### S. A. T. C. TO CONTINUE WORK ON WAR BASIS

Official Telegram Commands Carry On. Dishonorable Discharge Awaits Those Whose Conduct Is Unworthy Or Those Who Neglect Studies

FURTHER DETAILS YET TO COME

There has been a great deal of conjecture as to whether the S. A. T. C. would break up. Now that peace is imminent, and there will be no further use to train men as officers. The Army Unit will continue as usual, and the men in it need not fear an immediate discharge. A special order has been received from headquarters which follows. It begins with a telegram from the Committee of Education.

Nov. 13, 1918.

Class Inst. of Technology,  
Cambridge, Mass.

S. A. T. C. will continue military and academic work without interruption, regardless of armistice. Plans have been prepared for the future of the S. A. T. C. under conditions brought about by the armistice, which will be sent to you and the college authorities as soon as authorized. Inform college authorities of this wire.

(Signed) Committee Education Recs. In addition to this change in conditions has undoubtedly cancelled all chances of going to officers' training camps, so that everyone would do well to consider this a straight educational scheme as they have always been told it was. Heretofore the academic work

has been very unsatisfactory. This was partly due to conditions, but also partly due to the students' fault. They must now look on this as the serious end of their life here, and strive to make good. The faculty will doubtless be lenient in regard to past work, but there is no reason why they should be in regard to the future. The option of sending men to Camp Devens is probably at an end, and it is presumed that the one thing that can be done to men who fail when it is clearly due to their own neglect is to give them dishonorable discharges.

"The war is the greatest event in history. Every member of the S. A. T. C. is entitled to the highest credit. He is not merely a drafted man who is too late to get into action, but he has the proud distinction of having gotten into the Service, even if not to the front, and having been a member of the United States Army, ready for any call to any duty during the war, whereas except for his voluntary action he would never have been in the Army. This heritage is worth holding on to as a real honor, and a man will be very foolish to risk dishonorable discharge now by unworthy conduct.

The Technology Naval Unit eleven will get its first real test this afternoon when it meets the strong Springfield Y. M. C. A. College football squad at Springfield, Mass.

Coach Jack McAuliffe '20, the All-American tackle and former captain of the Dartmouth eleven in 1916, is working under the greatest of handicaps on account of the formal schedule of routine established by the Naval authorities for the Unit. This schedule allows but one hour at noon, the regular drill period, and one hour in the afternoon for practise. The men are using all the possible available time in getting their formations working smoothly. Considering the fact that the Unit was able to score

R. L. SJOSTROM (Mgt.)

quite satisfactorily on the unbeaten Exeter eleven two weeks ago with about three days' preparation for the game, the football situation of the Technology sailors is working out well despite the limited amount of time they have for daily training.

One of the biggest assets in the line is Boli, who stands over six feet and weighs 190 pounds, and who is considered one of the best punters turned out by the Institute. Coach McAuliffe has spent considerable time in pounding him into shape for today's game. The Unit has an exceptionally fast backfield and the supporters of the team are expecting great things from Brokaw who has been playing a fast game in the scrimmages. Johnson, the former Worcester Academy star has the job of center as he has been showing up strong in this department in the practise stunts. Mason, who is looking after the quarter-

(Continued on page 3)

### NOTHING DEFINITE KNOWN REGARDING USE OF DORMS

Bursar Ford Advises Men To Retain Their Rooms.

There seems to be a false impression current about the Institute that the Technology dormitories are soon to be opened up to students. For the benefit of those interested we may say that nobody has any idea when the naval aviators now living there will move out. Until this is done, of course no arrangements can be made for the fellows, the aviators may leave tomorrow, or two years from tomorrow, from all that is known. The dormitories will have to be entirely redecorated and gone over before they can again be occupied, and this alone will take a month or six weeks. A good many fellows have already filed their applications for rooms for next year; this is looking pretty far into the future for these troubled times when no one knows what will happen next. Bursar Ford's advice to all is to hold the room you now have—and wait, as it is sheer folly to make applications.

