## MARCH TWENTY-FOURTH THREATENS POSITION OF THE FOURTH OF JULY

Undergraduate Spirit and Enthusiasm Unconfined at Enormous Gathering in The Union  
Friday---Detailed Plans for Great Pageant Explained by  
Professor Ralph Adams Cram---854 Sign

Technology's largest smoker was held Friday evening in preparation for the work of the undergraduates in the Institute's greatest event, the Reunion. Never before has the Institute seen such a gathering of students, and never before has the entertainment been carried out on so extensive a scale. Due partly to capable advertising and partly to a probable awakening of the student body to the importance of co-operative spirit in connection with Technology's great festa, the number of those present considerably exceeded one thousand; nevertheless, there was little congestion, and a platform for the speakers made it possible for every one to hear and see without difficulty.

Promptly at 8.00 the M. I. T. orchestra struck up a spirited piece and drew the crowd into the dining room. Class cheers were exchanged, and the orchestra led several Technology songs. As chairman of the Reunion Committee, T. D. Brophy, '16, mounted the rostrum and opened the evening's events with a short address explaining the specific purpose of the meeting.

### CHAIRMAN BROPHY'S ADDRESS

"Gentlemen: We are gathered here this evening to discuss the plans for the greatest event that Technology has ever known. Up to the present time there have been mere rumors concerning the plans for the great Reunion, but there has been no definite information given us. This meeting is called to arouse the enthusiasm of the undergraduates in order to make this the greatest college event in the history of America."

He was followed by W. J. Farthing, '16, President of the Senior Class, who said: "This is a night of great events. It is the largest smoker ever held in Technology and it goes to prove that there is a true Technology spirit if you men have a chance to show it. Tonight we will hear of plans for the great pageant and we are going to call for more than a thousand undergraduates to indicate their intention to participate. The Alumni have spent a great deal of time planning and have put up the money and if you all realize the spirit and loyalty that they have, you would come forth unanimously and not one of you would leave before the dedication is over. Millions of dollars have been given for the New Technology, and what is expected of us, in return, is our youthful enthusiasm."

"In order to carry out the plans we must have a strong organization. The Reunion committee comprises a main committee of five members and has three subcommittees of ten members each. In June after we are all through examinations, it will be hard to stay over, but it is necessary to help out across the river. We owe it to the Alumni!"

"Although the Seniors will be

EVERY ISSUE OF THE TECH FROM NOW UNTIL JUNE WILL CONTAIN NEWS OF REUNION DEVELOPMENTS. A COPY OF EACH OF THESE ISSUES WILL BE MAILED TO ANY ADDRESS OUTSIDE OF THE BOSTON POSTAL DISTRICT FOR FIFTY CENTS. WHY NOT SAVE LETTER WRITING AND KEEP "THE FOLKS" INFORMED IN THIS WAY?

busy, the three lower classes will not be. For these, there will be on Friday a rehearsal on Saturday evening entertainments, and on Sunday—sleep! Monday we are to go to the wharf to meet the boat carrying thousands of Alumni. There will be a parade all over Boston headed by a huge band, and Monday night there will be more entertainments. You men will never regret signing up, and I hope to see every man in June. You must be there!"

Brophy then took the platform. "Gentlemen," he said, "after the inspiring words of Bill Farthing little further should be necessary to arouse your enthusiasm to a sufficiently high pitch to compel you to stay. We must have more than enthusiasm, however, for a great responsibility rests with us; and to impress you with the importance of this we have the great honor and pleasure of having for the first time in the history of Technology the President at an undergraduate smoker. I take great pleasure in presenting President Richard C. Maclaurin."

Farthing then jumped upon the platform and led an enthusiastic "regular M. I. T." for the President.

### PRESIDENT MACLAURIN'S ADDRESS

The President bowed in acknowledgment of the greeting and said: "Need I say, gentlemen, that I greatly appreciate such a welcome. It seems to reflect upon me for not having been here before. I believe it will be as good for me as for you. While I have been President, these gatherings have not been frequent."

"I have not spent the day in planning a speech for this occasion, but in finally deciding the plans for the Walker Memorial. Its erection is to begin immediately and it will contain a hall in which a crowd like this could almost be lost."

