RELAY WITH GEORGETOWN AT HARTFORD

Mile And Two Mile Teams Vs. Cornell And Dartmouth At Providence.

The Varsity track team starts the hardest part of the indoor schedule with the dual relay race against Georgetown at the Hartford military meet tonight. The race will be run over the full mile route. No individual cafion will be sent to Hartford, as the meet in past years has not proved a financial success and the management was unable to secure expenses for anything except a relay team.

At Providence the following night both the mile and two mile team will be seen in action. The opponent for the mile team has not been definite yet announced, but arrangements are pending with Cornell at present. Syracuse had been secured by the Providence management as Tech's opponent, but "Tommie" Keane declined to consider the proposition after seeing the race against Dartmouth at the B. A. A. games. The two mile team will be matched against the Dartmouth team, which defeated Penn in that time at the Unicorn meet.

The short relay will be made up of the same men who ran against Harvard, Holy Cross and Dartmouth, and although the distance in the Georgetown race will be a full quarter per man, the team should be fully as fast over the longer route.

AERO DYNAMIC MEDAL

American Aero Club Provides Trophy For Institute.

Professor C. H. Peabody, head of the department of Naval Architecture at the Institute, has been notified by the Aero Club of America of the establishment of an award in the form of a medal to be presented annually. This testimony of the leading club in the aviation field was tendered to a student for merit in the graduate work in Naval Architecture, and he was received with a hearty welcome. He stated that he would give the second chapter of the bluffer a little time to catch up and explain his statement of "Never present, a help in time of need." The immediate benefit may seem advantageous, but in the end is a very dangerous game for a Tech student who is at the Institute for four years.

Tech relations with foreign countries as engineers is remarkable. A dozen of Tech students are in the European war, one has been killed, two wounded, and the others have not been heard from. There are over two hundred and forty whose homes are unknown.

THE TECH

PROGRESS MADE ON THE NEW TECHNOLOGY

Concrete Pouring Suspended Until Spring—Granite Work Almost Complete.

Contrary to general opinion work on the New Technology has not been discontinued. While it is customary to suspend certain operations during the periods of frost and snow, some who have noticed the decrease in number of workmen have attributed it to financial difficulties, which is not true. The open Salt permitted the pouring of concrete and other outside work in unusual measure so that the Institute found itself actually ahead of the schedule. So in December with few days left, the 1917 Football team at the roof line the pouring of concrete was discontinued until warmer weather.

The laying of the granite base, the limestone facing, and the brick work of the interior courts has steadily progressed. Of the granite twenty-one carloads, or 70 per cent of the whole, is today in place. The tiling portions are the bases of the long mechanical engineering building and on the Great Court side, the bases of both sides of the two short wings extending east and west of the library, and the granite of the latter building, which has not been pushed forward with the rest. Progress with the limits (Continued on Page Four)

CAST SELECTED

Coach Hume Picks Men For Parts In "Getting A-Cross."

After a short but extremely keen competition for the cast of "Getting A-Cross," this year's Tech Show, Coach Hume has made his final choice. Over thirty men cane out for the principal parts after the voice trials and many of them showed considerable ability. The men picked to be retained only on condition that they do satisfactory work in all the rehearsals.

The parts and the successful candidates (Continued on Page Three)

TECHNIQUE PICTURES

The following Technique pictures are scheduled to be taken during the next few days: Tuesday, 1918 Football team; tomorrow, 1917 Football team; Tuesday, 1917 Relay team. The time in each case is one o'clock at Notman's. The picture of the basketball team which was formerly scheduled for Tuesday will not be included in the Technique photographs.

A little boy was asked what a lie was. Give the second chapter of the bluffer. A little time was asked what a lie was and the answer was, "Never present, a help in time of need." The immediate benefit may seem advantageous, but in the end is a very dangerous game for a Tech student who is at the Institute for four years.

ALUMNI BUSINESS CARDS

ALUMNI OFFERED TWO ADDED ATTRACTIONS

Display Of Architects' Work And By Institute Committee At Pittsburgh.