### ROLAND B. GRIFFIN

Corporal Of 2nd Squad, Comp, D  
Dies of Pneumonia

Every member of the S. A. T. C., who in any way knew Corporal Roland Babson Griffin, grieves his death. The faces of his friends and all those that knew him are a little more serious, and a little more thoughtful than they were before Wednesday, the day he died. Corporal Griffin was taken ill two weeks ago with the "flu" and taken immediately to the Technology S. A. T. C. Infirmary, the Phi Beta Epsilon house. This was his second year at the Institute. He had started in on the regular S. A. T. C. Third Term and was taking course XV. Because of his previous military training at Technology he secured the corporalship of the second squad of Company D and was making a big success of it. His parents live at 305 Washington street, Gloucester.

It seems that after standing on guard Griffin became tired out and contracted the influenza. After being removed to the Infirmary he did not seem very ill for a while, but later was attacked by double pneumonia and died shortly after. Roland Griffin was a man with a very pleasing personality and all of Company D cannot say enough for him. Immediately upon news of his death the

(Continued on page 3)

### WILL GIVE BOXING LESSONS IN WINTER

Mr. Frank Boutillier Ex-Champion, Once a Former Instructor At the Institute, To Instruct

CLASS OPEN TO ALL

All who desire to be instructed in boxing, or to keep up with it, will welcome the announcement that Mr. Frank Boutillier will give boxing lessons at the Institute during the coming winter. Mr. Boutillier was once international and twice national amateur champion. He has won the New England amateur championship three times, and was also formerly boxing instructor at Technology, and one year turned out a team which included such men as Maverick, Friebus, Center, and Russell.

The class will be open to all, including the army and navy unit men, and civilians. The cost will be five dollars for six lessons. Gloves will be provided but the other togs will have to be furnished by the men themselves. Mr. Boutillier will meet all men who wish to have instruction in the room under the grandstand on Wednesday, November 20 at any time from ten o'clock on. He hopes to be able to turn out a team this year, and he certainly should be able to, if good material turns out, as the quarters for instruction and practice are all that could be desired. Previous experience is not necessary in order to make the team. A movement is under way, according to Coach Kanaly, to have those men in the junior battalion who take boxing, excused from calisthenics.

The lessons will be given twice a

(Continued on page 4)

### MAJOR TURNER URGES M. I. T. BATTALION TO GIVE TO FUND

Yesterday, the M. I. T. Battalion was marched from the drill field into room 3-270, where Major Turner told the men of the needs of the European nations for American money. He said even Germany has called upon us to save Europe from starvation. He then went on to tell of the great good being done by the Y. M. C. A. and allied organizations and elaborated upon the great need of the soldiers for the huts and entertainments, now that an armistice had been declared. Pledge cards were then handed out for the United War Work drive and the battalion was urged to give to its limit. There will be competition between the various companies.

### NAVAL AVIATORS MAY LEAVE

According to reports among the Naval Aviators the life of the present school at Technology will be a short one. The yeomen say that the school will probably continue indefinitely, or until the men complete their training. Owing to the uncertainty of events the Government has not published its intentions regarding the Naval Aviation Detachment yet. Lieutenant Walker, stationed at the Institute, says that the plans will probably be released Monday for publication.

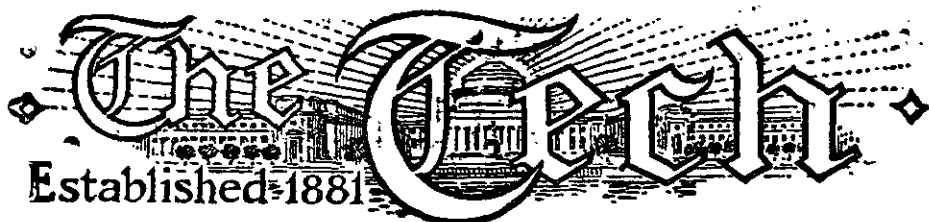

### NO MORE RECEIVING SHIP GRADUATION SHOWS GIVEN

There will be no show at the Receiving Ship next Friday, as a great many of the fellows are returning to civilian life again. These shows were produced by local talent which generally took the form of acrobatic stunts, singing, take-offs on officers, and classic or Oriental dancing. They were patronized by the naval cadets and will be greatly missed by those fellows who have transferred to other units.

### APPLY FOR RELEASE

A report says—The navy department estimated today 50,000 men could be spared from the navy within the next month. As one means of releasing men, students of schools and colleges can apply for release to their commanding officers and the department policy will be to grant it.

A new Students' Directory is being prepared, and a copy of the proof may be seen at Army Headquarters, in the main lobby of the Institute, and at the Information Office. Report corrections to the Information Office AT ONCE.

