

THE TECH

VOL. XXXIV. NO. 25.

BOSTON, MASS., SATURDAY, MAY 2, 1914.

PRICE TWO CENTS

INVITE STUDENTS TO MARCH IN PARADE

Speakers at Convocation Want Tech Men to March With Suffragists.

The suffragist convocation was well attended by the students. Two ladies spoke about Woman Suffrage in general and the parade in particular, and the enthusiasm of the men was shown by a vigorous "Regular M. I. T." at the end of the meeting.

Maurice Paris, '14, introduced the speakers. He described Mrs. L. J. Johnson, who spoke first, as the wife of a Harvard professor, and hence, according to the new agreement, of a Tech professor also. Mrs. Johnson told of the need of the women's votes. She said that the principal arguments advanced against suffrage are the same as those formerly employed against the higher education

(Continued on Page 4.)

TECH VS. HOLY CROSS

Tennis Team Plays First Match of Year This Afternoon.

This afternoon at 2.30 the Technology Tennis team will hold its first tournament of the year. The matches will be played at Jarvis Field, Cambridge. The entries from Holy Cross are not available but they will probably send a strong team against Technology. The men who will represent Technology have been playing a high class of tennis and will give a good account of themselves this afternoon. There will be six matches run off, two of doubles and four of singles.

The following men will represent Technology: In the doubles, R. A. Warren and E. G. Polley, E. R. Goodwin and H. R. Stewart; in the singles, E. R. Goodwin, H. R. Stewart, H. V. Fay and R. A. Warren.

BIG PARADE

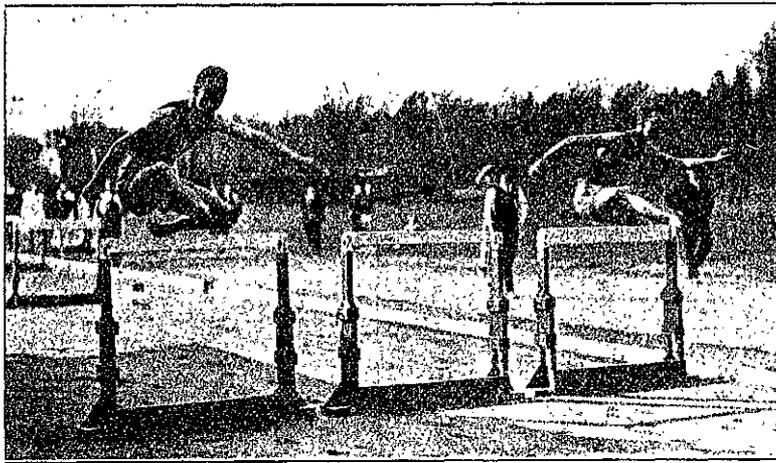

Today, as a Grand Finale to the M. I. T. Holy Cross Meet, there will be a secret Mess Meeting at the corner of Arlington and Beacon streets preceeding the Grand Suffragist Parade down the latter. The final fire-cracker which will set the affair in motion will be touched off at 4.30 sharp. This will give everyone ample time to be on hand. Delegates from Wellesley, Simmons and Tech will all be sandwiched in one battalion and it is rumored that Harvard will march in the rear. Veterans of the M. I. T. Cadet Corps will be expected to officer the feminine suffragettes, and the Technique Band will probably be present to make "Hip-Hip" unnecessary. "Safety First" and "Tech is Ready" will be the slogans of the demonstration.

TECH MEETS HOLY CROSS TODAY AT TECH FIELD

Big Student Cheering Section---Records Likely To Be Lowered---Result In Doubt.

