The Aero Club of the Institute has undertaken a series of activities this year under the leadership of Phillip J. S. P. in connection with the establishment of the Student Aeronautical Society. The club aims to foster interest, knowledge, and research in aeronautics, to promote social intercourse among students interested in aviation, and to encourage the establishment of aeronautical societies on the part of others in the various colleges of the University. The Aero Club has a large membership and meets regularly to discuss technical and social topics. The Student Aeronautical Society will be formed by the end of the year, and the Aero Club will be its governing body. The Society aims to foster interest in aviation among the students and to promote co-operation with similar societies at other institutions.

Concerning the Walker Memorial

W hen the Corporation decided, last summer, that the best possible use which could be made of the Walker Memorial building during the period of the war was to turn it over to the Government as a dormitory for the School of Naval Aeronautics, there was a certain degree of dissatisfaction expressed by many Technology students. It seemed to them that they were being deprived of a privilege to which they had been looking forward for a long time and to the enjoyment of which they were, consequently, rightfully entitled. After a little thought, however, most of the objectors realized that any sacrifice which they might thus be made small in comparison with the sacrifices which the intended occupants of the building were preparing to make. The gambling, therefore, was short-lived.

This fall, the student body has been going to the opposite extreme; we seem to evidence evidence of any will to desire to take advantage of the few privilege which remain to them in the building, namely the dining room. It is possible that many of the men do not realize that this service is for them as well as for the aviators or is there some feeling of resentment against these "privileged" still unknown? If the latter is the case, it suggests exceedingly small and selfish attitude on the part of the few students who may entertain such a feeling. The incidents of the summer which caused some friction between the students of the Junior Junior which caused some friction between the students of the Junior-Junior class and the Engineer class, there exists the best of feeling between the various groups.

The incidents of the summer were a certain degree of dissatisfaction expressed by many minority as at present. It may be that the students do not realize this service is for them as well as for the majority, who may entertain such a feeling. The incidents of the summer were a certain degree of dissatisfaction expressed by many minority as at present. It may be that the students do not realize that this service is for them as well as for the majority.

Custom Tailoring

WE EMPLOY NO HIGH PRICED SALESMEN TO SOLICIT YOU

When a man purchases once we rarely lose him as a customer.

Why?

Because we have always been able to give quality by supervising the manufacturing in our own workroom.

Because our prices are low for the kind of suits we build. That is due to low selling expense.

Our Wish

is that you will investigate before ordering your suit or overcoat.

MEMORIAL SOCIETY MEETING
There will be a meeting of the Memorial Society this evening at 7:30 in the Walker Memorial. The purpose of the society is to promote the social and moral welfare of the student body. The society was organized in 1914.

THE TECH Thursday, October 18, 1917

NOTICES

MEETING OF TAX COLLECTORS
At a meeting of the tax collectors held in rooms 109-110, the plans for collecting the tax were discussed. It was decided that only 200 copies of the tax form were to be printed, and that these should be distributed to the various heads of the departments. The form is $2.50 for each man and should be paid immediately. The tax collector will then take charge of these forms. There will be a collection of number of collectors from the various offices to see that the tax is properly carried out. Any person trying to carry this tax can make sure of it.

OREGON ORCHESTRA
There will be a special meeting of the orchestra today at 4:00 o'clock in the "Club." Those of the orchestra present at 4:00 o'clock to be in attendance.

HARRISON'S RUST PREVENTING ANTOXIDE
Gives maximum protection on all exposed metal surfaces. It will lengthen the life of all metal which is exposed to rust. Can be used on galvanized iron over a first coat of Harrison's Galvanized Iron Primer.

The increasing use of sheet metal out-buildings has created an enormous demand for a good rust-proofing product.

We have used this paint on exposed metal buildings, fire-escapes, pipe-lines, etc., around our own plant, under the taxing conditions which prevail around any acid- and paint-manufacturing plant and have been unable to find anything better for your own use.

To property owners who are really interested in the problems created by rusting roofs or cupolas, we will gladly send a beautifully-printed brochure which gives the practical experience of paint and building owners, municipalities, etc., with—
