MINING SOCIETY

Mr. W. S. Hutchinson, 1892, Will Be The Speaker.

Mr. W. S. Hutchinson, Technology 1892, and Professor C. F. Locke, will be the speakers at the Mining Society meeting next Friday night. Mr. Hutchinson will talk on quicksilver mining in Arizona and platinum mining at Good Springs, Nevada. At present the world's supply of these materials comes from Europe, the platinum from the Ural Mountains and the quicksilver from Spain. Naturally the price of them is considerably affected by the present war.

Mr. Hutchinson graduated from the Institute in 1892 and is at present a consulting mining engineer in this city. His entire life's work has been in the mining profession, his early experience being gold mining in California. Later he had charge of a gold mining enterprise in Idaho and also of some zinc companies in Missouri. For the last five years he has been a consulting engineer and has travelled over a great part of the United States, Mexico and Canada. Professor Locke will speak on the occurrence and assaying of platinum. The meeting will be held in Room B at the Union.

T. C. A. NEWS

At the T. C. A. talk tomorrow noon in the Union Mr. W. H. Foster, a prominent Boston lawyer, will speak. Mr. Foster has been vitally interested in Ford Hall and has done much work there with G. W. Coleman. He has investigated to a great extent the city unemployed and will speak on the general topic of unemployment.

The T. C. A. elections close Thursday, April 1.

Another call for men to work on the publication of the Technology "Bible" is issued and there will be a meeting today at 1.30 in the T. C. A. office.

JAS. J. CORBETT

Famous Prizefighter and Actor, says:

"My enthusiasm for the fragrance and mildness of Tuxedo has no limit. Tuxedo is without doubt the most satisfactory pipe tobacco."

James J. Corbett

**Tuxedo Keeps You in the Pink of Condition**

Corbett is today as physically vigorous and mentally alert as when he was champion of the world, because he takes good care of himself. He smokes Tuxedo—because he knows that Tuxedo is mild, pleasant, wholesome and beneficial in every way. He takes no chances on other tobaccos.

You can keep yourself sound-winded and in the pink of condition with this mild, fragrant tobacco. Smoke all you want of Tuxedo; it can't hurt you and will give you added pleasure with each pipeful or cigarette.

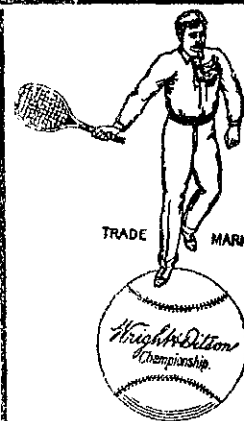

Tuxedo
The Perfect Tobacco for Pipe and Cigarette

Mild, fragrant, delicious—and as gentle with your tender tongue as the touch of Spring—Tuxedo turns on a new inspiration. It can't bite, it can't sting because that's cut out by the famous original "Tuxedo Process" that first made men realize how good a pipe smoke could be. That process today stands supreme. It never has been duplicated.

RIFLE CLUB

No Shoot Last Saturday—Freshmen To Meet Harvard Team.

Owing to the high wind and unfavorable weather conditions last Saturday, the Rifle Club omitted its regular practice, and will shoot this Saturday instead. A list of those eligible has been posted on the Union Bulletin board, and all desiring to go are requested to check their names or to cross off their names if unable to go. This list will remain posted till Thursday at 6 o'clock, when it will be superseded by a subsidiary list composed of those next in line. The party will be limited to fifteen men.

Replies as to the choice of rifles are coming in slowly. If no reply has been received from each member by the end of the week, rifles will be assigned by lot, each man to use only the rifle assigned to him for the rest of the season.

The Freshman Rifle Team of Harvard has challenged the Tech freshmen, and a first year team will be picked shortly.

There will be a meeting of the Executive Committee Friday noon in the Union.

THE TECH DINNER

(Continued from Page One)

H. Ranger and G. A. Palmer, '15; M. B. Dalton, President of the Senior Class; C. W. Loomis, Editor-in-Chief Technique 1916; and C. W. Howlett, I. B. McDaniel, K. T. King and R. H. Wells, the famous Hawaiian Quartet, who have kindly consented to render several musical numbers.

The banquet is expected to eclipse all previous ones, both in attendance and entertainment. All men on The Tech who hold positions at present, or who have been elected to the new volume, are invited to be present. The affair will be strictly informal, and will begin promptly at 6.30.

THE TECH

VOL. XXXV. NO. 1.

PRICE THREE CENTS

THE TECH, VOLUME XXXV, USHERED IN WEDNESDAY

Mr. J. P. Williams, Editor-in-Chief Of Transcript, L. K. Rourke, '95, And I. W. Litchfield Give Talks At Annual Banquet.

