CLASS DAY BALLOTS WILL BE OUT SOON

All Corrections To Preliminary Ballots Requested To Be Turned In.

The 1916 Class Day Election Committee, consisting of D. R. Webster, B. H. White and K. Dean, has placed on the bulletin boards the preliminary ballots for the Class Day officers. Each Senior of good standing who has paid all of his class dues, according to the records of the Treasurer, will find his name on the ballot. If, however, there are any corrections to be made, the committee requests that they be sent in as soon as possible in order that the official ballots may be correct. These ballots will be mailed to each member of the Senior Class by Saturday, February 5, and the voting will take place on the following week. Each man voting is to mark on his ballot the names of twenty-five men, and the twenty-five seniors receiving the most votes will be elected.

CHINESE NIGHT

Characteristic Oriental Program Carried Out.

The program given at the Union Wednesday night by the Chinese students at Technology and at other colleges around Boston was well attended, and quite successful. The entertainment was entirely the work of these students, who performed bits of Chinese drama, mingled with a few occidental items, to "neutralize the taste."

Interesting numbers were the "stunt speeches" and the shuttlecock games. The most Oriental item of the evening was the duet played upon a Chinese zither. The modes and rhythms were characteristic and distinctive. The program ended with a choral number, after which refreshments were served.

CHAUNCY HALL CLUB

The members of the Chauncy Hall Club held a meeting and smoker in the Union last evening. It was decided to hold an outing in the spring. In the meantime the Chauncy Hall Architectural Department has offered to file their schedules with Captain Brandt as early as possible.

BLANKET TAX RETURNS

At the meeting of the Institute committee yesterday, the Blanket Tax committee turned over to the Institute $1,500. This means that about 375 men have paid their tax up to the present time, while nearly a hundred more payments may be expected next term.

HOCKEY TEAM LOSES IN CORNELL GAME

Team Strengthened By Addition Of Wannamaker, Plays Best Game Of Season.

Wednesday noon at the Arena Cornell defeated the Hockey Team in a close game the score being 2-1. Technology was strengthened by the decision of the Executive Council which permitted Wannamaker to compete in. Hockey, his playing greatly adding to the offensive attack of the team.

Cornell took the lead in the first half by virtue of two goals shot by Hunter and Capt. Rubbo. The first was the result of a pretty dribble down the ice by hunter, who followed this by evading the Technology defense and nailing the disc. Capt. Rubbo added the second point to his team's score a few minutes later by a short from scrimmage.

Technology showed great improvement in the second half when they scored their only point on a shot by Clarke. Cornell was almost wholly on the defensive this period, and it was only the wonderful exhibition of goal tending by Myers that prevented Technology from scoring. In the third half Technology played a very strong game, their decided break showing the team has greatly improved in offensive play, and with Wannamaker playing his usual steady game, the Cornell goal was kept from scoring. The combined Musical Clubs are hard at work on plans for their mid-year trip, which will start January 30th. Trips to various plants and factories in the cities visited are department of Harvard as well as to Y. M. C. A. buildings and other club houses, where the men will be entertained. Many of the men plans to New York previous to the departure of the main contingent, thus giving them extra time in and around the metropolis.

The group of twelve men from the Cicco Club will appear in New York on Saturday evening, January 29th, and will be the guests of the Technology Club of New York, and will render several selections at a banquet to be held in one of the hotel.

CATHOLIC CLUB

South American Trip Described By Harvard Professor.

The Catholic Club held the last meeting of the term on Wednesday evening. After the supper Professor J. D. Ford of the modern language department of Harvard gave an account of a trip through the countries of South America, explaining the nature of the various people met with and the impressions received by the tourist. In the opinion of those present this was the most interesting talk that club members have yet heard.

At the business meeting following it was announced that an inspection similar to that previously held would be conducted by the club in St. Cecila's Hall on the first Wednesday after vacation.

INSTITUTE COMMITTEE

At meeting of the Institute Committee yesterday the report of the Budget Committee was accepted. The total expenses for the year were calculated at $2112.69 while the receipts were only $2650. The deficit is to be made up from the Blanket Tax receipts.

The matter of changing the time of class elections to the end of the spring term was again taken up and a committee was appointed to draw up definite plans for such a scheme. H. B. Shepard was appointed under-adviser for the Tech and the resignation of C. W. Loosn. E. of the Blanket Tax committee was accepted.

Those absent were: O. C. Lorenz, the secretaries of the C. E. E. E. and M. E. societies.

MAJOR R. R. MONTON Speaks In Union.

Large Audience Hears Hampton Quarter and Washington's Successor.

To one of the largest audiences of students and visitors that have ever filled the Union, Major Robert R. Monton, president-elect of Tuskegee Institute, spoke very briefly of that great institution for the education of the negroes in the South. In introduction, Major Moton stated that the entire establishment had been designed and erected by R. R. Taylor, M. E. T. graduate and that Mr. Taylor was at present engaged in improving the buildings.

