MUSICAL CLUBS PLAN FOR BIG SEASON

Work To Begin at Once—Trials for Candidates Start Next Week.

The management of the Combined Glee, Banjo and Mandolin Clubs is planning for the biggest season in their history. The Clubs intend to give a greater number of concerts than last year and are working for a midyear tour. Freshmen who are interested in this line of musical activity are invited to come out for the clubs.

Trials for candidates will probably be held early next week. The exact date will appear on the bulletin boards and in THE TECH. First and Second Tenors will be in especial demand, as will those men who can play the banjo, guitar or mandola.

CHARTER GRANTED

Delta Kappa Phi Granted Charter in Kappa Sigma.

The Delta Kappa Phi fraternity, a local at the Institute, has recently been granted a charter as the Gamma Pi chapter of Kappa Sigma Fraternity, this being Kappa Sigma's eightieth active chapter.

The installation and initiation was conducted by the officers of the New England District and of the Boston Alumni Chapter, assisted by active members of the various New England chapters on Friday and Saturday, September 24th and 25th. The new chapter starts its national existence with about thirty active members.

The Kappa Sigma Fraternity has chapters in the following New England colleges: University of Maine, University of Vermont, Bowdoin, Brown, New Hampshire State College, Massachusetts Agricultural College, Dartmouth and Harvard.

CHINESE PUBLICITY

Several of the most prominent newspapers of China published articles concerning the eighteen Chinese students who received degrees at the Institute last June. The "Shun Pao" is an editorial administration the young men among them have kept up, in their letters, their agitation, a very natural and excellent beginning in life. This is perhaps the first time that Chinese scholars have been used for Technology publicity.

MUSICAL CLUBS

The executive committee of the Musical Clubs will meet at the office in the Union tomorrow afternoon at five o'clock. There will be a meeting of last year's Glee Club at the Union at five o'clock Thursday afternoon.

NEW TECH RISING ONE STORY PER FORTNIGHT

Concrete pouring that includes an acre of floor space is the work that is on today at the New Technology site. In some sections of the work the towers are pouring concrete into the forms for the columns which are to support the third floor of the building. The schedule for the structural and concrete calls for the completion of the entire first floor of the group by the first of October. The second, third and fourth floors are due at intervals of fifteen days. The roof will probably be in place by December fifteenth. From this it may be seen that concrete pouring that includes an acre of floor space is the work that is on today at the New Technology site. In some sections of the work the towers are pouring concrete into the forms for the columns which are to support the third floor of the building. The schedule for the structural and concrete calls for the completion of the entire first floor of the group by the first of October. The second, third and fourth floors are due at intervals of fifteen days. The roof will probably be in place by December fifteenth. From this it may be seen that the requirements for admission are not strict, about two years' practice and a reasonable amount of skill being, as a rule, sufficient to enable a man to make the instrumental clubs while a fairly good voice, combined with ability to carry a tune, is the principal requisite for the Glee Club.

CONCRETE POURING ON THE NEW SITE

FINANCE COMMITTEE

Standard Form For All Receipts Adopted.

The Finance Committee has adopted a standard form of receipt to be used by all Institute organizations. The receipt for class dues and the dues of the larger professional societies will bear the name of the organization. Receipts in every case will be numbered for the purpose of simplifying the auditing of the books. Classes or other dusses should not be paid without obtaining one of these standard numbered receipts.

President Maclaurin To Address Class—Junior Committee Will Take Charge.

Today at 1:30 P.M. in Huntington Hall, President Maclaurin will make his annual address to the new students. Following this, the meeting will be turned over to Looms, '16, the temporary chairman of the Freshman Class, who will explain the new plan of government as proposed by the Institute Committee last year, and will submit to them their new class constitution. Announcements concerning the meeting of candidates for the various Field Day teams, and concerning the Freshman dinner will also be made at this time.

CHINESE PUBLICITY

THE CREDIT OF THE YEAR

Speaking of the Chinese students, reporter A. S. says: "The Chinese students have made quite a stir this week. The Chinese Embassy in Rome has presented several of them with some of the most important awards given to Chinese students. Among the awards presented were the Gold Medal awarded to Mr. Coolidge, '96, and the Silver Medal awarded to Mr. Higginson, '96. The Chinese students have done a wonderful job in the United States and have brought a great deal of credit to the country of their birth."

SOPHOMORE FOOTBALL

Practice for the Sophomore Football Team will probably commence the middle of this week; it is expected that all who possibly can will turn out. The coaching will be done by H. R. Sullivan, who coached Mal den High last year, or by R. R. Harper, head coach of the Des Moines School of Mines.

TRACK WORK STARTS TODAY AT THE GYM

Varsity Men and Candidates For Relay Teams Asked To Be Present.

All varsity track men and candidates for the Field Day relay teams are requested to report at the Gym for practice today at three o'clock. The day set for the completion of the track at the new field is October 12th and until that time track work will be held either at the Gym or on the road.

Varsity men are requested to report early this year as there will be a dual meet with Harvard, which will very likely occur on October 24th at the new field. The Hare and Hounds Club will hold a run at Newton this Saturday, probably leaving Boston about two o'clock. The Harvard meet is not held on the 24th the Annual Handicap Cross Country "Run" will be held at Watertown that day, otherwise on November 28th. The Cross Country trials against the E. A. A. are scheduled for October 21st and Field Day for November 9th. The

FRESHMEN RECEPTION  
BY T. C. A. FRIDAY

Preparations for Annual Affair  
Under Way—Attractive Program.

