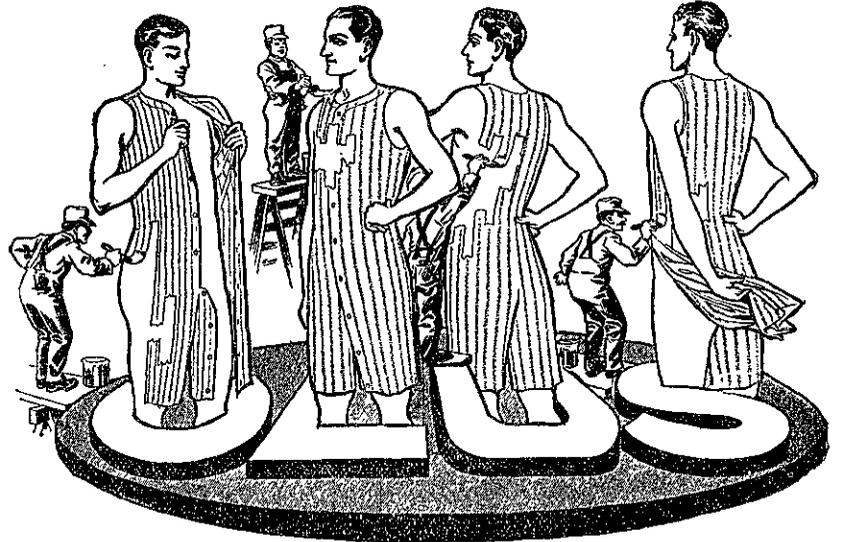

Mr. Talbot, General Secretary of the T. C. A., then explained some of the details of the work. It was important, he said, that those in charge of sending out the lists have the summer addresses of all the advisers. Lists of Freshmen are sent to the advisers the latter part of July, with a brief letter explaining what is expected. Usually three or four Freshmen will be assigned to each man.

If any men wish to help in this work and have not handed in their names to the T. C. A. they should do so at once. They may leave their names and summer addresses at the T. C. A. office or send them by mail to L. R. Talbot.

Advisers having friends who expect to enter the Institute next September, may give the names to the T. C. A. Secretary, who will as far as possible follow out the suggestions made.

A new plan will be started next year in addition to the regular work of helping Freshmen in registration. Men from each of the more important courses will be appointed to confer with students entering from other colleges and technical schools, especially in regard to getting work signed off and securing advanced standing.

A Mere Veneer for a Union Suit

Did you ever see a Union Suit that was *Coat Cut*, with actual closed crotch and a closed back? Well, here's one, and the **only** one—

PAT. JAN. 5TH 1909

REG. U.S. PAT. OFF.

COAT CUT UNION SUITS

OLUS Union Suits *open all the way down*—have *no flaps*, no bunching and *only one thickness* of material anywhere—no opening in back, fit perfectly *from shoulder to crotch*—all fabrics, including knitted.

Price from \$1.00 to \$3.00. At your dealer. **Important Booklet on request.**

OLUS one-piece PAJAMAS for lounging, resting and comfortable sleep. Made on the same principle as OLUS Union Suits. No strings to tighten or come loose. **\$1.50 to \$8.50.** To Dealers—Your Wholesale Distributor Carries OLUS.

ARCH. ENGINEERS HEAR ANIMATED DISCUSSION

Experts Talk on Re-enforced Concrete Construction at Smoker.

Last evening at eight o'clock at the Smoker of the Architectural Engineering Society there was an interesting discussion on the use of Flat Slabs in Re-enforced Concrete Construction. Mr. C. H. Hopkins, ex-president of the Society, introduced Mr. Angus B. MacMillan of the Aberthaw Construction Company, who read a paper on the methods his firm uses in designing this method of building construction. Slides of the Pierce Arrow Motor Car Company building at Buffalo, the Gray and Davis building in Cambridge, and other plants erected by the Aberthaw Company were shown.

Mr. J. R. Nichols of Monkson and Johnson, Architects and Engineers, gave an explanation of his ideas on the subject. Following this he led the general discussion of the matter. After the discussion Mr. Burtis S. Brown, Consulting Engineer, described a number of tests recently made at Worcester, Mass. Approximately twenty-five Boston engineers and many Harvard men were present, and intense interest was displayed throughout both talks and especially in the discussion. After the meeting a "feed" was enjoyed. This was the final meeting of the Society this year.

CREW CAPTAINS ELECTED
(Continued from Page One)

more boats yesterday the first crew was beaten decisively by the second. Following the race, a shake-up in the first crew took place. MacRae was shifted from three to bow. Fuller was taken from the second boat into the first, Bousquet went back to two, and Hill was placed in stroke in the second crew. The first crew at present is as follows: MacRae, bow; Bousquet, two; Fuller, three; Berkowitz, stroke. The second boat is rowing with Hill at stroke, Duff at three, Stocking at two, and Wellington at bow.

All the crews were on the river yesterday, and of the four class crews the Junior and Freshman boats showed up remarkably well. The Seniors, after a long row over the course, arrived at the boat-house in very good form. Early in the afternoon the Junior boat went on the river with the following men: Mumford, stroke; Sifton, three; Howkins, two; Sabin, bow. Later, the places of Sifton and Sabin were taken by Plummer and Jasionowski, in an en-

J. R. Ryder, G. V. Brown and G. B. Billings are leading men in the B. A. A. Ryder is the coach of the track team, Brown is the promoter and manager of the various athletic events run off by the club, and Billings is the head of the athletic committee. Barwise, Gram, Powers and Hedlund are some of the athletes from the club. Gram is also an old Tech man, and is the present holder of the N. E. I. A. A. record in the 220-yard dash. Powers has just recently returned from a tour of Australia.

A. J. Lill is the President of the Amateur Athletic Union. W. C. Proun is a former captain of the Brown track team. B. B. Osthus is well known to all track men through his connection with the Coast Artillery games.

deavor to discover the best possible combination.

The make-up of the Freshman crew is still doubtful, as every combination used seems to work well. The present combination with MacDonald at stroke, Brooks or Bertlesen at three, Captain Dunning at two, Toye at bow, and Canby or Demond, coxswain, seems to prove as successful as any. The Senior boat as it went on the river yesterday is as follows: Freeman, stroke; Affel, three; Stocking, two; Todt, bow.
