

## NEW COMMITTEE FOR SERVICE PUBLICITY

Information About Military Opportunities From Joint Commission is Gathered From Most Reliable Sources

### HOURS SPENT ON BULLETINS

The Executive Committee of the Institute Committee has been appointed as a Publicity Committee to serve as a single source of all accurate and reliable information in regard to the field for service for the Institute man.

The Joint Committee on National Service has been issuing, and will continue to issue, tri-weekly bulletins to inform the students of the Institute of the condition of affairs in the country and of opportunities for service. The information for these bulletins bear the signature of President Maclaurin before they are published.

To facilitate the issuance of these bulletins, the Executive Committee of the Institute Committee serves as a Publicity Committee. It is this group that is responsible for the wording of the statements. Each of these bulletins requires hours of careful preparation in order that all the information may be imparted in a clear and concise form. The bulletins thus carefully prepared are posted on an official Service Bulletin Board opposite the Information office, and are published in a conspicuous place in The Tech. Thus the work of this representative Joint Committee is of the most authentic nature, and the "last word" on the subject in hand, and all information is presented in the best possible manner.

### TRACK MEN LEAVE FOR PROVIDENCE TOMORROW

Hard Tussle Expected with Brown in the Discus, Hurdles and High Jump

The varsity track team will go to Providence tomorrow for a dual meet with Brown University. On account of losses through enlistment the strength of the Brown team is uncertain, but enough of the Providence stars are left to give the Institute runners a good tussle. The trains for Providence will leave South Station at 10.05, 11.00, and 1.05 o'clock, and will leave Back Bay four minutes later in each case.

Brown will present a speedy sprinter in White, winner of second place in the 50-yard dash at the B. A. A. meet this spring, while Nichols, in the discus throw, Howell, in the high jump, and Pollard, the Providence hurdler, will probably share in the honors. Isaacs, who ran the fastest 390 yards at the B. A. A. meet, will be a hard contender for a place in the quarter mile run.

That F. P. O'Hara '17, Technology's sprinter, will run at the Brown meet tomorrow is doubtful as he has recently enlisted for duty at Plattsburg.

The N. E. I. C. A. A. meet will be held at Tech Field on May 19. Although a list of the entries is not yet complete, it is believed that the following colleges will be represented: Boston College, Brown, Colby, Holy Cross, Maine, Technology, Wesleyan, Williams and Worcester Tech. Of these Maine is picked as winner, with Technology a close second.

The same afternoon the freshman team will go to Exeter to meet the Phillips Exeter Academy runners. The 1920 team will be severely handicapped by the absence of Bossert and McMahon, who are slated to compete in the New Englands. The Exeter team is usually strong and a good meet is expected.

### TOMORROW LAST DAY TO GET TECHNIQUES

Holdings of sign-ups for Technique 1918 must redeem them by 2.00 p. m. Saturday, May 5. After this date all sign-ups will be forfeited, and those on the waiting list will be able to secure books. It is very probable that all those on the waiting list will be able to procure books. The books will be distributed in the main lobby daily from 1.00-2.00 p. m. and 5.00-6.00 p. m.

### BULLETIN NO. 5 OF JOINT COMMITTEE ON NATIONAL SERVICE

May 3, 1917.

In view of the numerous efforts that are being made to get members of the student body to enter military and naval organizations of all sorts, the Joint Committee desires to call attention again to the list of opportunities recommended in Bulletin No. 4 as especially suitable for Technology men. Students contemplating entering other forms of service are urged to apply first to the Military Department for advice.

(Signed) Richard C. Maclaurin,  
Chairman.

## CORPORATION XV TO DINE

Dr. Dewey and Prof. Aydelotte to Address Banquet

Corporation XV will conduct its last regular meeting of the year in the form of an annual banquet at Riverbank Court on Thursday, May 10, at 6.45 o'clock, when the election of the officers for next term will be held. The principal speakers of the evening will be Dr. D. R. Dewey, head of Course XV, Professor Aydelotte, and Professor Armstrong. The entertainment, the nature of which is known only to the committee, will be furnished by Sir Roger Leffingwell, recently of London.

The nominations to precede the election at the banquet have been opened and all nomination papers should be signed by no less than ten members of the Corporation, addressed to Robert C. Erb '17, and left with Miss Jamieson, the Corporation's private secretary, in Room 2-170, not later than 5.00 o'clock on Wednesday, May 9.

