New Walker Memorial Which Is Housing 250 Naval Fliers

TRAIN FIERS AT FT. WORTH

Transplant Royal Flying Corps From Their From Canada

Godfrey L. Cabot '81, president of the Aero Club of New England and a vice-president of the Aero Club of America, has for the past 24 months been engaged in training the Royal Flying Corps of the British Army in a flying school at Haslemere, England. The school is now being prepared for the opening of the Royal Flying Corps at the Canadian Flying School, a flying field near Haslemere, England.

The Signal Corps has made arrangements to establish a flying school at Fort Worth, Tex., where English instructors will train the officers preparing American flyers for service in the United States.

American students are already at the Royal Flying Corps school, and the equipment will be transferred to the Fort Worth school, a move for which Cabot has not yet been approved. It is expected that by that date a sufficient portion of the barracks, messengers, and rooms, folders, etc., will be completed to provide for the opening of the school.

Four Squadrons Under Training

Four squadrons—400 men—will probably under present conditions be housed for the time being in the same building. A large number of men are expected to arrive within a few weeks.

English and American instructors are recruited from the Royal Flying Corps and the Naval Flying Corps, respectively.

The training of students to fly in the United States is acknowledged to be a better system than in the United States, and is dependent upon the training for actual flying instruction in the United States.

The Fort Worth school will follow the practice pursued at other American schools of having flying fields within flying distance of each other, and the duration of training for each man will be two months. The French model has been studied.

American Fliers to be Recruited

American students will be recruited largely from among young men of college education, with the addition of some with previous experience in aviation.

The first quota of men, no closer than 100 miles, was found, possible to give the examination. What is Happening in Europe—First Camp Cunningham Quota Dismissed Tonight After Eight Weeks of Training—Company B Home the Fourteenth

To Aid First Detachments of Troops

AMERICAN RED CROSS FORMING CANTINE SERVICE FOR U. S. ARMY

WASHINGTON, Sept. 3.-The Red Cross is preparing for the first detachment of the First detachment of the National Guard, which will be sent to the Front by the end of the month. The first detachment of the National Guard will be composed of volunteers from all parts of the country. The Red Cross will provide all necessary equipment, including uniforms, sleeping bags, and food supplies. The detachment will be commanded by Col. John G. Dix, the head of the Red Cross in the United States.

The Red Cross is also forming a canteen service for the troops. The canteen will be located in a large building near the front lines and will be staffed by volunteers. The canteen will provide meals, coffee, and cigarettes to the troops.

NAVY

WASHINGTON, Sept. 3.-The Navy Department has announced the formation of a canteen service for the troops. The canteen will be located in a large building near the front lines and will be staffed by volunteers. The canteen will provide meals, coffee, and cigarettes to the troops.

The Navy is also forming a canteen service for the troops. The canteen will be located in a large building near the front lines and will be staffed by volunteers. The canteen will provide meals, coffee, and cigarettes to the troops.

U. S. ARMY MAY HAVE MORE OFFICERS' TRAINING CAMPS

WASHINGTON, Sept. 3.-Secretary Baker said today that the army department was considering the formation of a new training camp. The new camp will be located in the state of Washington and will be used for the training of officers.

The army department has been looking for a new training camp for some time. The old training camp at Camp Gordon in Georgia is no longer adequate for the training of officers.

The new training camp will be located on the site of an old army base. The base was abandoned during World War I and has been available for use since then.

The army department will be responsible for the construction of the new camp. The camp will be equipped with all necessary facilities, including dormitories, mess halls, and training facilities.

The new training camp will be used for the training of officers. The officers will be trained in the latest military tactics and will be prepared to fight in World War II.

The cylinders are hard iron steels fitting into an aluminum cylinder casting. The pistons are of Lynite aluminum, increasing flexibility, reducing wear and lessening carbon deposit.

The entire motor is several hundred pounds lighter than the average motor in use today.

In short, the Marmom 34, throughout the whole outboard unit, marks an advance in design that forecasts a new era.

You may prove the difference between the Marmom 34 and other cars in a single demonstration.

DISCREDIT STEEL FOR JAPAN

Secretary Lansing Deplores Formal Commencement of War Between Russia and Japan. WASHINGTON, Sept. 6.—Formal conference with the Japanese mission began today when Secretary Lansing received Viscount Ishii, head of the mission. Neither the Secretary nor the Secretary of State has indicated the feeling of the United States upon the subject of the Japanese question that will be discussed, but it has been clear that it will be left to the Japanese to espouse the cause of their allies and to frame the order in which they will be taken up.

The possibility of Japan taking on her own resources and making a demonstration will be a serious matter at present from all points of view, political or diplomatic. The effect of any such action on the war being laid aside.

The position of the United States will be that such questions as we have at present in the joint war program of the two nations and it has been announced that Japan will conform to this position.

Japan has invited that consistency in bearing and will stand her to place her ships on the same at a much earlier period than the council of Ems and the most embarrassing moment of the action.

ABET WILL HAVE FOOTBALL TEAM ON FIELD THIS FALL

WEST POINT, N. Y., Sept. 4.—The military academy will have a football team on the playground this fall, it was announced today. Authorization has been received from the War Department for the cadets to participate in contests with other colleges, but there will be no game with any service.

The West Pointers will endeavor to arrange a series of games to take place on the athletic field beyond early in the year when orders from the Secretary of War will be received.

Capt. Geoffrey Keyes, West Point, who is in the command, will act as head coach. Some players will include among the stars those now on the Army team. The West Pointers will make an effort to put their best players in the game here from the War Department not as coaches and will employ no outside coaching force. Capt. J. E. McManus has been appointed football representative and Capt. U. B. Storliffe will assume the details of the Army athletic council.

Cades Emerson O. Opfliat to be captamed the army team this season.

NEW YORK BOSTON CHICAGO

The War-Times Tech

TECHNOLOGY itself is giving remarkably effective war service to the Country.

THE ALUMNI in large and rapidly increasing numbers are in government or industrial work essential to war success.

THE UNDERGRADUATES are efficiently fitting themselves for similar patriotic duty.

"THE FRIENDS OF TECHNOLOGY" have organized to render this news service by making THE TECH the organ of ALL TECHNOLOGY for the period of the war.

THE WAR TECH WILL GIVE:

NEWS from the summer camp, from Plattsburg and from all the resources of Technology brought to bear on the need of the moment and should have it promptly.

THEREFORE the undersigned have co-operated to render this service by making THE TECH the organ of ALL TECHNOLOGY for the period of the war.

THE FRIENDS OF TECHNOLOGY—Visitors from the Summer Camp, from Plattsburg and from all other training camps where Institute men may be.

TECHNOLOGY MAN CAN AFFORD NOT TO SUBSCRIBE.

Six months (36 issues) for $1.50; anywhere in the United States. For their own safety and to stand behind the great drive to put all the resources of Technology behind the United States and her Allies, we urge every Institute man to subscribe.
