NAVAL ARCHITECTURAL SOCIETY DINNER
T. R. Goodwin Will Describe Experiences On Board Yaw! "Seabird."

There will be a dinner given by the Naval Architectural Society tonight at 6:30 o'clock in the Union, Mr. T. R. Goodwin, of Providence, will tell of his experiences with two other men on board the 80-foot sail boat, "Seabird." They sailed through the eastern coast and sailed to the Arosses. From there the party went overland to the Mediterranean Sea, proceeding to intermediate points of interest, then up the Tiber River. The yawl was equipped with a three horsepower auxiliary motor for which a remembrance was carried as a gift because of danger of explosion.

VALENTINE DANCE
T. R. Goodwin will be the guest of honor at the annual Valentine's Dance of the Combined Musical Clubs to be held in Copley Hall tonight, at 9:30 o'clock, to be followed by a dance. The dance is the first big game on the schedule.

TECHNICAL ELECTORAL
By-laws for the 1916 Technical Electoral Committee have been sent out to all members of the Sophomore class. They must be returned to the class committee by 5:00 o'clock Monday, January 28. No one, except the committee in charge of the election, may enter the Office of the Secretary. None of theHttpResponse cut off.
THE TECH

Published tri-weekly during the academic year by students of the Massachusetts Institute of Technology.

Advertising Manager .......... 5:00 to 6:00 P. M.
Treasurer ................. 6:00 to 7:00 P. M.

Subscriptions within the Boston Postal District, and outside of the United States must be accompanied by postage at the rate of one cent a copy.

FRIDAY, DECEMBER 17, 1915

THE CALL FOR HELP.

Suppose that America were to declare war tomorrow. Among the first to enlist would be the college students all over the country. It has been so in Europe; it would be so here. Classmates, friends, companions, now receiving the full benefit which comes from the forming of permanent life friendships and the striving to attain ideals, would be suddenly embroiled by the European furnace— to face what? Pain, grief, despair, death, in the prisons and in the trenches.

We must be the state of mind of European college students who are today on the battlefield, in the prisons, and in the hospitals. But little more than a year ago they too were attending universities with the same bright sunshine ahead that American college students have today. Now all is blackness, save for the light that is being shed by the Y. M. C. A. workers. Consider what it must mean to have someone talk to you or something to read during the interminable hours that would otherwise mean Insanity. Consider what it must mean to have someone to write home to the hearts that are near breaking when you yourself have lost both hands. Is it not up to Technology men as human beings with human sympathies to contribute through the agency of the T. C. A. their share in the forming of permanent life friendships and the striving to attain ideals, would be suddenly embroiled by the European furnace— to face what? Pain, grief, despair, death, in the prisons and in the trenches.

NEGLECTING THE OPPORTUNITY.

Most discouraging is the response to President Patling's request that communications be sent to The Tech or letters to the Alumni Council containing the undergraduates' viewpoint on dormitory administration at the new Institute of Technology. If every man's name described in this column is a name you know, be sure that you see to it that every letter is written and every dispatch sent.

"DAMAGED GOODS"

Dramatic Recital To Be Given Next Monday.

Next Monday afternoon at 4:30 o'clock, a dramatic recital of "Damaged Goods," will be presented by Mr. Edward Mead of New York. This event is to be held in 23 Walker, under the direction of the T. C. A., and will be free to all.

Mr. Mead has given this play in numerous places, in all of which he has received by large audiences. It is a powerful argument for clean living, and as the speaker's spirit of earnestness and sincerity, the moral lesson is vividly drawn. The presentation is marked by a refinement and delicacy that brings to the foreground the meaning and necessity of social purity.

Among the colleges before which this recital has been given by Mr. Mead are the Pennsylvania State College at State College, Western University, The University of Vermont and Springsfield Y. M. C. A. College. All heartily recommend Mr. Mead's method of presenting this subject.

TRACK STATISTICS (Continued from Page One)

Cross Country team, reported twenty-seven times from September 25 until today, for a 69-2-3% average. For the whole season he reported thirty-seven times, thus running on 65% of the available days. The other men on the team made practically the same average.

Whaley was high man for freshman Cross Country, running twenty-four days from a possible forty, for a 50% average. R. K. Wells led the Sophomore relay men Russet was the most dependable. He reported twenty-two times from a possible forty.

Institute. If the undergraduates are going to continue their school, as it is in the new Technology, if the men who are now in the Institute wish to leave behind them something of the William Barton Rogers spirit of helpfulness to others, which they have been so good to absorb but too reluctant to give back, it is time for them to act. Monday is now the last available issue for the Tech before the Institute Committee meeting next Tuesday at which the recommendation of the Alumni Council must be framed. We again earnestly invite expressions of opinion in our columns, as it is in this way the matter will receive the most general attention, and consequently the most careful consideration next Tuesday.

FRESHMEN WRESTLING

A wrestling meet between the M. T. F. freshmen and the Huntington School is scheduled for today. The match will be held in the Boston Y. M. C. A. Building, and admission is free. The freshmen lineup is as follows:

115 lbs., Davis and Caldwell.
125 lbs., Smith or Petterson.
135 lbs., McCormack and Fother.
145 lbs., Elwell or Kitchen.
158 lbs., Elwell or Deane.
Heavyweight, Batch.

TECH SHOW POSTERS

Meeting Of Competitors In Show Office Today.

This afternoon at 5 o'clock, the Poster Competition will start at the Show Office. O. R. Freeman, '16, who prepared last year's poster, will explain the requirements of the design and the conditions of the competition to the members. The preliminary sketches will be due Monday at 5 o'clock, at which time a general criticism of all the sketches submitted will be given to those present. The final poster must be done on double elephant paper and will be selected by a disinterested committee. Only two solid colors and black may be used in the design and space must be allowed for the title of the Show, which will be announced at the meeting this afternoon, the words, "Tech Show," and the name of the theatre at which it will be produced.