Published twice a week throughout the year by the students of the MASSACHUSETTS INSTITUTE OF TECHNOLOGY

Entered as second-class matter, September 16, 1911, at the Post Office at Boston, Mass., under the act of Congress of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 1103, Act of October 3, 1917, authorized on July 19, 1918.

IN CHARGE OF THIS ISSUE

Edward A. Ash ..... Night Editor

SATURDAY, NOVEMBER 16, 1918

NO arrangements have yet been made to better the opportunity for study in the S. A. T. C. It is high time that something were done, for now that peace has been declared the military work becomes far less important than the Engineering. As the S. A. T. C. is now run, however, military work is carried on at the expense of the academic work, with the result that unless something is done, only exceptionally quick students will be able to get passing marks in their work.

Discipline will be necessary so long as there is an organization, but there is no longer need for all the restrictions which now leave the men so little time for study. The old threat that men who do poorly in their academic work will be sent to Devens no longer holds. The newest penalty is a dishonorable discharge for those who fail to measure up. Whether the military authorities would ever carry out such a threat is hard to tell, but if they intend to place such a penalty on failure they are bound to make an improvement in working conditions. The sooner, the better.

As far as the students are concerned, the majority are doing their best and accomplishing all that can be expected of them. They don't get enough sleep or enough time to study. They are required to go on guard, police, fatigue and other extra duty that interfere with the studies. Under the present conditions the authorities can expect very little from the S. A. T. C.

At a meeting of the Managing Board Thursday afternoon the following elections were made in the News Department of THE TECH: Night Editors, Carl W. Harris and Edward A. Ash, both of the class of October 1920; Personals Editor, R. Peverell Warriner '20; News Staff: F. W. Adams '20, Ernest N. May, Henry C. Gayley and H. D. Folinsbee all of the class of October 1920.

Today, November 16, THE TECH completes its thirty-seventh year of continuous news service at the Institute.

PERSONALS

The Personals Editor asks the cooperation of the great body of people interested in Technology. He is powerless unless he has material to work upon. This material can only be supplied by the friends, relatives and classmates of Technology men. This column will be doubly interesting to those men who are across the sea, now that they are doing guard duty. We wish to get all the news of all those men who have been connected with the Institute in any way. Send your contributions to the Personal Editor, giving as much information as possible. The Editor wishes to thank those who have helped him in the past and trusts they will continue their support.

Mr. and Mrs. Frederick Reid Estes of Brookline announce the marriage of their daughter, Louise, to Captain Frederick Montgomery Lee of the Tenth Infantry, U. S. A., son of Mr. and Mrs. Herman F. Lee of Glen Ridge, N. J. The marriage took place at Battle Creek, Mich., last Saturday. The bride, who was to have been numbered among this season's debutantes, is known among her intimates as "Peggy" Estes. Captain Lee, who has been on duty at Camp Custer, was formerly a student at Princeton University, and later studied at Technology, leaving his course there where he belonged to the "Number Six Club," to go to the Mexican Border, where he was on duty with Battery A. Later he attended the Army School in Washington, D. C., and there he received his commission.

Lieutenant Francis Appleton Wood of the United States Aviation Section was killed in action Sept. 14, during the American advance in the St. Mihiel sector. He was a son of Mr. and Mrs. Chalmers Wood of 20 East Eighty-third street, New York city, and was born twenty-four years ago at the summer home of his grandparents, Rev. Roland Cotton Smith, D. D., and Mrs. Smith, Ipswich. He was educated at St. Marks School, Southboro, and at Columbia University, from which he was graduated in the class of 1916.

Lieutenant Wood was an officer in the Seventh Regiment of the New York National Guard, and saw service on the Mexican Border, where he was transferred to the Sixty-ninth Regiment. Upon the entry of the United States into the war he enlisted in the aviation service and was a student at the aviation school at Technology during the summer of 1917. He also studied in Toronto.

Announcement is made by Rev. and Mrs. George Herbert Gutterson, of Cambridge, formerly of Winchester, of the marriage of their daughter, Sylvia, to Ensign Philip Clifton Pearson, U. S. N., Air Service. The marriage took place in the chapel of Andover Theological Seminary, Cambridge, and the father of the bride was the officiating clergyman. Miss Gutterson had as her maid of honor here sister, Miss Hildergarde Gutterson, and was also attended by a little flower girl, Catherine Haskell, daughter of Mr. and Mrs. John Aborn Haskell of Wakefield. The bridegroom's brother, Lieutenant Andre Pearson, U. S. N., was best man. The musical programme was under the charge of Professor Archibald T. Davison, organist, of the Harvard faculty, department of music.

