A NEW MATHEMATICS COURSE AT INSTITUTE

Laboratory Work In Mechanical Calculation First Time In Country.

A new course called Mathematical Laboratory has been introduced by the Mathematics Department at Technology through the efforts of Dr. Joseph Lipsig. This is said to be the first attempt in this country to give the course as a whole, although parts of the work may now be found in other colleges.

The subject includes the most modern methods of numerical, graphical and mechanical calculations, with particular emphasis on their relations to engineering and applied mathematics. The graphical part is the most important feature. Various means of obtaining solutions in arithmetic and algebraic processes of calculations as well as in calculus are taken up.

The construction of graphical charts which is rapidly becoming very important in the engineering world, is the main part of the graphical work. It is this phase of the subject for which T. Spear, R. V. Tiffany, and C. W. Wood.

SENIOR DINNER

Westminster Hotel Chosen For Big Event.

The Senior Class will hold its annual dinner Thursday evening, December third, at 7:15. An innovation has been introduced this year in choosing the Westminster Hotel for the scene of festivities. The committee in charge promises an excellent program, and wishes to remind its students that the Class has obtained a few more opportunities to assemble as a Technology organization.

Tickets were placed on sale at the Cafe this morning and may also be obtained from T. Spear, R. V. Tiffany, or C. W. Wood.

NO T. C. A. TALK

Because of Thanksgiving coming on, Thursday, T. C. A. talk will be omitted this week. All Technology men who are to be here on Thanksgiving Day are invited by the Association to attend an informal gathering at the Boston Y. M. C. A. in Jacob P. Ratas Hall from 5 to 7:30 p.m.

GLEE CLUB

There will be no rehearsal of the Glee Club today, but a rehearsal on Monday at 4 o'clock. Men cannot attend at four Monday should come at five.

WRISTLING TRYOUTS THIS AFTERNOON

Entrants To Beverly Meet Must Enter The Elimination Trials.

Elimination trials will be held this afternoon and Friday afternoon to decide what men of the squad are to represent Tech in the Beverly Y. M. C. A. Meet on Saturday night. Any man who expects to take part in these must enter these trials. With two matches will probably be unable to wrestle, there will be a vacant place in the 125-lb. class. There is also a possibility that Leo may not enter this meet, in which case another man in the 125-lb. class will be needed.

VARSITY BASKETBALL

Opportunity To Get On Varsity Team—Practice Today.

Practice for the Varsity Basketball Team will be held today and Friday at 4 o'clock at the Gym. There have been arrangements to Loyola College at Baltimore, Navy at Annapolis, Pennsylvania State College at State College, Clarkson Tech at Potsdam, Y. M. St. Lawrence University, Canonsburg, N. Y. New Hampshire State College at Durham, N. H., and to Wesleyan University at Middleton, Conn. Candidates may report either of the above days.

GYM TEAM PRACTICE

Gym Team practice will be held every night at five o'clock at the Gym. As the time is limited, the management wants every man to perfect his "stunt" for the exhibition to be given December fifth. The team is expected to make a good showing in the winter meets, judging from the progress made already.

JUNIOR PROM

Nominations for the Junior Prom Committee are now due and should be handed in at the Cafe not later than 1 o'clock on Saturday, November 28th. At least ten signatures are required on each nomination paper. The committee is to be composed of five members.

MILITARY SCIENCE

There will be no Drill or Military Science lectures today or next Friday. This was announced by Major Cole to the different sections at the last lecture.

1918 Ballots Due. Cage, 2 P. M.

INDOOR TRACK MEETING ATTENDED BY MANY

Coach Kanaly Speaks About Work During The Indoor Season.

The Indoor Track Meeting held last Monday was attended by about sixty candidates for the team. Each man signified what event he wished to try out for, and handed in his name as a member of the track squad. Coach Kanaly then outlined the coming season, giving a schedule of events and ideas of what is expected of each man.