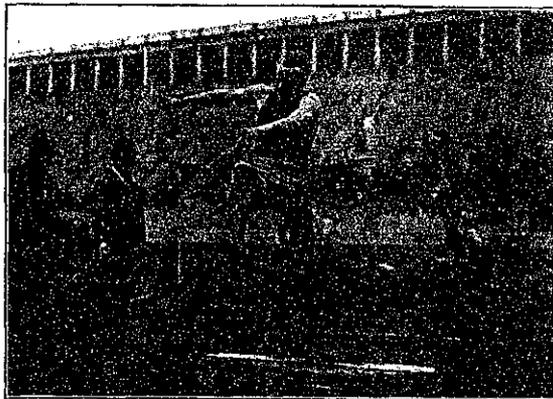

With the weather man predicting fine, clear weather for today, the dual meet with Holy Cross this afternoon at 2.30 at the Field promises to be a contest worthy to be remembered as the last to be held at the Old

al closely contested races. Captain Guething and Lee of Holy Cross will put up a great struggle in the quarter. Lee in the quarter is a strong, powerful runner and is expected to finish with a rush as he did last

A. B. CURTIS, '15

T. H. HUFF, '15

C. E. FOX, '14

Three men who will place for Tech Today

Field. In the past Technology has triumphed over Brown, Dartmouth, Williams, Wesleyan and W. P. I. at the Field, but the meet today promises to rival all of them in keenness of competition, excellence of performance and display of enthusiasm. The presence of several stars on the Holy Cross team combined with a well-balanced aggregation in all events, will leave the result in doubt until the very end. From present indications a large percentage of the student body will be present, and from the notices given of the meet by Boston papers there will be a large attendance of outside track fans.

Competition promises to be keen in all events and the result of the meet will hinge on the outcome of sever-

year at the New England Intercollegiate at the Stadium when he nosed out Guething for third place. The result of this race will be taken by the New England colleges as a good indication of the outcome of the quarter at the Stadium on May 23d next. In the half mile another close race is looked for. Higgins of Holy Cross finished a close second to Taber last year at the New Englands and, as he is in fine form from relay running, he should run close to 1:58 for the distance. Higgins is the man whom everyone expects to be the New England champion this year in this event. C. T. Guething will run in this event, however, and from

(Continued on Page 4.)

HIGHWAY ENGINEERING A COURSE I OPTION

Will Be Taught by Prof. H. J. Hughes of Harvard University.

A new option in Highway Engineering is to be offered by the Department of Civil and Sanitary Engineering which will be under the general supervision of Professor Charles M. Spofford, head of that department, while the instruction will be given by Professor H. J. Hughes, who comes from Harvard.

The option is related to two kinds of co-operation that are today very much in the public eye. The new work is within one of the departments affected by the recent agreements between Tech and Harvard and it also falls within those lines of working together to which Governor Walsh has recently called attention, whereby the special work or experience of Technology is to be put where it will be of substantial aid to city or commonwealth.

The work will recognize a number of matters, one of them being that much of the money put into roads has been spent inefficiently. This is due largely—politics, of course, being set out of the question—to lack of knowledge. There is need of research all along the line. This need applies to the materials of the pavement, and to the construction and management of vehicles, and there are indeterminate items of great consequence, like the kick of the tire or the suction of the tire, both of which factors are new and important where the life of the road surface is considered.

COSMOPOLITAN CLUB

The Nominating Committee of the Cosmopolitan Club wishes to state that Stewart Keith has withdrawn his name as a candidate for Treasurer of the club. No more nominations have been received for National Chairmen. As the nominations close at five o'clock next Monday it is necessary that names should be handed in immediately. The dinner and election will be held in the Union on May 9th.

WEATHER

For Boston and Vicinity: Fair, continued cool today; moderate to fresh northwest winds.

CALENDAR

Saturday, May 2, 1914.

2.30—Holy Cross vs. Tech Track Meet. Field.

2.30—Holy Cross vs. Tech Tennis. Jarvis Field, Cambridge.

Monday, May 4, 1914.

5.00—Cosmopolitan Club Nominations Close.

SATURDAY APRIL 25, 1914.