Following the ceremony, a reception was held in Farrar House, of the Andover Seminary group, and at this the ushers were a brother of the bride, Captain Wilder Gutterson, U. S. A., of Washington, who was in charge of the group, which included the bridegroom's brother Kendall Pearson, together with Walter Rockwood and Albert Rockwood, of West Medford. About 150 guests were present at the reception. The bride is a graduate of Abbot Academy at Andover. The bridegroom was in his sophomore year at Harvard where he relinquished his course there to enter his country's service. He trained at Technology and from there went to Pensacola, Fla. He is the son of Mrs. Tyler Redfield, by her former marriage. Mr. and Mrs. Redfield live in Greenwich, Conn.

Cadet W. Norman Strachan has died in the post hospital at Barron Field, Fort Worth, Tex., according to information received by his parents, Mr. and Mrs. Benjamin Strachan of 32 Pleasant street, West Roxbury. He entered the United States Army Flying Corps May 11, after being graduated as company commander from the school of military

aeronautics at Technology. Previously he was an accountant with Gilour, Rothery & Co., insurance agents, 120 Water street.

Mr. and Mrs. John H. Balch, Jr., announce the engagement of their daughter, Marjorie Knapp Balch, to Lieut. John Wheeler Clarkson '18, son of Mr. and Mrs. E. H. Clarkson of this city. Lieutenant Clarkson is attached to the aviation corps as an observer, and is now stationed at Mt Clemens, Michigan. Clarkson was in Course 15 and was a member of Sigma Chi fraternity.

QUARANTINE RAISED

Company F no Longer Confined Because of Diphtheria

There was quite a scare in regard to the single case of diphtheria that developed in Company F the other day. LeFevre was the unlucky person to contract the disease; he is doing nicely in spite of the rumor that he had died. The entire barrack was quarantined supposedly for eight days but in reality for about three hours, from 5 until 8 Monday night. This confinement to barracks was most unfortunate at this time. As the peace celebration was at its height, the fellows were allowed to go out to some extent, but had to keep away from such crowded places as theaters and hotels. All were examined on Tuesday morning but as no new cases had developed since LeFevre's removal to the infirmary, the fellows were allowed out under the same restrictions as the previous evening. Tuesday night they were again forced to stay in barracks. This was unfortunate as it was the only time the S. A. T. C. was having a real holiday. The company pianos were kept busy, but they could not dispel the gloom which, as one of the fellows said, "was so thick you could cut it with a knife." The whole affair was a misfortune, but all are glad it turned out as well as it did.

FOOTBALL GAME TO BE HELD NEXT SATURDAY

Company E To Play Company F—Both Have Stars.

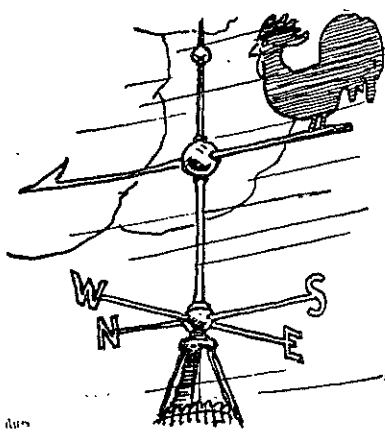

Spirit is running high in Barracks number three. Companies E and F are to have a championship football game on next Saturday afternoon on the Tech Field. It is not merely a Company affair, but it is an Andover-Exeter and a 1921-1920 affair. Once again the Star of last year's freshman team, J. J. Murphy, meets Bradley of last year's sophomore team. Bradley also meets his old opponent, Sullivan. Company F is very sure of the results with two such men as Murphy and Sullivan. Company F also counts on the services of Miteh of Tufts. The rest of the men have not been decided upon, but there is a whole team, and then some, of Prep football stars.