He said that in order to get the full benefit from his work, each man should come out four times a week, and that three times a week is the minimum. This is not at all demanding too much, because of the handiness of the Gym and the short time required for training each day. The track work requires only six or twelve minutes at most, while a Gym class occupies a whole hour. The advantage of Track over Gym in regard to time is at once evident. Track athletics, too, he stated, afford one of the best and most healthful exercises, and give men excellent moral training.

(Continued on Page Six)

CIVILS TO MEET

"What We Owe To Germany" To Be Topic Of The Evening.

At the meeting of the Civil Engineering Society in the Union next Friday evening, Reverend Doctor Powell will speak on the topic, "What We Owe To Germany." It is expected that the talk will be in the main resume of the effects of German scientific investigations upon American progress. One new member will be elected to the executive committee.

SOUTHERN CLUB DINNER

The Southern Club will hold its first dinner of the year at the Hotel Napoleon on Wednesday, November 29, at 6 o'clock, instead of Thanksgiving Day as was stated in the notices sent to the members. The committee requests the men who intend to present to inform them so that adequate preparations may be made.

FRESHMAN BALLOTS DUE

Ballots have been sent to all members of the freshman class. These will be due at two o'clock today at the Cage, where extra ballots may be obtained. Does may be cast until the ballot if not already paid.

TECH SHOW LYRIC COMPETITION OPENS

McDaniels To Be In Show Office Monday To Assist In The Fifteen Lyrics.

Last Monday, Stage Manager Coleman held a meeting of men intending to enter the Show Lyric Competition. McDaniel, the author of this year's book, outlined the plot and explained the plot and the situations for which the "Getting A-Cross" lyrics must be written.

McDaniel will be in the Show Office Monday (Continued on Page Three).

ELECTRICAL SOCIETY

Trip Taken Last Monday By A Number Of Members.

Last Monday afternoon seventeen members of the Electrical Engineering Society visited the works of the International Engineering Co., Ltd., at South Framingham. The entire operation of boiler making was shown by two representatives of the company.

The sheet steel comes in at one end of the plant, is laid out according to specifications, and then proceeds to the punching machine which punches the holes in the thick plate as rapidly and cleanly as a paper punch goes through paper. The material is then rolled into shape, assembled, set up, and arrives at the other end of the plant where it is ready to be tested.

COURSE IV SOCIETY

The Architectural Society will hold another next Friday evening, November 30th, at 8 o'clock, in Room 42 Pierce. Professor J. O. Summer will speak on the European War.

CALENDAR

Wednesday, Nov. 25, 1914.

Military Science and Drill Omitted.

1:30—Camping Demonstration by Capt. H. E. Call, Commanding Officer of the Tech. Upper Office.

2:00—Freshman Ballots Due. Cage.

4:00—Varsity Basketball Practice. Gym.

5:00—No Glee Club Rehearsal. Union.

6:00—Gym Team. Gym.

P. M.—Elimination Trials for Wrestling Team. Gym.

6:00—Southern Club Dinner. Hotel Napoleon.

Thursday, Nov. 26, 1914.

Exercises of the Institute suspended.

No T. C. A. Talk.

5:00—Reception to students at R. Y. M. C. A. at 5 o'clock.

6:00—Gym Team. Gym.
VELVET, The Smoothest Smoking Tobacco, has all the "spirit," flavor and fragrance that Nature puts into her Kentucky "thoroughbred" Burley de Luxe tobacco. More than 2 years' aging mellows out every trace of bite. The rich and 30 metal-lined bags.

College Clothes

This season we offer an unusually strong variety of Overcoats and Suits as well as formal garments, remodelled and tailored to meet the requirements of the keenly critical.

Made on the premises from exclusive imported and Domestic Woolens.

SHOW LYRICS
(Continued from Page One)

See Monday at five o'clock to
assist any team who are having diffi-
culty in putting their teams together
or to talk to any new men who wish
to come out. The aim of the Show is
to save a live "Tech Song" written
for the book.