IN CHARGE OF THIS ISSUE.

Editors: B. N. Stimets, '16; W. E. Johnson, '17.

Assistants: O. R. Freeman, '15; J. F. Maguire, '16; P. Y. Loo, '16; A. W. Joslin, '17.

Yesterday's communication has aroused a storm of protest from members of the Institute Committee, two of whom have replied in this issue. We printed the criticism, not because all its statements would hold water, but because the effect of the whole seemed to be salutary. Its lack of constructiveness we admit, but not therefore that it is without value. The writer, while he exaggerates the defects, points out serious faults of the Institute Committee in the undue influence exerted by one or two individuals, and its off-hand way of selecting the 1918 class officers. The lack of a reasonable number of nominations was in fact pointed out by the president at the meeting.

We agree heartily with the "Visitor's" deprecation of the establishment of precedents. While the Sophomore track, football and tug-of-war managers would in practically every case be suitable for the same offices in the incoming class, we do not think all other candidates should be excluded. The writer's sweeping condemnation of the Institute Committee applies perhaps to this particular meeting, but the institution in general is universally admitted to be an unqualified success.

COLLEGE NEWS

The Red Head Club at Illinois has received the official sanction of the Council of Administration and is now an established "activity" at the University. The object of this society is "to promote good fellowship among the red heads at Illinois. The membership is limited to Juniors and Seniors. They are expected to pledge several Sophomores before the close of the school year. The pledge ribbon is a brilliant red." The club has petitioned the national organization of Red Heads, Phi Lambda Rho, for a charter.

JOINT BANQUET

The annual joint banquet of the Architectural and Architectural Engineering Societies will be held on Friday evening, May 8th, at the Copley Square Hotel. The principal speakers will be Ralph Adams Cram, Supervising Architect of Princeton University and Past President of the Boston Society of Architects; and George Fillmore Swain, '77, Professor of Civil Engineering in the Graduate School of Harvard University. Mr. Cram is also a Fellow of the American Institute of Architects and Professor Swain was formerly the head of Course I at Technology.

A competition has been opened to members of the two societies for a design for the menu cards. The winner will receive a free ticket to the banquet.

WELLESLEY SHOW

In response to several inquiries in regard to the Tech Show performance at Wellesley on March 23d for the benefit of the building fund of Wellesley college the manager has announced that approximately \$450 was cleared by the performance. The total receipts amounted to about \$600 and the expenses \$150 dollars.

CREWS PRACTICE DAILY

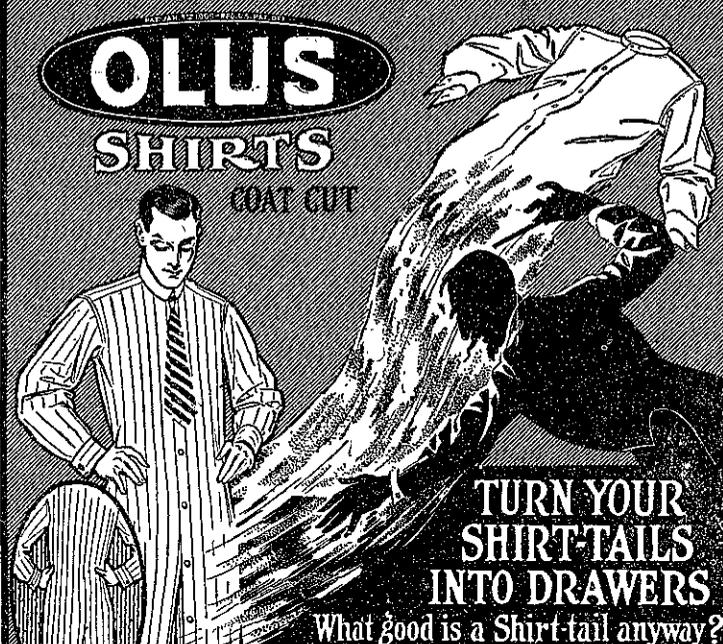

Freshmen and Sophomore First Crews Are Unchanged.