"The Reunion is pre-eminently an alumni affair, but unfortunately I am not an alumnus of Technology, so that I am not going to speak of the alumnus' function in the coming event. I will, therefore, say a word or two about the dedicatory exercises which will take place on the last day of the Reunion, Wednesday, June 14. The exercises are to be held in the Great Court, weather permitting, and it will be filled with people from all over the United States and foreign countries."

"The Court itself is larger than Copley Square, and such a crowd in such a setting will be a memorable one. To witness this mighty crowd of enthusiastic men will alone be something that ought to make every one of you feel that you have been lucky in being able to partake of it."

"All of you who have traveled are full of regret when you recall that you did not see something that you might have visited. I am sure you would all sincerely regret it if you were not present upon this great historic occasion."

"This affair must be interesting and inspiring—not merely local. It will be something that will interest the entire intellectual world. No school anywhere in the world, devoted to applied science, has anything which can approach the New Technology buildings. It is an interesting and inspiring thing because for the first time in this country's history, such a school has buildings suited to its purpose."

"Everyone who desires to take an active part will find plenty of oppor-

tunities to do so. We are to sing and amuse ourselves but we are also to be there as good Tech men, to work; not mere routine, but useful and interesting work."

"The Dedicatory Exercises themselves will be simple, as befits a serious occasion. There will be a few speeches by men of national reputation. Various colleges will be represented; the State by the Governor; the United States by a prominent Senator. There will also be a splendid musical program."

"What will be of greatest interest to visitors will be the buildings themselves. Here, again, you can do your share by helping the thousands who will be here, to see the new Technology buildings, but I suggest that before you try to describe them, you become acquainted with them yourselves."

"Any Technology man who, for any reason, misses the opportunity to be present in June, will regret it all his life. Never can there be such a chance to show Technology spirit and prove to the Alumni that we are just as loyal as they are. They have been planning and working for months to make this a success. Now we must take a hand and show that we mean business. I want you all to sign up and compel all the others to do likewise."

In introducing Professor Cram, head of the Architectural Department, Brophy said: "We are particularly fortunate in having with us the man who is bringing about the pageant. Nothing in the way of a college pageant can approach it, and Professor Cram, who is one of America's foremost architects, is ideally the one man who would be able to do justice to such an undertaking. Professor Cram is celebrated for his wonderful imagination, and in his conception of the subject he has given that imagination full play."

Professor Cram, as he mounted the platform, was greeted with another "regular M. I. T." led by Farthing, and, laying his pipe on the ice-water table, commenced as follows:

### PROFESSOR CRAM'S TALK

"Unfortunately, I can claim resemblance to President Maclaurin in only one respect, and that is that this is the first time that I have attended an undergraduate smoker, or should I call this a Roosevelt rally? I can tell you that if I get away alive, I shall certainly come again. The first thing for me to say is that I don't want one man to leave this building until he has signed up. I don't believe there are any slackers here, because I know there are no slackers in Technology, and that applies to the Reunion as well as to National defense. This is to be a pageant worthy of Technology, and that means that we must make it the best pageant ever held in New England, and I may even say, providing the undergraduates do their full share, the greatest in America. If all of you help, this will be possible. There are those who are working night and day to make it a success. The alumni are pouring out 'untold millions' upon this thing, but the money will count for nothing unless we are backed up by the undergraduate body as a unit. And let me say right here that I fully agree with President Maclaurin that it will be a cause for great regret to any man for him to miss the opportunity to take part in this affair."

"We are going to begin the exer-

cises with a voyage by water from Boston to Cambridge. You will please note the language I used, 'a voyage by water,' not 'a voyage for water.' The first thing that will happen will be that the President and Faculty (although they may not know it yet), will assemble in Rogers, from which they will march down to the embankment—or I believe the proper high-brow name is the 'Esplanade'—carrying the charter and the great seal of Technology. There they will embark on a boat such as has never before been seen in these waters. It will be like the Bucintoro, the magnificent barge in which, each year, the Doges of Venice wedded the waters of the Adriatic. The original barge was destroyed during the French revolution, but fortunately a model was left, and the replica of this ship is now under contract. It will be decorated with Cardinal and Silver, and will be accompanied by a flotilla of smaller boats occupied by people in costumes representing all ages of civilization. It is then to cross the river and discharge its

(Continued on Page Two)

### MASS MEETING

#### General Discussion Of Honor System Next Thursday

President Farthing of the Senior Class has called a mass meeting to be held Thursday afternoon at 1.30 o'clock in Huntington Hall for the purpose of discussing the Honor System. Various speakers will briefly describe the features of the system as it would be if applied at the Institute. An opportunity will then be given for any one to ask questions relating to the subject.

