Professor Sedwick is Highly Honored

Elected to Presidency of The American Public Health Association.

Professor William T. Sedwick, head of the Department of Biology and Public Health at the Institute, was honored by being elected president of Technique Class Public Health Association for the coming year. As the association was nearing the close of its forty-second annual meeting held in Jacksonville, its president, Dr. William C. Woodward of Washington D. C., resigned. Professor Sedwick was elected without his knowledge.

The first news of the election was atelegram sent by the members, eighteen of whom were Technique graduates. One of these was a woman, Miss Wade, formerly of the Boston Normal, and graduate of the class of 1916. As some of the class of 1916, represented by members of the Technique Junior class statistic blanks were distributed in Monday's issue of The Tech.

The first news of the election was a telegram sent by the members, eighteen of whom were Technique graduates. One of these was a woman, Miss Wade, formerly of the Boston Normal, and graduate of the class of 1916. As some of the class of 1916, represented by members of the Technique Junior class statistic blanks were distributed in Monday's issue of The Tech.

FINANCE CAMPAIGN

All the reports of the T. C. A. finance campaign have not yet been received. The campaign will continue today and will be completed this evening. A full report will be published in Monday's issue of The Tech.

JUNIOR STATISTICS

Blanks Distributed Thursday—More At Cage.

About three hundred copies of the Junior statistic blanks were distributed by members of the Technique board at the “Football” lecture yesterday. As a part of the class of 1916, were not present at the lecture, a large supply of the blanks has been left at the Cage, where they may be obtained by all Juniors. The answers should be turned in at the Cage as soon as possible. The Statistician wishes to receive as much wit and humor as each man can supply. A copy of the first blank distributed to him is sent to the man handling the best set of answers.

TECH SHOW

Any other man who wishes to compete for the position are to report at the Tech Office at five o’clock on Monday, Wednesday, or Monday next week.
THE TECH

Published as second-class matter, Sept. 14, 1884, under the laws of the State of Massachusetts.

Published tri-weekly during the college year by the students of Massachusetts Institute of Technology.

IN CHARGE OF THIS ISSUE

Editors, J. M. De Bell, '17; W. P. Johnson, '17
Associate, H. N. Keene, '17
Assistants, B. N. Simonds, '16; D. E. Bell, '17; W. J. Henry, '17; J. Purves, '18; M. A. Penelas, '18; B. D. Munro, '18; H. A. Thorem, '18

We are pleased to see renewed this year the proposition, which the Class of 1914 so hastily abandoned, of including the Senior Portfolio in the Yearbook. The details of the plan are presented in this issue. In order that a well-considered decision may be reached at the Senior meeting on Monday, every man who has arguments of interest to the class, on either side of the question, should communicate them to the chief through Monday's issue of The Tech.

Since the Union Committee has delegated to an efficient and reliable man the arduous duty of keeping the Union supplied with magazines in good condition, a most gratifying change is to be noted. We congratulate the Committee on its choice of a man, and hope they may have equal success in getting their other duties done.

TECH MONTHLY

E. J. Goldstein, assistant Managing Editor of the Monthly, wishes all men who wish to try out for Assistant Publicity Manager to meet him at 1:30 today in the Monthly office, upstairs in the Union. He wishes to say that this is a very good chance as one man will be selected from among those to be the regular assistant.

SILENCE DANSANTS SATURDAY, 8 P. M. SUBSCRIPTION $1.00 a Couple

TECHNICAL CHURCH

Technology Professor Will Talk Next Sunday Evening

Professor George B. Haven of the Mechanical Engineering Department will address a gathering of students from the various colleges in and around Boston next Sunday evening at eight o'clock. The meeting will be held in the chapel of the Central Church, corner of Newbury and Berkeley streets. The chances of a fast relay team appear particularly bright at present, and Coach Kanaly will have hard work making his final decision as to who will make the team.

From the work and number of the candidates, Technology's representation in the high jump promises to be excellent. The pole vault also is being well taken care of, but the shot put has only one regular candidate. This event is very important and should not be neglected.

The absence of the freshmen is particularly noticeable in the jump and weight events. Why don't they show a little school spirit?

Much confusion has been caused by the absence of the freshmen in the GYM. floor during the time assigned to Track practice. Members of GYM. classes, and other teams, who are not taking Track, will address a gathering of students yesterday afternoon the Cross Country meet of the season, which will occur Saturday afternoon. The chances for a fast relay team appear particularly bright at present, and Coach Kanaly will have hard work making his final decision as to who will make the team.

