

## DORM COMMITTEES' ELECTIONS ANNOUNCED

Senior Representatives Are Selected as Chairmen of House Committees For Each Section

### SUB-COMMITTEES ALSO ELECTED

The elections in each of the four houses were held Monday night. The Dean and Mr. Ford were present at each one at some time during the course of the evening to outline the work that was to be done. To leave matters entirely to the will of the students, however, they left before the elections took place.

The four House Committee Chairmen are C. M. Beattie (Atkinson), J. E. Longley (Runkle), R. Rimbach (Holman) and H. P. Geisler (Nichols). The sub-committees were also chosen. Representatives from the classes of 1919, 1920 and 1921, in each dormitory, together with their respective Senior member, comprise these smaller groups. No action has yet been taken on the election of the fifth Senior member of the Dormitory Committee or the representative to the Institute Committee. This, along with active work in general, will be taken up in the immediate future.

Other representatives were chosen as follows: N. B. Connors '19, W. M. Whittaker '20; J. H. Bayle '21 (Holman House). D. B. Kimball '19, J. S. Visscher '20, and R. K. Thulman '21, for Runkle House. Those from Nichols include, besides Chairman Geisler '18: J. Merrill '19, B. Casey '20, and C. D. Green '21; and from Atkinson, H. J. Daube '19, R. L. Turner '20, O. L. Barges '21.

With a desire to promote social life within the dormitories, Chairman Longley of Runkle House and the men of his committee are considering the possibility of having a Dormitory Dance at Walker Memorial as soon as it can be arranged. This, and the idea

(Continued on page 3)

## A. I. E. E. TO MEET

Plans For Year Will Be Outlined By Officers

The Student Branch of the A. I. E. E. will hold its first meeting of the year tonight in room 2-190 at 7.30 o'clock. At this time the plans for the year will be outlined and several informal talks will be given. After the meeting refreshments will be served in the old Cafeteria.

The committee in charge of trips hopes to arrange for one to some interesting plant on alternate weeks throughout the year, but the success of this idea will depend upon the support which the men give. It is also planned to have meetings on the other weeks if possible. Last year, it will be remembered, there were several exceptionally good talks offered and the officers anticipate an even more successful season this year. The mid-year trip, which has been an annual feature, to Schenectady and surrounding points, will be described at this meeting and an endeavor made to round up all old members as well as to obtain several new ones. Sophomores, Juniors and Seniors from Courses VI, VIII, XIV and XV are eligible for membership in the Branch.

### INSTITUTE DIRECTORS FOR CO-OP NOMINATED

At a meeting of the stockholders of the Harvard Cooperative Society officers and directors for the coming year were nominated. The three directors nominated to represent the Institute are Major E. T. Cole, from the faculty; Walter Humphreys, from the Institute at large; and R. W. Van Kirk, Jr., '18, from the student body.

## THREE CADET OFFICERS APPOINTED TO COMMAND FRESHMAN REGIMENT

In line with the system adopted by the military authorities of the Institute in selecting cadet officers to command the freshman regiment, three ranking officers have been named and a fourth is now under consideration.

The others will be appointed on the merit of their work during the next six weeks, at the end of which time their names will be announced. The three ranking officers are: Colonel, H. E. Collins '18; Lieutenant Colonel, H. Geissler '18, and Major, H. L. Wirt '18. The name of the other major will be made known as soon as the appointment has been definitely decided upon.

The other officers down to the "non-coms" will be selected from the members of the three upper classes who have had military experience and who show sufficient ability during the first

six weeks to warrant their appointment.

All candidates for these officerships will have the advantage this year of knowing that their efforts will be judged solely upon the basis of merit. To this end, Colonel Collins advises against "cutting" drills, as such practice will seriously affect the candidate's record.

Non-commissioned officers will be appointed from those members of the regiment who have had military experience and who prove themselves capable.

It has been announced that the staff majors will drill with the Advance Battalion. Continuing the policy of subordinating the interests of the individual to those of the Institute, lieutenants will be expected to drill as sergeants or act in whatever capacity they are required.