For the first term next year, the President, Secretary and the Treasurer will be members of the class of 1918. One member of the Board of Directors will be chosen from 1918 and three from 1919. This is the first chance that the members of the 1919 class have had to represent the Corporation and it is hoped that there will be many nomination papers landed in. At the last meeting of the Board of Directors, it was urged that the entire Sophomore Class of the Course be present for the banquet.

### C. E. SOCIETY WILL DINE AT ENGINEERS' CLUB TONIGHT

Henry W. Hodge and Ex-Gov. Bates Slated to Speak

The Civil Engineering Society will hold its annual banquet and last meeting of the year this evening at 6.00 o'clock in the Engineers' Club at 2 Commonwealth Avenue. A number of prominent men have been obtained to speak on topics of special interest to the society members. The first speaker of the evening will be Mr. George W. Kittredge, chief engineer of the New York Central Railroad, whose subject will be "The Development of a Railroad Terminal." The second speaker will be Mr. Henry W. Hodge, Commissioner of the Public Service Committee of New York City, who will speak on "Broadening of Engineering Life." Ex-Governor Bates of Massachusetts, and Professor Spofford, head of Course I, have also been engaged for the evening, but the subjects of their speeches are not yet announced.

The election returns for the officers of next year will be announced at this meeting. The candidates are: for president, Marvin Pierce and Rudolph Beaver; for vice-president, John W. Friery and Geo. F. Malley; for secretary, Chas. F. Wetland; for treasurer, Henry M. Barber and Walter T. Biggar; for assistant treasurer, Merrit P. Smith and Eugene Mirabelli; for executive committee: 1919, A. E. Farrington; 1918, C. C. Carpenter, J. E. Longley, J. H. Chase, Raymond Smith, E. Miago.

## HONOR HEAD OF RED CROSS RELIEF WORK

Reception Given to Edward Stewart '10, Just Returned From Sanitation Work in Europe

### PRESIDENT MACLAURIN ABSENT

A reception was given yesterday in honor of Mr. Edward Stewart '10, who has just returned from doing sanitation work in Europe as head of the American Red Cross Relief Committee. The original committee called for from Washington Red Cross under Dr. Strong was composed of fifteen men from Technology and Harvard and the Harvard-Technology School for Health Officers. The two men from Harvard were Schoolmaker and Hazelhurst, and from Technology-Harvard School for Health Officers Edward Stewart '10, Dr. Mitchell, Dr. Mendelsohn, Dr. Osborn, Dr. Cornellius. To these were added men from the Institute, namely, Carl Buck (formerly of Dartmouth), Albert Buck '13, Charles Fox '14, G. W. Bakeman '13, Elliott Gage '13, E. H. Magoon '14, M. H. Harrington '14, R. D. Bates '14. Besides these were men from other colleges.

Professor Sedgwick, head of Course XI, spoke of the work of the Relief Committee, and after explaining the absence of President Maclaurin of the Institute, introduced Dr. Rosenall, Director of the School for Health Officers. Dr. Rosenall spoke of the work done by the Relief Committee in the pioneer work of protecting the European countries from poor sanitation. Professor Spofford then addressed the gathering and welcomed the committee back to the United States.

Mr. Stewart was next called upon and his talk consisted in an interesting account of the work done in the beginning under Dr. Strong. A great majority of the work was done in Serbia where the sanitary conditions were the worst. He gave an account of the methods pursued in the stamping out of the epidemic of typhus. To give an idea of the poor water condition, he told of one case where a member of the committee dug a well. The French upon entering the town put a sign on it claiming "This is the only pure water in town." From here, Mr. Stewart outlined the actual process of stamping out an epidemic. The soldiers are bathed, given antitoxin, and sprayed with kerosene. In the meantime a detachment is sent to fumigate the barracks. Several of the men of the committee who had formerly served in Panama attended to the mosquitoes and sprayed the pools around the outskirts of the cities.

Mr. Stewart concluded his address by stating his appreciation of the reception and his joy in being back in America.