To acquaint the members of the Technology Clubs, assembled at Pittsburgh, with the present state of activities in the Institute in general, and the Course IV work for the current school year in particular, exhibits to be shown at the convention have been arranged by the Institute Committee and by the Architectural Department.

The exhibits of the latter will be held in the Department of Architecture of the Carnegie Institute of Technology. It will be opened after the course luncheon and will in all probability remain there for two days. This display consists of forty-four design drawings executed by the present 3rd, 4th and advanced year students, among the number being those entered in recent prize competitions.

MECHANICALS MEET

Equipment Engineer For New Technology Buildings Talks.

At a meeting of the Mechanical Engineering Society which was held last Wednesday afternoon Mr. Harry Day, engineer for Stone & Webster, in charge of the equipment of the New Site buildings, talked on the methods employed in drawing the plans for the work. He told how materials were ordered from the drawings and a little about the organization of the draughting work.

The Society voted to make men in Course XV, taking the Mechanical Engineering option, eligible for the society.

CALENDAR

Friday, February 19, 1915.

1.00–1916 Postball Picture, Notman's.

ALUMNI NEWS

Dr. Maslarin will speak in Indianapolis Monday night and on Tuesday night will address the Chamber of Commerce at Cleveland.

J. W. Litchfield, the field manager, will hold a meet with the alumni of Cincinnati at a luncheon on the 23rd. He will attend a dinner at Dayton on that evening. He will also be present at a meeting of the Detroit Club on the 23rd.

At a recent meeting of the Technology Club of Philadelphia, the following officers were elected: Richard Waterman '92, president; L. F. Wadsworth, '93, vice-president; William B. Lenox '91, Secretary-Treasurer. Arrangements will be made regularly at the City Engineers' Club of Philadelphia.

The class of 1912 will hold the dinner for the current year on February 21st. Festivities will commence at 6.11 p.m. at Louis' Cafe. After the dinner a theater party at the Safety is on program. Information can be obtained from the secretary or B. Dendy.

Plans for the reception of engineers visiting the Engineering Section of the Panama-Pacific Exposition by the Technology Alumni China on the Pacific Coast are progressing, and the final plans will be announced in about two weeks. Arrangements for accommodations in the city of Seattle are nearly complete.

On February 8th, the Washington Society of the M. I. T. gave a smoker and lunch at the University Club. A large number of alumni were present and listened to a talk by Mr. J. W. Litchfield on the progress being made on the new buildings.

The Class of 1896 will hold a dinner and meeting in the Union next Tuesday, the 23rd.

Leonard C. Wason '91, gave a talk on Modern Building Construction at a dinner of the Technology Club of Rhode Island which was held at the University Club Wednesday evening.

The Technology Club of Albany has instituted a course of free public lectures by the State Department of Education. These lectures are given by institute men who are specialists in the various departments of the State and are held in the Education Building at Albany.

The Tech Club of Lake Superior held their annual dinner on Feb. 15th at the Kitchi Gammi Club, Duluth, Minn.

The following new officers were elected: President, G. R. Skelhorn; Vice-President, W. G. Zimmerman; Secretary-Treasurer, P. M. Folsom; Business Manager, Charles Brewer and William Parton comprise the Executive Committee.

A MAN'S house is his castle, an' his pipe's a strong defense to keep trouble an' gloom on the outside.

But the best pipe must be provided with good "annulation." Try VELVET, the smoothest smoking tobacco, Kentucky's Darley du Luxe, with an age-old-tar-wood mellowness. 10c tins and 50c seal-lined bags.

Semi-annual reduction sale

Of our entire lines of woolens—winter and early spring weights. We must reduce our entire stocks immediately, and to do so now you offer you the best values in the history of our business. You know what THAT MEANS. Our usual high-grade workmanship will go into all garments.

MAT MEN HAVE HAD SUCCESSFUL SEASON

Wrestling Team Has Received Good Support From Student Body.

Although the prospects of the wrestling team at the beginning of the season were not as bright as they might have been, the aggregation has made an excellent showing this winter and have lived up to the reputation which the Technology wrestlers have made in the past. Meets have been held with most of the strongest colleges in this part of the country and went through the past two seasons without defeat, and up to the present point have maintained their reputation.