MASS MEETING

Annual Gathering To Be Held In Huntington Hall.

The annual mass meeting in the interest of student affairs will be held in Huntington Hall Wednesday, April 14th, at 4.15. Representatives of all the student organizations will be present and will tell what their associations have been doing in the past year and what they aim to do next year. The student body is urged to attend as the gathering will prove of interest to everyone.

FRATERNITY BASEBALL

Fifteen Teams Will Compete For Championship.

A short time ago representatives from all fraternities in the Institute met to consider the formation of a baseball league and, after a short discussion, a committee of five was appointed to draw up a set of rules and regulations while fifteen fraternities agreed to enter a team. The first games will be played on Saturday of this week with four teams playing in Brookline and the rest at Franklin Park. The league is composed of three divisions with five teams in each. The winner of each division will play for the championship. A handsome silver cup has been awarded by a "Mr. Smith," who is interested and, although his exact identity is unknown, the trophy itself may be seen at the Union.

From the enthusiasm already shown the league will undoubtedly be successful, and if every fraternity plays its games when scheduled the championship will be decided early in May.

Owing to a lack of space, only tomorrow's schedule is published.

League No. 1.

Sigma Chi vs. Sigma Alpha Epsilon; Theta Chi vs. Lambda Chi Alpha; Theta Delta Chi, bye.

League No. 2.

Kappa Sigma vs. Lambda Phi; Beta Theta Pi vs. Phi Sigma Kappa; Theta Xi, bye.

League No. 3.

Delta Kappa Epsilon vs. Phi Kappa Sigma; Delta Tau Delta vs. Alpha Tau Omega; Phi Beta Epsilon, bye.

TRACK TEAM

All candidates for the various class relay teams must report immediately for practice at the Field.

At the annual banquet of The Tech, held at the American House last Wednesday evening, about fifty

ALDEN H. WAITT, '15.

men were guests of the paper, including all those who have made positions on the paper, as well as a number of outside guests. These included Mr. James P. Williams, editor of the "Transcript"; Commissioner of Public Works, Louis K. Rourke; Mr. I. W. Litchfield, '85; the Bursar, Mr. Horace S. Ford; Mr. John Ritchie, Jr.; Mr. W. H. Fielding, president of the Machine Composition Co.; M. B. Dalton, '15; C. W. Loomis, '16; and The Tech Advisory Council.

(Continued on Page Two)

UNEMPLOYMENT

Discussed By Prominent Boston Lawyer In Union.

Yesterday noon Mr. W. H. Foster spoke in the Union on the subject of "Unemployment." He showed the part which the technically trained man can do to relieve the hardship under which they now labor. He considered that the majority of employment bureaus, both municipal and others, are run in a poor and inefficient way. They tend to create vacancies, instead of filling them, in order to collect as many fees as possible. He told what he considered a model bureau which will come very soon. It would consist of a dining room, accommodations for the men who were waiting for positions, libraries and recreation rooms. He ended by telling of actual conditions in many of the present large firms.

ENTERTAINMENT AT MUSICAL CLUBS SMOKER

Mandolin Expert Plays At Union Before Audience of The Three Clubs.

The members of the combined musical clubs held a smoker in the Union last night. Mr. James M. Johnstone, known as "The Man with the Mandolins," delighted those present by the rendition of several selections on his favorite instruments. In one selection, of his own composition, Mr. Johnstone played on five different instruments. R. B. Stringfield, '15, known for his success in the Hawaiian quintette, performed upon the steel guitar. Mr. Justin Williams of the New England Conservatory of Music played several piano solos.

Questions concerning the leadership and management for next year were discussed and a review of the past season's work was recounted. Talks were given by Professors Russell and Bugbee, after which the refreshments and smokes were consumed.

Just before the close, the members were delighted by the exhibition upon the screen of some of the pictures taken on the trip.

SHOW APPLICATIONS

Tomorrow Night The Final Date For Receiving Them.

The Tech Show management announces that the applications for seats for "Getting A-Cross" are coming in very slowly, only 150 having been received up to last night. This is a very small fraction of all that are expected and, as tomorrow night is the last date on which they may be handed in, it is urged that all men who expect to attend look after this at once. All men who fail to take advantage of the application system will have to wait and take whatever seats are left, next week. Tickets for the Boston performance may be obtained at Herrick's after April 10th, at no advance in price. Great care should be used in filling out the application cards, as the management will be arbitrary in allotting seats where the blanks are not properly filled out.

FRESHMAN BASEBALL

The game with Rindge Technical School at Cambridge has been postponed from April 3 to April 10. There will be practice Friday of this week and every day except Wednesday of next week at four o'clock on Columbus Avenue Grounds.

