INFORMAL HEARING ON HONOR SYSTEM

Adoption Of System As Outlined Favorably By Slight Majority

Nearly a hundred men attended the meeting of the Civil Engineering Society yesterday, Mr. J. R. Worcester, head of the so-called Austin diagram for connection of systems, was present to meet the committee in the celebration next June. The speaker then explained that the committee believed that Technology men would be interested in recreational reading if they knew how to select books, and, with this idea in view, he had found it extremely valuable to publish lists monthly.

The book is to be free to all students of the Institute as an encouragement to do outside reading. The reading will be modern, live books, recommended by President Chadwick, President, and various authorities of the book.

uled for 1:20 p.m., the report of the Sophomore class for the coming year. Nomination for the coming year. Nomination for the coming year. Nomination for the coming year.

The expression of opinion offered at the mass meeting yesterday is difficult to analyze. Only about seventeen percent of the men present voted and in this group opinion was very evenly divided. The interests which determine upon the action of the meeting by the home system committee is commendable and well justified. It is brief the committee proposes to recommend to the Institute Committee that any special time for immediate action be held in abeyance; that the matter be kept before the student body by a consistent publicity campaign, and that a general poll be taken some time next fall.

An important point was made by Chairman Allen. Yesterday morning when he explained that a Technology house system would have to be adapted to conditions here and that no complete, concrete proposition could be expected at this early time. There are, however, features about the system as it is worked out in some institutions that would not be considered at a professional school such as Technology; and it is usually those features that excite the sweeping condemnation of the matter. That there are certain advantages in an honor system is admitted by all; but why negative the advantages it embodies and as carefully considered line of reasoning?

Probably men who want a technology system when they desire a little relaxation from the busy routine, will either go to the "movies" or read a popular magazine. Their response to any suggestion of recreation in this way air perfect. If they are given a very simple solution in the problem of employing extra time and have been found to work admirably. They would probably be willing to admit, however. That although such a method is pleasant enough, it brings no permanent good.

The recreational reading campaign which has just been started seems to offer the opportunity of employing spare moments more profitably and in a much more enjoyable manner than was possible by the old make-shift. Thoughtlessly snatching an hour here and there to rush off to the "movies" or to read the latest smoking-dust novel is about the most inefficient way imaginable of stimulating that supreme resource—a brain; the books that will

Margaret Foley, the well known suffragist, will speak at the Union next Tuesday, under the auspices of the M. I. T. Forum. This talk has been arranged for in order to give Institute men an opportunity to hear one of the most active workers for the suffrage cause. The subject of Mrs. Foley's talk will be "The Common-Sense of Equal Suffrage."

Mr. Brew Eddy Explains Labor Conditions

The second of the series of lectures on "Jobs in Foreign Lands" was delivered yesterday by Mr. Brew Eddy of the Board of Directors for Foreign Missions. He chose as his subject, "Pioneers of Civilization," Mr. Eddy spoke of the close connection between the engineer and the missionary, who, he said, are the real pioneers of civilization. The missionary is in the first and the last out of a foreign country, whereas the business man is the last in and the first in out in times of trouble. The business man has never paid his debt to the missionary, who has opened up every country to which he has gone, and is the conqueror of all education and uplift. The speaker chose Turkey and China as his examples of the great work that missionaries are doing for the advancement of civilization. At present several positions are open to men in the service of foundations of science in China. By closing Mr. Eddy said, that credit to the missionary for the great political reforms he has produced over the lecture tonight slides of foreign countries were shown.
SUCCESSFUL WRESTLING SEASON REVIEWED

Varsity Team Did Consistently Well—Freshmen Also Successful

The official wrestling season closed last week with the annual Massachusetts-Wesleyan Intercollegiate Meet. The season as a whole has been a successful one. The varsity team beat five dual meets, winning from Springfield, W. M. C., A. College and losing to Tufts, Massachusetts, and Harvard. The two meets were won with much wit the entire meets were lost by very close decisions. Technology tied for second place in the N. E. Intercollegiate Meet with the Springfield Y. M. C. A. College, beating Harvard, which was fourth. Yale was the leader.

The freshman team did exceptionally well this season, having nine Frequent Four meets and winning three of them, one with Springfield, Tufts and the Sophomores were all beaten, the only meet lost being the one with the Harvard freshmen. The second team met and defeated Andover Academy during the season.

The wrestling season opened with about twenty candidates: one. All but three of last year’s team were back and after Field Day the ranks were further enlivened with about ninety new freshmen. During the last part of the season two practice meets were held with the Boston Y. M. C. A. and the Boston Y. M. C. A. in order to try out the reserves material.

The real varsity season opened during the last week of January, the trip which lasted eight days. Two meets were held, one with the Boston State and another with the Tufts, but Technology was unfortunate and lost both of them. Huntington School, Tufts and the Sophomores were all beaten, the only meet lost being the one with the Harvard freshmen. The second team met and defeated Andover Academy during the season.

The wrestling season opened with about thirty candidates: one. All but three of last year’s team were back and after Field Day the ranks were further enlivened with about ninety new freshmen. During the last part of the season two practice meets were held with the Boston Y. M. C. A. and the Boston Y. M. C. A. in order to try out the reserves material.

CHESS OFFICERS
At a meeting of the chess club held last Friday night, a new constitution was adopted, embodying changes in the powers of officers and in the club dues. Officers for the following school year were elected as follows: Presi-
dent, Carlton Dean, '17; Vice-president, Alexander Kenigsberg, '17; Secre-
try-Treasurer, Alfred N. Pray, '16.