In order to save time and money for the Institute Committee, an informal vote will be taken, and in the event of a majority being in favor of installing the Honor System, the Institute Committee will proceed with a publicity campaign, and by a later thorough canvass of the Student body, will attempt to determine as exactly as possible the true sentiment in regard to the matter. In case an adverse vote is turned in at the mass meeting, a further campaign will be abandoned.

- 6.05—Musical Clubs leave South Station for Whitman Concert.

# THE TECH

Entered as second-class matter, Sept. 16, 1911, at the postoffice at Boston, Mass., under the act of Congress of March 3, 1879.

Published tri-weekly during the college year by students of the Massachusetts Institute of Technology.

MONDAY, MARCH 27.

In his remarks at the mass meeting Friday night President Maclaurin commented on the unavoidable feeling of remorse that would come to every Technology man who deliberately neglected to stay over in June for the dedicatory exercises. In the brief perspective of the last two days it has become apparent that the meeting itself is a part, although a preliminary one, to the general plan of student participation in June; and that those unfortunates who were not in attendance have missed their chance to "get in on the ground floor."

In the full sense of the word the "Night of Big Events" was a big success. The committee in charge, headed by its able chairman, T. D. Brophy, '16, demonstrated a spirit of capability and capacity for organizing student support that aroused a wonderfully high degree of enthusiasm. As a direct consequence of the meeting nearly nine hundred of the desired twelve hundred men have signified their desire to remain. But the lists are not yet complete; in the five days remaining in March three hundred and fifty more names will be added to the lists that will be placed in the archives of the Institute. We are confident that the honor of participating in the dedication will make such an appeal that the number of signees will far outnumber the number desired and that the Technology dedication will find Technology students taking part in the true Technology method and in the genuine Technology spirit.

It does not seem likely that the Institute Committee will continue to stand behind its action last Thursday which practically amounts to the exclusion of the Orchestra from the student governing body. The Orchestra petitioned for membership in the Committee, presenting a statement of past performances which admittedly entitled the petition to favorable consideration. The motion to admit the Orchestra was tabled, but the sentiment was expressed that the Institute Committee was already inefficient through its large membership and that it would be unwise to take on another member. The Committee also recognized the existence of considerable "dead wood" among its numbers at that the task might prove too difficult, present, but it expressed itself unfavorable to an investigation which might lead to the exclusion of this "dead wood," for no better reason than "In short, the Institute Committee thinks it best to exclude the Orchestra, not because the Orchestra is unworthy of representation, but because the Institute Committee feels itself incompetent to deal with a rather difficult problem. The criterion of membership is made not the efficiency of the applicant but the inefficiency of the Institute Committee. Such a policy, if pursued, will do much to break down the democratic spirit of which Technology is so justly proud."

## ENGINEER CORPS

At the exercise held last Friday in the armory the following company officers of the Technology Engineer Corps were elected: Captains, Ralph Millis, '16, and J. W. Barker, '16; Lieutenants in their order of rank, C. H. N. Roberts, '17, R. E. De Merritt, '17, A. E. Keating, '17, G. W. Spooner, '16, A. C. Lieber, '16, P. H. Duff, '16. Millis is a member of Phi Beta Epsilon, colonel of the Technology Regiment, a sergeant at the U. S. Army camp at Plattsburg, and a member of the Senior Class Day committee. Barker is a member of Phi Kappa Sigma, president of the Officers Club, major of the first battalion in the Tech Regiment, and a member of the First Corps Cadets of the state militia. With the exception of Spooner all the other men are either present or past officers of the Tech regiment. The field officers had been appointed previous to last Friday.

The next drill will be held as usual on next Friday in the armory. There will be no lecture this week, the next being held probably on Tuesday, April 4.

