DR. NASMYTH SPEAKS TO COSMOPOLITAN

Tells of Recent Convention Of Cosmopolitans From All Colleges.

The members of the Cosmopolitan Club received a new impression of the work that is being done by the Association of Cosmopolitan Clubs for the furtherance of world peace. At the informal dinner of the club Dr. Nasmyth, representative of the Harvard and M.I.T. clubs at the recent convention of the Association of Cosmopolitan Clubs, told of the spirit of the Convention.

The spirit of the convention was one of united work for peace and the furtherance of international harmony. The clubs at the different colleges have taken steps to educate the communities in which they are located to appreciate the brotherhood of mankind. Foreign students have been sent to speak at forums, churches, and similar institutions, giving the people some idea of foreign countries and ways of thinking. In this and other ways the clubs of this country have tried to help in the broad work which is being done by student cosmopolitans all over the world.

The present war has brought hope to all nations of more understanding between different peoples, and all the student clubs, which are affiliated in an international organization, are trying to work together in the cause of peace.

CATHOLIC CLUB MEETS:

Banquet Held In The Union—Plans For Dance Discussed.

The Catholic Club of the Union met in the Union Wednesday night for a banquet and talk. Father Scanlan spoke a few words, and introduced the speaker of the evening, Mr. Maning, who told of the work of the Superior Criminal Court, of which he is clerk, and of the Home for Destitute Catholic Children. At the close of the meeting, W. H. Colley was selected representative from the class of 1937. The plans for the dance of the club were then discussed. This dance will take place at the Hotel Somerest on Wednesday, February 10, the price being $1.50 a couple. Each member of the Club will be sent two tickets to dispose of.

Mr. Manning began his talk by the statement that besides the working life in college there is the charitable, the help-your-neighbor side. When a man of seventeen began to work in cotton, and the man may be the man he made his resolve to do what he could to help. Some twenty years ago he became interested also in the Home for Destitute Children. This home was started at the time of the Civil War, when a number of states required the care of the orphans of soldiers, and organized the Home for their benefit. It is now able to care for some 500 children.

CUSTOMS HOUSE TOWER

Designer To Address Architects At Union Tonight.

A joint smoker will be held in the Union tonight at 8 o'clock, by the Architectural Society, and the Architectural Engineering Society. The subject will be The Construction of the Customs House Tower, and will be treated by Mr. M. A. Reddy, the designing engineer. Mr. Appleton, one of the designers, will also speak on the branch of the construction. The meeting is intended for all Course IV students, as well as a number of juniors, who are expected to be present.

C. E. SOCIETY HAS AN INTERESTING MEETING

Speaking By Undergraduates Was A New Departure—Four Good Talks.

The meeting of the Civil Engineering Society Wednesday night in the Union was attended by about sixty men. After the announcement of the next meeting, which comes February 18, the speakers were introduced. At this meeting an innovation was attempted, in the form of talks by undergraduates rather than by engineers from outside. Refreshments were served in the side room at the close.

The first speaker was R. E. Walsh, who said that almost everyone used to be able to get a job in the summer as an assistant in an engineering camp; but it is now recognized that something more is needed. For this reason the Civil Service Examinations are helpful to the employers. The fact that a man has passed an examination involves a certain amount of training in that line, and moreover it shows that the man possesses some interest in the work. He said that there is nothing very hard about the exams and that he was glad to see so many planning to take them.

Mr. H. E. Mitchell, a professor in the school of Applied Science at Syracuse University, and a graduate student at the Institute this year, next spoke on the relations of the teacher.

The college graduate who wishes to become a teacher may go into the public schools, or into a college; the technical graduate is limited to teaching mathematics, physics, chemistry, and manual training in the high school.

SWIMMING TEAM

Captain Fortier of the Swimmer Team reports every one who has been retained on the squad to report for practice, regularly, as the time available before the meet with Amherst on February 12 is limited. Time trials will be held during the next two practice sessions.

CALENDAR

Friday, January 15, 1915.

1.10—Cross Country Picture. Natman's.

4.15—Mandolin Club. Union.

6.00—A. A. meeting. Union.

7.15—Ch. Society Talk. 62 Pierce.

8.00—Science as a Prevention of Fraud. Huntington Hall.

9.00—Advisory Council A. A. Picnic. Natman's.

7.15—M. M. Hockey Team Leaves Union for Amherst.

8.00—Wrestling Meet with Brown.

WRESTLING TEAM VS. BROWN TOMORROW

Both Teams In Excellent Trim—University Has Strong Quinl.

