NEARLY FOUR THOUSAND ON M.I.T. T. HONOR ROLL

War Service Auxiliary Organized in Every Town With Every Man Who Enters the Service

AFFILIATED WITH RED CROSS

The War Service Auxiliary of Tech and the Red Cross is a development that Association is caring for the needs of the Service and its men. It has its headquarters at the Institute and in the various towns served by its members. It is run by the students, who are volunteering their time to assist the men. The Red Cross is providing a service for the men in the camps and in the hospitals, and the War Service Auxiliary is working in the same direction. The organization is working in every town in the country, and it is expected that it will be successful in its work.

CROSS-OVER IS FIRST STEP TOwarD REPAIR

Repair Work on Harvard Bridge Has Been Seen

Just a few minutes ago, the repair work on the Harvard Bridge was seen. The bridge is now under construction, and the men are working on it. The work is being done in a very careful manner, and the bridge will be finished as soon as possible.

MONTHLY SCHEDULED TO APPEAR NEXT MONDAY

To Be Devoted Largely To War Subjects

The next issue of the Technology magazine will be published on March 4, and the men are working on it. The magazine will be devoted largely to war subjects, and it will be published every month.

ONE HUNDRED AND SEVEN MEN AT PRESENT ON INSTITUTE'S ROLL TO BE ADMITTED THIS FEBRUARY

The Majority Come From the New England States and Are the Representatives of About Seventy Schools

T he present time, Technology is undertaking the experiment, unique in institutions of its class, of admitting a new group of freshman students in the middle of the school year. These men have been admitted solely on the recommendations of the preparatory schools from which they come and will be allowed to take such examinations as the school offers. The class will thus be able to be an object of the greatest possible interest to the men at Technological, and at high standards of Technology, for it is agreed that the regular Institute courses are in peace times sufficiently intensive for the work that is being done by the men.

In order to overcome the handicap of the loss of a half year's work, the new class will begin work on February 4, and work during the summer with a vacation of two weeks after the spring term and during the summer, so that the class will begin work on February 4, and work during the summer with a vacation of two weeks after the spring term and during the summer, so that the class will be ready to begin work on February 4, and work during the summer with a vacation of two weeks after the spring term and during the summer. The class will be ready to begin work on February 4, and work during the summer with a vacation of two weeks after the spring term and during the summer. The class will be ready to begin work on February 4, and work during the summer with a vacation of two weeks after the spring term and during the summer. The class will be ready to begin work on February 4, and work during the summer with a vacation of two weeks after the spring term and during the summer.

A RECORO OF THE CONTINUOUS NEWS SERVICE FOR 35 YEARS

Price Three Cents

The Technology magazine has been published for 35 years, and it has been a source of news and information for the students, faculty, and alumni of the Institute. The magazine has been a source of news and information for the students, faculty, and alumni of the Institute. The magazine has been a source of news and information for the students, faculty, and alumni of the Institute. The magazine has been a source of news and information for the students, faculty, and alumni of the Institute.
I again appeal to our readers to furnish us with any corrections or hope to publish the corrected list. We must thank Mrs. Cunning-In checked over with the file of the Women's Auxiliary and we soon affiliated. There must be numerous changes of which we are not in-information has been letters sent to list up to date and correct, but it is rather difficult to do so what with

If you measure your judgement every day against what you find in not question and make a decision for yourself is something very few until you are grey haired. The ability to look at both sides of a rate of righteous criticism of those events, it gives you not only a necessary excerpt speaks for itself:

"You cannot afford to miss the influence of your own times. If you keep in touch with events and the righting of those events, it gives you not only a necessary knowledge, but it gives you mentality,—the power to sift the dust from the wheat, or, to put it in one word, it gives you judg-ment. You might just as well have judgment at twenty as at forty until you are gray-haired. The ability to look at both sides of a question and make a decision for yourself is something very few people can do unless they have had some sound knockings, and some can do it even then.

