THE TECH, BOSTON, MASS., WEDNESDAY, JANUARY 5, 1916

PRICE THREE CENTS

PROMINENT SPEAKERS FOR JUNIOR DINNER

Dedication Plans To Be Given Out At Annual Banquet Tomorrow Night.

The annual dinner of the Junior Class will be held in the Union tomorrow night at 6.30 o'clock.

P. N. Brooks will act as toastmaster and will introduce as the speakers of the evening Professor Davis R. Dewey of the Economic Department, Dean Burton, Mr. I. W. Litchfield, '85, and Mr. H. J. Horn, '88, the retiring president of the Alumni Association. These men are to talk on the dedication plans for the new Institute, which will be made public for the first time. The committee has also provided an exceptionally good entertainment.

Tickets at seventy-five cents may be obtained at the Cage or from the officers of the class.

LEAVES FOR FRONT

D. M. McRae, '16, Course III, Joins Canadian Regiment.

Another Technology man has left the Institute to join the ranks. D. M. McRae, '16, has received a commission in a Canadian regiment about to leave for the front. He went to Toronto about a week ago without any definite idea as to what command he was to join, and after searching for an opening several days, had about decided to leave for England to enlist there. He was fortunate in meeting Lieutenant-Colonel Reed, a West Pointer, who took him in charge, and succeeded in obtaining a commission for him as second lieutenant, according to report. His regiment is the forty-ninth Canadian Highlanders, and is to leave for the front on January 15. There will probably be a stop-over in England before being sent into the field for active service.

McRae has been in military surroundings all his life. He was under fire in the Philippines with his father, Major General McRae, and was for three years and a half at West Point. He left West Point without graduating, owing to a technicality, and
(Continued on Page Four)

TECHNIQUE PICTURES

Arrangements have been made for the following Technique group pictures: Thursday, Jan. 6, 1916 Governing Board; Friday, Jan. 7, 1917 Governing Board; Monday, Jan. 10, 1919 Governing Board; Tuesday, Jan. 11, 1918 Governing Board; Wednesday, Jan. 12, 1918 Football Team. The 1918 and 1919 Governing Board dates have been interchanged to provide for Sophomores having 1.00 to 2.00 o'clock classes.

RELAY TEAM TRIALS COMING THIS WEEK

Varsity And Freshman Relay Teams Will Be Picked For B. A. A. Annual Games.

Time trials are being held this week for the Varsity and freshman relay teams. These trials are preliminary but will have an important bearing on the final selection of the teams.

The B. A. A. annual games will be held on February 5, when the Varsity relay team meets Dartmouth, and the freshman run against Holy Cross and Dartmouth in a triangular relay race. The freshman will run the same distance as the Varsity, each man running 390 yards. Of last year's team, Capt. Guething and Reed remain. Guething is the fastest man out and will probably be anchor man this year. Doone, Justheim and Kwan are very fast on starts and sprints, and are likely candidates for anchor man. Hamilton and Dodge, Varsity cross-country men, are also
(Continued on Page Four)

STUDENT TALK

Hon. Samuel J. Elder Will Give T. C. A. Talk Friday.

This week the T. C. A. talk will be given by the Hon. S. J. Elder, whose subject is to be "A League To Enforce Peace." Hon. Elder is one of the most prominent lawyers of New England. He has been a participator as well as a student of international affairs, acting as counsel for the United States before the Hague Tribunal in the North Atlantic Fisheries Arbitration with Great Britain in 1909. During the past year he has addressed many organizations on subjects concerning "Preparedness and Peace."

Owing to a conflict with the inauguration of the Governor, Mr. Elder's address has been postponed from Thursday.

M. E. SOCIETY

The Mechanical Engineering Society will hold its next meeting today at 4.00 o'clock in 11 Engineering B. Mr. C. B. Sawyer, of the Dodge Mfg. Co., will address the society on the subject of "The Mechanical Transmission of Power." All Technology students are welcome at these meetings.

NUMERAL AWARDS

Numeral award cards for the 1918 baseball team for the Field Day teams may be had on application at the Cage. Both Sophomore and freshman football teams and the Sophomore relay and tug-of-war teams are entitled to these cards.

MUSICAL CLUBS MID- YEAR TRIP SCHEDULE

Plans Completed For Annual Trip —Leave Sunday Night, Jan- uary 30 For New York.