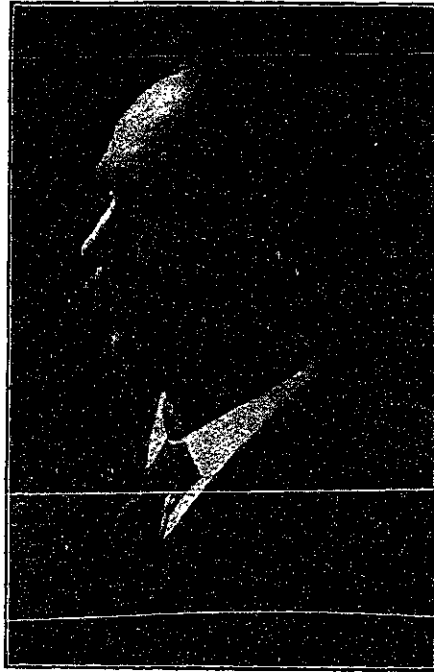

### TENNIS TEAM TO MEET HOLY CROSS TOMORROW

N. E. Intercollegiate Matches Canceled Because of War

The tennis team will meet Holy Cross at the new Longwood Courts at Chestnut Hill tomorrow afternoon at 2.30 o'clock. The team will probably be the same that played against Brown last Saturday unless one of these men is defeated in a challenge match before then. Captain Kaler has given up tennis for the season by his physician's orders and will consequently probably resign from the captaincy. R. B. Swain '17 is at present acting captain of the team. The schedule will be changed somewhat as the N. E. Intercollegiate tennis matches have been called off and the Trinity match cancelled because of war preparations. The management will announce the new schedule as soon as possible.

### JUNIORS PLAY FRESHMEN TODAY

The second game of the interclass series will be played today between the Juniors and freshmen at Ford Field, near Cottage Farm Bridge, at 3.00 o'clock. On Monday afternoon at 3.00 o'clock the Juniors will play the Sophomores at the same grounds. Either Blanchard, A. Howard or A. Wilson will go into the box for 1918.

PROFESSOR MILLER  
Head Course II

## PLAN COURSE FOR JUNE

Professors Hayden and Swift to Give "Machine Design"

In accordance with the advice given to Juniors in Course II to take as much of their fourth year work this summer, to leave as many hours as possible open for the military work which it is hoped will be authorized next year by the War Department, announcement was made yesterday by Professor Miller, head of Course II, that Professor Hayden together with Professor Swift have offered to give the first term work in "Machine Design" to as many men in Course II and also men taking Course XV, Option 2 who have had the necessary preparation and who are eligible to registration at the office, as desire to take it. This work will be taken from 8.00 o'clock in the morning until 5.00 o'clock in the afternoon, with an hour for lunch, from June 5 to 15. This offer by Professors Hayden and Swift is conceded to be a very generous one as the work will take up much of their time for which they will receive no financial benefit whatever. The work will also be given to the students without any charge.

As this work will start immediately after the final examinations are over and will be finished before summer school has hardly started, it will enable the men to utilize some time which would otherwise be wasted. After completing this course, the students may take "Machine Tool Work" and "Elements of Electrical Engineering" in summer school and thereby get off a total of 225 hours from their fourth year.

### CLASS NOMINATION PAPERS DUE IN CAF BY FIVE TOMORROW

Revised Voting List Will Be Posted Next Week

Nomination papers for the officers of 1918, 1919 and 1920 classes for next year must be handed in at the Caf before 5.00 o'clock tomorrow signed by at least ten men. Each paper should contain in addition a list of the activities, fraternity, societies, etc., of the candidates. There is no longer any requirement of paying class dues in order to vote, and therefore a much heavier vote than in former years is expected. This change will require a revision of the class voting lists to some extent and these will be posted in the Main Lobby early next week. Corrections may be entered in a note-book attached to the board for that purpose. The lists will remain posted until Wednesday evening, and all corrections must be made before then.

Each class will elect the following officers: President; Vice-President; Secretary; Treasurer; Institute Committee, two members; Executive Committee, two members.

## SENIORS PLAN CLASS DAY DESPITE WAR

Committee of Fourth Year Men Arranging to Have Annual Farewell in Usual Style—Cut Down Program One-Half

### SHORT SIGNUP CAMPAIGN BEGUN

In spite of the very unsettled conditions prevalent at the present time, the Senior Class Day Committee is meeting regularly and plans are being made to carry out the festivities as in previous years. The success of the whole week depends, however, entirely on the spirit in which the Senior Class as a whole enters into cooperation with the committee. Each member of the class will be personally consulted within a few days in regard to preliminary sign-ups which will give the committee some definite knowledge as to the number of men who intend to remain at the Institute until the close of the school year. With this knowledge at hand, definite plans can then be made which, it is probable, will mature into a week of festivity which will be a credit to the Class of 1917.