JUNIOR RELAY

There will be a meeting of the 1916 relay team in the Track office today at one o'clock.

BRING THAT GIRL!

With the annual Spring Meet only two weeks off, the candidates for positions on the various class relay teams are working harder than ever. Many of last year's men are out again and there is an abundance of new material.

The 1915 team has quite a few veterans of former years in Huff, Foster and Barry. The team is also helped by the possible addition of T. H. Guething, last year's track captain.

The 1916 team won their event at Field Day a year ago last fall from the 1917 team in 4:50 2-5, establishing a record for the event, but were beaten last spring by the same 1917 team. Cy Guething is running faster than he ever did on the relay team; Reed has improved, as has Loomis at anchor. The Juniors are slightly handicapped, however, by the fact that certain of their regular men are unable to come out for the relay because of the press of other activities.

The Sophomores are also confident of making a good showing. O'Hara, who did not run at Field Day this year, will probably run as anchor for the team, while Capt. Sullivan, Coleary and Brock will in all probability be the other men to compose the aggregation. The freshmen have the same team that they had this fall.

The Interclass Relay will be the last event on the program of the Meet. Each man will run 220 yards, passing the baton, under the same rules that are in force Field Day.

SOPHOMORE BASEBALL

A short meeting of the 1917 baseball team will be held in 8 Engineering C at 2 o'clock tomorrow afternoon and the following men are requested to attend, together with all second year men interested in baseball: D. E. Bell, L. Cady, A. P. Farnsworth, H. B. Gardner, J. A. Gargan, G. W. Henderson, R. O. Lowengard, R. J. McLaughlin, H. S. McQuaid, J. R. Poteat, C. F. Simpson and G. R. Stevens.

FRIDAY, APRIL 2, 1915.

The issue of March 31 marked the final publication of The Tech, Vol. XXXIV. The degree in which the old Volume has been successful in fulfilling the ideal of reflecting and uplifting the daily life and character of those connected with Technology must be left to the more thoughtful readers of The Tech to decide. There are two distinctive steps for the advancement of the paper that Vol. XXXIV has taken. First, they have changed the publication from a daily to a tri-weekly. By so doing they have been able to devote more time to editing the paper and have thereby materially raised its standard. Second, by a conservative advertising policy they placed The Tech on a firm financial basis.

The old Volume wishes to thank those who by their interest have helped make The Tech a better publication. The warm support of the Faculty, the Alumni and the students has meant much.

As successors to Vol. XXXIV, Vol. XXXV starts in with a clean slate financially and with a standard which they will do well to maintain, but which they must raise if they are to fulfill their duty. Vol. XXXV takes pleasure in announcing the elections to Vol. XXXV which appear today in the new Editorial Head.

Our recent editorial on the subject of the Tech Show box seats was written without inside knowledge of

THE TECH BANQUET (Continued from Page One)

This dinner signalized the end of Vol. XXXIV of The Tech and ushered in the new board, whose names were announced by Alden H. Waitt, the retiring general manager. The names of the new board, as they were announced, will be found in the regular editorial column head.

The menus were gotten up in the form of miniature copies of The Tech, announcing the speakers, and containing a number of humorous features. The Hawaiian Quartet, of the Glee Club, enlivened the intervals of the repast with a few numbers.

Toastmaster Waitt opened the speeches of the evening by recapitulating briefly the results accomplished by Vol. XXXIV. He said that first, the paper had been kept on a sound financial basis; secondly, every effort had been made to make work pleasant for men on the paper, by smokers, etc.; thirdly, the board had tried to maintain the general tone of the paper as high as possible from the point of view of the subscribers. "Whether these have been done, or not," he continued, "remains for the student body to decide. But the volume is not fearful of the decision. It thinks it has succeeded. But how? Only by the combined efforts of a group of loyal men. Only by co-operation. Let loyalty be your watchword. Without it there is no assured success. With it, Vol. XXXV cannot but surpass all previous ones. I don't care a lunch cart doughnut for a man's ability to make up a dummy, or write up a meeting, if only he be loyal, for that quality will force him to improve in all respects, and in the desire to see the paper a success he will do his utmost to carry out the circumstances, and perhaps expressed a one-sided point of view. It was founded on the belief that the Show was trying to increase its gross receipts in order to cover up the leaks occasioned by faulty management. We are now convinced that this year's Board, while of course not perfect, is administering its affairs more efficiently than did its predecessors, and that the increase in price was a necessary step toward raising the required athletic fund. Whether or not it is equitable thus to place the added burden upon the house-party members is a debatable question, but there is no doubt that the Tech Show Board acted sincerely and with due consideration, and deserves the support of all Tech men.