### FRESHMEN SHOW SPIRIT IN FIELD DAY PREPARATIONS

Large Number of Men Competing for Positions on Teams

The freshmen are showing far more spirit in their preparation for Field Day than is being shown by the Sophomores. The new class has a squad of some twenty-four men now competing for positions on the football team, while but five men of the 1920 class have reported. The freshman tug-of-war has been at work for over a week with a squad of more than thirty men, whereas the second year team has not yet put in its initial appearance. The number of candidates for the relay teams is about the same in each class. Of the 1920 team of last year, Ash, Bradley, Downey and Knight have reported for work, and Ormon and I. H. Wilson are expected within a week. The following Sophomores who did not make the team last fall are showing up well now: Berko, Bossert, Brickett, Chun, Farrer, Matthews and Owens.

The Naval Aviators will hold an elimination meet some time this week in preparation for the dual meet with the M. I. T. team, which will be held next week.

The Hare and Hound run next Saturday will be at Melrose. Those who expect to run will meet at the North Station at 2.00 o'clock.

### ARCHITECTS MEET IN ROGERS TOMORROW EVENING

Elections of officers to fill the vacancies caused by men enlisting will take place at the first meeting of the Architectural Society, to be held at 7.30 o'clock tomorrow, October 5, in Rogers Building. A new vice-president, secretary and one member of the executive council are to be elected, and addresses are to be delivered by Professors Lawrence, Sumner and Codman. Mr. Kenneth Carpenter, a fellow in the American Academy at Rome, who had intended to be present and address the members of the society, will be unable to attend, due to the fact that he has been called to Washington on important business. Freshmen as well as all students of either option, whether members of the society or not, are invited to attend.

### TECH SHOW BOOKS DUE AT 5 O'CLOCK TOMORROW

Undergraduates must turn in all books which have been written for the Tech Show not later than tomorrow. Whether the manuscripts have been completed or not they should be submitted as the general type of show which has been used heretofore is to be employed again this year. The details of the manuscript are not essential at this time but it is of primary importance that the plots be handed in as soon as possible. These plots will be subject to competition, the result of which will be announced at the first Show Snoker to be given some time in November. Show books may be handed to the general manager, C. B. Hutchings '18 after 5.00 o'clock at The Tech office on Massachusetts avenue.

### TECHNIQUE 1919 COMPETITIONS FOR JUNIORS START TODAY

All Juniors desiring to compete for the two positions of Associate Business Managers of Technique 1919 will meet Business Manager Riegel at 1.00 o'clock today in Room 8-205, at which time the details of the competition will be outlined.

Candidates for the position of Assistant Art Editor will see A. L. Muller in 42 Rogers any time this afternoon. Men finding this impossible may communicate with him at B. B. 53559.

## ENGINEER WORK IN ARMY

Fourteen Branches of Service Open For Technical Men

The United States Corps of Engineers is establishing for the National Army several engineering organizations to comprise not only skilled engineers, but also helpers and workers now associated in such occupation as:

Water supply companies, surveying and mapping, pioneer companies, railway instruction, railway operating and railway shops, quarrying, road building, construction (building trades), truck and wagon operating, saw mill, mining, supply and shop work. At present these are being organized and enlistments are invited for units at the various cantonments all over the country.

All applicants are enlisted only as privates; but may advance as corporals and sergeants when found qualified. After the applicants have been accepted at the branch recruiting station, they are then sent to the main office in New Jersey, and thence to Fort Slocum, N. Y., for the medical examination and enlistment. After this, the men are sent to the commanding officer of any of the engineering organizations. A candidate must convince the recruiting office that he is experienced or skilled in some particular branch of such engineering as he may be called upon to do. If drawn for the draft no man can volunteer.

### COMPETITION OF BUSINESS MEN FOR MUSICAL CLUBS TO START

The Musical Clubs will start their annual competition for the business department this week. All members of freshman class are eligible to enter the competition, which will extend for the length of the first term, when two men will be elected to the positions of second assistant managers. Candidates will be entitled to go on all local trips. Those interested should report at the first regular meeting, which is to be held in the Musical Club's office in the Stone & Webster service building on Massachusetts Avenue, tomorrow afternoon, at 5.00 o'clock.

### CANDIDATES FOR ASST. SWIMMING MANAGER MEET

All candidates for first assistant swimming manager will meet Manager Sheeline in room 2-290 at 5.00 P. M., Tuesday, October 9. This competition is not open to freshmen.

