Monday, April 23
Physical examination.

Tuesday, April 24
Geography. Time 4 hrs.

Wednesday, April 25
Mathematics. Time 4 hrs.

Thursday, April 26
American History. Time 4 hrs.

Friday, April 27

Military examinations

The trip that was scheduled for last week had to be postponed on account of the weather. The men who expected to go on this trip and who had not been informed to those who are partners in crime will George E. McLaughlin '18.

Steve Holt Herbert C. Williamson '17
Walter L. Winant '20
George Washington Stammers, 
Ross Bradford, who is in love with Jane Elliot D. Harrington '18.

Pansy, and last but by no means least a credit to the Institute.

The management and cost of Tech Show are to be congratulated upon an unusually smooth and polished performance of this year's production. Work on Tech Show differs from that in other activities in that the peak of the whole year's collaboration and planning is seen for only a few short hours; leaving so little permanent record their work is hard to appraise, and the sacrifices which go to make success are all realized by those who have made them. Nevertheless, the construction of Tech Show requires months of creative labor on the part of the author, coach and principal, not to speak of the supreme effort when the production is finally completed. This, the hardest part of the work, remaining till Junior Week, when the majority of students look for people from the classroom grind. The cooperation and often indomitable spirit displayed by the men who make the Tech Show a reality are in the highest degree a credit to the Institute.

The next regular issue of The Tech will appear Friday, April 27.

Author of "Not A Chance"

(Continued from page 1) it was no longer a rehearsal of an imaginary show but the real Tech Show to which we were introduced in the first act. It is rather confusing, isn't it?

And yet, we report, that taking the show as a whole, Mr. Hathcock did his work well. His films had plenty of humor, his songs were bright and lively, individual situations were very amusing, and the construction of the plot was very clear. In the second act, most of which we saw through in the story, Mr. Hathcock's most interesting effort is that he wrote "Not A Chance" for the effectiveness of special moments and acts instead of the obfuscation of the whole performance.

The management is deserving of the highest praise for its concept in attempting to produce such an educational entertainment. Mr. Chauncey M. Roberts and his staff of assistants did more than well in so neatly handling a production of such tremendous proportions. Those of us who know Mr. Roberts are not surprised at the success of the show; but are surprised that his friends are not at the present moment more favorably disposed towards broken columns and Godey's Jar.

Briefly, the show was very effective. Most of the sets were beautiful, and well adapted to the scenes and the acts. The ballet scene was lovely to the last, and at the National Theatre was remarkable. Mr. Dooley went on the stage to a rousing chorus of "I'm Going to the World's Fair," and his work was extremely Musician of the year. Mr. Parsons' Music was so well that it is impossible to choose between the Tech and Iona performances, or, as one man put it, sub-Urbam.

We know that we voice a universal opinion when we say that the Tech Show is a success; and that from which the hero interrupted to return to the plot, and that from that point on...
We extend the facilities of our service to Dutchmen, and we are glad that we saw it, and as for very few...