The following is the list of the
lyrics:
1. "Down With Liquor"—Solo by
Colonel Greene, a Southern gentle-
man—comic song on how he downs
liquor—two verses and chorus.
2. "He's Great To Be A General's
Daughter"—Solo by heroine, a French
girl—two verses and chorus.
3. "The Pride of the Neighboors"—
by a chorus of soldiers—4 lines with
no chorus.
4. "Home Is The Greatest Game Of
Cricket"—Solo by the hero—two
verses with chorus.
5. "The Bathing at Nice Is So Nice"—
a bathing song—Solo by a Tech-1
women Professor and a chorus of
Girls—two verses and chorus.
6. "At Last It Is Moonlight on the
River"—Quartet sung by two girls
and two men—two verses and chorus.
7. "Over Mountain Tops"—A Swiss
Mountain Song—two verses, each
ten lines long with a chorus suit-
able for presenting.
8. "If They Would Only Hold On
their Knees"—A comic song, but,
ot to cause offense to anyone—should
be about the present war situation—
two verses and chorus.
9. "Tell 'Old Dad All Your Knows"—
Solo by the hero—two verses and
chorus.
10. "My Home in Georgia Land"—
11. "Bathing on a Diner With Dis-
co"—Both 10 and 11 are stolen by
a colored man and should be sung
numbers with two verses and chorus.
12. "I'm Neat"—A comic solo
with one local verse pertaining to
the Institute.
13. "Boys, Boys, Let's Go Off to
a Party"—Trio by two men—local hit
on how Tech men enjoy life
around the Institute—two verses and
chorus.
14. "My Aeroplane Hero"—March
music with a semi-military spirit—
two verses and chorus.
15. "Cancan Song"—A local hit
combining Technology and Riverside
—two verses and chorus.

Circulation Manager Candidates in
the Upper Office of The Tech between
one and one-half any day.

FRESHMAN WRESTLING

Freshmen, who intend to take
wrestling are to meet the other men
of their weights in elimination bouts
until all have had a trial. The win-
ers of these bouts will remain on the
squad until defeated by candidates in
their respective classes. The con-
testants who do not win a place will
return to regular gym work until they
defeat some member of the team.

Naval Architectural Society Has Dinner

Mr. Cahan of Commercial Company Talks On Building Of Tow Boats.

The Naval Architectural Society held the first of a series of informal dinners last night at the Cafe de Paris, with Mr. P. D. Cahan of the Commercial Tow Boat Company as the speaker of the evening. Nearly all of the upper classes in Course XIII and a few of the Naval Construction Company present. Professors Beckett and Keith represented the Faculty.

President Bent, in a toastmaster, said that with such an auspicious beginning it might be a very successful year for the Society. He then introduced Mr. Cahan, who told of the construction and operation of tow boats, together with many of his own experiences in this work. Mr. Cahan said in part: "I used to think when I was a young man that anything was good enough for tow boat equipment, but only after I got acquainted with the business that it is absolutely necessary to equip successful tow boats with the best obtainable, as far as machinery is concerned."

A modern tow boat has the same or better equipment and as many units as a steamship and it all has to be installed in a very small space. My opinion is that it takes a better man to lay out a tow boat and do it right on account of the space allowed, than any other branch of naval architecture. To show you the necessity of keeping tow boat equipment up, look at the enormous ships they have to handle at the most dangerous time of their voyage, docking and taking them out of dock. They use the tow boats for tenders for the ships, consequently they are subject to a great deal of wear and tear. It is certainly exciting to see several little harbor boats pushing and pushing away at an ocean liner trying to get her into her dock.

"The ordinary ocean boat burns about 20 tons of coal per day. The engines are mostly triple expansion and we get down as low as 1.5-4.5 lbs. of coal per hour of power, per hour, including all auxiliaries, which is good for slow running engines. A modern ocean tow boat is electrically lighted, steam heated, steam driven, and all hours have separate rooms. Men would rather work on them as they get out on deck and see what is going on about them. The stove heated and engine rooms are open and they are not confined below as they would be on a ship. In some cases the watch is longer but the extra comfort makes them acceptable."