MR. HUBBARD SPEAKS

AT NOON HOUR TALK

Discusses The Accomplishments
Of The Japanese In

Manchuria.

The Technology Christian Association, procured for its weekly noon-hour talk yesterday, Mr. C. V. Hubble, of Japan, who gave, in a short talk, a very clear idea of what the Japanese have accomplished for the betterment of conditions in Manchuria.

Mr. Hubbard asserted that Manchuria has gained greatly from the Russo-Japanese war, despite the fact that is suffered immensely from the direct results of the war. This is due to the fact that the Japanese have developed the mining resources of the country, and have made proper use of the railroad facilities. Before the Japanese started improving the country, the people were poor and stricken, and lifesaving in hand-to-mouth fashion on what little sustenance they could scrape from the surface of the land.

The soil had been tilled until it was exhausted and there was little fuel to protect the inhabitants from the rigors of the Manchurian winter. When the Japanese entered the country, they found that the coal resources were the very finest in the world, and the population is not only furnished with abundant fuel, but also with large quantities. Mr. Hubbard spoke of one mine with an unbroken coal vein 135 feet thick, with an output of 7000 tons per day.

The oil of the Soya bean which used to be used as fuel and food in Manchuria, has been displaced in a large measure by Standard Oil products, and the oil is now produced entirely by the Japanese.

The Technology Christian Association, procured for its weekly noon-hour talk yesterday, Mr. C. V. Hubbard, of Japan, who gave, in a short talk, a very clear idea of what the Japanese have accomplished for the betterment of conditions in Manchuria.

Mr. Hubbard asserted that Manchuria has gained greatly from the Russo-Japanese war, despite the fact that it suffered immensely from the direct results of the war. This is due to the fact that the Japanese have developed the mining resources of the country, and have made proper use of the railroad facilities. Before the Japanese started improving the country, the people were poor and stricken, and lived in hand-to-mouth fashion on what little sustenance they could scrape from the surface of the land.

The soil had been tilled until it was exhausted and there was little fuel to protect the inhabitants from the rigors of the Manchurian winter. When the Japanese entered the country, they found that the coal resources were the very finest in the world, and the population is not only furnished with abundant fuel, but also with large quantities. Mr. Hubbard spoke of one mine with an unbroken coal vein 135 feet thick, with an output of 7000 tons per day.

The oil of the Soya bean which used to be used as fuel and food in Manchuria, has been displaced in a large measure by Standard Oil products, and this has resulted in a greatly increased export of the native vegetable oil, which has nearly doubled the price of the latter.

Mr. Hubbard stated that, contrary to popular opinion, the Japanese exercised absolutely no administrative control over Manchuria, this being entirely in the hands of the Chinese.

The only opportunities for control which the Japanese have is their possession of a small area around Port Arthur, and a three mile strip along the railroad. This last has been extensively operated by the Japanese, in contrast to the Russian policy of using it only for military purposes. In connection with the operation of the railroad, the Japanese have instituted a widespread system of industrial welfare, which includes the establishment of schools, hotels, hospitals and provisions for all kinds of technical and medical training.

In conclusion, Mr. Hubbard said that these remarkable results were achieved through the work of 1500 men who had received their training in the Y. M. C. A. throughout Japan, and was a good example of the sort of work this institution is striving to accomplish abroad.

Laminate programs will be cut out this week, as follows:

1. One Step, The High Cost of Living
2. One Step, Capt. Betty
3. Waltz, Carlo
4. Fox Trot, Meadow Brook

WRESTLING OUTLOOK FOR COMING SEASON

Team Weakened By Graduations

New Material Looks Promising

To this year's wrestling squad has been given the task of upholding the reputation of a team, which for more than two years has gone without defeat and which last year won the Eastern Inter-collegiate Championship. Of having all the members of the second string, this time, the wrestling team has undergone little change but has depended upon the skill and experience of such men as Kelley, Treat and Martin.

This year graduation has taken away five of those who have been the mainstays of the team; Kelley, Martin, Treat, Means and Leslie. This leaves, of the original first string men, only Leo, Crowell and Walter, while of the second string men, there still remain Durkee, Rounds and Goodell.

Manager Moore, who should be in good shape with the latter, will probably be unable to wrestle owing to injuries sustained last year.

In the heavy weight class, Captain Crowell will take care of bouts as formerly. The 158-pound class will have Walter, although he may be un

able to enter all of the matches. The new men in this class are Blodgett and Wood, both Sophomores and both able to give a good account of themselves.