At present the main issue to be decided is in regard to the magnitude of the preparations. This will vary according to the number of signups and it is probable that the men of the Senior Class will realize the importance of attending to this duty as soon as possible so that the committee can have something definite upon which to act. No signups will be taken after May 12 and anyone not having a receipt by that time will not be allowed to be in any of the graduating exercises. By action of the Class Day Committee all Seniors are eligible to participate in Senior Week whether they have paid their class dues up to date or not, if they sign up and pay their assessment before the time limit. In order to maintain the usual Class Day standard, it is essential that the committee receive the active cooperation of every Senior, and, whether he expects to be here or not, he should do his part by a contribution of five dollars. The fee has been made one-half of the intended assessment in order to secure a large number of signups.

A tentative program for Senior Week is as follows: Saturday afternoon, June 9, Tea Dance (optional); Sunday afternoon, June 10, Baccalaureate Sermon; Monday morning, June 11, Inspection of Buildings; Monday night, Class Dinner; Tuesday afternoon, June 12, Class Day and Graduation Exercises combined; Tuesday night, Alumni Night.

### FRESHMAN RACQUETS DOWN HUNTINGTON ON COURTS

The 1920 tennis team opened its season with a 4 to 2 victory over Huntington School at the Boston Y. M. C. A. Courts Wednesday afternoon. The Huntington players were plainly out-classed, losing to the Institute men in straight sets.

Summary:  
Singles: Stanwood, 1920, defeated Russell, Huntington, 6-1, 6-1; Barron, 1920, defeated Preston, Huntington, 6-2, 6-0; Merryweather, 1920, defeated Warns, Huntington, 6-1, 6-0.

Doubles: Barron and Wurzelbacher, 1920, defeated Preston and Russell, Huntington, 6-0, 6-2.

THERE WILL BE AN IMPORTANT NEWS MEETING IN THE TECH OFFICE AT 1.05 O'CLOCK TODAY.

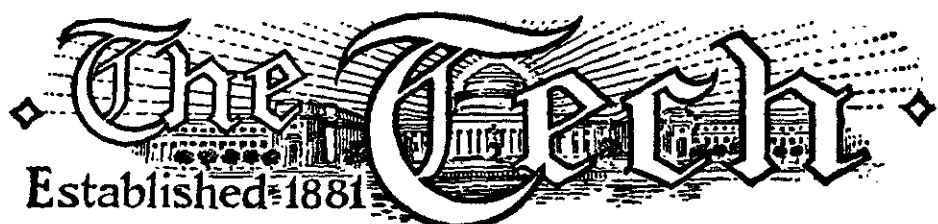

### CALENDAR

Friday, May 4, 1917

1.15 P. M.—Pi Delta Epsilon Meeting—Room 4-109.  
3.00 P. M.—Freshman-Junior Baseball Game, Ford Field.  
6.00 P. M.—C. E. Society Banquet, Engineers' Club.

Saturday, May 5, 1917

2.30 P. M.—Holy Cross-Technology Tennis Match, Longwood Courts, Chestnut Hill.  
5.00 P. M.—Class Nomination Papers Due in Caf.

Entered as second-class matter, September 16, 1911, at the postoffice at Boston, Mass., under the act of Congress of March 3, 1879.

Published tri-weekly during the college year by students of the Massachusetts Institute of Technology.

The Editor-in-Chief is always responsible for the opinions expressed in the editorial columns, and the Managing Editor for the matter which appears in the news columns.

FRIDAY, MAY 4, 1917

#### AUTHORITATIVE DATA ON SERVICE

THE bulletins now being issued from day to day by the Joint Committee, representing the most authentic information and the soundest advice available at the Institute, should receive the first attention of all undergraduates who have given serious thought to the war emergency. The difference between information contained in these bulletins and that distributed gratis in casual conversation is the distinction between pertinent and trustworthy facts and vague rumor. The signature of President Maclaurin as chairman of the Joint Committee, to their utterances, gives them authority justified by the extreme care with which they are drawn up. For an undergraduate to neglect the Committee bulletins issued for his benefit, or to take other courses than those outlined there without special reasons, would be the sheerest folly. A careful perusal of the Joint Committee Bulletin No. 4, published in our last issue, is recommended for the list of military and professional openings through which the undergraduate can most efficiently serve the nation.

