INVITE STUDENTS TO MARCH IN PARADE

Speakers at Convocation Want Tech Men to March With Suffragists.

The suffragist convocation was well attended by the students. Two ladies spoke about Woman Suffrage in general and the parade in particular, and the enthusiasm of the men was shown by a vigorous "Regular M. I. T." at the end of the meeting. Maurice Paris, '14, introduced the speakers. He described Mrs. L. J. Johnson, who spoke first, as the wife of a Harvard professor, and hence, according to the new agreement, of a Tech professor also. Mrs. Johnson told of the need of the women's vote. She said that the principal arguments advanced against suffrage votes. She said that the principal arguments advanced against suffrage are the same as those formerly employed against the higher education of women.

TECH MEETS HOLY CROSS

TODAY AT TECH FIELD

Big Student Cheering Section—Records Likely To Be Lowered—Result In Doubt.

With the weather man predicting fine, clear weather for today, the Tech meet with Holy Cross this afternoon at 2.30 at the Field promises to be a contest worthy to be remembered as the last to be held at the Old Stadium on May 23d next. In the past Technology has triumphed over Brown, Dartmouth, Williams, Wesleyan and W. P. I. at the Field, but the meet today promises to rival all of them in keenness of competition, excellence of performance, and display of enthusiasm. The presence of several stars on the Holy Cross team combined with a well-balanced aggregation in all events, will leave the result in doubt until the very end. From present indications a large percentage of the student body will be present, and from the notices given of the meet by Boston papers there will be a large attendance of outside track fans.

Competition promises to be keen in all events and the result of the meet will hinge on the outcome of several closely contested races. Captain Guething and Lee of Holy Cross will put up a great struggle in the quarter. Lee in the quarter is a strong, powerful runner and is expected to finish with a rush as he did last year at the New Englands and, as mentioned before, he should run close to 1:58 for the mile.

A new option in Highway Engineering is to be offered by the Department of Civil and Sanitary Engineering which will be under the general supervision of Professor Charles M. Spofford, head of that department. The instruction will be given by Professor H. J. Hughes, who comes from Harvard.

The option is related to two kinds of co-operation that are today very much in the public eye. The new work is within one of the departments affected by the recent agreements between Tech and Harvard and it also falls within those lines of working together to which Governor Walsh has recently called attention, whereby the special work or experience of Technology is to be put where it will be of substantial aid to city or commonwealth.

The work will recognize a number of matters, one of them being that much of the money put into roads has been spent inefficiently. This is due largely—politics, of course, being set out of the question—to lack of knowledge. There is need of research all along the line. This need applies to the materials of the pavement, and to the construction and management of vehicles, and there are indeterminate items of great consequence, like the kick of the tire or the suction of the tire, both of which factors are now and important where the life of the road surface is considered.

The Nominating Committee of the Cosmopolitan Club wishes to state that Stewart Keith has withdrawn his name as a candidate for Treasurer of the club. No more nominations have been received for National Chairman. As the nominations close at five o'clock next Monday it is necessary that names should be handed in immediately. The dinner and election will be held in the Union on May 5th.

BIG PARADE

Today, as a Grand Finale to the M. I. T. Cross Meet, there will be a secret Mass Meeting at the corner of Arlington and Boston streets preceding the Grand Suffraget Procession down the latter. The final firecracker which will set the affair in motion will be touched off at 2:30 sharp. This will give everyone ample time to be on hand. Delegations from Wellesley, Simmons and Tech will all be sandwiched in one battalion and it is rumored that Harvard will march in the rear. Veterans of the M. I. T. Cadet Corps will be expected to present the "Hip-Hip" unaccompanied by "Safety First" and "Tech is Ready" will be the slogans of the demonstration.

BIG TRACK MEET THIS AFTERNOON

TO MARCH IN PARADE

TECHNICAL UNIVERSITY TO MARCH IN ПаRADE

WEATHER

For Boston and vicinity: Fair, continued cool today; moderate to fresh northwest winds.

CALENDAR

Saturday, May 2, 1914.

2.30—Holy Cross vs. Tech Track Meet. Field.

5.00—Cosmopolitan Club Nominations Close.

ADVERTISEMENTS

TECH MEETS HOLY CROSS TODAY AT TECH FIELD

BIG TRACK MEET THIS AFTERNOON
The Tech, Boston, Mass., Saturday, May 2, 1914.

COLLEGE NEWS

The Red Head Club at Illinois has received the official sanction of the Council of Administration and is now an established "activity" at the University. The object of this society is "to promote good fellowship among the red heads at Illinois. The membership is limited to Juniors and Seniors. They are expected to pledge several Sophomores before the close of the school year. The pledge ribbon is a brilliant red." The club has petitioned the national organization of Red Heads, Phil Lambda Rho, for a charter.

JOINT BANQUET

The annual joint banquet of the Architectural and Engineering Societies will be held on Friday evening, May 8th, at the Copely Square Hotel. The principal speakers will be Ralph Adams Cram, Supervising Architect of Princeton University and Past President of the Boston Society of Architects; and George F. Swain, '77, Professor of Civil Engineering at the Graduate School of Harvard University. Mr. Cram is also a Fellow of the American Institute of Architects and Professor Swain was formerly the head of Course I at Technology.

