SOCIETAL DISCUSSES ASPECTS OF MOVEMENT

Socialist Discusses Aspects of Movement

VITAL PROBLEM BROUGHT HOME TO TECH M.I.T. FORUM

Stock Goes Up

A large and interested gathering in the Union yesterday noon heard Dr. H. W. Laddie, organizing secretary of the Intercollegiate Socialist Society, give certain reasons why every college man and woman should take an intelligent interest in Socialism.

Dr. Laddie first spoke of his experiences in Europe at the outbreak of the war, telling how the Socialists, being the one party which consistently and firmly opposed the war, opened the eyes of their former critics to the constructiveness of their policies and ideals. He then proceeded to other instances of how

PORTFOLIO COMMITTEE

Balloons Out Saturday—Elections Close Tuesday.

As decided at the class meeting Monday nominations will be made for the Senior Portfolio Committee, to act in conjunction with Technique Board in arranging the Portfolio Section of Technique. The list of nominations will appear in The Tech Friday and ballots will be at the Cage on Saturday. Elections will close at 8 P.M. Monday, Dec. 22. It is necessary for the committee to start work at once since collecting the necessary data takes a great deal of time and every effort is to be made to make this new plan of the Constitution of Portfolio and Technique a success.

HOCKEY TEAM MEETS HARVARD THURSDAY

Large Attendance Expected At First Game. Teams Evenly Matched.

The Hockey Team, when it meets Harvard tomorrow night, will have completed three hard weeks of hard practice, which consisted for the first two weeks of cross-country runs three times a week. Since the Arena opened last Friday, the team has been on the ice four times. Monday night the men showed up good advantage in a practice game against the Arena team. Coach Whitten has been pointing the men out since they reported for the first practice and a remarkable improvement has already been made. Although the team, as it stands today, may not come up to the standard set by the team of three years ago, yet there is a lot of good material in the squad and the outlook is bright for the development of a fast seven. The team when it goes on the ice tomorrow night for its first game with Harvard will be one which is fully capable of securing a victory, and will enter the game fully determined to do so.

The team will have four of last year's regular men in its lineup. Captain R. L. Fletcher will be shifted from his former position at right wing to fill that of rover left vacated by McLeod, captain of last year's team. C. D. Winton, C. Cochran, and W. G. Gould will remain at their positions of last year, center and cover-point respectively. Blakey, a new man, has developed into an excellent guardian of the cage and

(Continued on Page Six)

STATISTICAL BLANKS

Number Of Ballots Per Man Not Limited

The Technique statistics blanks which were given out last Thursday at the Pol Roon lecture are due next Tuesday at the Cage. Extra blanks may be obtained at the Cage, so that every man will be given a chance to vote as many times as he desires for the class goat. Ralph Smith, as usual, makes the data.

Copy reaching The Tech later than five o'clock on Sundays, or eight o'clock on Mondays and Tuesdays, cannot be given a definite place in the composition of the paper. People having notices which cannot be handed in on time should communicate with the Make-up Editor at 8 B. 8527, so that they may reserve space.

THE TECH, BOSTON, MASS., WEDNESDAY, DECEMBER 16, 1914.

INDOOR TRACK WORK

Although the cold weather has set in, the Track Team still continues practicing outdoors, once a week. On this day the men are given a short run on the board track at the Oval. Indoor practice is held three afternoons a week at the Arena.

Manager Webster is trying to arrange for many more Relay Races than has been the custom in the past. This has aroused considerable interest and a large number of men are out for the Relay. But in order to enter any of the various indoor meets with as well balanced a team as possible it is absolutely necessary that more men come out for the weights. At this stage there is hardly anybody out for this department. There are plenty of men in the Institute who are fitted for this event and they are urged to come out and lend their efforts toward helping Tech to have a winning Indoor Track this season.

HOCKEY NOTICE

There will be a temporary cut in the Hockey Squad until after the Harvard game. The following men are to report for practice at the Arena tonight at 6.00: Fletcher, C. D. Watson, Costhane, Osgood, Blakewell, Loveward, Toye, Keeler, Gray, Ross, C. Teitel and Holdin. For the first practice after the Harvard game the whole squad is to report again, after which the squad will be cut down permanently to about twenty men to conform with the regulation made by the Arena Management.

MECHANICS' TRIP

Opportunities are still open for men to sign up for the trip of the Mechanical Society to the Wattham Watch Company, F. C. Purton has charge of the sign-up slips for the trip Thursday; and W. R. Hanchett, for the Friday trip. For both trips, the men are to meet on Rogers Steps at 1.45 P. M.