The greatest weaknesses of each of these wrestlers is that of all the new men, lack of experience.

The 146-pound class has suffered severely in losing Treat, who was practically invincible in this weight. However, this class is fortunate in having Goodell, who has trained down from the 160-pound class, where he wrestled last year. The only promising new man in Peterson, a product of last year's freshman team.

The 158-pound class has lost two men of greatest ability; Kelley, who captained the team to championship last year and Martin, who managed it.

The never-die spirit, which so characterized this team, is almost directly responsible to the influence of these two men. To fill their places are Left Durkee and Rounds, both men to be depended upon. Each of the latter won his W-T last year.

This class is especially strong in new material. Gillin, a new man at the Institute, who was formerly 155-pound champion of the University of Texas, will undoubtedly strengthen the team greatly. Hoffman, a Sophomore, is developing rapidly and he, with Hodgetts, who wrestled two years ago, will further bolster up this weight.

The 160-pound class has lost Kelley, who wrestled both at this and the next higher weight, and Means. This year the team seems to depend entirely upon new material unless Rounds is able to train down from the 165-pound class. Eighthins, also over-weight, will strengthen this class materially if he can train down. At present, Bone and Leo, who are both lighter weight men, will have to be depended upon.

The 158-pound class is still invincible, with Leo ready to tackle anybody within ten pounds of his own weight.

The New No. 5 Printype Oliver Typewriter

The printype Oliver Typewriter makes an ideal machine for students' use. It is a marvel of simplicity, durability and ease of operation. Printype your notes and they will be as valuable to you as a study aid is to a student. These machines are reliable and will stand up under the strain of work. They are easy to operate and are simple to learn.

Easy terms if desired.

FINANCE COMMITTEE

A Uniform Check System is Adopted—Many Are Absent.

The second meeting of the year was held by the Finance Committee in the Union last night. The voucher check system was discussed and it was decided that each activity in the Union should use uniform voucher checks. The question was brought up of having all the members of the Finance Committee dine together in the Union before the meeting and a motion was carried that every treasurer sign on his report whether he will be on hand or not.

The following members were absent: E. W. Jackson, Architectural Society; P. D. Ross, Architectural Engineering Society; C. L. Hall, Civil Engineering Society; W. H. Brown, Electrical Engineering Society; L. E. Best, Hare and Hound Club; R. E. Burnham, Mining Engineering; S. R. Plee, Glee Club.

FACULTY NOTICE

First year students are expected to take at the end of the present term all entrance examinations in which they have not already clear their records, with the following exceptions:

1. Students having conditions in entrance History and entrance Physics. No examinations will be held in entrance History and entrance Physics at the semi-annual examination period.

2. Students taking no work dependent on entrance subjects in which they have not clear their records. They may take remaining examinations in June or September.

3. Students who are now making up entrance German or taking entrance French; students entitled to excuse from entrance subjects in which they have undergone little change but have depended upon the skill and experience of such men as Kelley, Treat and Martin.

INSTITUTE COMMITTEE
(Continued from page 4)
shall have only the points attached to the office, provided they exceed or equal four (4), otherwise he shall have the four points only attached to the Institute Committee Membership.
2. The capitation of any team not otherwise mentioned shall add one point to the rating for that team.

The committee recommends that the above schedule of points take effect upon approval of the Institute Committee, and that it apply to all men now in office, whether elected under the old schedule or not.

A further appropriation of 165 dollars was voted to the Hockey Team, making a total of 259 dollars for this activity.

The bulletin board committee reported that it is in need of place attractive posters on the boards.

The representatives of the R. H. Society and O. C. Lorenz did not attend the meeting.

WRESTLING TEAM
(Continued from page 4)
Manager Morse has appointed men who now take charge of the freshmen wrestling squad upon Mondays, Wednesdays and Fridays. The former crowded conditions of the mat have thereby been avoided and each freshman is under the supervision of some more experienced man. Tuesday and Thursday afternoon and Friday morning have been reserved for varsity practice as well as time after 5.30 upon other afternoons.
The team believes that it can continue this year the reputation so far been by the Institute in this field. The men feel that those graduated last June have left behind them an influence in their earnest and indomitable spirit, which will greatly make up for the loss of the wrestlers themselves. They cannot succeed through their own efforts alone. With the encouragement and financial support of the student body, this year's team feels that it can make itself a worthy successor to Kelley's Championship Team of 1914.

CANDIDATES MEET
At the me will held Wednesday noon in the i th office, several new men came out for the Circulation, News and Advertising departments.
