Bowling Association Abandons Schedule

Races With Exeter, Middlesex, Tufis and Harvard Canceled so Men Can Be in Engineer Corps

End Season with Class Races

The Technology Bowling Association yesterday announced that all of its matches in the season and some spring schedule officially ending with the last game of the month will be called off. The announcement was made at the request of the Junior War Committee.

The technicians are now able to get more of their work in and the society must therefore cancel its scheduled matches. Many of the members have already been accepted by other schools for the March and April matches. The matches will be held at the Walker Club.

New Course for Airmen

Aero Club Members Who Want to Be Birdmen Eligible

Airplane School for layer of those in the Junior class is being planned. The school is to meet every week and will cover the elementary course of the Navy's basic training. The course will be held on the new airfield being built on the tennis courts.

Preparedness Committee Report

Preparedness Committee Report By Mr. Cabot. Yesterday the Preparedness Committee met to discuss the report of Mr. Cabot, chairman of the Preparedness Committee, which was read at the last meeting of the committee.

The committee has been considering the report of Mr. Cabot and has come to the conclusion that the General Staff should be given more power to carry out the policies of the committee. The committee also recommends that the Preparedness Mass meet next week.

Follow-up Speech

N. C. T. tonight will be held in the Tech Gym with Mr. Cabot as the speaker. The meeting will be held at 8:30 p.m. and will be open to all students.

Preparedness Mass

Preparedness Mass, to be held on April 16, will be held in the Tech Gym with Mr. Cabot as the speaker. The meeting will be held at 8:30 p.m. and will be open to all students.
Dear Sir:

To the Editor of The Tech.

I am, like many others, a believer in patriotism and in no way do I mean to mislead by a show of sentiment which savors of bombast or insincerity. Although communications may be published unsigned if so requested, the name of the writer must in every case be submitted to the editor. The Tech assumes no responsibility for the opinions expressed in the columns of The Tech to appeal to the sentiment of the majority.

Sincerely yours,

John W. Damon '18

Editorial columns, and the Managing Editor for the matter which appears in the columns has been permitted to use the columns. The writer may at any time, however, have the letter not submitted for the opinion expressed. The Editor-in-Chief is always responsible for the opinions expressed in the editorial columns, and the Managing Editor for the matter which appears in the new columns. Although communications may be published unsigned if so requested, the name of the writer must in every case be submitted to the editor. The Tech assumes no responsibility for the opinions expressed in the columns of The Tech to appeal to the sentiment of the majority.

The completeness with which the Dormitory students are given charged of their conduct may be expected to result now and then in doing out of the ordinary, which under a severer discipline would not be allowed. Students government here will not stand or fall without fail observe the military courtesy which their uniform absolutely requires. The dormitory students are temporarily thrown off, it is up to the Dormitory men to show the proper respect for the flag. Disrespect of our buildings and a great many of the Junior Prom have resulted from the expression of sentiment which savors of bombast or insincerity. Although communications may be published unsigned if so requested, the name of the writer must in every case be submitted to the editor. The Tech assumes no responsibility for the opinions expressed in the columns of The Tech to appeal to the sentiment of the majority.

POOR ECONOMY NOT TO GROUND ELECTRIC WIRES

W. H. Blood '88 Says There Are Countless Cases of Electrocution Every Year From Faulty Protection

Mr. W. H. Blood '88, of the Stone and Webster Engineering Corporation, Boston, spoke before the American Lead Pencil Company Engineering Society last Wednesday evening on the subject of ground faults. Mr. Blood has long been identified with the manufacturing of ground wires and has introduced into the United States the principle of applying ground wires to the energized conductors. This principle is now being used on the electric railways in Europe, and its advantages have been undoubtedly demonstrated.

As a result of these investigations, a number of important conclusions have been drawn, the most important of which is that grounding systems are of the utmost importance in the protection of life and property.

Mr. Blood said that in our society there is a prejudice against our society, for he believed that the way to deal with it is systematically. The way to deal with it is systematically.

He added that the principle of applying ground wires to the energized conductors is the most important of all the conclusions drawn.

The result of these investigations has been a new system of grounding which is now being used on the electric railways in Europe. The system has been found to be of great advantage in the protection of life and property.

In conclusion, Mr. Blood urged the adoption of the new system of grounding, which he believes will be of great benefit to all communities using electric railways.

Therefore, it is concluded that the principle of applying ground wires to the energized conductors is the most important of all the conclusions drawn.