#### CLASS DAY

CLASS DAY this year will require support from every Senior who completes his term at the Institute. Tradition has made it an essential function of Technology life as well as that of other colleges, and the disorganization caused by war should not be extended to the point of dropping Class Day activities. The program has been curtailed, due to war conditions; but it is the duty of Seniors, insofar as possible, to subscribe, attend and make Class Day the representative and momentous affair which Technology will always consider it.

#### THREE WEEKS TO EXAMINATIONS

THERE seems to be a prevalent notion, and a wrong one, about the Institute, to the effect that due to the war crisis, the final exams, only three weeks away, are to be of the kindergarden variety. Yet no Professor has signified his intention of countenancing such an innovation. This is much like the other notion that all one has to do to pass this year, is to join the army at once to be provided with special concessions for those who fail to pass their courses regularly. Despite the present condition of affairs, it is highly probable that the exams will be as hard as ever, if not even more difficult. It is, therefore, the duty of The Tech to remind its readers, and especially those guilty of neglect of work, to make their final spurt and effort for the exams now. The prepared student need not worry or cram, but it is hoped that the delinquents will take this warning by starting their reviewing now—immediately—as the time for making up is waning fast.

With the failure of the British to stifle the reports of U-boat activities, the gravity of the submarine peril is being realized by all Americans. It is gratifying to hear that some of our own Institute men are working on devices to combat the deadly undersea craft.

## The Nettleton Shoe For Men

A Shoe of Supreme Excellence

FRANKLIN P. WINSTON CO.

14 MILK STREET

BOSTON, MASS.

#### A. T. O. SURE OF PENNANT IN COMMONWEALTH LEAGUE

Two games were played in the Interfraternity Baseball League yesterday morning, one between the Alpha Tau Omega and Phi Gamma Delta teams which was won by the former 17 to 7, the other between Phi Kappa Sigma and Lambda Chi Alpha in which the Phi Kappa Sigma team won by a score of 15 to 8.

By winning yesterday's game the A. T. O. team cinched the title in the Commonwealth League, having previously defeated Kappa Sigma 3 to 1, and Lambda Phi 5 to 4. In the other leagues there are still some games to be played which have been postponed on account of the unfavorable weather and the inability of some of the men to play on account of the Army examinations they were taking. These games will probably be played off next week and the championship games should take place on the following week. In these games A. T. O., winner in the Commonwealth League, will play the winner of the Beacon League, which looks at present to be S. A. E. The winner of the Suburban League, which from present indications will be Beta Theta Pi or Phi Kappa Sigma, will play the winner of the Cambridge League, in which D. K. E. and Delta Tau Delta are fighting for supremacy. The winners from these games will then play each other for Interfraternity League Championship and the cup which goes to the winner.

#### CATHOLIC CLUB TO HOLD BANQUET TUESDAY EVENING

The Catholic Club will hold a banquet next Tuesday evening in the Rose Garden of the Riverbank Court Hotel. As this banquet will be the last meeting of the club this year, elections for next year's officers will be held and plans for next year's organization will be discussed. Tickets may be obtained from any of the following officers: A. R. Brooks '17, A. F. de Zubiria S. '18, and G. E. McLaughlin '18. No tickets will be sold after tomorrow on account of the guarantee that must be made to the hotel.

#### AERO LECTURES SUSPENDED

The lectures in Aeronautics that have been given on Monday and Thursday afternoons will be suspended for three or four weeks on account of the fact that Mr. Klemin has to be away.

#### FRESHMAN CLASS MEETING CALLED FOR NEXT TUESDAY

Next Tuesday the freshman class will meet as a whole at 3.00 o'clock in Room 10-250. The meeting will be called in order that information concerning the new system of spring elections may be given out. Other matters of interest and importance to the class will be advanced and explained at this time.

