WRESTLERS WIN MATCH WITH WEYMOUTH TEAM

Clapp Memorial Association Defeated at The Gym, January 11, 1915, By Technology.

The Technology Wrestling Team defeated the Clapp Memorial Association of Weymouth by winning 6 out of 8 bouts last Saturday night. The Technology men showed their superiority by winning the first six bouts in succession. Three of these were won by falls. In a hand-to-hand bout in which Zeoli of Clapp Memorial agreed to throw Stebbins of Technology, whom he overpowered six pounds, Zeoli had all he could do to keep from being thrown himself.

Wood started things for Technology by throwing Pride in about three minutes. In the second bout Gillis of Technology won a hard match which he lost matter in six minutes. Zeoli then brought to throw Stebbins in fifteen minutes. Goodman was in the show in about the same time of three minutes. Loo showed his old-time skill and knowledge of the coin point of the man when he came to make the fifteen minute bout. While Clapp of Weymouth was the leading man of Technology, the former Dartmouth athlete, who, in addition to winning the high jump, set up a new Tech record of eleven feet for the pole vault. The best race was the mile run. Fifteen men started. Cook and Stevens alternated at the first six steps when Cook took the lead and was never headed.

The summary: 35-yd. sax, won by Donlan, '17, time 5.5-6s. 88-yr., run, won by Gushing, '16, time 2m 10.5-2s. One-mile run, won by Cook, '15, time 5m 30s. Shot put, won by Swain, '16. High jump, won by Buck, '15.

TECHNOLOGY ALUMNI DINE AT SOMERSET

Over Five Hundred Alumni Members and Guests Will Attend Banquet Saturday.

The enviable position of Technology in the educational world of to-day was again brought out vividly at the annual dinner of the M. I. T. Alumni Association at the Somerset last Saturday evening. The importance of these speakers not alumni of Technology was present and seemed to indicate the extent and range of Technology's interest.

"We of the Association," said Mr. Cushing, "are here to remind us of the duty to the Commonwealth to which we owe so much, and whose service must always be our first consideration. We have Mr. Eliot, the President of Harvard, who represents the New England—railroad on whose successful operations depends in so large a measure the commercial prosperity of that great section of the country of which Massachusetts is but a part; and we have Mr. Taft, representing the nation as a whole—a man held in respect and affectionate esteem by his countrymen everywhere and by his great qualities of mind and heart typifying what is best in humanity all the world over."

Five hundred alumni were present including twelve women who are former students, together with the speeches of President Whitman, Secretary Humphreys and committee man Whidden. Every class was represented, of which there are but three living graduates. The first class to graduate, that of 1869, had been represented. The closing address was made by William H. King, '94, assistant corporation counsel of the city of New York, first president of the Technology Clubs Association.

Jasper Whiting, the retiring President, and Toastmaster, reviewed the work accomplished during the past year. The most important thing that had been performed, he said, was the founding of the treasurer, Walter Humphreys. "Walter Humphreys," he explained, "had held the keys to the money bags for eight years and no one had been taken to the trouble of making off with the enormous sums entrusted to his keeping. Walter is honest enough now, no case will be heard."

The picture of the Institute Committee for Technique Is Best will be taken at Notman's Thursday, Jan. 14th, at 11.00 P. M.

states of Harvard, giving them the prestige of both great institutions. I congratulate you on this great forward step.

The combination does not violate the anti-trust law he said and would not as long as the students of Technology enjoyed the privilege of member status of the Harvard professional schools and not those of Harvard undergraduate. When the latter came true and they were asked to compete for membership on Harvard teams the University in Connecticut might rise up and enter suit to enjoin them under the anti-trust law from so combating.

President Macaulay, in his speech following Mr. Tufts' said, among other things: "We must never get away from the fundamental fact that educational institutions exist for the rising generation and not for those that have risen, that their purpose is to serve the community as a whole and not that section particularly on whom they have already conferred great favors. Just a year ago today a great stride was taken in the right direction by the agreement between Harvard and Technology that has been discussed so much within the last twelve months." Speaking of the effort that has been made toward cooperation between all the schools of Massachusetts he says: "If this great co-operative effort is at all successful, it means that we have established what is effectively a great University of Massachusetts, worthy of the best traditions of the Commonwealth and incomparably more potent for service of certain kinds than any single institution could possibly be."

Chairman Elliott presented his view of the New Haven's problems and discussed the railroad situation at length. He emphasized the need, in New England particularly, of securing legislation in the various states that, first of all, does not conflict, and that will facilitate the restoration of the railroad's credit. He expressed a hope for a federal financial plan for railroad development and operation—one that is better than the present expensive method of borrowing money for short terms and high rates of interest. Concerning the public and the public service commissions, Chairman Elliott observed many hopeful signs especially in their attitude on the matter of rate increases. About regulation itself he remarked "Regulation of the great public service corporations, if it stops progress, is a failure. The power to regulate carries with it the duty to protect. Men like graduates of the Institute and of Harvard ought to use their influence with their respective legislative, and help them, and should not stand aloof, but as stated by the President in his letter of September 10 to the railroads, "all stand as one to see justice done and all fair assistance rendered and rendered ungrudgingly."

President Henry J. Horn, the incoming president, congratulated Jasper Whiting on the work done during the past year which is considered

CONCERT AT SIMMONS

All Numbers Well Received— Dancing Follows Program.

Last Saturday evening the Combined Musical Clubs gave a concert at Simmons College for the benefit of the Endowment Fund. Miss Dorothy Thomsen, who is president of the Ohio Club under whose auspices the concert was given, stated that over $100 was raised. This sum will go towards the building of a new dormitory.

The concert was from many points the best given this year. All the numbers were well received, especially the Medley by the Glee Club. The solos by H. C. Williamson were also well rendered. Dancing followed the concert to which all the men were invited.

CHESS TEAM WINS

Last Saturday the Technology Chess Team defeated Harvard by a score of six points out of eight with one draw. The eighth game is as yet unfinished.

in every way one of the most successful.

The surprise of the evening, and every one who knew that George B. Gibb, '95, was on the committee expected some surprise, was when James W. Rollins, '78, known of all Tech alumni, rose to his feet and the orchestra struck up the Wedding March from Lohengrin. Not knowing who was to be wedded, but realizing that it meant a ceremonial entrance of some kind every eye moved to command the door. As it sprang open there appeared a diminutive negro boy moving with the pomp and majesty inherent in his race and bearing a silken cushion and upon it some object covered with a veil. To the dignified music the youngster marched through the hall to where Mr. Rollins awaited him. The veil torn aside there appeared a silver porringer and spoon, the handsome gift of Mr. Maclaurin. The head table was decorated in a wealth of colors and from it the guests were called to their seats and the toast reading commenced.

WELL dressed and discriminating men realize that Coes & Young shoes reflect a certain individuality that is most essential in lending character and distinction to their appearance.

HOCKEY TEAM TO PLAY YALE NEXT WEDNESDAY
Second Game Of The Season To Be Played In New Haven—No Game Saturday.

The game which the Technology Hockey Team was to play against the East Side Hockey Club last Saturday had to be called off on account of there being no ice in Providence. The next game is against Yale next Wednesday night at New Haven.

The recent acquisition of Coach Denishaw has already begun to show itself in the style of play of the whole team and in the last few practices the men have really taken on the aspect of a team and not an aggregation of several individual players. Manager MacRae has made a slight cut in the squad. The following men have been retained and are to show up for regular practice: Fletcher, Sawyer, Tutein, Winton, Cochran, Johnson, Keeler, Wood-Gould, Jewett, Blakewell, Toye, Ward, Coward, Ross and Gleason.