## MAJOR COLE EXPLAINS PLANS FOR PROPOSED ADVANCED BATTALION

New Military Unit to Get More Technical Training Than Old Engineering Corps—Calisthenics Also to be Given

### MEN REQUIRED TO WEAR SUITS DURING DAY

At a joint meeting of the Junior and Senior classes held last Tuesday, Major Cole discussed fully the military activities of the Institute, especially in regard to the Voluntary Battalion which is to be formed.

He stated that since the early part of August there has been very little advance in the plans for the formation of a battalion at the Institute.

The R. O. T. C. is not possible under the present arrangement of things; however, if the necessary changes are instituted, such a department may be established some time in the future. Many wrong impressions have been given in regard to the R. O. T. C. unintentionally. Its establishment was not brought about with the purpose in view of actual use in the present war, but merely as a measure whereby the national reserve may call upon such individuals as have completed the course of instruction connected with that department, when time requires it, to act as officers in the national army. The R. O. T. C. does not offer commissions to the men, but only makes them eligible for appointments after attendance at two camps.

The ordnance department has established the rule that it will not accept men for active work unless 27 years of age. The reason for this is that those in charge may be assured that the men have had some experience. This is probably fair for the country at large, but does not do the men at Technology or similar institutions justice. A man might have the necessary knowledge and experience, yet when he is called, his age would prevent him from receiving a high office in spite of his superior knowledge. While men from Technology are now being favored in that respect, the military department proposes that all the men make good from the start. The training which will be offered will prepare men to act as corporals, sergeants, lieutenants or even as captains, and it ought not be difficult for Institute men to become good officers in a few months.

A part of the training will consist of calisthenics, the result of which has been so favorably shown on the naval men here at the Institute. To become a good soldier, it is necessary to be mentally and physically alert, a state which cannot be attained by following out the old methods of drill. Time is a necessary factor for this purpose, as is readily seen when one takes into consideration the fact that it takes six months' work of eight hours a day for the government to give its men their training.

As much work as possible will be given out of doors on the athletic field, and for this purpose an overcoat has been included in the required uniform. In this way, more fresh air drill will be possible than heretofore. More engineering work will be given than was previously to be had in the old Engineer Corps. There will be some training in signalling, a certain amount of machine gun practice, and as much technical work as time and opportunity permits.

Major Cole advised the men not to bother with the R. O. T. C., as this work applies more to the lower classes. Plans have been made so that there will be three hours of work per week. It is very necessary that all the men who are going to join the battalion and those interested in it fill out a tabular view card at once, indicating the hours and names of subjects and also noting the free periods. The Faculty will arrange the three hour schedule as soon as a sufficient number of these registration cards are handed in. This card, however, involves no obligation on the part of the student. It is entirely optional.

(Continued on page 4)

## TENNIS PROSPECTS GOOD

Only One Man Lost From 'Varsity—1920 Team Intact

The chances for a successful tennis team are considered brighter this year than ever before. Last year's team lost only one match out of five played, and the management expects to duplicate if not better last season's record. Three of the veterans are back at the Institute this year, Capt. Swain being the only man lost, and the 1920 team is intact. Beside the new men of 1921, the ineligible of last year will be available.

The number of entries in the fall tournament show a slight increase over last year, and due to the fine showing of freshmen the lack of Senior competitors will not be so deeply felt. The freshman team, soon to be organized, will play a complete schedule of its own.

The selections for the fall tennis tournament have been made and are posted on the bulletin board in building 10. All first round matches must be played before next Monday, weather permitting. The slight inconvenience which may be caused by this ruling must be put up with if the tournament is to be finished this fall. The players are urged to aid the management by playing their matches as soon as possible. They should look up their opponents and arrange the time and place of their match at once. Results should be posted immediately. Notices concerning the tournament will be posted on the official bulletin board.

### MINING SOCIETY TO MEET NEXT TUESDAY

There will be a meeting of the Mining Society in room 8-419 on Tuesday, October 9, at 5.00 p. m. At this time the election of officers for the term of 1917-18 will be held.

### THERE WILL BE AN IMPORTANT MEETING FOR NEWS MEN IN THE TECH OFFICE AT 1.00 O'CLOCK TOMORROW.

#### CALENDAR

##### Thursday, October 4, 1917

- 1.00 P. M.—Meeting of Candidates for Associate Business Managerships of Technique 1919. Room 8-205.
- 4.00 P. M.—Freshman Crew Practice. B. A. A. Boat House.
- 7.30 P. M.—Meeting of the Student Branch of A. I. E. E. Room 2-190.