WIRELESS SOCIETY

(Created from Page One)

field and is sure to prove an interesting speaker. He will talk especially on the measuring of capacity, inductance, the construction and operation of the tower at Medford Hillsides and research work as centered out with earth antennas. The meeting will probably take the form of an open discussion after the talk and all members who have any information as to results obtained with earth antennas are urged to come around to the meeting prepared to say something. All students whether members or not are welcome at this meeting.

ORGANIZATION.

The Technology orchestra was formed early in November by a group of students who desired to have an organization of this sort. The orchestra has been called the American spirit of service. The recognition of the efforts of the Y. M. C. A.'s representatives in the prison camps, and especially about the opportunities for social contact with the men who visit them in the trenches, and the position of Americans in the eyes of Europeans will be profoundly influenced by the efforts of these workers sent out by the Y. M. C. A.

The next speaker was Mr. Clark, who spoke of Mr. Mott's work in the trenches and held hospitals. He described the help the Americans are giving in the way of alleviating suffering, and supplying the men with material. He urged that people here should guard against becoming calloused to the tales of hardship and suffering. They are seldom exaggerated, he said, and the conditions of warfare are frightful.

WIRELESS SOCIETY

The recognition of the efforts of the members, afforded by the share of the action of the Show Management, is a well appreciated encouragement to them and will prove a great stimulus to their work. There are now twenty-six members and the management recommended further candidates who wish to come out to leave a note at the Cage for J. W. Proctor before the Christmas vacation.

The first Varsity wrestling meet of the year will be held at 7:30 p.m., Saturday evening, when the M. I. T. section will meet the Boston Y. M. C. A. This meet is scheduled as a practice meet for the purpose of getting a line on new Varsity material and sea bouts have been arranged, and the meet should be very close, with many interesting bouts.

The following men comprise the M. I. T. team: R. B. Means, H. L. Bone, G. A. Hunt, J. C. Woolen, D. A. McFarland, H. G. Morse, C. Elwell, R. W. Rounds, Hodgson, and either Todd or Bond. This meet is open to the public, and will be held in the Boston Y. M. C. A. Building on Huntington avenue.

WAR BY-PRODUCTS

(Continued from Page One)

Mr. Cashman, secretary of the T. C. A., introduced as the first speaker R. E. Wilson, president of the Chemical Society. Wilson spoke very highly of Mr. Mott and of the profound impression the address had made upon him. He sketched briefly the general work the Y. M. C. A. is carrying on in the war-ridden countries, and emphasized the magnitude of the opportunity for reaching the millions of men concentrated in Europe. He spoke enthusiastically of Mott's work, especially in the concentration camps. He brought out the point that the armies are made up of the men with the best ability, and that the future legislative bodies of all the countries will be composed for the greater part of these men. Their impression of American standards of humanity will be gained to a large extent through their contact with the men who visit them in the trenches, and the position of Americans in the eyes of Europeans will be profoundly influenced by the efforts of these workers sent out by the Y. M. C. A.

The next speaker was Mr. Beadon, who spoke of Mott's work in the trenches and held hospitals. He described the help the Americans are giving in the way of alleviating suffering, and supplying the men with material. He urged that people here should guard against becoming calloused to the tales of hardship and suffering. They are seldom exaggerated, he said, and the conditions of warfare are frightful.

Walter J. Beadon, '17, dealt with Mott's work in the prison camps, and the results of the activities of the Y. M. C. A.'s representatives in the belligerent countries. He spoke of the opportunities for social contact among the men, and especially about the direction which the superfluous mental energy is taking in the pursuit of learning. The men have organized among themselves veritable colleges, and in one camp there are 9650 students, with a curriculum of over 60 subjects.

Mr. C. E. Turner, research assistant, in Course XII, was next introduced. His point was that this work is of an extremely practical kind, without theology, and in fact, without any direct reference to religion. The work is typical of our times in this respect, and the movement is one that expresses admirably the American spirit of service.
now that musical numbers have been introduced into it. It is sure to please those who have come to enjoy the skit and make the best of the situation.

If a man whose initial was "M" had No. 1 and a dance engaged with a man whose initial was "C," it would be up to No. 1 to look up No. 2 as his initial came after the initial of No. 2 in the alphabet. Or if No. 1 had initial "C" and No. 2 had initial "K," it would be up to No. 1 to locate No. 2 before the dance were held.

The important part of the system lies in the fact that the man who is to be looked up in each instance is to remain in the section allowed to men whose initials correspond to his.

For example, if "C" had a dance with "M," he would stay in the "C" section after the dance next preceding his, even when "M" until "M" was successfully in finding him.

Dance orders can be obtained at the Cage after 5:00 o'clock today. The final touch has been put on the system and it is sure to please those who have come to enjoy the skit and make the best of the situation.

always welcome — riz la croix:

The man who says I s favorite tobacco in Riz La Croix takes pride in the fact that he uses the best cigarette papers the world produces. And his cigarettes have the fresh, mellow flavor and the rich fragrance of the tobacco, without a particle of "paper" taste or odor.

riz la +

(Proonounced: REELAGKROY)

FAMOUS CIGARETTE PAPERS

For a test — light two pieces of cigarette papers, Riz La Croix and some ordinary brand.

Note how much more finely and evenly Riz La Croix burns, with but faint trace of gray ash —no charring, no odor.

It's far easier to roll your own cigarettes in Riz La Croix, because it's thin and light. And being made from pure flax flax, Riz La Croix is unusually strong and perfectly adhesive.

Cigarette paper is so small an item of expense that every man can afford the best. Try Riz La Croix.