"What I want to impress upon you is that it cramp your mind will a lot of boiled down facts will not develop your mentality. But a lot of the wisest men of the past, and many of the men of your own times we are living in, portentous and cannot remember your right or wrong thinking in a big help or a big hindrance. We don't know yet how the present will affect the future. It is up to every one of us to do our bit mentally as well as physically."

**NEWSPAPERS**

Probably the following extract from a letter to one of the editors from his mother will open the eyes of some of us who are prone to think that writing in a newspaper is the least of the honours.

We do work hard but there is not one of us who can afford to neglect the papers. We do work hard but there is not one of us who can afford to neglect the papers.

**THE SERVICE LIST**

Lately there have been some complaints about the service list which is being run in The Tech. Most of these were that the list was not authentic. We are endeavoring to keep the list up to date and correct, but it is rather difficult to do so with the numerous changes of rank and location. Our principle source of information has been letters sent to us by relatives of the men, the stationed men themselves and by organizations with which we have more, but the list must be a matter of more changes of which we are not in-formed, but we are doing our best to make the list correct. The same seventeen hundred names now in file in our office are being checked over the list of the Women's Auxiliary and we hope soon to publish the corrected list. We must thank Mrs. Cunningham of the Auxiliary for her cooperation with us.

Even this checking cannot clear up all mistakes and we must again appeal to you to will furnish us with any corrections or additional data which may be known of.

With the present shortage of fuel, it would be better if the Institute found another way of disposing of its waste wood boxes than by burning them in the rear of the buildings.

In order to bring before the eyes of Technology Alumni and underclassmen and for the use of engineers in foreign countries. The Tech will devote considerable space in some of its future issues to a series of articles on the subject of Engineering Education. The material for these articles will be taken from reliable sources, and the writers will be chosen from those whose names have been emphasized which are of greatest interest. Busel will be done in the Near future, and China will follow in the course of two or three weeks.

RESUME REGARDING INTENSIVE COURSE IN NAVAL ARCHITECTURE AT INSTITUTE

The intensive course in Naval Archi- at the Boston Navy Yard, one

tecture was given this summer. The

summer months were spent at the

Boston Navy Yard, where the stu-
dents worked closely with the engi-
geners and architects on various pro-

jects.

The course lasted for two

months and covered a wide range of

topics, including ship design, con-

struction, and naval architecture.

The students were given the op-

portunity to work on real-world pro-

jects, gaining hands-on experience

and practical skills.

The course was highly regarded

for its rigorous and comprehensive

curriculum, and many students went

on to successful careers in the field

of naval architecture.

The Boston Navy Yard, one

hour was required for lectures each

day.

On account of the urgent needs of the service, applications will be accepted until further notice. Papers will be read promptly and certification made as the needs of the service require.

U. S. NEEDS TECHNICAL MEN DURING WAR

For further information concerning these positions, communicate with the nearest Secretary of the Civil Service Commission or the R. T. 7, Committee for National Service, 918 Union Trust Building, Washington, D.C.

SUBJECT THE PRESIDENT

From the Boston Post

We very regret to note that the

death of President Wilson. The little

city of narratives engaged in public

life with so much interest. If ever there was a time in the his-

tory of this country when the people

of Washington needed the or-di-

nance of the President, it is now.

It was to be expected that the news

of President Wilson's death should

make a great impression on the peo-

ple of the United States, and those

of the peoples of the world, who

have always been anxious to know

more about his administration and

his policy. It is well to remember

that President Wilson was a great

statesman, and he will be deeply

missed by all who knew him.

NOON MEETING IN INSTITUTE SCHEDULE

Monday, February 16, To Be Held For

Practically the only change that

is to be made in the schedule of the

Friculty of the Institute this year is

the withdrawal of the second form and a shift between Wednes-

day and Thursday of some of the

classes. The holiday train schedule

of February 16 will be made and

will be used instead of the usual

one for February 17.

The holiday train schedule of

February 17 will be used instead of

the usual one for February 16.