L. C. Prior, Managing Director

**"MEN JUST OUT OF COLLEGE LACK POWER OF DECISION," SAYS EMPLOYMENT EXPERT**

**N. H. Daniels '96 Tells E. E. Society That Personality, Congeniality, and Willingness to Work Are Roads to Success**

Mr. N. H. Daniels '96 spoke yesterday afternoon to the Electrical Engineering Society at their last meeting of the year. Mr. Daniels' subject was "Jobs, How and Where to Get Them and What to Do with Them After You Get Them." In view of the fact that he is in charge of the employment department of the Stone and Webster Engineering Corporation, his remarks were particularly valuable to Technology men about to enter the commercial field of science. Mr. Daniels said in part:

**Men Graduating Lack Decision**

"The most striking thing in connection with hiring young men just out of college is their lack of decision. They give no hints as to their adaptabilities or preferences, they simply ask, 'Where can I fit in?' My advice to all young men, whether from the Institute or not, is to hunt for a job just as a salesman who has certain goods to sell hunts for a market. Apply to the people who want the services that you are capable of rendering. Find out what you are able to do best and then try to get in that field. Young men should look into the future when accepting a position. In certain lines of work the purely scientific field is soon exhausted and unless the man is able to advance into the administrative branch of the business, he has to look for another job and begin all over again.

**"Personality Spells Success"**

"In regard to holding a job after you have it, I should say that the personal characteristics of the individual alone spells his success or failure. One noticeable failing of graduates is their dependence on other people to point out the important points of a subject. The colleges should make the men rely more upon their own responsibilities. When a man has a subject to investigate, he should know just where to go to get his information without having to ask someone 'how and where.' The doctrine of learning by making mistakes is a very good one, but requires certain qualifications. In other words, it depends on the kind of mistakes.

"A mistake in figuring out original problems and a mistake in routine work are very different. The problem

of a civil engineer in laying out a railroad is subject to many conditions that cannot be anticipated so that a mistake in his case is permissible. On routine work, however, no solution is considered satisfactory unless it is 100 per cent correct. The idea that 70 per cent will draw a P should be discarded pretty quickly by the man just out of school.

**Congeniality Essential**

"The ability to get along with other people is becoming more and more an essential factor in the success of any man. Among the seven thousand men with whom I have had to deal, there have been a surprising number of young men with unusual capabilities who have failed because of inherent personal characteristics which prove distasteful and unpleasant to people with whom he comes in contact. Such things as discourtesy and over-self-assurance will inevitably handicap a man more than his technical qualifications.

**Learn to Write and Talk Well!**

"My last point which I find of importance to men young or old is the power to express their thoughts in good English. Careful scientific investigations may entirely lose their value if they are interpreted in a poorly written report, poorly expressed and poorly arranged. Every man should cultivate letter writing and at the same time handwriting. In large cities where stenographers are available handwriting is not of so much importance, but when a man is sent out on a job he must often write up reports which have to be handled in manuscript form."

**Don't Watch the Pay Roll**

Mr. Daniels then concluded with this remark:

"Get in the habit of doing your bit with all your faculties alive and don't keep thinking about whether you are advancing as rapidly as you think you should or about the possibility of an increase in wages."

R. B. Gay '17, president of the society during the past year, extended his thanks to the members of the society for their cooperation and wished success to the incoming officers and the society next year.

**—WHEN YOU GO OUT IN THE WORLD**

and equip your first laboratory perhaps you will have doubts as to what is the best apparatus to install for your particular requirements. Our experience as specialists on laboratory apparatus for sixty odd years is at your disposal. We enjoy such co-operation—invariably it leads to firm business friendship. There must be a reason.

**MARMON 34**

The Spare Seats of the 7-Passenger

Distinction in body-design and luxurious comfort are the points on which the new Marmon 34 scores with most people

Yet there is another feature that particularly appeals to men, once they try it—the perfect ease with which this remarkable car can be driven.

The Marmon mechanism for shifting the gears, disengaging the clutch, applying the brakes, and even for steering, has been so refined that the new Marmon is the most sensitive to control of any car ever built.

This is a luxury car of

136-inch wheelbase, 7-passenger capacity and 74 (brake test) horsepower.

Yet it weighs 1100 lbs. less than any other car of equal size and power, handles easier than many small cars and holds the road better than the heaviest car on the market.

Do you think that impossible in a large motor car? Ask any of our dealers to demonstrate that the new Marmon 34 opens up new possibilities in motoring.

NEW YORK BOSTON CHICAGO

**VENUS 10¢ PENCIL**

No matter what course you're taking you need this famous pencil!