Mr. Cahan then related some of his personal experiences. He told of how one tow boat was ordered by the company and then had a delay in getting a replacement. To make her have the proper trim her bottom was filled with concrete. This produced some very interesting results for the engines, which were practically set upon a concrete base, had no appreciable vibration. In fact, there was so little vibration that it was found unnecessary to bracket any steampipes. The experiment was a complete success, much to the surprise of everyone.

At the third Congress the appropriation to cover the cost of the Panama Canal was severely criticized by many people throughout the country, as being entirely too extravagant. The total sum spent on this engineering work, as recently announced by the United States Engineer, would be only sufficient to run the present European War for ten years.

A Pacific Coast highway for automobiles is being planned with the roads and when completed by the end of this year will connect San Diego, Cal., and Vancouver, B. C. The route passes through the principal towns and is entirely over hard-surfaced roads. The highway is to be extended later to Alaska.

A receiving station, for handling radio messages direct from Norway, is to be erected at Chatham, Mass., on Cape Cod, by the Marconi Company. Aerial masts 415 feet in height are being put up. These are composed of 16 and 10 foot steel sections bolted together.

The Hipwell Manufacturing Company, Pittsburgh, Pa., has recently put on the market a new type of flashlight, which has the distinction of possessing an effective range of 200 feet. In appearance, the Hiposcope (the name under which this new type of flashlight is being sold) does not differ greatly from the so-called minor type of flashlight. All improvements were made with a view to producing greater efficiency from the miniature tungsten light which is employed. The Hiposcope is fitted with two high-power lenses which concentrate the light and project it with the aid of a true parabolic reflector in the desired direction.

Five students from the University of Washington succeeded in carrying a motion-picture camera to the summit of Mt. Rainier and photographing the crater and Columbia Crest, the highest point to which a motion-picture camera has ever been carried. They do not allow of the quick maniacal rush of coal per hour, including all auxiliaries. A modern ocean week, the greatest point to which a motion-picture camera has ever been carried, is to be erected at Chatham, Mass., on Cape Cod, by the Marconi Company. Aerial masts 415 feet in height are being put up. These are composed of 16 and 10 foot steel sections bolted together.

There is a Great Difference in Tobaccos
Tuxedo is the Mildest, Swearest, Most
Pleasant Smoke in the World, Because——

First—No one but the makers of Tuxedo is willing to spend the money necessary to buy the mildest, choicest, most thoroughly aged, selected Burley tobacco.

Second—No one but the makers of Tuxedo knows how to treat this Burley tobacco so that every bit of pleasantness and goodness remains in the tobacco and every bit of unpleasantness and harshness is taken out.

Tuxedo

The Perfect Tobacco for Pipe and Cigarettes

Tuxedo was born in 1904. Its first imitator appeared two years later. Since then a host of imitations have been born and are clamoring for your patronage.

No imitation is ever as good as the original. No amount of advertising, no amount of bluster and bluff, can ever make an imitation tobacco as good as Tuxedo.

If you are not a pipe smoker, you are denying yourself the greatest smoking pleasure known to man. Try Tuxedo in your pipe this week.

You can buy Tuxedo everywhere

Conveniently packed in 5c and 10c tins abundantly with gold lettering, air-tight and moisture-proof paper inner-lined. Conveniently curved to fit your pocket in any location in the United States. Address

MACLAURIN SPEAKS ABOUT CO-OPERATION

Gives Address Before College Presidents On Last Friday Evening

At the meeting of the New England College Presidents held last Friday evening at the Boston City Club, President Maclaurin gave an address on "Co-operation." In it, Dr. Maclaurin spoke of the co-operation with the State to which Technology has recently given so much consideration.