Tomorrow night, at the M. I. T. Gym Technology's first college wrestling meet this season will be held. The team has already won three matches but Brown will be its first really difficult opponent. This will give the first real opportunity to determine how efficient this year's squad is made up.

Last year, Brown University was defeated by Technology's champions. (Continued on Page Four)

THE MONTHLY

The February issue of the Technology Monthly and Harvard Engineering Journal comes out next Monday. It will contain several articles, a number of which have been written by undergraduates. A wide range of subjects will be covered from articles on the subject of swimming to one on the making of the Panama Canal. There will also be a good number of illustrations. The humorous side has not been forgotten as there will be a series of cartoons by wounder as well as illustrations by one of Life's staffs.

YALE HOCKEY TEAM DEFEATS TECHNOLOGY

Hard And Fast Game Finally Won By Blue By Small Margin.

In the game last Wednesday night at the New Haven Arena the M. I. T. Hockey Team gave Yale the hardest and most closely contested game they have played this season. Although the final score was 5-3 in favor of Yale, it was only after two extra five-minute periods that the wearers of the Blue were entitled to claim a victory. (Continued on Page Two)

Lectures of Society of Arts to Commence

Dr. Bigelow To Talk on "Science As Protection Against Fraud"

The first of a series of lectures under the auspices of the Society of Arts will be given this evening at eight o'clock in Huntington Hall, by Dr. S. Lawrence Bigelow, Professor of General and Physical Chemistry at the University of Michigan. His subject will be "Science as a Protection Against Fraud." Clever frauds, especially scientific ones, have a fascination for the general public, and Professor Bigelow will discuss some of these in detail, especially those in connection with chemistry, physics and medicine.

Dr. Bigelow is a man of wide education and experience. After graduating from Harvard, he entered the firm of Bigelow & Dana, a hardware firm. He left his business to take a scientific course at the Institute, from which he graduated in 1895. Later he went to Germany to study, and obtained a Ph. D. degree at Gottingen under the famous Norman. He has been at the University of Michigan during the latter part of the past few years, and has there acquired a reputation as a fluent and easily comprehended lecturer.

The other lectures of the Society will be as follows: "The Horse and its Progenitors," by Dr. W. D. Matthew, Curator of the Department of Vertebrate Paleontology, American Museum of Natural History; an experimental lecture in physics, by Professor Dorr of the Institute; a talk by Dr. Carl Alpers, Head of the Bureau of Chemistry of the U. S. Department of Agriculture; and a lecture on "Submarines" by Professor W. Howard, formerly Lieutenant Commander in the Danish Navy, and now a member of the Institute Faculty.

RED AND GRAY will probably be given two more games at the New Haven Arena during mid-week; one against the rink team and one against some college seven. If possible a second game with Yale will be arranged.

To Coach Denham who has worked hard with the team for the past few weeks, the team owes in a great measure its good showing in this game. Now that he has seen the team in a game he knows its weak points and can coach the team from now on to better advantage since he knows its defects. The game by periods is as follows:

Almost at the blowing of the whistle Coward got the puck and dodging the whole Yale defence passed to Whiston who made a pretty shot resulting in a goal, after about fourteen seconds of play. The game for the next ten minutes was very fast, the puck being alternately at each end of the rink. During this time Yale made several remarkable stops which looked like almost sure goals for Yale. Hereon finally scored Yale’s first goal by clever individual effort after eleven minutes, twelve seconds.

At this time Gould, in a scrimmage, made a needless delay in the game by putting the puck on his stick and sitting down. This was immediately followed by Coward, who in a beautiful play, passed the puck to Whiston who made a perfect shot which was stopped by Gould.

With three offices, conveniently located in different sections of Boston, the Old Colony Trust Company offers exceptional banking facilities for Technology men. Modern safe deposit vaults at all offices.

the interest of spreading the doctrine of international brotherhood, hoping thereby to prevent another calamity such as the present struggle. Dean Burton spoke briefly to the Club, commanding the plan which is now on foot to have a larger entertainment directly after the mid-year vacation. Professor Seaver described an interesting prophecy that he had heard in the weeks of Sir Francis Bacon, anticipating the Institute. Bacon told of a College of Six Days' Work, and gave a description of the feelings and ambitions of students that is somewhat similar to what we have here. Professor Seaver mentioned especially the spirit of the institution, namely, to investigate science for the purpose of alleviating the sufferings and difficulties of humanity.

MRS. IRENE CHASE HIBBARD will give instruction in modern dances Wednesday evening, from 8 to 10 o'clock. General dancing, 9 to 11. Subscription in advance, $5.00 for ten, or $3.00 for five. Single evenings, 9, 75.