## COURSE XV JUNIORS ORGANIZE SOCIETY

### "Fifteen Corporation" Informally Makes Its Appearance Thursday

At six o'clock last Thursday night, fifty members of Course XV, including its Faculty, assembled at the Engineer's Club to enjoy a "specialty dinner." Early in the evening, Course XV was enthusiastically organized as a social institution by its Junior members under the name of "Fifteen Corporation." This organization is the natural outcome of a tendency which has grown with the rapid expansion of the Business Administration Course.

The men were entertained between courses by special features, commencing with a musical number by J. W. Doon, R. C. Erb, J. E. Wallis, and W. A. Wood. They were so heartily encored that they were called upon several times during the evening. R. C. Erb and J. E. Wallis were especially well received because of their original songs, the most successful one being entitled, "Course XV." H. G. Mann added to the enjoyment of the telling.

After the dinner, E. P. Brooks gave evening by his recitations and story—a short talk emphasizing the work which the Junior Class must do to make the New Institute fulfill the traditions of the old. Professor Doten in his address said that the opportunity was now ripe for bringing students together, and he concluded his remarks by saying that Course XV could do much towards accomplishing this end by a social organization.

Professor Aydelotte in an interesting talk on Oxford University, brought out the contrast between that famous institution and Technology by explaining the various duties of an Oxford student.

Dr. Dewey made a thorough analysis of college instruction and methods as he had found them at the University of Vermont when he was a student there. He told about former times when a student received no aid from his professors except in the relation of "teacher to scholar."

## REUNION SMOKER

(Continued from Page One)

precious freight in Cambridge. Before the boat sails, a field piece will be discharged to announce its departure. There will then be an exhibition of fireworks such as will, I believe the proper term is, 'stagger the imagination.' We are promised that many new and wondrous forms of aerial bombs will be shown, and one especially invented in honor of Technology.

"The group will disembark and enter the court where 'Prosperity' will greet them. And let me whisper in your ears that at this point something will happen that is to be the most wonderful thing of the whole Reunion. Anyway, they enter the court. In the court will be situated six thrones. On one will be the Governor of Massachusetts, on another the Mayor of Boston, on the others will sit the President of Harvard, and the Mayor of Cambridge, a Senator in Congress, and a representative of American colleges and universities. In the center against the portico will be seats for the President and Faculty and invited guests. When all have been anchored in their appointed spots the masque will begin. This pageant will be altogether too large for me to describe and I shall have to leave it to your imagination, as neither my voice nor your patience will permit me to go into details at this time. In general it will represent the age-long contest between man and the forces of nature, with which strife, Technology, has had much to do.

"By means of a steam curtain brilliant lighting effects will be produced, and we can guarantee on the advice of the man who had charge of the illumination at the Panama-Pacific Exposition, that the result will be fully as good as that produced on the Pacific coast.

"The scene will first represent 'Chaos,' from which 'Order' will slowly emerge. There will be dances by groups representing the six great forces of nature, earth, air, fire, water, steam, and electricity. All the dancing will be under the supervision of Miss Virginia Tanner, director of the Tech Show ballet, who has been given full sway in the arrangements. After the dance will be

shown the episode of 'Prometheus, the winning of fire, and the blind worship by man of the forces of nature which he cannot understand. Following this there will be shown an attack upon nature by primitive man, and for this we need eighty athletic men. In this encounter, primitive man is done up and thrown out. Then two new forces appear, 'Will' and 'Wisdom.' 'Will' and 'Wisdom' lead against nature all the historical groups that crossed the river with the flotilla, and for these groups we want six hundred men. Mr. C. Howard Walker is in charge of all the costuming, and the costumes are perfectly wonderful. I should think that after you men have seen them you would be anxious to take part in the pageant just to get a chance to see how well you would look in really handsome clothes. As I said, here in the midst of this great Arena a mighty fight takes place, and the forces of nature separate before the attacks led by 'Will' and 'Wisdom,' and they go out on either side.