The speaker went on to say that the purpose of such a school was to solve more easily the national problems of adjusting the racial differences between the colored man and the white man and to maintain the present peaceful relations. He emphasized particularly the fact that nature and the world-at-large do not color line. What they demand is high

Fridays, January 14, 1916.

It is only natural that, with Technology outgrowing its present home and with all the organizations at the Institute widening the scope of their activities, the Tech should have also outgrown itself. Beginning February 7th, the size of the sheet will be increased and the printing will be set closer, giving in all an increase of about thirty per cent in the space at present available for news.

It is past the different activities have been demanding more space than could possibly be given them. It has been necessary to curtail a great deal of valuable news to the mutual dissatisfaction of everyone concerned. Henceforth it should be possible, not only for The Tech to meet the demands for space which are continually being made, but it should go further, striving to uplift everything it touches with a truer and better interpretation of the undergraduate life, the expression of which must come mainly through these columns.

It will also be possible to more efficiently serve our great Alumni Association. That organization is at present planning for next June a production which will rev the grandeur of the Hudson Fulton Exhibition in many respects, a production whose conception originated in the most active artistic imaginations of our time. The Tech can now stand ready to further this great enterprise... With heart and soul.

And in all this there is only one regret. The ever-alert Circulation Department has forced itself rather obtrusively upon the editors, who, try as they may to approach the matter tactfully, are wholly unable to do so. They must state the bare and ugly facts which is that ONE DOLLAR BUYS THE TECH FOR THE REST OF THE YEAR. The only excuse for making such a statement is that The Tech will be bigger and better than ever before, and that it will be really cheaper in the end if subscriptions are bought now. The first issue of the larger size will appear, as was stated before, on Monday, February 7, the first day of the second term.

AD J

SECOND EDIT

The following announcement of the Technology Club of Northern Ohio is given as an example of what some of the Technology Clubs in the country are doing to arouse enthusiasm among their members for the reunion next June.

YO HO, SKINNY!

Run like everything! Win of those big times! You know! Regular Jabberwock of the Tkeckology Club of Northern Ohio, Hermit Club in Kleveland, 1931 East Third place.

Look what's coming off!!! Pikeschules the new Tkeckology; grace the air by ex-main gink Fay Smythe. Sum more by Big Cheese Litchfield; minor all the time, other things. Handum Larry Odell has summin to say about the wild men of Borwoe.

The Kleveland contingent have an idea or two about stopping the war by Sir Titer Percival Karlysle and Sir Archibold Eicher and maybe Hon. Gen. Glover. Thru Darkest Africa. Personally conducted by sum of our prominent members.

So there will be plenty of variety. See you there Skinner!

O yes, most torpor, $2.00 per, $1.00 for Classes of 1913, 1914, 1915. Mix on the fancy dress stuff. Remember, January 13, 5:30 o'clock.

Don Stevens, Goodyear Tire & Rubber Co., Akron, O.

Material of this nature is invaluable in giving both to the Alumni and undergraduates some conception of the comprehensive scale in which the reunion is being planned and it is earnestly to be hoped nothing of this sort will be allowed to slip by without being forwarded immediately to The Tech.

ORCHESTRA PLANS

The Technology Orchestra rehearsed Wednesday afternoon in the Union Dining Room, and a number of new pieces were taken up. Several new men reported and were accepted, among them some who played in the Show orchestra last year. There will be no more rehearsals of this term, but vigorous work will start immediately upon the opening of next term. Any men who intend to come out after midyear have been asked to do so without delay as the show music will be taken up at the very beginning of the term, and the makeup of the orchestra for the show will be determined early. Notices of all rehearsals will be posted on the bulletin boards.

B. A. A. TICKETS

Applications for tickets in the reserved Technology Section at the B. A. A. Games may be filed with Mr. P. H. Briggs, 166 Summer street, Boston. Tickets are $2.00 each and will be delivered about the last of January.

The greatest number of votes will be elected as members of the Class Day Committee.

This year several improvements over past years will be considered by the committee. It is especially desired to shorten the program in order to allow for as much time as possible for the inspection of the new buildings. There has also been suggested the appointing of a sub-committee for the purpose of getting in touch with the alumni officials. The governing board has decided that the marshals would be elected as in the past but that the Class Day Committee should elect its own chairman.

A. I. E. E. MEETING

A meeting of the Boston Branch of the American Institute of Electrical Engineers is to be held tonight at the Praxolin Union. The phenomena of long distance telephone transmission waves will be demonstrated on the screen by means of an electrograph machine and long distance connections. All members of the Electrical Engineering Society are invited to attend and they should meet at the entrance of Lowell Building at 7:15 o'clock.

SENIOR PICTURES

The informal negatives for the Portfolio may be handed in at any time. Envelopes will be found outside the Technique office and should be plainly marked with the owner's name. All seniors who have not had a sitting at Bachrach's should make an appointment at once.

ART COMPETITION

Candidates Given One Month To Prepare Material

Candidates for the position of Art Editor of Technique 1918 will be required to submit the following at the Cage before 4:00 o'clock Feb. 10, addressed to the "Committee on Art Editor's Competition":

First-A statement of whatever artistic experience he has had and suggestions of his plan for running the Art Department of the book. He may illustrate his suggestions by sketches.