(Continued on Page Three)

the circumstances, and perhaps expressed a one-sided point of view. It was founded on the belief that the Show was trying to increase its gross receipts in order to cover up the leaks occasioned by faulty management. We are now convinced that this year's Board, while of course not perfect, is administering its affairs more efficiently than did its predecessors, and that the increase in price was a necessary step toward raising the required athletic fund.

Whether or not it is equitable thus to place the added burden upon the house-party members is a debatable question, but there is no doubt that the Tech Show Board acted sincerely and with due consideration, and deserves the support of all Tech men.

THE TECH BANQUET (Continued from Page Two)

ry out this purpose. And by loyalty, I mean the active, live, energetic, pushing kind, the kind that gets out and boosts hard. Spread The Tech's virtues broadcast, boost it all the time, and put in a good word whenever you can. And, last of all, heed not the siren call of the other activities. Let not glowing prospects divorce you from your chances of promotion, from the father of all activities, The Tech. Stick to your job, plugging along, hoping, and be loyal."

The first speaker introduced was Mr. Louis K. Rourke, '95, who was present in place of Mayor Curley, as the latter had been called away at the last minute. Mr. Rourke was one of the head engineers of the Panama Canal, and is now Commissioner of Public Works of this city. He spoke of the need of technically trained men in municipal work, and touched briefly upon some of the problems met. He said that in such work, tact was the primary asset, even more than technical knowledge.

Mr. I. W. Litchfield, '85, who was a member of the first Tech Board, gave some interesting reminiscences of the first banquet of the paper, which "cost eighteen dollars a plate," and amusingly described the appearance of the first issue. He warmly commended the change from a daily to a tri-weekly, because the efficiency of the publication was thereby increased. In concluding, he said, "Let everything you do redound to the glory of Technology."

The principal speaker of the evening was Mr. J. P. Williams, the editor-in-chief of the Boston Transcript. Mr. Williams has had wide experience as a newspaper man, acting as political secretary to Mr. Taft during the latter's 1908 presidential campaign, and so is qualified to speak as a past master of his profession to amateurs in journalism. He took as his subject "Der Tag—In Newspaperdom." He began by giving an outline of the working departments of a metropolitan newspaper, recounting many anecdotes from his experience. In speaking of the three divisions of the newspaper he said, "The function of the news column is to make people read, of the editorial column to make them think, and of the advertisements, to make them feel." To make people read, the matter must be attractively presented. To make them think, there must be thought behind the editorials. To carry on successful advertising, the truth must be told, and no frauds concealed. In the newspaper world today accuracy, diligence and fairness are pitted against over-coloring, sensationalism and prejudice. The success of the best newspaper is judged not by numbers of circulation alone, but by the quality of its influence. In accomplishing this purpose, "common sense and the hardest kind of work play the greatest part." He stated that railroads and corporations are no longer finding the ownership of a newspaper an asset, but rather the contrary, because people have become more farsighted and are suspicious of false

CHESS MATCH TONIGHT

Season's Last Game To Be Played With Wells Memorial.

This evening at 8 o'clock the Wells Memorial chess team will play Tech at the Union. This is to be the last league game of the year, and it decides whether or not Technology finishes third. The Wells team is one of the strong ones of the league, and stands second at present. The Tech lineup will probably be as follows: Woodbridge, Kenigsberg, Pray, Dean, Sanger and Saladrigas. The team has won four of the last five matches played.

THE TECH BANQUET (Continued from Page Three)

motives in newspaper influence. In other words, "The Public Is On." The era of corrupt influence in the journalistic world is consequently passing and the number of honestly owned newspapers is much larger than ever before. The influence of the modern paper is chiefly on the basis of services rendered, in the form of accurate information. Editors can no longer force on the public, during a short campaign, an opinion which their news columns have indirectly contradicted for months or years. We are at last approaching "Der Tag, when no community shall be without a paper, honestly owned, efficiently managed, intelligently edited, all of whose money comes in over the counter, and to whose editorial office there is no back door."

President Dalton of the Senior class said a few words as the representative of the student body. He expressed his approval of the tri-weekly plan now used, and told how other undergraduate activities appreciated the value of The Tech in aiding them.

The elections to the board of Vol. XXXV were then announced by the retiring general manager. He lauded the work of his successor, H. P. Claussen, '17, as treasurer of the closing volume. The latter turned over to the new treasurer a check for two hundred dollars, representing the gains for the year, which are to be applied in the bettering of the standards of the new volume. He said that the policy of strict economy followed during the past year would be continued, that frank criticism of the work of all men on the paper would be unhesitatingly meted out, and that every effort would be made to keep the standard of the publication high, so that it may give increased satisfaction to all its readers.

The meeting broke up about ten-thirty, with the singing of the "Stein Song."