Friday evening at eight o’clock in the Union the Technology Christian Association will hold its annual reception to new men at the Institute. This will not be an exclusively Freshman affair; men of all classes being invited to attend.

The list of speakers includes: F. P. Scully, President of the Institute Committee; Cushman, the new General Secretary of the T. C. A.; and Dean Burton. There will be music on the program, and refreshments will be served.

TECHNOLOGY MONTHLY,

October Number To Be Issued  
Next Week.

The first issue of the Technology Monthly will appear early next week, subscriptions being on sale all day next Monday. This number will contain articles by Ralph Adams Cram, Senior Professor of Architecture and Mr. Charles S. Sharsness, of the Harvard Engineering School, will contribute the leading engineering story.

HELD AS SPY

Mr. James H. Ellis, assistant in the Physics Department, has had an adventure with European militarism which he will not soon forget.

Mr. Ellis, while doing summer work at a foreign university, cultivated a fashionable French mustache and goatee. When war broke out he was found with a camera near some German fortifications and arrested as a probable French spy.

After six hours of third degree work, during which he obstinately refused to speak French, his photographs were developed for use as evidence. As they were found to be of a harmless character, he was released with a warning.

FRESHMEN MEETING  
(Continued from Page One)

This year for the first time the entering class will be under the supervision of a committee of Juniors, and no class election will be held until after Field Day. This is the result of an effort on the part of the Institute Committee to do away with extreme in any way.

that the buildings will be up before the snow is really flying.

There has been a series of delays due to the necessity of changing some of the plans. The court decisions and the condition of the real estate market have for the present put a stop to hopes of disposing of the Back Bay property of the Institute. The Rogers and Walker buildings will for some years be used for departments that can most easily be separated from the main engineering schools, and the laboratories will await a better time for their sale. This Tech found itself somewhat handicapped for building funds and it was deemed wise to modify the plans to some extent. Although it was not a question of fundamental changes it was thought best to hold up all construction activities till a decision was reached as to what better be omitted for the present. The conclusion was that the wing reaching back from the front line of the library should be held back, portions of the buildings intended for Mining Engineering, Electrical Engineering and Mechanical Engineering. The Mining will remain in Rogers where it will have an opportunity to expand and some modification of the arrangements in the new buildings will permit the Mechanical to move forward within the specified limits. The reasons for the delay were, removed some time ago, however, and the work has been in progress again for several weeks.

The present group includes the three sides of each of the minor courts and the two long sides of the great court, together with the extension on the line of the library building face north and south to accord with the buildings near the river front. This group includes the buildings already designated as Architectural, Mechanical, Chemical, Physical, Electrical and Biological departments and General Studies. The total area of the group thus indicated is not far from 90,000 square feet. The English department on the great library building has not been started. Three pile drivers are working to provide its support.

The granite has been coming for some time and the bricks for the inner courts are arriving at the rate of two cars, or 40,000 bricks, a day. The structural steel is ordered in thousand-ton lots and two hundred barrels of cement arrive each day. It may be here noted that Edward M. Hagar, '93, president of the University...

IMPORTANT CHANGES IN TECHNOLOGY FACULTY

Cram Replaces Taylor in Architectural Department—Pender Leaves.

Cram replaces Edward M. Cram, architect of the million-dollar Cathedral of St. John the Divine and of the parish church of St. Thomas in New York City, has been appointed senior professor of the Department of Architectural Engineering to the resignations of Professor James Knox Taylor, Mr. Cram will continue the active practice of his profession and Professor William H. Lawrence, who has been at the head of the Architectural Engineering option, will assume the position of Chairman of the Department of Architecture and will be responsible for the administrative routine. It is expected that Professor Cram will urge a constant consultation with leading members of the architectural profession in the city and the country, and particularly with the American Institute of Architects, as to the essentials demanded by the practice of the day.

Professor Harold Pender of the Department of Electrical Engineering has left the Institute to head a new department in the University of Pennsylvania. This new department was practically created for him as the electrical engineering courses have heretofore been in a division of the department of Mechanical Engineering.

The retirements of Professor Robert Hallowell Richards, '78, in charge of the Department of Mining Engineering, and Assistant Professor Henry A. Harrison, '76, of the Department of Drawing, have been announced. Professor Davis R. Dowey has been placed in charge of Course XV entitled "Engineering Administration."

Professor Harrison W. Smith has been granted leave of absence during the coming academic year. Professor Albert LeMoyne, assistant in Mechanical Engineering, was appointed chairman of the Department of Mining Engineering and Assistant Professor Henry A. Harrison, '76, of the Department of Drawing, have been announced. Professor Davis R. Dowey has been placed in charge of Course XV entitled "Engineering Administration."

The following instructors have resigned: H. D. Wilson, Research Assistant in Physical Chemistry; T. S. Holdén, in Mathematics; P. P. M. Eise, in Physics; W. J. Murrell, in Analytical Chemistry; F. M. Raybuck, in English; R. H. White, in Inorganic and Theoretical Chemistry; J. E. Zimmerman, in Theoretical Chemistry.

The following assistants have resigned: C. J. Anderson, in Mining