Second-A full page drawing to be done in black and white, wash, pen and ink, or charcoal, for the "Musical Clubs" section of the book. This drawing is to be in the proportion of 9½ by 13½ inches and not smaller than these dimensions.

Third-A heading, 2½ times 12 inches by 0½ by 2 inches for a page for Clecan. This drawing must be done in pen and ink.

All drawings submitted in the competition should be of a finished character and must be mounted on cardboard in order that they may be incorporated in the book if of sufficient merit. Candidates wishing further information may apply either to L. P. VanZelm, O. C. Lorenzo, or D. O. Bradley.

BIG TRIP SCHEDULED FOR MID-YEAR RECESS

Electrical Engineering Society Plans Trip To Many Plants—Meeting Today

One of the most extensive inspection trips ever taken by the Electrical Engineering Society is scheduled for the mid-year vacation. Among the plants to be visited are the Edison Waterside Stations, the Interborough Rapid Transit Company, and the Holograph Lamp Works, all in New York City; the Edison plant, in New Jersey; the Niagara Power Company, the Hydroelectric Power Company, the Ontario Power Company, and the Acheson Graphite Company, at Niagara Falls, and the Westinghouse Machine and the Westinghouse Electric Companies, in Pittsburgh. An effort also is being made to go through the Carnegie Steel Works in Pittsburgh but definite word has not yet been received from this plant. The itinerary as first announced included the inspection of the Baldwin Locomotive Works in Philadelphia, but it will be impossible to carry out this part of the plan.

The entire cost of the trip, exclusive of hotel and board bills, will be about $35.00. Any men who have not yet signed up and who are contemplating going with the party should see W. C. Brown, B. D. Stason, or G. W. Wyman just as soon as possible. Every man who expects to make the trip should meet in the Lowell Library at 1:00 this noon when they will adjourn to another room to discuss the details of the tour.

MAJOR MOTON SPEAKS (Continued from Page One)

quality of production. With this in view, Hampton, Tuskegee and all the other negro educational institutions are trying to give the students experience and in that way produce more efficient and highly-trained men. In conclusion, Major Moton attributed to his predecessor, He said that Booker T. Washington has done more than any other man to build up the negro race in America and that all the cost of the erection and maintenance of Tuskegee was more than paid for by the life of such a man.

Before and after the address the famous Hampton Quartet sang plantation songs. Both speaker and singers were warmly applauded, the latter being encored repeatedly.

CHESS CLUB MEETING

The first Chess Club meeting of the second term will be held in the Union Saturday, Feb. 12, at 2.00 o'clock. It is intended on this occasion to play off games in the elimination tournament and to start a new match between members of the team. So far this year the competition has gone slow, owing to the players matching with each other not meeting and to their engagement in other activities. Those who care to enter or wish to enter the tournament should attend the meeting.

This evening at $.00 o'clock the Chess Team is scheduled to play Wells Memorial at the latter's room.

prominent hotels. They will be entertained over the week end at the house of the New York Technology Club.

Contrary to the plans of last year, the men will start Sunday evening, and go to New York by boat, traveling via the Fall River Line. Returning, they will come through on Saturday night in their private cabin arriving in Boston early Sunday morning.

FIELD DAY TEAMS

The following Field Day Team pictures may appear in the Technique. 1918 Football Team, to-day at 3.05 o'clock; 1918 Track and Field Team, to-day at 3.05 o'clock. Both pictures will be made at Bachrach's, 247 Boylston street.
A New Model Typewriter!

Yes, the crowning typewriter triumph is here—it is just out—and comes years before experts expected it!

For makers have striven a lifetime to attain this ideal machine, and Oliver has won again, as we scored when we gave the world its first visible writing.

There is truly no other typewriter on earth like this new Oliver "9." Think of touch so light that the trend of a written will run the keys!

CAUTION! The new-day advances that come alone on this machine are all controlled by Oliver. Even our own previous models—famous in their day—never had the Optional Duplex Shift.

It puts the whole control of 84 letters and characters in the little fingers of the right and left hands. And it lets you write them all with only 26 keys, the least to operate of any standard typewriter made.

Thus writers of all other machines can immediately run the Oliver Number "9" with more speed and greater ease.

17 CENTS A DAY Remember this brand-new Oliver "9" is the greatest value ever given in a typewriter. It has all our previous special inventions—visible writing, automatic spacer, 6½-ounce touch plus the Optional Duplex Shift, effective Color Attachment and all these other new-day features.

Yet we have decided to sell it to everyone everywhere on our famous payment plan—17 cents a day! Now every user can easily afford to have the world's crack visible writer, with the famous PRINTRY, that writes like print, included FREE if desired.

TODAY—Write for Full Details and be among the first to know about this marvel of writing machines. See why typesetters, employers, and individuals everywhere are flocking to the Oliver. Just mail a postal at once. No obligation. It's a pleasure for us to tell you about it.

The Oliver Typewriter Co.