This year the squad lost five of last year's men by graduation and two men through injuries. Of those constituting the squad last year Smith, Martin, Trest, Leeds, Means and Kelley, last year's captain, were lost by graduation. Besides these men Burke, who wrestled last year, has an injured shoulder, while Walter and Rounds have not been able to come around for practice this season so that the squad this year is up almost entirely of men who did not do wrestling on the varsity squad last year. The veterans back on the team this year are Loo, Crowell, Wood and Goodell, while several men who wrestled in novice meets and made the second team last year have found positions on the varsity squad this year. Among the latter are Shab- bina in the 125 lb. class, Hoffman in the 135 lb. class, Bond and Martin in the 158 lb. class, and Bone in the 115 lb. class, Bond and Mertz in the 135 lb. class, Bond, Treat, Leslie, Means and Smythe-Martin, Treat, Leslie, Means and Smythe-Martin, and the makers up the 125 lb. class.

Among the others to look for this year are some fine novices who have shown promise, especially among the 125 lb. class. Clarke, a freshman, has made an excellent showing this winter in the 135 lb. class. The team which has done good work this year, and Giles who comes from the University of Texas, has taken out all men in the 135 lb. class. Bodgitt, who managed the team two years ago, but did not do any wrestling last year, is back and giving a good account of himself in the 125 lb. class. The team as it stands is as follows:

115 lb. class, Loo or Bone.
125 lb. class, Rounds, Shabbina or Clarke.
135 lb. class, Giles, Hoffman, Burke or Bodgitt.
145 lb. class, Goodell.
158 lb. class, Bond, Martin or Burke.
Heavyweight, Crowell.

The team has held the New England Intercollegiate championship for the past year and the New England Club Championship for the past two years. The showing made against Brown this year was an excellent one despite the fact that Brown has practically the same team as last year. Last year Yale claimed the intercollegiate championship, but they were easily disposed of by the Technology wrestlers, as was also Harvard. Berkeley, Y. M. C. A. was defeated twice, 5-3 and 6-4; Chipp Memorial 6 bouts to 2. At the Brown meet a full set of rules were used and the decision came to 4 points, a little different method of scoring than that used in the prior meets, but despite this the Tech Technology had little trouble in winning 360. March 3 the team meets Harvard and inasmuch as Brennan, the cap-

HARTFORD MEET

(Continued from Page One)

is in charge of all branches of athletics at the Washington University, can be relied upon to send a fast quartet to the mark.

At Providence the distance for the short relay will be 352 yards to the man, and judging by the showing Cornell made against Harvard, Tech should start a decided favorite. The Cornell men, however, were unable to negotiate the corners on the Mechanics Building track, and will run a much faster race on the ten-lap track at Providence.

The make-up of the long relay for Saturday night has not been definitely announced, but Allan, Cook, Brock and Hamilton look best for places at present. Coaching is easily the fastest on half-miler in the Institute, and may run on both relays.

Ousheen will probably use the team which so easily defeated Penn at the B. A. A., making one of the fastest teams in the country at the distance. Tucker, Long and Green- ger are all men able to run the half in two minutes or better. Coach Canady will have a well-balanced and inasmuch somewhat inexperienced team, which will force the Green aggregation all the way.

In addition to the two relays, a number of individual entries have been sent in for the Providence meet. O'Hara, Wilson and Loomis will all start from scratch in the dash, and any one of them is apt to nose out first place.

OPPOSITE THOMPSON'S SPA
FINANCE COMMITTEE MAKES PROGRESS

Twenty-Six Activities Are Represented—Graphical Charts Now Used.

The importance of the Finance Committee is not fully understood by the different activities of the Institute and the accomplishments of the Committee are very seldom known. From the time of its organization in 1912, it has grown to be one of the most important student bodies and is now more or less responsible for the financial condition of the twenty-six student organizations. A record is kept of the finances of every activity in the Institute, and the different treasurers are required to meet once a month, submitting a report of the exact condition of their respective organizations. If an activity is in poor condition financially, the matter is discussed until a solution for improvement is attained, and in this way all activities are not only kept out of debt, but also with a safe allowance for coming expenditures.