Plans have finally been completed for the Annual Mid-year Trip of the Combined Musical Clubs. This year the itinerary of the trip has undergone but few changes since first announced in the fall. The tour will include concerts in Montclair, N. J., Philadelphia, Pa., Schenectady, N. Y., Pittsfield, Mass., Hartford, Conn., and Springfield, Mass., all but Hartford being fixtures. In the latter case there is a possibility of a change to Northampton or South Hadley.

The men, forty in number, leave Boston on Sunday night, January 30, going via the Fall River line to New York, where they will spend Monday. Late Monday afternoon the party will leave New York for Montclair where they will open their tour with a concert at the Montclair Club Hall. The men will spend the night with friends and Alumni at Montclair and will set out Tuesday forenoon for Philadel-
(Continued on Page Three)

INDOOR TRACK MEET

Will Take Place In Gymnasium Next Saturday.

The Interclass Track Meet will be held next Saturday at 2.30 o'clock in the Gymnasium. The two mile run and pole vault are to be omitted from the regular events. This will comprise the first real competition that the track squad has had this year.

All men who have been working on the squad are required to enter. Harvey S. Benson is offering a cup to the first man placing in the mile run.

Heats for the 440 yard run will take place sometime this week so that the final heat may be run off on Saturday.

CHESS MATCH

This Friday evening the Technology Chess team will meet the Harvard team in the second of their League matches, at Fairfax Hall, Cambridge. The first League match, played December 18, resulted in a 3-1-2 to 2-1-2 win for Harvard, while Technology reversed the scores in a game played in October. From all indications the teams are more closely matched than they have been in past years.

SENIOR INFORMALS

Technique calls the attention of the Seniors to the fact that a large number of men who promised informal negatives for the Portfolio have as yet neglected to bring them in.

ALUMNI BANQUET COMES NEXT SATURDAY

Annual Affair At Copley Plaza— Prominent Men Will Give The Addresses.

On Saturday evening, January 8, the annual banquet of the Alumni will take place at 7.15 o'clock in the Copley Plaza. The committee in charge of the affair is the same one which in past years has managed successful and interesting banquets, consisting of, George B. Glidden, '95, chairman; Harry S. Mork, '99; Don Galusha, '04; Lawrence Allen, '07, and Harold E. Kebbon, '12. It is intimated that a very novel entertainment is to be furnished for the occasion.

The list of speakers includes Hon. Samuel W. McCall, Governor of the Commonwealth, President Maclaurin, Samuel Insull, president of the Commonwealth Edison Company of Chicago, and Charles A. Stone, '88, the incoming president of the association. Governor McCall, who is ex-officio a member of the Technology Corporation, will take this early occasion to get in touch with the Alumni of the Institute. Mr. Stone, the president-elect, will formally take up the management for the coming year which will be a most important one for all Institute men, as not only will the New Technology be dedicated, but it is also the fiftieth year of the school's existence.

HOCKEY GAME FRIDAY

Dartmouth To Be Played Again At Hanover.

The Technology Hockey Team is scheduled to play Dartmouth at Hanover next Friday night and in view of the improvement shown since the first game with the Green aggregation, Manager Young expects a better showing to be made. The win over Amherst has put more confidence into the players and the regular practice is showing its effects.

The game scheduled with Boston College has been again postponed, but two games will be played with this team later in the season.

CALENDAR

Wednesday, January 5, 1916.

- 4.00—M. E. Society Meeting. 11 Eng. B.
- 4.00—Orchestra Rehearsal. Union.
- 4.30—Stage Competition Meeting. Show Office.
- 5.00—Gym Team Practice. Gym.

THE POINT SYSTEM AGAIN.

The deliberate disregard for the Point System, the provisions of which are every year violated by a considerable number of influential undergraduates who should uphold rather than defy the laws of the student body, seems entirely without justification. It was the painful duty of the Point System Committee at the last Institute Committee meeting to report fourteen men carrying anywhere from eleven to thirteen points. The offenders have not only involved the activities for which they are working but they have created a lot of unnecessary work for the Institute Committee.

In the opinion of those who have watched the working of the Point System from year to year and have given the subject careful consideration the ratings should be made first upon the consideration of honor and second upon the consideration of specialization. Five of the fourteen offenders, it seems, are carrying a miscellaneous number of activities and they have been told to reduce their points to the required ten. The other nine are overpointed due either to Technique, the Musical Clubs, or both these activities. It will be remembered that some time ago Technique petitioned to have their points rerated upon a basis of required work. They overlooked the fact that a position on Technique generally stamps a man as among the ablest in his class and thereby gives him a great deal of prestige. It is, perhaps, unjust to rate every one on the Board at eight points, but whatever reductions are made the question of honor should always be given first consideration.

