Three German aviators in a great Cotiac were shot down yesterday in the North Sea. The pilot headed straight down, in a spinning dive. He never recovered control—and he died of fright! One of his observers was shot. The other was picked out of the water—alive!

A. L. E. E. TO HOLD MEETING IN SMITH HALL

Next Tuesday evening at 7:45 o'clock, the A. L. E. E. will hold a national meeting in Smith Hall, when a paper will be read by Mr. William B. Jackson on the subject of "Effects of War Conditions On Cost and Quality of Electric Service." This paper has been prepared by L. B. Good- man and W. R. Jackson after a presentation on the war conditions as affecting the central power station service and operation. The abstract of the paper deals with a varied combination of ways in which the efficiency of modern power plants has been decreased and the expenses increased. The paper does not carry full names of authors, but it is almost certain that they are all those who have not yet filed their taxes and initiation fee due at the Thursday rehearsal and thus leave a clean slate with which to start the next term's work.