Four crews, two representing the Sophomores and two the Freshmen, held practice yesterday on the river, and each rowed a distance of four miles. Competition for places in the boats is very close and positions in first crews are still in doubt. All of the classes, with exception of the Seniors, have elected captains for their crews.

The first Sophomore crew yesterday was as follows: MacRae, bow; Bousquet, two; Fuller, three; Berkowitz, stroke; Lucas, coxswain. The first Freshman crew remained in the same order as yesterday. Brown, Gaus and Makepeace were tried out in the second Sophomore crew and the second Freshman boat was composed of Bertelson, Althouse, Beaver, Clayton and Demond.

CATHOLIC CLUB

Catholic Club ballots may be obtained at the Cage. All ballots must be handed in there before 5 on Wednesday, May 6th. Announcement of the election will be made at the banquet at the Hotel Thorndike Wednesday, May 6th, at 6.30.

OLUŠ

SHIRTS

COAT CUT

TURN YOUR SHIRT-TAILS INTO DRAWERS

What good is a Shirt-tail anyway?

IN OLUŠ the outside shirt and underdrawers are one garment.

This means that the shirt can't work out of the trousers, that there are no shirt tails to bunch in seat, that the drawers "stay put," to say nothing of the comfort and economy of saving a garment. OLUŠ is coat cut, opens all the way down—closed crotch, closed back. See illustration.

For golf, tennis and field wear, we recommend the special attached collar OLUŠ with regular or short sleeves. Extra sizes for very tall or stout men. All shirt fabrics, in smart designs, including silks—\$1.50 to \$10.00.

OLUŠ one-piece PAJAMAS for lounging, resting and comfortable sleep. Made on the same principle as OLUŠ Shirts—coat cut, closed back, closed crotch. No strings to tighten or come loose. \$1.50 to \$8.50.

Ask your dealer for OLUŠ. Booklet on request.

**MOVIES ILLUSTRATING
AUTO CONSTRUCTION**

**Mr. R. F. Coburn Will Take the
Maxwell Car from Ore to
Finished Product.**

The manufacture of the automobile from the ore to the finished product will be described with moving pictures before the Mechanical Engineering Society Tuesday afternoon at 4 o'clock, in Huntington Hall. Mr. Ralph Franklin Coburn will give the lecture and the particular car he will describe is the Maxwell.

Mr. Coburn is now making a tour of this part of the country and the Society feels that they are extremely fortunate in being able to get him to give them a little of his time. All the processes in the manufacture of this car and the methods involved will be explained and illustrated. Not the least interesting will be the description of the trying out of the motors, which often times becomes a very hazardous undertaking. The talk is expected to last about one hour and a half and all those who are interested are invited to attend. An excellent idea of modern engineering practice and up-to-date auto construction can be obtained.

COMMUNICATION

The anonymous writer of the communication in yesterday's issue of THE TECH seems to have paid as little attention to the business of the Institute Committee as he accuses the Committee of doing. In spite of the obvious injustice of the attack and in spite of the fact that many might consider the whole matter too "picayuneish" to, reply to it seems to me that it is well to place the matter before the student body from the point of view of one who took an active interest in the meeting.

In the first place the question was brought up in meeting as to whether the temporary officers should be given point system ratings. If "Visitor" had been wideawake he would have heard the chairman's reply that no points would be given for these offices. In view of this, the statement that "a man who already holds an office which according to the point system when correctly applied did not entitle him to hold another office was elected to a high position" is surely uncalled for. An attack (remember these attacks which are on individuals as well as on the whole committee are anonymous) which was made on the same man, C. W. Loomis, states that he advanced "as reason for non-election in the case of another man the fact that he held a position, with even fewer points than held in his own case." This is not the fact. Two men were up for temporary treasurer, one recommended by the present treasurer and holding no important office in activities. Mr. Loomis advanced as an argument in favor of this man that he held no positions in activities that would keep him busy while the other nominee held a position that required work throughout both terms. The question of points was not brought up.