The primary function of all colleges and universities is now and always has been to train individuals so that they will do their jobs well. He suggested that those professors and instructors in the higher institutions of learning might be able to solve some of the countless problems presented in the administration of modern cities and states on account of their being better informed as to the teaching of experience, and broader in their interests and sympathies.

The co-operative effort is doing excellent work in a quiet way and which will doubtless be extended throughout the state as other institutions take their part in it. This cooperative spirit has shown itself most effectively in this community in the recent agreement between Harvard and Technology for carrying on the work of engineering as a joint effort.

SUNDAY FORUM

The Y. M. C. A. Discussion Group, or Forum as it is called, will have for its speaker this Sunday Mr. Frank Palmer Sears, director of education at the Y. M. C. A. schools. Mr. Sears has built up a school system that has placed the Y.M.C.A. in line with Exeter Academy. He will have as his topic "Are You Building a Career?" These discussion meetings are followed by a social hour and musical program: "The Forum extends throughout the T. C. A. a cordial invitation to Technology men to attend, and as there will be no speaker in the Union this week, those Tech men who have found something worth while in the Thursday talks will be gladly welcomed at the Y. M. C. A. Sunday at 3.45.

ENGLISH HIGH

The members of the classes of '90, '92, '94 and '96 of the English High School will hold a joint banquet at the Hotel Restaurant, Dec. 1, 1914, at 7 o'clock. Mr. J. F. Casey, the Principal of the School for more than thirty years, has resigned. He is to be given a sendoff by the alumni. Tickets may be obtained at B. Landers, 45.

CHESS TOURNAMENT

Entries for the Chess Meet to decide the championship of the Institute are due Friday. Men who wish to compete must have their names at the Cape for R. H. Neumann. All students are eligible for this tournament.

which there is an increasing demand among all technical men. Further study is also given of numerical solutions of algebraic equations of the higher powers, and of transcendental and differential equations. The different methods of checking results for accuracy in arithmetical and logarithmic computations are also considered.

The course is so arranged that study in detail may be made of the different computing instruments, both as to their use and ideas of constructions. Among the instruments are the slide rule, which is now used so much in everyday calculation, the arithmometer, and an instrument for obtaining areas of irregular surfaces, besides the integrator.

The subject is elective and, notwithstanding the fact that the study of the third and fourth years are in the main taken in addition to his other studies, more than sixteen men from the third and fourth years are in the laboratory under the instruction of Dr. Laps. If the trial proves successful, the subject will eventually become one of the required list.

**NEWS MEETING**

There will be a meeting of all News Men on The Tech next Monday at one-thirty in the Lower Office. Estimates are being sent to the students. Fountain Pens, Text Books.

**BOAT CLUB MEETING**

The meeting of the Boat Club officers on Monday adjourned without anything definite having been decided upon. Letters have been sent to the Alumni and other colleges regarding the purchase of rowing machines.

**TECHNOLOGY CHRISTIAN ASSOCIATION’S WORK**

Presented To Student Body In Form Of A Circular And Mailing Card.

The Technology Christian Association has sent out to Tech men a circular and mailing card which will probably present to the student body the work of the Association in a new light. The Bible Study work of the Association is a branch comparatively unknown to the student body as a whole. There are at present seven regular Technology groups for the study and discussion of present day questions and, as stated in the circular, new groups will be organised anywhere at any time that not less than five men select to meet. The Technology Christian Association is anxious that these study groups should attract the students and has as its aim the organization of congenial groups of followers for discussion of live topics, for the study of “real problems in stress and strain, tests for tax resisting properties of moral fibre,” as the circular states.

**CANDIDATES NEEDED**

Circulation Department Offers Splendid Opportunity.

The Circulation Department of The Tech needs candidates for position of Assistant Circulation Manager, and all who wish to enter the contest will be required to report at once. The work consists of attending to the files and mailing list and keeping the accounts of the newspaper. Manager Knauss will be in the Upper Office every day from one to one-thirty to meet candidates.

Gym Team: Five today. Gym.
