KOMMERS SMOKER TO BE HELD FRIDAY

Coach Duncan of 1917 show to address paraders at smoker.

Everyone Invited

Following the ceremonies of many groups, a very famous smoker will be held at Friday evening, February 9, at 8 p.m., in Roche Music Hall, and this year the event will be held for the first time in the main dining hall of the college.

This smoker, in conjunction with the beginning of actual work on Tech, 1917, will serve as a form of celebration, and the participation of the Institute in the annual smoker.

The program is divided into three parts: the first will consist of a speech by the chief speaker of the evening, who will explain the character of the production and the aims of the smoker. The second part will be devoted to the consideration of the new students, and the third part will be devoted to the participants in the smoker.

The smoker will be held in the Memorial Hall, and the opportunities afforded for the participants will be greater than at any previous smoker.

The smoker will be a means of enlisting the interest of all the new men in the coming season, and the opportunities afforded for the participants will be greater than at any previous smoker.

The publication is sold at the price of $1.00.

TECHNOLOGY TIED BY NAVY IN SWIMMING

Last Saturday afternoon the first swim meet of the season was held at the Memorial High School.

The meet was held in the Memorial High School, and the opportunities afforded for the participants will be greater than at any previous smoker.

The smoker will be a means of enlisting the interest of all the new men in the coming season, and the opportunities afforded for the participants will be greater than at any previous smoker.

The publication is sold at the price of $1.00.

TECHNOLOGY RUNNERS WIN THEIR EVENTS IN B. A. A. GAMES

Red and Gray Wins "Long" and "Short" Relays—Freshmen Also Take Event From Holy Cross Four

NAVAL AVIATORS WIN RELAY

The Navy representatives at the B. A. A. meet made a very creditable showing last Saturday night at the patriotic games held in Mechanic Hall. In the relay against Harvard, the first after the first, had little trouble in keeping a fifteen yard lead to the finish. In the "long" relay the Red and Gray won from Dartmouth. The Dartmouth men won the "short" race by the same distance, and in the well contested race which was spoiled only by an unfortunate "pull" in which the Holy Cross runners were held up.

The publication is sold at the price of $1.00.
The Question Box has been inaugurated for the benefit of all those students who wish to have a chance to express an opinion regarding questions of interest. Among the questions which have already found their way into the box are questions on the thesis of the day, the happening in the social affairs of the college, and the future of the college. The questions are of course anonymous, and each must be mailed to the Editor, The Tech, 152 Purchase Street, Cambridge, Mass., 95, to establish a medium for clearing up misunderstandings and dispelling rumors in the college. The Tech reserves the right to publish any question which it may consider to be of interest to the students.

The Tech. Rowing Association is issuing a call for new members to enter the sport, as often times a new man will prove to be a better sailor than the man who has spent all his time with his fellow. This is made necessary on account of the tremendous amount of work which the engineering profession demands, and it is up to each individual student to make up for himself the lack of general study. The various student activities offer unlimited opportunities for experience in business, journalism, theatrical, and dealing with men, and even the most inexperienced freshmen should compete for a place on one of these activities. In this way, you will gain far more from your time at the Institute than the man who spends all his time with his fellow.

The one great criticism of Technology is that the curriculum does too much to purify technical subjects, and not enough time to those studies which tend to broaden the mind. This is made necessary on account of the tremendous amount of work which the engineering profession demands, and it is up to each individual student to make up for himself the lack of general study. The various student activities offer unlimited opportunities for experience in business, journalism, theatrical, and dealing with men, and even the most inexperienced freshmen should compete for a place on one of these activities. In this way, you will gain far more from your time at the Institute than the man who spends all his time with his fellow.

Another very important consideration is that of physical welfare. The one great criticism of Technology is that the curriculum does too much to purify technical subjects, and not enough time to those studies which tend to broaden the mind. This is made necessary on account of the tremendous amount of work which the engineering profession demands, and it is up to each individual student to make up for himself the lack of general study. The various student activities offer unlimited opportunities for experience in business, journalism, theatrical, and dealing with men, and even the most inexperienced freshmen should compete for a place on one of these activities. In this way, you will gain far more from your time at the Institute than the man who spends all his time with his fellow.

The following telegram was telegraphed from the Washington office of the University of Chicago to the Secretary of the U. S. War Department: "The University of Chicago, through its board of regents, has accepted an invitation from the government to send a detachment of students who desire to go to France as students, to serve in the army as teachers. The boys who desire to go as teachers should come to Chicago on the 1st of April and report to the University of Chicago, whose address is: Chicago, Illinois.

The University of Chicago."