The case of the Musical Clubs is different. It is so difficult to get enough men out for the Clubs that there are comparatively few cuts made. Thus the honor due to competition is almost entirely missing, except in the case of the officers, and, moreover, the men are not as well known around the Institute, due to the fact that the field of their ac-

COMMUNICATION

To the Editor of The Tech:

The Junior Class Dinners of past years have not been representative gatherings. This is practically the only chance available to the members of the second largest class in the Institute to get together this year in the spirit of fellowship and sociability.

It is a deplorable fact that class gatherings of this kind can not be restrained to meetings of class interest and enjoyment, and not to a general carousal as happened once before this year.

Therefore I take this opportunity to appeal to the members of the Junior Class to make this coming dinner a truly representative affair both in the matter of attendance and conduct.

Signed,

A JUNIOR.

tivities is usually outside of Boston. The question of whether a member of the Musical Clubs can specialize in some other activity is not easy to decide; it seems doubtful in view of the comparatively large number of hours a week required in rehearsals and concerts. There is a very important consideration, however, which cannot be overlooked. The Musical Clubs and the Track Team afford the Institute its practically only means of outside advertising, and it is in this role that the Clubs perform an invaluable service. The renewal of a warm spirit and a love for their Alma Mater characterized the visits of the clubs in every city where they appeared before Alumni audiences. There is no more potent factor in binding together our Alumni, and it seems that this reason should suffice to place the Clubs in the same class with the Track Team whose members are allowed to carry more than ten points when some of those points are due to Track.

At this period, one of utmost importance from the standpoint of the students' college work, many of the men unfortunately are sufferers from the epidemic of "grip" which is now current. A large number who are attacked attend classes in spite of the handicap of work under such conditions, and it follows that they cannot accomplish as much as if they were in health, however able they may usually be. On this account there would seem to be the best of reasons for making allowance in the marking of examination papers for poor work due to this cause. This, of course, does not apply to the cases of "grip" contracted while oversleeping nine o'clock recitations or forgetting the home assignment; on the other hand, a man suffering from a real attack is justified in asking a liberal rating for the written work which he is able to do.

phia where the next concert will be staged in the New Century Club Hall under the auspices of the Alumni Association.

On Wednesday morning the men will take their private Pullman leaving for Schenectady, N. Y. Here the Alumni Association will hold the concert in the Edison Club Hall. Thursday morning the party will proceed to Pittsfield where the Alumni will manage the affair, to be held in the Masonic Temple. Dances will follow the musical program at all the concerts. The concert for Friday is still in doubt, South Hadley, Northampton and Hartford, Conn., all being under consideration.

The clubs will appear in Springfield, Mass., on Saturday evening under the auspices of the Alumni Association. The men will be entertained Saturday night by the Alumni and friends in Springfield and leave Sunday morning for Boston, thus completing a trip of approximately one thousand miles.

NEW YORK BOSTON CHICAGO

RADIO CLUB BANQUET PROVES A SUCCESS

List Of Speakers Includes Men Well Known In The Radio Field.

Last evening the Wireless Society held an informal banquet in the Union after which Dr. Pierce of Harvard, Professor Kennelly of Harvard and Technology, and Mr. H. C. Gawler, Radio Inspector of this district, spoke to the members. W. J. Henry, '18, acted as toastmaster in the absence of C. G. Holt, '17, president of the club.

After the banquet Mr. H. A. Effel, who is conducting research work in measuring resistance of radio circuits, related a short history of the club since he first became connected with it six or seven years ago. He stated that never before has such an interest been taken as has been manifested this year.

The next speaker, Mr. H. C. Gawler, explained the position of the amateur operator at the present time. He explained the many benefits to be obtained from wireless work among which are the unlimited field which it offers for experimentation and the recreation which it offers to the student. He touched upon the fact that in a school of this sort such work is a side line yet in time of war its uses and opportunities will be infinite. Since the laws restricting amateur communication were passed, interference has been almost completely eliminated and the amateur is placed upon his own responsibility.

Dr. Pierce of Harvard explained that the many problems which have been solved have been done by the amateur. He stated that work along these lines involved a large amount of advanced mathematics which everyone who enters the field does not possess. He then touched upon his experiments and said that in his laboratory recently he had copied Germany steadily for three hours on a tape machine without a mistake. By means of a trigger arrangement he was enabled to light up a large Geissler tube with the energy radiated from Germany five thousand miles away.