PATRONIZE TECH ADVERTISERS
The eyes of the world are fixed today on the war in Europe. Here in America we are appalled by its inhumanity and the terrible economic waste that it involves. Its dramatic aspect, and leads to good in many ways, but it has its own. One of these evils is the great load of needlessly suffering and loss that it imposes on the workmen of the country. The statistics of Germany seem to show that the problem is about two parts workman and one part employer. In other words, that there are about twice as many accidents that happen through the carelessness of the workmen as through the neglect of proper safeguards on the part of the employer. In this country we are poor supplied with statistics on such matters, but such as we have seem to show that the proportion to be ascribed to the workman is even greater than is abroad. Clearly, we must educate the workman to think of his own safety. What we are initiating is a campaign of education everywhere. This is not an hysterical reform movement such as often follows a big accident and rapidly dies out, but a steady, serious, unsparing effort to arouse the whole community, workman, employer, and ultimate consumer, of all whom bear share of the loss, and all must be brought to believe that every avoidable accident is a crime.

**SWIMMING TEAM**

Members of the Swimming Team are asked to report for practice on Mondays, Wednesdays and Fridays at 5 o'clock at the pool of the Young Men's Christian Association. Captain Groves states that there is a lack of material, and that more men are needed. The following men have been retained on the team: H. D. Bover, N. A. Bond, R. N. Guy, H. P. Greider, W. C. Foster, J. H. Hanley, F. V. Humford, F. R. Harris, E. M. New- ton, C. L. Kingsbury, R. B. Wilks, D. Bly, W. A. Wood, G. S. Goode, R. H. Day and B. C. Curtis.

**T. C. A. CAMPAIGN FUND**

The T. C. A. campaign fund amounts to about one hundred and seventy dollars up to date. Courses one, three and five have not yet been heard from. In one course, all the men of the Junior class contributed to the fund.

**EDISON DEMONSTRATION**

The Edison Diamond Disk Phonograph Co. will give a demonstration of its latest machine in the Union today at 1:30. An exceeding varied and interesting program has been arranged.

**PRESIDENT MACLAURIN RECEIVES NEW HONOR**

Chosen President of the Boston Safety Society—Meeting Yesterday.

A "Boston Safety Society" has been organized for the promotion of industrial safety among factory workers in Boston and generally throughout the State. President Maclaurin has been chosen to head the new society, and many other prominent men have been named as vice-presidents. The formation of this society is a result of the popular Safety First campaign inaugurated by the Boston Chamber of Commerce last summer, and was suggested by the Chamber's committee as serving to cover, through the co-operative efforts of employers and employees, the important field of accident prevention in manufacturing plants and industrial corporations which could not be reached by the public campaign. The first meeting of the new society was held last evening at Pinneuil Hall. President Maclaurin gave the address which is printed below:

The eyes of the world are fixed today on the war in Europe. Here in America we are appalled by its inhumanity and the terrible economic waste that it involves. Its dramatic aspect arouses our interest and leads to good in many ways, but it has its own. One of these evils is the great load of needlessly suffering and loss that it imposes on the workmen of the country. The statistics of Germany seem to show that the problem is about two parts workman and one part employer. In other words, that there are about twice as many accidents that happen through the carelessness of the workman as through the neglect of proper safeguards on the part of the employer. In this country we are poor supplied with statistics on such matters, but such as we have seem to show that the proportion to be ascribed to the workman is even greater than is abroad. Clearly, we must educate the workman to think of his own safety. What we are initiating is a campaign of education everywhere. This is not an hysterical reform movement such as often follows a big accident and rapidly dies out, but a steady, serious, unsparing effort to arouse the whole community, workman, employer, and ultimate consumer, of all whom bear share of the loss, and all must be brought to believe that every avoidable accident is a crime.

PULMOTOR INSTALLED
AT THE INSTITUTE

"Safety First" Movement Brings Life-Saving Device To Employees.

Probably few undergraduates at the Institute realize what precautions are taken to safeguard the lives of employees and others engaged in the power-plant and laboratories. An example of this precaution was the installation, a few months ago, of an up-to-date, and efficient pulmotor in the office of the Superintendent of Buildngs and Power. This recently developed life-saving device has been proved to be of incalculable value in resuscitation from drowning, electric shock, asphyxiation, and all accidents where breathing is cut off. The apparatus consists of a small tank, containing oxygen under pressure of 2000 pounds per sq. inch, and an exceedingly ingenious device which automatically fills and empties the lungs of the patient with oxygen. It not only regulates the pressure of the oxygen, but adapts the speed of the respiration to the size of the victim's lungs, so that normal breathing is assured to either a child or an adult. The pulmotor was taken to the Summer Camp at East Machias, and fortunately, there has been no necessity for its use, either there or here at the Institute.

The supply of five extra tanks of oxygen makes possible four hours of continuous artificial respiration, although a few minutes are usually sufficient to restore consciousness. Practically all of the employees about the Institute are instructed in the operation of the pulmotor, and it is readily accessible at all times, so that the risk from accidents of this particular type should be greatly decreased.

NEXT T. C. A. TALK
The Technology Christian Association has secured Reverend H. B. Gibbard to speak in the Union, tomorrow noon at 1:30 P. M. His subject will be "Counting the Cost." Doctor Gibbard is noted for the humor in his addresses which he has told at his former talks here. Once, when speaking to Technology men, he gave as a boy's definition of a lie "an abomination in the sight of the Lord, but a very pleasant thing in time of need."