Then the great men in history who have been conquerors in science and art ascend their thrones. There follows the procession twice around the Arena, the Alma Mater leading groups representing the seven liberal arts. During this progress they sing a song—a song that will remain Technology's song for at least five hundred years. The melody is from a chant from the thirteenth century, and words full of the sentiment of the Great Reunion. They walk up through the center of the crowd to the throne where sits the President of Technology. Miss Tanner is in charge of every bit of the dancing, and in charge of the music is a man who has had a great deal of professional experience with her. Hymns will be sung by a chorus and some by all the students; for we think that possible. Then the great triumph commences which brings in everybody who has marched in the pageant. Knights and guards and—heralds. Knights know what not!—all the gorgeousness that we can pile on. We have got to demonstrate that Technology is the greatest scientific school in the world. We want to show that followers of science are

also interested in beautiful things. Applied science is in itself a beautiful thing!

"You are the ones to do the work, get the glory, and have the fun! If you go at it with the proper spirit the undertaking will have to succeed. The different things that the students can do will be infinite. There will be no valid excuse for anyone not participating."

"A man who knows said that there is a man in Technology who is a better dancer than any one in the Russian Ballet that was recently here in Boston. I will not mention the man's name for he may be here tonight. There will be women dancers as well!"

"We want men to row the Barge of State, two men to every sweep. We would hate most horribly to have to use Harvard students, chained to the oars! We want men to carry banners, sing, and—I'm afraid I'm ignorant, but I think you may have a mandolin club here—men to play 'hand musical instruments.' We also want good looking men and athletes. We want warriors and men of every known kind of physical characteristics."

"There is a job for every man! Nobody can say, 'There is no job for me.' We have the chance to make the pageant famous throughout the United States and to add, if that could be possible, to the fame of Technology. There will be nothing that we or the Alumni can do that will in any way compare with what you may accomplish. We are depending upon you to back it up, and we know that you will. I have nothing more to say, excepting that I have had the time of my life in talking to you."

Brophy had difficulty in making himself heard, so loud and enthusiastic was the cheering for Professor Cram. He finally began, "Professor Cram has given us a fine word picture of what is to take place at the Dedicatory Exercises. We have gone a step further! We are going to bring part of the pageant to you for tonight is 'The Night of Big Events!' We are going to show you four of the 1200 gorgeous costumes designed by C. Howard Walker that are to be used in the great pageant. A Reunion Quartet has been organized and it will sing for us tonight." (Continued on Page Four)

night a song, the premiere of 1916, written by I. B. McDaniel, '16, especially for this occasion, and which will be from now until the Reunion the official Technology song."

I. B. McDaniel has followed up his triumph of last year, "That Technology Rag," with a song that those who know declare is destined to eclipse it, "At That Reunion." Four masked men, displaying four of Professor C. Howard Walker's creations, made their way through the crowd and mounted the platform. They sang two verses of the new song, one of which runs like this:

**"AT THAT REUNION"**

At that Reunion,  
 At that Reunion,  
 You'll see every one;  
 They're coming back here,  
 They all will be here  
 To join in the fun.  
 For a week the city is ours  
 To do as we please  
 No matter the hour.  
 It's Dedication!  
 It's Dedication!  
 And everybody knows  
 You'll have the time of your lives  
 With the Alumni wives—  
 Singing.

**Chorus:**  
 Technology, we truly love  
 The Cardinal and the Gray;  
 And when this June comes rolling  
 'round  
 All of us will stay.  
 Your buildings new  
 We'll wander through  
 And loudly sing your praise.  
 Technology, our Alma Mater,  
 Technology, our Alma Mater!  
 Hail! Hail! All Hail!

The "Stein Song" was then sung by the whole gathering, accompanied by the orchestra. Afterwards, Brophy introduced Professor Miller, head of the department of Mechanical Engineering. Again a rousing "regular M. I. T." greeted the speaker, whose talk was short and concise. His remarks were based upon two aphorisms: "What men most value is what they have striven hardest for," and "Men who have gone through an ordeal together are ever afterward the best of friends." "Perhaps the former explains why a Technology degree is so highly prized, and the latter tells why Technology Seniors are so loyal, and why the graduate's love for his college grows with the years. Have you ever stopped to think what you get from Technology? Anywhere in the world you are at once rated as a man of ability and integrity, and unafraid of work. . . . How did Technology men get such a valuable reputation? Through the service of the alumni who are leaders in architecture and science. . . . These are the men whom we are asked to receive and entertain and in the future we must feel proud to have participated in such an affair as will take place in June."

