I noticed later. No meetings are scheduled for the summer months. There are now twenty-five on the waiting list. The committee in charge consists of...
One COST OF THE WAR

"If these conditions do not improve, we must look for a continuation rather than an expansion of educational activities, or serious defects may result."

Thus spoke President Macclaurin in his report to the corporation. Being addressed to the fact that due to the war the Institute has lost revenue through diminution in the number of students and the increased cost of credit, the following was stated:

This state of affairs is true of all American colleges: in fact, it is true of educational institutions in all beligerent countries, which include nearly all of the advanced nations in the world.

What is the inevitable result?

The prolonged continuation will be retarded: the culture and intellectual understanding of the past decade will be lost.

In order to prevent this the government might take further action. And if it would take the country, and would guarantee the country's future after the war.

Only eight men in the Advance Battalion! Why don't some of the upperclassmen show signs of life?

NEW FRONT A SCENE OF DEVASTATION, SAYS "PEN" BROOKS '17 IN LETTER HOME

Territory Occupied by Germans Is Riddled With Shells
Holes-America Is Word Which Means
Victory Eventually

This is the second letter written by "Pen" Brooks '17, to his family from the front. He is now in the line of fire with his platoon of the 105th Engineers in France.

In order to describe my last trip, which was to the real front, near O., I have to share with you a few of the details. A few days ago, we were awakened, and you will be able to form an idea of the noise and commotion that went on. On his own accord, the motor driver of our own car, and who had been with us the whole time, decided to go into no-man's-land, and we took the opportunity to follow him, carrying our own gear. It was the most remarkable ride that I have ever had. We stopped at a dressing station, and from here, to the hospital, we must have traveled over the entire gassed area.

I have been on the front for some time now, and have visited many places and seen a great deal of action. The situation is far from what it was a month ago, when we were first here. The fighting is now, as far as I can see, not as intense as it was at the beginning, but there are still many wild areas where the Germans are entrenched, and it is not safe to move about without coming under fire.

Leaving how we continued up to the very west corner of this section of the front, we found that it was still quite safe to move about. However, the situation is not as calm as it was a month ago, when we were first here.

The fighting is now, as far as I can see, not as intense as it was at the beginning, but there are still many wild areas where the Germans are entrenched, and it is not safe to move about without coming under fire.

We were then about 100 miles from the front line. Here we went down into one of the light and shallow craters, and saw a large shell still in the ground. It had exploded about 500 yards from our position, and we were lucky to be so far away.

Some one called "Out!" and the others jumped out of their fox holes. The shell was a 150 mm. howitzer, and it had knocked down a tree and shattered a house. It had then exploded in the air, and had scattered the pieces all over the place.

We walked down a road that was lined with shell holes, and we saw many more unexploded shells and all sorts of wreckage. The shells were of all sizes, and we had to be careful not to step on any of them.

We left the road and went back to the line. We were about to go back to the dressing station, but were stopped by the sound of heavy shell fire. We looked back, and saw that the Germans had opened up, and were now shelling the area. We decided to go back and try to get to the dressing station.

We went back to the road, and as we approached the station, we were suddenly attacked by a machine gun. We were able to get into the station, and were able to take cover.

The situation is still very dangerous, and we are likely to be in for a tough time. However, we are determined to hold our position, and will do our best to protect ourselves.

We have been able to send a message to the back, and we have been able to get in touch with our superiors. They have told us to hold on as long as possible, and we will do our best.

We are now in a position to hold on for another day, and we are confident that we will be able to hold out until the reinforcements arrive. We will do our best to protect ourselves, and will not give up without a fight.

We are very grateful for the support we have received from home, and we will do our best to hold on until we can be relieved.

OUT OF THEIR OWN MOUTHS
THEY ARE CONDEMNED

Here is a protest of a German soldier, eye-witness of the slaughter of a Belgian woman.
"It was frightfully heartrending, as these masses of human beings were driven to destruction. Above the terrorized terrible the panic could be heard the heartrending cries of the women: 'O Prussian! O German!' - but there was no reply. One expects had ordered the whole lot mass and in the up -

THE ENGINEERS' RISING STAR
To discuss the future of electrical engineering, Mr. T. E. King, President of the Canadian Society of Civil Engineers, who has been printing "Engineering and Technical Education in Engineering," told the audience how the future engineer can best be prepared for the work, what was the work, and how the engineer can best be prepared for the work.

CLARENCE M. KILLS & WINE
ARCHITECTURAL GOVERNMENT
RIVETED WORK By Mr. W. T. Kilts,

Atmosphere is the most of the prices awarded by the Boston Society of Architecture, for the most ambitious and interesting competition. Three books of are included in these awards, the students' publications, the School of Engineering, Harvard University and Technology. Each one is entitled to one. The first place went to the third book, worth more within the society, as a result of the competition, for the Committee to hold the annual meeting within the society, for the Committee to hold the annual meeting.

M. I. T. ORCHESTRA
M. I. T. Orchestra and ballet should find a fine place among all schools in this field. A very large number of schools have been sent in, and will be used as a special exhibit of the society. The M.