##### Friday, October 5, 1917

- 1.00 P. M.—Meeting of Candidates for Freshman Tennis Manager. Room 2-180.
- 5.00 P. M.—Meeting of Candidates for Second Assistant Business Manager. Musical Club Office.
- 5.00 P. M.—Tech Show Books Due. The Tech Office.

## A WORD TO THE WISE.

THE traditional failure of Sophomore classes to begin their preparation for Field Day as promptly as the freshmen is almost a law in Institute history, and the Class of 1920 is showing no disposition thus far to violate the tradition. It may be that they are satisfied with having won one Field Day and are regarding the coming struggle with a more or less apathetic eye, counting on their superior age, experience, and wisdom to pull them through with a creditable showing. They should, however, profit by considering the causes which led to their last year's victory, when they themselves were newcomers and sent their men out for the teams full of fight and confidence.

The fact that they got the jump on their heavier rivals in the matter of practice had much to do with their ultimate success. No class can win its second Field Day by hoping to overawe the younger men with stories of its past prowess. It takes hard and patient work, and it behooves the Sophomores to begin now if they intend to furnish the rest of the Institute with a contest which will be worth watching. The freshmen possess the advantage of having a much larger number to pick from, and, judging from their antics of last Saturday, are not overburdened with respectful timidity. Turn out, Sophomores, and show the stuff of which you are made!

## A SACRED DUTY

By Max Seltzer '18

THE numerous peace feelers and suggestions which have been recently emanating from Germany should be no cause for decrease in vigor of preparation for a long war. There is no doubt that Germany wants peace—a German peace. The only way to obtain a lasting peace, however, is to continue the war until the Central Powers are freed from the yoke of autocracy—and any lethargy on the part of the Allies induced by the vision of an early peace will mean more quick, sharp attacks by the Germans and more trenches to be fought for again by our soldiers. Our Nation's authorities are preparing for a war of at least three years' duration. It is absolutely imperative that such preparation be continued with increased ardor, energy and activity.

To aid in furthering this preparation Technology students should not forget that educated men—and especially scientific men and engineers—are very much in demand and can be of the greatest service to the government. England let her undergraduate body go to the front at the beginning of the war, but later felt the need of educated, trained men behind the lines, and sent her students back to finish their courses. It is to be hoped that the United States does not repeat England's initial mistake. Incidentally it may be pointed out that Germany, according to latest accounts, has not yet called her University men. It is highly gratifying, in this light, to see that so large a percentage of the student body has taken the advice given last year by the Joint Committee on National Service, to be calm, to be intelligently patriotic, and to finish the course at the Institute.

There is just one more sentiment to be added to this splendid advice. In normal times Technology is noted as a place for serious study. The student takes his lessons in this attitude that he may become a good engineer. Our nation has agreed on a program to continue this war with increased activity and enthusiasm. Our part is to become trained men and engineers for our country. What a fine, stimulating, inspiration it is for us to study more faithfully and seriously to become better engineers,—not alone for personal advancement—but that we may better serve our country.

The Tech announces with exceeding regret the loss of its Managing Editor, Donald D. Way '19, who is now on his way to Toronto to become a member of the Royal British Flying Corps. His position on the paper will be filled by W. Raymond McKenney '19, who has been Assistant Managing Editor for the past year.

## THIRD SERIES OF OFFICERS' TRAINING CAMPS TO OPEN

Students From 93 Specified Colleges Will Be Admitted

WASHINGTON, Oct. 3—A third series of officers' training camps, to be opened Jan. 5, will run until April 5. The War Department announced today, primarily for the education of the Regular Army, National Guard and National Army for commissions.

In addition, however, 2490 graduates or undergraduates from 93 specified schools and colleges will be admitted.

A camp will be located in each of the Regular Army, National Guard and National Army divisions. Additional camps will be located in the Philippines, Panama and Hawaii, and one at Fort Bliss and Fort Sam Houston, Texas, and Chickamauga, Ga.

The quota of each regiment or smaller unit of the army to be selected to attend the officers' schools will be 1.7 of the enlisted strength of the organization. Graduates recommended for commissions as second lieutenants will be commissioned as vacancies occur.