ELECTRICAL SOCIETY
Mr. William H. Blood, Jr., of Stone and Webster, will speak to the electrical engineers next Wednesday, December 23, 1914. His subject will be "Some suggestions for the Making of Examinations and Reports."

ELECTRICAL'S TRIP
Today and tomorrow, the Electrical Engineers go on trips to the Simplex Wire and Cable Company in Cambridge. The trip is to start from Lowell Building at two o'clock on both days.

A Letter from "Ma" with P. S. from Sister
"It was all right to be an Indian in the football season, but you must be civilized now, and heed your personal duties. You told us in one of your letters about that beautiful dress suit that Burke makes for $5.00. Get one, if you haven't."

Sister's P. S. "That's right."

MECHANICALS TO VISIT WALTHAM WATCH CO.

Several Members Of The Department To Accompany Men On Trip.

Two trips to the Waltham Watch Co. Factory, Waltham, Mass., will be made by the members of the Mechanical Engineering Society, one tomorrow, and the other on Friday. As the list for the two afternoons is nearly complete, thus limiting the number who can go to about a dozen for each trip, those who first apply will have the privilege of going. F. G. Potting is taking the names of those going on Thursday, and W. R. Hanchett is signing up the men for the Friday trip. Preparatory to both the Thursday and Friday trips the men are to meet on Rogers steps at a quarter to two.

The Company, which employs some four thousand hands, turns out some of the finest machine-work that is done in watch-making. Guides will be furnished to show the men about the works, and to explain the function and operation of the automatic machinery.

WRESTLING TEAM TO MEET BEVERLY

Institute Has Already Defeated It Once—Return Meet Saturday.

Next Saturday night the Techolu by Wrestling Team meets Beverly Y. M. C. A. at the M. I. T. Gym. The Technology Wrestling Team has already met and defeated the Y. M. C. A. team and is confident of repeating the performance in its own gym. Manager Morse and Captain Crowell want a good crowd out to see the first home meet of the year. Tickets are 25 cents and may be obtained from any member of the wrestling team.

Final arrangements for the meet have been all but completed, and there will be twenty-five minutes of music furnished by the Institute Band. The men representing the Institute will be as follows: 110-pound class, Loe; 115-pound class, Stickle; 120-pound class, Breslow or Danno; 125-pound class, Moulton; 130-pound class, Goodell; 135-pound class, Walter or Board; and heavy- weight class, Captain Crowell.

RIFLE CLUB SHOOT

The Rifle Club held the first indoor shoot in the South Armoury at Irvington yesterday afternoon. A large number of members turned out, but there was no official record taken of the scores. The range was twenty-five yards.

CUSTOM HOUSE TOWER

Mr. M. A. Reddy, Designing Engineer, will give a talk to the members of the Architectural Engineering Society this evening in Room 40. Please be on the subject of "The Structural Features of the Custom House Tower."
The Men Who Put The Fun Into Your Daily Life

WITS well sharpened and minds in good humor, the men who have these generally knows what he is talking about. Read the testimonial on this page. Here are some of the greatest cartoonists in the country. They all smoke and endorse Tuxedo.

They wouldn't smoke Tuxedo if it didn't keep their minds alert and cheerful all day long, day in and day out. A tobacco that can do that stands in a class by itself.

Tuxedo is made of the very highest grade of choice, mellow, sweet Kentucky Burley leaf—treated by the original Tuxedo Process, which removes the sting so that it cannot bite your tongue—granulated so that it smokes freely and uniformly—packed 40 pipefuls to the 10c tin.

Tuxedo deserves everything that has ever been said of it—and to prove it Tuxedo sells by the millions upon millions of tons annually.

YOU CAN BUY TUXEDO EVERYWHERE

Conveniently packed, 10c tin of TUXEDO tobacco to any address anywhere in the United States. Address

MUSICAL CLUBS

Section 4 will include initials I, J, K, L, M, N, and O. It will extend from letter L to the seating system.

Section 5 will include initials L, M, N, and O. It will extend from letter A- to the seating system.

Section 6 will include initials O-Q, and will extend from letter R to the seating system.

Section 7 will include initials R-T, and will extend from letter T to the seating system.

Section 8 will include initials U-V, and will extend from letter V to the seating system.

The system works in this manner. If a man whose initial was "M" had a dance engaged with a man whose initial was "C," it would be up to No. 1 to look up No. 2 as his initial came after the initial of No. 2 in the alphabet. If No. 1 had initial "O" and No. 2 initial "W," it would be up to No. 1 to locate No. 2 before the dance for the same reason.

The important part of the system lies in the fact that the man who is to be looked up in each instance is to remain in the section allotted to man whose initial corresponds to his. For example, if "C" had a dance with "M," he would stay in the "C" section after the dance next proceeding the one with "M" until "K" was successful in finding him.

The officers of the affair are to lend their support to the arrangement and try to make it a success.