Chairman Brophy introduced the final speaker, "The man who is the soul of the coming Reunion," Mr. I. W. Litchfield, secretary of the Alumni Reunion Committee. A hearty cheer greeted Mr. Litchfield before he commenced his address. He gave a rapid outline of the development of the idea of the great celebration. "When it became definitely decided a number of years ago that there should be a formal dedication of the 'New Technology,' Technology alumni immediately determined that it should be made a great occasion, and they have gone a good way toward making it so. . . . Even as early as this, men are starting from foreign strands to get here in time for it. To carry this through we need

badly the assistance of the under-graduates. We did not at first figure on the necessity of enlisting every man. We counted on the help of the city, the Metropolitan Police Commission, and influential men, but the thing grew, and we find that we now need fully 1500 men, and with your co-operation we will be able to put over the best thing that has ever been attempted since the flood (not the Johnstown flood, either). Your one duty is to place the Institute above all other considerations. Your Alma Mater calls you—are you with us?" Mr. Litchfield's appeal was answered by a thunderous "YES." Twice he repeated his question, and each time the Union shook with the assent.

A number of announcements were made by Chairman Brophy following this. The winning phrase in the contest conducted by the undergraduate Reunion Committee for the best Reunion slogan for the students was announced as

**"DAMN THE EXCUSES BE THERE!"**

Peter M. Strang, '18, Course XV, won the contest. Unfortunately, the winner was erroneously announced at the smoker as James Maclaurin Strang, brother of the successful man.

After directions for signing up at the tables were given, the crowd turned its attention to refreshments. The huge assemblage was well provided for. All during the evening cheese, pickles and pretzels were served, and after the speakers had finished, ginger ale was given out. Some idea as to the size of the gathering may be obtained from the following statistics: 1008 bottles of ginger ale were drunk; 50 pounds of cheese, 45 dozen doughnuts, 225 pickles and 100 pounds of pretzels were consumed during the festivities.

**IT PAYS TO ADVERTISE.**

A feature of the occasion was a huge sign across one end of the Union, bearing the legend: "This Is The Night Of Great Events." The banner was nearly 35 feet in length, and was designed to be stretched across the street in front of the Union. The city authorities refused permission, and the sign had to be placed in a less impressive setting.

The whole publicity campaign for the great smoker was conducted by R. H. Cattet, '17, with an effectiveness and force that were largely responsible for the tremendous showing at the Union. For a week previous to the

event large posters placed in every recitation room in the Institute, and all other available places announced the "distinctly different" March 24. The advertising was in many ways unique, and far more thorough and extensive than anything that has been done in the past.

**854 SIGNATURES SECURED.**

The results of Friday night's sign-ups presents a total that exceeds the expectations of the most imaginative. Eight hundred and fifty-four names were secured, a number that indicates with what measure of success the efforts of the Committee were rewarded. Two tables for each class were placed at advantageous points; the men lined up and within an incredibly short time all the signatures were put down. The work was expedited by careful planning on the part of the committee, and confusion was entirely lacking.

The totals by classes is as follows.

'16	201	23.5%
'17	227	26.6%
'18	234	27.4%
'19	192	22.5%

These sign-ups are in no sense pledges; they merely signify willingness to remain in Boston for the few days of the Reunion to take part in the dedication proceedings. They will not bind the signers to any agreement. Their sole use will be in giving the authorities an idea on the number of men who intend to stay over, to form their plans accordingly. The list of the signatures will be placed among the documents of the Institute, and will be preserved as history-making autographs.

**AWARDS ANNOUNCED**

At the regular March meeting of the Advisory Council on Athletics, held last week, the following awards were confirmed: Wrestling Team—P. Y. Loo, '16, a second star; H. T. Morse, '16, "T"; L. A. Hoffman, '17, H. L. Wirt, '18, J. M. Todd, '18, E. L. Sache, '19, E. W. Rounds, '17, and Manager G. H. Stebbins, '17, "wTt." The freshman wrestlers were awarded numerals as follows: C. P. Davis, A. M. McMorrin, F. G. Ellwell, D. W. Kitchin, B. Parker, E. R. Smith, G. A. Inglis, J. Holt. For their work in the "Four A" meet at New York, R. G. Brown, '16, G. F. Halfacre, '18, H. A. Herzog, '19, and G. C. MacCarten, '19, were awarded the "aTa."