College men to be admitted must be between 21 and 31 on the day of the opening. There is no restriction against married men, but unmarried men are preferred. No graduates of the colleges named who did not take military courses given at the institutions will be eligible.

College students will be required to enlist for the duration of the war and to serve out their enlistments if they do not obtain commissions. They will receive the pay and allowances of first-class privates while under instruction.

The camps are primarily for the training of line officers. The quartermaster general, chief of ordnance, chief of coast artillery, chief signal officer, and chief of engineers have been authorized to organize such schools for special training as may be necessary.

## COXSWAINS WANTED TO TRY OUT FOR FRESHMAN CREW

Crew work has started in earnest, as is shown by the daily practice on the river. About thirty men have reported for the freshman team, and although most of them are inexperienced, the crew has fine possibilities with some good coaching. Members of last year's crew are taking the new men in hand and giving them pointers which will later prove very valuable. As only two men have come out for coxswain, that position is still undecided and there is a good chance for a light-weight man to get this seat. Anyone wishing to try out should report at the B. A. A. Boat House at the Cottage Farm bridge, at 4.00 o'clock any day.

## RECENT Y. M. C. A. BULLETIN DESCRIBES EXTENT OF SERVICE FOR SOLDIERS

An inkling of the great work being done by the Y. M. C. A. in the interest of the American soldier, at home and overseas, is afforded by the bulletin just issued by the National War Council of that organization. At Camp Devens it has eleven buildings and about seventy secretaries for the 43,000 men in that city dedicated to the military art.

Out on the plains of Westfield, tented in the outskirts of Boxford, isolated in the island rocks off Newport, Portland and New London, are hundreds and thousands of soldiers expecting to leave for France at any minute. This advance guard is not quartered among the comforts existing at Ayer, but the Y. M. C. A. is right there on the job trying to dispel the gloom, keep up the morale, and conducting educational work.

Throughout the United States there are 578 separate Association buildings and tents, maintained for the men in the army and navy, under the direction

of 1,775 secretaries. In addition three hundred physical work directors, 127 religious work directors and 57 educational directors have already been appointed and more are in demand.

At present the activities of the National War Work Council in this country are claiming the major output of men and money, but the budget of \$35,000,000 for the next nine months calls for an expenditure of \$850,000 more for the American forces in France than for the troops at home.

The advance representatives of the Red Triangle have been working with General Pershing's men since the arrival of American troops. At the naval bases, too, which are frequented by American ships, they have been busy fighting liquor and gambling interests.

Of the \$35,000,000 budget, over \$3,000,000 will be devoted to the demoralized Russians, and millions more will be spent for the French and Italians armies.

### DORMITORIES COMMITTEES' ELECTIONS ANNOUNCED

(Continued from page 1)  
of having a monthly "Smoker," as well as other plans of interest, are to be brought up by him at the first general meeting of the committee as a whole.

The success of last year's experiment in self-government for the dormitories has given it a place of permanence in the institutions of Technology. Dean Burton is enthusiastic over the outcome of the plan which was suggested by him last year and which was regarded as a doubtful step by other members of the Faculty Committee.

### ART COLLECTION OF ALUMNUS NOW ON EXHIBIT IN ROGERS

Under the supervision of the Department of Architecture, there is now being exhibited in the gallery of the Rogers Building, a collection of the engravings and studies of Mr. Kenneth E. Carpenter '09. This exhibition is to continue until October 20 and will be

open daily from 9.00 A. M. to 6.00 P. M.

Mr. Carpenter was a special student in the Department of Architecture in 1906-07 and also in 1908-10, and in 1912 won the fellowship in architecture at the American Academy in Rome.

### FACULTY NOTICE

There will be no second meeting of the course Contemporary Drama this week. Instead, students will read either a Doll's House or Ghosts by Ibsen before Monday, October 7.

Books in reading room 2-240.

## The Massachusetts Institute of Technology

CAMBRIDGE

RICHARD C. MACLAURIN, M. A., Sc. D., LL.D.

President

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY offers courses, each of four years' duration, leading to the degree of Bachelor of Science, in Civil, Mechanical, Mining, Electrical, Chemical, and Sanitary Engineering; in Architecture, Chemistry, Electro-chemistry, Biology and Public Health, Physics, General Science, Geology and Naval Architecture, and in Engineering Administration.