A competition has been opened to members of the two societies for a design for the menu cards. All on the Tech. man will receive a free ticket to the banquet.

WELLESLEY SHOW

In response to several inquiries in regard to the Tech Show performance at Wellesley on March 23 for the benefit of the building fund of Wellesley college the manager has announced that approximately $450 was cleared by the performance. The total receipts amounted to about $500 and the expenses $40 dollars.

CREWS PRACTICE DAILY

Freshmen and Sophomore First Crews Are Unchanged.

Four crews, two representing the Sophomores and two the Freshmen, held practice yesterday on the river, and each rowed a distance of four miles. Competition for places in the boats is very close and positions in first crews are still in doubt. All on the Tech men.

Saturdays April 25, 1914.

IN CHARGE OF THIS ISSUE.

Editors: H. N. Stittmore, '16; W. F. Johnson, '17.

Yesterday's communication has aroused a storm of protest from members of the Institute Committee, two of whom have replied in this issue. We reserve the criticism, not because all its statements would hold water, but because the effect of the whole seemed to be reactionary. Its lack of construction is evident, but not therefrom that it is without value. The lack of a reasonable number of nominations was in fact pointed out by the president at the meeting.

SPECIAL NOTICE TO TECH STUDENTS

I am offering a 10\% discount on all orders placed during the season.

DON'T FORGET THE ADDRESS

We make a special effort to win the esteem of Tech men.

L. PINKOS, Tailor.
I'm holding no important office in active work throughout both terms. The work done over the last two years was of the same sort that I did last year. As a member of the student body, I became interested in the Institute Committee as he accuses the Institute Committee of doing. In spite of the obvious injustice of the attack which is on the whole system when correctly applied did not entitle him to hold another office was elected to a high position, as is surely uncalled for. An attack (referring to the point system ratings. If "Visitor" the temporary officers should be given the temporary president had only four or five weeks, are really only advisory and it seems logical that a man who has served as president of his class board could be just the man to fill the place. Again it was suggested that the men who had been managers of their class teams might be the best to be the temporary managers of the respective teams. This, however, did not meet with the approval of the Committee except in the case of the football manager. It was thought that it would be a good plan to elect the past football manager since by the first of May it would be late to get names for the next fall. Work must be started on making out a football schedule in the early spring at the latest and so the election of the past manager was considered a good precedent to set.

Are these precedents dangerous, or is the tendency to establish them durable? I think not. At any rate they are established and I hope that they will be continued.

The Institute Committee is a fine thing, not only in theory but in practice. It has accomplished many great things in the past and it would like to do so. It is a body unique in the field of student governing boards, for it has absolute power (which it wields most wisely and effectively) and is looked upon with respect by almost every undergraduate and by every loyal Technology man. The excellent condition of student activities at the Institute is due to the Committee and the system here is being copied by other colleges throughout the country. I feel, and I think I know the conditions, that there is no single body that does better undergraduate and social conditions, to stimulate interest in activities and to make us all better Technology men, than does the Institute Committee.

Yours sincerely,

ALDEN H. WAITT.

THE TECH, BOSTON, MASS., SATURDAY, MAY 2, 1914.
The result of both hurdles is very much in doubt. Huff was ruled a favorite over Grady in the 130-yard hurdle heat, but our team will know that they play the part of locomotives equally with the men.

The middle and two-mile are not likely to be strenuously contested by Holy Cross, but with the track in excellent condition, due to yesterday's good weather, Benson and Cook should make very good times. In fact Cook is expected by everyone to break the Technology record at the two-mile, as he came within three seconds of the record at Bowdoin when pushed by Higgins and Gue-\n
Women uphold the details of moral life more than men. They are concerned with the rearing of children, and have a vital interest in laws that affect the children, as well as so many laws which affect themselves, but they are not given any voice in the making of those laws. If women were given the vote they would be able to have a voice in things that are of importance to them. They are tired of working by indirect methods, for what they want, and think they deserve the power of direct action.

The speaker showed a map illustrating the progress of woman suffrage, which was quite a surprise to many of the audience, on account of the number of western states which have voted men the vote. She also gave figures showing the number of voters in Illinois, for which she computed that the suffragists have to win over about 230,000 voters to win in that state.

In conclusion, she stated that which women have formerly played in progress to the cause of a railroad train, which are pulled along, but do not pull. Women demand that they play the part of locomotives equally with the men.

Mrs. Groce gave of Washington, D.C., was the next speaker. She described the parade which was held in the city a year ago, when the spectators made so much trouble for the marchers.

That has been recorded by a Technological union since 1908.

The game between the 1916 Barnum team and Boston English High School, scheduled to be played yesterday, was postponed until later in the season.

TECH CALENDARS

Tech calendars, containing pictures of President Macbeth, Athletic Teams and of the proposed buildings across the river, are now for sale at the Cage at fifteen cents each. There are only a few left.