I will agree with the writer that

there were not enough nominations made and this seemed to be due to the fact that instead of regular members there were several substitutes present. This question of non-attendance should be remedied.

As to the deplorable tendency to establish precedents, this tendency was only evidenced in one case, that of the election of temporary officers, and was indeed a most excellent one. It was suggested that since it has been the custom for so many years to have the Junior president take charge of the first Freshman meeting and instruct the new men in the ways of conducting themselves on Field Day, etc., it would be a good plan to continue this a little further, giving him the authority as their temporary leader. The duties of the temporary president last only four or five weeks, are really only advisory and it seems logical that a man who has served as president of his class one year would be just the man to fill the place. Again it was suggested that the men who had been managers of their class teams might be the best to be the temporary managers of the respective teams. This, however, did not meet with the approval of the Committee except in the case of the football manager. It was thought that it would be a good plan to elect the past football manager since by the first of May it would be late to get games for the next fall. Work must be started on making out a football schedule in the early spring at the latest and so the election of the past manager was considered a good precedent to set.

Are these precedents dangerous, or is the tendency to establish them deplorable? I think not. At any rate they are established and I hope that they will be continued.

The Institute Committee is a fine thing, not only in theory but in practice. It has accomplished many great things in the past and will continue to do so. It is a body unique in the field of student governing boards, for it has absolute power (which it wields most wisely and effectively) and is looked upon with respect by almost every undergraduate and by every loyal Technology man. The excellent condition of student activities at the Institute is due to the Committee and the system here is being copied by other colleges throughout the country. I feel, and I think I know the conditions, that there is no single body that does more to better undergraduates and social conditions, to stimulate interest in activities and to make us all better Technology men, than does the Institute Committee.

Yours sincerely,
ALDEN H. WAITT.

TRACK MEET

(Continued from Page 1.)

form displayed at the Spring Meet and at Bowdoin should do close to 2 flat. Thompson is the dark horse of this race. His win at Bowdoin shows his ability at the distance and, when pushed by Higgins and Gue-thing, he may upset calculations by winning himself. At all events this will be one of the best races of the day.

The result of both hurdles is very much in doubt. Huff was ruled a favorite over Grady in the 120-yard high hurdles up to the first of this week, when a slight illness rendered his chances less promising. Huff defeated Grady in a trial heat at the Coast Artillery Meet during the winter, only to lose out in the finals by reason of tripping over a hurdle. These two men, with Braun of Dartmouth, look like the three best hurdlers in the New England colleges. Huff's closest competitor in the low hurdles will be Mooney of Holy Cross, but if Huff's recent illness has not slowed him up too much, he should win in good time.

The mile and two-mile are not likely to be strenuously contested by Holy Cross, but with the track in excellent condition, due to yesterday's good weather, Benson and Cook should make very good times. In fact Cook is expected by everyone to break the Technology record at the two-mile, as he came within three seconds of the record at Bowdoin while running against a strong wind and with very little competition to push him.

Principal interest in the field events will center in the shot-put, in which Leslie is expected to come very close to breaking the new record which he set up at Bowdoin last Saturday. Brawley is Holy Cross' best man, but it is doubtful if he can do over 39 ft., whereas Leslie's record is 42 ft., 1 in. Lawrason will be pushed to the limit to defeat Grady of Holy Cross in the pole-vault. The latter has done 11 ft., which is higher than Lawrason has done so far this season. Unless Holy Cross springs a surprise in the broad-jump Fox, C. Reed and Morse should finish one, two, three in this event, as they have all done over 20 ft. during the past week. The other field events are an unknown quantity as far as Holy Cross is concerned and the lack of star men on the Technology team in these events will make their outcome exceedingly doubtful.

