I have learned of the Institute, several of the large modern power centers, and the latest adjunct to the design of the New Technology Buildings as shown in the "The Institute Journal," of April 11, 1917.

The bronze work is the result of the latest developments. The bronze is a metal of great strength and durability, and is used for architectural and ornamental purposes. The bronze work is designed to fit into the buildings and to form an integral part of the structure. The bronze work is designed to fit into the buildings and to form an integral part of the structure. COMMUNICATION

To the Editor of The Tech:

I beg permission to use the columns of The Tech to reply to a communication in Monday’s issue, re- questing that questions of instructors be addressed to The Tech. I would like to do so and believe it to be wholly compatible with the spirit of The Tech. This writer is a member of the Junior class and has, I believe, a fair right to have the questions I would like to ask answered. I would like to know your thoughts on the following:

- Must be accompanied by postage at the rate of one cent a copy. Issues mailed to year after November 1. Single copies, 5 cents.
- Although communications may be published unsigned if so requested, the name of the writer must in every case be submitted to the editor. The Tech assumes no responsibility for opinions expressed in any communications.

The Editor-in-Chief is always ready to receive opinions expressed in the columns.

Advertising Manager—10:00 to 12:00, Tuesday, Wednesday, and Friday.

Circulation Manager—10:00 to 12:00, Monday, Tuesday, and Thursday.

GETTING TOGETHER FOR JUNIOR WEEK

Just before Junior Week it has been an annual custom to hold a mass meeting of Technology students, for the purpose of discussing the various events of the four-day period. Those like Techs, such as this, which have the force of tradition behind them, have a peculiar something in the nature of an informal explanation to guide ushers to those activities present for the year and all activities benefit by the annual interest at the time when student interest in them should be most spontaneous.

Junior Week is par excellence the time of year when students should be least bound by the eternal chains of study, and must able to meet on common social ground. With semi-terms far to the rear, and a large part of the second term’s work completed, all of Technology have leisure to consider the achievements of those who have labored in activities during the winter. The Tech Show, the Musical Clubs, and the social leaders of the Junior Class reveal, after the Spring celebration, so varied is their appeal. Yearbook and athletic records, the Institute’s flag, even though the remainder may pass disdainfully, still realize something of the fact that they are almost “within the law.”

Distinction in body-design and luxurious comfort are the points on which the new Marmont 34 scores with most people.

Yes there is another feature that particularly appeals to men, once they try the rich feel-of-silks with which this remarkable car can be driven.

The Marmont mechanism for shifting the gears, disengaging the clutch, applying the brakes, and even for steering, has been so refined that the new Marmont is the most sensitive control of any car ever built.

This is a luxury car of NORDYKE & MARMONT COMPANY, Indianapolis.

Technology is very much interested in baseball this Association is quite of the view that baseball is of much more than this season. Several games have already been postponed, and the next game will play at a fast rate as soon as the snow melts. Under this dispensation, the team shall be the centre of sport of the interested league in baseball, hence great credit is being expressed by the various leagues, the Season, the Commonwealth, the Massachusetts, the American and the Eastern Leagues. The latter three are composed of the following clubs: Delta Upsilon, Alpha Delta Omega and Gamma Xi, the Commonwealth League; Alpha Xi Omega, Gamma Sigma and Delta Xi, the Massachusetts League; and Alpha Lambda Delta, Delta Sigma and Gamma Chi, the Eastern League.

Our a la Carte Menu includes the following:

- Table D'Hote Dinner
- Up the Riverbank Court, Hotel Tremont. 4th floor, Room 304.
- Music-Solbists 'Tel. Beach 1313
- Banquets Rooms for Parties 4 to 125
- Baltic Room and Garden of Roses may be engaged for banquets, assemblies.

For information call at the Tremont Theatre, Off. Avery Alley, Back Bay.

Regular Lunch 60 cents - Dinner 75 cents - Specials 50 cents.