To be admitted to the first-year class, applicants must have attained the age of seventeen, and must pass satisfactory examinations in Algebra, Plane and Solid Geometry, Physics, English, History, French, and German, and must present teachers' certificates for two of a series of elective subjects. A division of these entrance subjects between June and September or between two successive years is permitted.

Entrance examinations are held at the Institute in June and September of each year. In June, applicants may be examined also by the College Entrance Examination Board in New York, Philadelphia, Chicago, and many other cities in America and Europe. A circular stating times and places is issued in advance, and will be mailed on application.

Graduates of colleges and scientific schools of collegiate grade are admitted, without examination, to such advanced standing as is warranted by their previous training.

Graduate courses leading to the degrees of Master of Science, Doctor of Philosophy, and Doctor of Engineering are also offered. Special Research Laboratories of Physical Chemistry, Applied Chemistry, and Sanitary Science have been established.

Correspondence should be addressed to Prof. A. L. Merrill, Secretary of the Faculty.

### PUBLICATIONS

The Annual Catalog (issued in December), the Report of the President and the Treasurer (issued in January), the Programme (issued in June), and circulars in regard to Admission of Students from other Colleges; Summer Courses; Advanced Study and Research.

Any of the above-named publications will be mailed free upon application

## MARMION 34

### ALL on Oil

Man is a machine—engine, boilers, cylinders and gears, and sometimes wheels and cranks. If you are going to get the best out of him you must rub him the right way, or in mechanical terms, "give him oil."

To an automobile oil is as necessary as air is to man. And as the man gets the air automatically, just so should the automobile get the oil.

That's what happens in a Marmion 34. Every moving part of the motor is automatically lubricated. Oil is fed to the bearings under pressure through a hollow crankshaft.

See that the demonstrator explains this to you fully and understandably. Have him show you how it works, for it is genius made visible.

In a Marmion 34 a perfectly simple device controlled by the throttle-lever automatically increases or decreases the supply of oil.

And not according to the speed of the motor, mind you, but according to the amount of power developed.

Always in sight of the driver, a small gauge reports the pressure behind the oil.

The Marmion 34 oiling system is so ingenious, so thorough, simple and satisfactory that to examine is to incurse.

Look before you buy.

**Hotel Lenox**  
 An hotel which has the atmosphere of a college club.  
 Historic as a stopping place for University Athletic Teams.  
 Unusually attractive to college men—graduates or undergraduates.  
 Popular for its dances in the Rose Garden from 10 P. M. to 1 A. M. Saturdays 9 P. M. to 12 P. M.  
 L. C. Prior, Managing Director

**PENSION FRANCAISE**—House recently occupied by Professor von Munsterberg. Opens August 1. Educated, refined French family offers board, room, laundry to professors, students, and others. Reasonable terms. Excellent table. French spoken exclusively. Write or come, see at once, Mme. Lenior 16 Avon Street, Somerville.

**Personal**  
 Among the callers at the Washington office during the past few days have been Howell Taylor '14; Philip Baker '16; H. S. Cleveland '10, 1st Lt. E. R. C.; Sumner Hazlewood '01, and A. M. Rosenblatt '09, 1st lieutenants E. R. C.; who have been assigned to active duty at Belvoir, Va.; D. H. McMurtrie, who is working with gas defence, under the Sanitary Corps; C. B. Morey '06; 1st Lieutenants R. H. Woods, Jr., '13, and F. B. Williams '13, O. R. C., who are stationed at the Ordnance Base Depot, 920 F Street; 1st Lieutenants Dudley Clapp '10, and Alden Waitt '15, of the Sanitary Corps; and C. M. Baker '11, who is in the purchasing department of the Signal Corps.

W. L. Dennen '17, W. P. Blodgett '09, and H. D. Chandler '08 are reported as being in training at the C. A. C. camp at Fort Monroe.

R. D. Wells '11 is reported as having received his first lieutenant's commission O. R. C.

D. D. Way '19 has enlisted in the Royal Flying Corps, and expects to leave shortly for the Toronto Training Camp.

Lt. Edward Kenway '11 has been assigned as commander of the 64th Aero Squadron.

Chauncey C. Davis, Special '12, is with the Burgess Co. of Marblehead as chief inspector of aeroplanes and materials.

1st Lt. Robert H. Woods, Jr., of the Ordnance Department, U. S. R., was married on September 12 to Miss Evelyn Blake of Charlotte, N. C. He reported on September 14 to the American Base Ordnance Depot in France in Washington, D. C., for active duty.