BECAUSE of the superlative quality of material and workmanship, VENUS is the finest pencil it is possible to make.

If you like a thick soft lead that marks so that you can read the writing half-way across the room, choose the soft degrees 6B-5B-4B.

For short-hand notes or easy writing 3B-2B-B (medium soft) are popular.

For sketching, general writing purposes, etc., HB-F-H-2H (medium) will prove desirable.

For drafting, a medium hard pencil gives the best results and you'll like 3H-4H-5H-6H.

For very thin, narrow lines for extremely accurate graphical charts, maps, details, etc. 7H-8H-9H are available.

Look for the distinctive water mark finish on each of the 17 black degrees and hard and medium copying.

Your professors will confirm these statements as to the merits of VENUS pencils.

For sale at the college book store.

**AERO CLUB TO VISIT  
WATERTOWN ARSENAL**

Authorities Will Allow 12 Citizens to  
Go Through at a Time

Twelve at a time the members of  
the Aero Club will visit the United  
States Arsenal at Watertown next  
week. The Lieutenant Colonel in com-  
mand has stipulated, however, that  
only citizens of the United States  
shall go through. C. H. Tavener '19,  
president of the club, is working on a  
statement guaranteeing the citizenship  
of all those inspecting the plant.

Heavy ordnance, large shells and  
ammunition are the chief manufactures  
of the Arsenal at Watertown, which  
has been working at full capacity turn-  
ing out guns for coast defense and the  
arming of United States merchant  
ships. Since the declaration of war,  
anti-aircraft guns are also being man-  
ufactured.

Signup sheets will be posted next  
week for those desiring to take the  
trip. A party will comprise twelve  
men, each party making the tour on a  
different day.

**RECORD SQUAD OF NINETEEN  
OFF TO SHOOT TOMORROW**

The largest squad of riflemen will go  
to the Walnut Hill Range tomorrow,  
when nineteen men will board the train  
at the North Station. Guns and ammu-  
nition will be issued at the club office  
in the basement of Building 1 between  
12.00 and 1.00 o'clock tomorrow. Those  
taking the trip will meet at the gate  
to track 19, North Station, at 1.55.

**PI DELTA EPSILON MEETING**

Members of Pi Delta Epsilon will  
hold a short business session at 1.15  
o'clock today in Room 4-109. As sev-  
eral Seniors are to withdraw from the  
Institute in the near future, it is ex-  
pedient that affairs be adjudged ac-  
cordingly.

**BANKING AND SAFE DEPOSIT**

The nearest Cambridge bank to the  
Institute is the Central Trust Company.  
Its main office is at No. 599 Massachu-  
setts Avenue, exactly at the easterly  
entrances and exits of the Central  
Square Station of the Cambridge sub-  
way.

The Central Trust Company is not  
only the oldest bank in Cambridge—the  
business having been established in  
1826—but it also is the largest subur-  
ban trust company in Massachusetts.  
This institution has built up its busi-  
ness and increased its clientele by the  
high character of the service it renders  
to the public.

On checking accounts two per cent.  
interest is allowed. This bank has al-  
ways paid four per cent. on savings  
accounts and interest begins on the first  
day of each month. There is no limit  
to the amount which may be deposited  
in the savings department. The safe  
deposit vault is on the ground floor and  
the rates are one-half the Boston ren-  
als. This company also has a large fore-  
ign exchange business. The members  
of the Technology faculty who are stor-  
ing valuable books and manuscripts  
can have their books and papers much  
more accessible by having them in the  
Central Trust Company vaults. The  
company calls for and delivers storage  
without charge.

The business hours of the Central  
Trust Company are very convenient and  
will meet the requirements of both the  
members of the faculty and the stu-  
dents of the Institute. The bank's doors  
are open every day, except Saturday,  
from eight A. M. to four P. M., and on  
Saturdays the hours are from eight A.  
M. to one P. M. and from six to eight  
in the evening. Saturday evening all  
departments are open and all lines of  
the company's business are transacted.

Banking business may be transacted  
by mail, as this company has facilities  
for expediting and safe-guarding any  
business transacted through the mails.  
Deposits in the Central Trust Company  
may be made at any United States mail  
box.

The professors and students of the  
Institute will find that the Central  
Trust Company is mindful of their  
special needs and that it offers them a  
banking service that is not only highly  
efficient, but that is also cordial and  
neighborly.—Adv.