Like the broad-jump, the sprints will be most closely contested between the Technology representatives. Not since the days of Carl Gram have so many good sprinters represented the Institute. O'Hara should win the hundred in close to 10 seconds, followed by Wilson and Loomis, unless Captain Trowell of Holy Cross comes in for a place. In the 220 the order should be Loomis, O'Hara, Wilson, although Lee of Holy Cross is a good man in this event. However, he will already have run the quarter and should be shut out from placing. Loomis has made the best time in this event

SUFFRAGE PARADE

(Continued from Page 1.)

of women. At present there are few objections to the education of women, and it is found that though there are many colleges for girls, the women have not been made masculine, nor have they lost their feminine charm. It has been shown that women are intellectually capable, and it is now time to give them the ballot. Mrs. Johnson believes that women have gradually risen from the position of low esteem in which they were formerly, and that giving them the vote is merely the next step in advance.

Women uphold the details of moral life more than men. They are concerned with the rearing of children, and have a vital interest in laws that affect the children, as well as in many laws which affect themselves, but they are not given any voice in the making of those laws. If women were given the vote they would be able to have a voice in things that are of importance to them. They are tired of working by indirect methods, for what they want, and think they deserve the power of direct action.

The speaker showed a map illustrating the progress of woman suffrage, which was quite a surprise to many of the audience, on account of the number of western states where women vote. She also gave figures showing the number of voters in Massachusetts, for which she computed that the suffragists have to win over about 230,000 voters to win in Massachusetts.

In conclusion, she likened the part which women have formerly played in progress to the cars of a railroad train, which are pulled along, but do no pulling. Now women demand that they play the part of locomotives equally with the men.

Mrs. George Gove of Washington, D. C., was the next speaker. She described the parade which was held in that city a year ago, when the spectators made so much trouble for the marchers.

that has been recorded by a Technology man since 1909.

Technology should win the meet, but our team will know that they have been in a meet with a team of the first rank before they are through. The result of the meet will be watched with interest all over New England, as the winner will be considered eligible for one of the first places in the New England Intercollegiate on May 23d at the Stadium.

COMMUNICATION

To the Editor of The Tech:

It was surprising to me that you were willing to publish in your issue of yesterday the communication regarding the Institute Committee. Though cleverly written, the article represented a very peculiar point of view and was decidedly unjustified.

During the past year many undergraduates, not officially connected with the Institute Committee, have attended the meetings of that body and have taken an active and helpful part in the discussions. One would have expected that the man who signs himself "A Visitor" might have acted in a similar manner. Evidently he preferred to take no useful part in the meeting, but rather to reserve his remarks, which are entirely of a destructive nature, to be printed in the form of a communication.

The article might have been ignored as the writing of one who has a chronic desire to publish communications were it not for one statement which I take the liberty of quoting:

"Their meetings are both interesting and instructive and it might be possible that with greater interest in the Institute Committee the men when voting for the men on that committee would be sure that they were choosing men who had the interest of the class as a whole at heart and did not merely consider the question of their own personal advancement or the interests of an association of which they happened to be a member."

This assertion, it seems to me, reflects discredit upon no one except its author. It is not surprising that he did not sign his name to the communication, for men of his stamp seldom do. I hope "A Visitor" will address these charges directly to those whom he suspects of "considering their own advancement," for in that case he is certain to receive the treatment which he so justly deserves.

ARTHUR C. DORRANCE,
Pres. Institute Committee.

SOPHOMORE BASEBALL

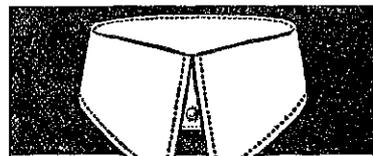

The game between the 1916 Baseball team and Boston English High School, scheduled to be played yesterday, was postponed until later in the season.