Treasurers are also reprimanded for low allowance for coming expenditures. In this way all activities are not only kept in proper condition financially, the matter is emphasized the necessity for careful accounting. The question of the policy of the track department was also considered, and the future is brighter than ever. and a final hearty cheer.

Major Cole stated, "Size up a man for what he does and not for what he is worth." One is successful in the line of work if he has kept up physical and mental capacities.

The Evening Broke up with the singing of the Streak Song, led by Swan, and a final hearty cheer.

ADVISORY COUNCIL DISCUSSES ATHLETICS

Report of Track Team Submitted Ideas For Coming Season Taken Up.

The chief theme of the meeting of the Advisory Council on Athletics held last Tuesday evening at the Technology Club was a discussion of the policies of the track department for the next two years. Manager Webster reported on the future meets arranged for the indoor season and gave a tentative list of the outdoor events on the spring program.

This was the first year that the Undergraduates have had charge of the financial running of athletics and Manager Webster stated that although the general conditions were not favorable to be expected the season will pay for itself. He, however, emphasized the necessity for careful accounting. The question of the policy of the track department in the future was discussed. The feeling of the manager and the coach is that the Institute has no real rival now in the New England Association with the exception of Dartmouth and Maine and that in the future it would be advisable to work gradually into the class of the larger colleges.

Informal reports were given on the status of the wrestling, basketball and extra teams.

NEW TECHNOLOGY

(Continued from Page One)

Stone has been gratifying, being in place to the cornice level on the street and open court faces of four of the units, and to the third floor on most of the others. Altogether 199 (about one-half) of limestone have been received and submitted to the Institute.

Informal reports were given on the status of the wrestling, basketball and extra teams.

THE TECH, BOSTON, MASS., FRIDAY, FEBRUARY 15, 1915.
forth to South Americans wishing to pursue higher work in engineering than their own country could offer to them. A circular was prepared and the South American alumni notified, so that a series of Technology reunions have began along the route of the party.

The chief permanent feature of the education of education is a neat little brochure in Spanish illustrated with a color view of the New Technology outlined by President Macaulay and translated by Rafael Alfaro, '16. The phrasing was passed by Professor Ernest F. Langley and rushed through the press in order to catch the steamship.

A certain noted authority has spoken of this as follows: "The preparation of just this kind of circulars is one of the matters that Tech has taken up and developed in regular fashion. It has realized that this country leads the world in methods of technical education to produce what Mr. Edison has been pleased to designate as 'able young men', and is disposed to give the world the advantages that the close study and practice of these educational methods will afford.'

The idea of spreading information about North American educational work in South America was discussed at a meeting of the Alumni Council a year or more ago and general plans were formulated, but time to put them into operation did not come until the present tour. When it did come, it required merely a few days of quick work to get together the needed material. During the next three months every principal port of South America will have evidence not only of the attitude of the commercial United States towards South American markets, but the attitude of northern educational institutions, headed by Tech, towards South American students.

The "Rochester Experiment," a conference plan originated in the Rochester Tech Club, has fully proven its worth at the Institute. The scheme was put in practice only two weeks ago, but already a large and continually increasing number of men have taken advantage of the convenient way of obtaining advice which it offers.

The system by which the conferences are carried on is very simple. Every day some member of the Faculty is in Room 11, Engineering C, to meet students and help them in the removal of any difficulties which they are confronted. As yet, most of the men have brought questions relating in some way or other to scholarship, but as the scheme ceases to be a novelty, and is accepted as a standard feature of Institute life, it is probable that the types of problems brought up in the conferences will become more and more diverse.

Many Students Take Advantage of Recently Inaugurated Alumni Plan.

The Faculty members who are conducting the work are all young men. They represent practically all the main departments of Technology instruction, being chosen from the various leading courses. The group at present includes Robert E. Williams, assistant professor of Chemistry; C. E. Moore, assistant professor of Mathematics; R. E. Rogers, assistant instructor in English; F. B. Kennedy, assistant in Drawing; and J. W. Howard, assistant professor of Civil Engineering.

The system is made-in the blank given on page five, subscription blanks. One hundred replies were received. A further offer is made in the blank given on page five of this issue.