Professor Kennelly, head of the research department of Harvard and Technology, was the next speaker. He told of the difficulties of bringing the use of wireless before the public and explained what a help its use in apprehending criminals like Dr. Crippen as well as its use in shipwrecks had been. He stated that the professionals had no time to take up the solution of present day problems and that they were left to the amateur.

Recently wireless telephone communication was carried on from Arlington with points in latitudes seventy degrees away and when the ninety degree line is passed there seems to be no limit to its accomplishments of radio work.

One of the athletic features at Dartmouth College is the annual winter carnival, which consists of athletic and other entertainments. This winter's events will be held on February 10, 11, 12, and the athletic features will be a hockey game on Alumni Oval on February 11, with preliminary heats of the intercollegiate ski and snowshoe competitions. The finals will be contested the next afternoon. C. G. Paulson of New Hampshire State College will give an exhibition on skis and in the evening there will be a basketball game between Yale and Dartmouth.

An unsuccessful attempt was recently made to flood the newly-built hockey rink at Maine University. The system of drainage did not work so that the water could not be prevented from soaking into the ground. More trials, however, will be made as soon as the weather becomes colder.

The Engineering Society of Brown University was recently addressed by F. E. Winsor of the Providence Board of Water Supply and its chief engineer. He delivered a talk on the "Catskill Water Supply for New York City." He traced the growth of the water supply from its beginning to the present time, showing the enormous increase.

For the purpose of discussing a plan for the introduction of voluntary military training, similar to that at the Institute, at the University of Pennsylvania, a meeting of undergraduates and alumni will be held on January 6. Negotiations with the War Department at Washington have been carried as far as they can be until the next step is taken by the students and University authorities.

out. Brock, first substitute last year, and Avery, who competed last year in the sprints and broad jump, are showing up well. Other candidates are Gagnon, Ford and Fisher.

The most promising freshmen are Bent, Whaley and Scranton. Bent and Scranton have both been doing good work. They are almost sure of positions on the freshman team, and also are making a strong bid for the empty Varsity positions. McCarten, Herzog, Jackson and McCloskey, who ordinarily run the distances, have switched to the relay. Other freshman candidates are: Strang, Schinder, Iesley, Langille and Steubenrauch.

LEAVES FOR FRONT
(Continued from Page One)

came directly to the Institute. He has been prominent as a member of the fencing team, and would have graduated from Course III in June had he remained.

CHEMICAL SOCIETY

"Engineering Efficiency" To Be Subject Of Talk Friday.

The Chemical Society will hold its next meeting on Friday, January 7. The subject of the meeting will be "Engineering Efficiency." Dr. Lewis of the Chemical Engineering Department is to speak on the "Taylor System of Efficiency Engineering." Mr. Magnus Alesander will speak on "The Hiring and Firing Men." Mr. Alesander is head of the Employment Department of the General Electric Company, and has a great deal of experience with the employment of men. The Chemical Society had this date reserved long before Christmas, and the musical clubs set it for their concert without consulting the calendar committee. The meeting will start promptly at 7.30, so that men wishing to go to the concert will have time to hear one speaker.

TRACK NOTICE

The 390 yard trials which are being run off this week will count for the final heat of the 440 yard run in the Interclass Track Meet this coming Saturday.

M. I. T. ORCHESTRA

The M. I. T. Orchestra will hold a rehearsal in the Union today at 4.00 o'clock.

The management would like to meet any men who have had experience in playing the viola, horn, or double bass, whether they possess the instruments or not, at this rehearsal.

Joy just hangs on every puff

How a pipe of "Tux" does bubble over with good cheer and sunny comfort! There's something about the mellow taste of "Tux" that stirs a smoker's soul. It gets into his inside works, sweetens his disposition, and gives him that perky, chesty feeling, like a high-stepper trotting down the avenue.

Tuxedo
The Perfect Tobacco for Pipe and Cigarette

Men who never smoked a pipe before are now smoking Tuxedo, because they have found that Tuxedo is the mildest tobacco made, and that it is the one tobacco that never irritates mouth, throat or nerves.

You simply cannot get another tobacco made by the "Tuxedo Process"—and that's the original of all processes for removing every trace of harshness and bite from the tobacco. It has been widely imitated, but never duplicated.

Try Tuxedo for a week, and you'll get acquainted with the sweetest, mildest, mellowest smoke in the world.