H. P. Sabin, IV '15, is captain O. R. C. in the infantry from Fort Riley.

William Bement Claffin '92 is captain of the 114th Engineers, Camp Beuregarde, Alexandria, La.

**Provisional Second Lieutenants**  
 All results of the July examination for provisional second lieutenants in the regular army will have been mailed out by October 15. The majority of men who passed have already been notified. The adjutant-general's office states that men who are commissioned will probably be assigned to duty between October 20 and November 1, the exact time depending to a considerable extent on the celerity with which the Senate acts on the recommendations of that office.

**Special Engineer Regiments**  
 The office of the Chief of Engineers states that the officers for the special engineering units enumerated recently in The Tech will be furnished in general from the officers' reserve; and as this reserve now has commissioned many more men than will be needed for some time, the opportunities for civilians to become officers for these special units are rather limited.

Mail at Washington Office  
 Undelivered mail is being held at the Washington office for Laurence D. Chapman and Mrs. Helen F. Dodge, who are requested to forward their present addresses.

Student Mending and Darning. Reasonable Rates. Mrs. G. W. Watson, 166 Huntington Ave., Boston Mass. Suite 1.

**MAJOR COLE OUTLINES PLAN FOR PROPOSED ADVANCE BATTALION**

(Continued from page 1)  
 tional now, but the Faculty has agreed that once the final registration card is made out, the work then becomes compulsory. The only way to get out of the work will be to submit a petition with sufficient causes.

In regard to the uniforms, a contract has just been made. The outfit will cost \$35.75 and will consist of:

Sheepskin lined canvas overcoat (fur collar), \$10.00; coat, \$13.50; breeches, \$8.25; cap and ornaments, \$2.25; canvas leggings, \$1.50; and M. I. T. collar ornaments, 25 cents.

The students are expected to wear the uniform during the day.

Measuring began yesterday, and the students should leave their orders in the Military Department room as promptly as possible. Payment can be made upon delivery, which will be about three weeks after date of measurement. Due to the possibility of cold weather, the overcoats will be delivered immediately. Shoes are not included in the uniform, but any kind of high tan shoes may be worn. The uniforms will be cut along officers' lines.

There will not be any physical examination, and drill will be ordered in a few days. The students should remember that the card to be filled out now is not binding, but merely to give the faculty an idea as to the number that will turn out, so that they can prepare a satisfactory schedule.

**MEASUREMENTS FOR UNIFORMS TO BE TAKEN IMMEDIATELY**

All upperclassmen who have enlisted in the advanced battalion should report as soon as possible to room 3-210 in order to be measured for uniforms. The charge for the entire outfit will be \$35.75.

The uniform measurements for the men in the Freshman Regiment are now being taken in Faculty room 3-210. The freshmen this year will wear the regular United States Army service uniform, consisting of blouse, leggings, garrison cap, and sheep-lined trench coat.

The price of the complete outfit is \$35.75. Extra breeches and blouses can be ordered. Delivery of coats will be made immediately. Uniforms will be ready three weeks from date of measuring.

**COMPETITION FOR TENNIS MANAGER STARTS TOMORROW**

Candidates for the position of freshman tennis manager will meet Manager Kimball tomorrow afternoon at 1.00 o'clock in Room 2-180, at which time the details of the competition will be outlined.

**YALE COACH BARS NON-MILITARY MEN FROM FOOTBALL TEAMS**

Yale's football coach has announced that no physically fit man, unless he has identified himself with some branch of military service, will be permitted to play football this year at the college.

**FOR SALE**

**ANTOXIDE**  
 Gives maximum protection on all exposed metal surfaces  
 It will lengthen the life of all metal which is exposed to rust. Can be used on galvanized iron over a first coat of Harrisons Galvanized Iron Primer.  
 The increasing use of sheet metal out-buildings has created an enormous demand for a good rust-preventing paint.  
 We have used this paint on exposed metal buildings, fire-escapes, pipe-lines, etc., around our own plant, under the trying conditions which prevail around any acid- and paint-manufacturing plant and have been unable to find anything better for our own use.  
 To property owners who are really interested in the problems created by rising costs of up-keep, we will gladly send a beautifully-printed brochure, which gives the practical experience of paper-mill owners, municipalities, etc., with—