Company E is also counting on big things. They still have the quarantining in mind which was handed down to them by the company above them in the Barracks. They also have a star backfield. Dyer of Everett High will be Quarter, Bradley of Everett, Keenan of Pittsburg Prep., Rudderham of Beverly, and Sheppard of Huntington will be the rest of the back field. According to their past performances they are all good ground gainers. The rest of the team consists of: Harris of Cohasset, Handley of Portland High, Flather of Exeter, Beyer of Oregon Aggies, Homer, who will play center, formerly of Chelsea High, Bell of Norwich Milt. Prep., Curie of Exeter and Brown of Malden.

Practice has been going on for the

last few days in all spare moments. Both teams are putting every ounce of power into the preparation for the game. There is more good material in this Barracks than in all the other as is shown now by all the stars. The winner of this contest ought to play Navy and show them that the M-pounders can cover ground better than Gobs any day. There are also possibilities that a combined eleven might represent the Institute in outside games. This game will surely attract the interest of the whole S. A. T. C. as it is an Inter-scholastic affair. The office, as well as all the men are certain to be out and cheering for their chosen friends.

### CLASS OF '11 DINNER

#### Dean Burton Speaks On 11th Day of 11th Month

Monday, the 11th, the Class of 1911 held its class dinner at the Boston City Club. Owing to the excitement caused by the signing of the armistice, the attendance was small, but as Dean Burton remarked, those present made up for this with the noise of their celebration. Dean Burton and eight men of the Class of '11, viz., S. B. Dyer II, H. G. Jenks VI, A. H. Kaufman X, W. J. Pead, Jr. VI, D. J. Smith V, E. D. Van Tassel, Jr., X, F. A. Wood II, and O. B. Denison VI, secretary, formed the party.

Throughout the evening Dean Burton told of the new conditions at the Institute in his characteristically intimate way. Everyone was anxious to hear of the activities at Technology. The Dean also explained the novel, interesting and instructive course in "War Issues" now being taught.

Originally planned by the secretary for the 11th day of the 11th month, the evening took a new significance when it was brought to the attention of his classmates by the secretary, that hostilities ceased at the 11th hour of the 11th day of the 11th month, and that there were strangely enough one hundred and eleven stars in the 1911 Service Flag.

Instead of breaking up at 10 o'clock the boys left the City Club in cars owned and driven by "Ted" Van Tassel and "Bill" Pead, and joined in the merry-making up and down Tremont and Washington streets until a late hour.

#### TO MARRIED STUDENTS

The wives of married students are cordially invited to the Teas given by the Technology Matrons in the Emma Rogers Room, third floor, building 10. The first tea will be held on Wednesday, November 20 at four (4) o'clock.

If the married students will please send their addresses to the Registrar's Office, Room 3-110 in care of Miss Comstock, invitations will be mailed to the wives.

#### MORE MILITARY ORDERS

Another bulletin has been received from Major Cole regarding the proper use of letterheads, and also regarding officers' leave.

The order follows:

Extract

1. The initials M. I. T. will not be used in any official blank or letter. It must be remembered that these letters will not mean anything when the letter or blank gets away from our own headquarters. The name will be written out in full, or at least when space is scarce in intelligible abbreviation.

2. All military posts run seven days in the week. It would seem that it would not be necessary to order officers to report for duty as usual on that day when a large part of their commands are present. To avoid any misunderstanding, all officers will in future report for their usual duties on all Sundays and at the usual times. An effort will be made to lighten the duties of officers on Sunday and those not having specific duties to perform after 12.30 P. M. will be excused for the rest of the day. Others who may be absent without leaving unfinished duties may request permission to be absent at other times, and such permission will be granted when it can be done without injury to the service.

By order of Major Cole,  
JOHN B. BRAINARD, Jr.,  
Capt. Inf.  
Adjutant.

Sunday morning at 9 o'clock, Mr. Palmquist will speak in the "Y" hut on The Challenge of Peace. Let us give him a good hearing.

#### GRIFFIN DIES

(Continued from page 1)

fellows took up a collection and sent a wreath of flowers to his family. The members of his squad, too, all say that they cannot find terms to express what a good fellow he was, and are unable to express the deep sorrow which they feel at his loss.

#### NAVY FOOTBALL

(Continued from page 1)

back position is regarded as one of the fastest men on the team. The remainder of the backfield will be made up of Hurley and McAuliffe.

The line-up for today's game is as follows: Barker, lc; Ramsay, lt; Rogers, lg; Johnston, c; Spaulding, rg; Gabogan, rt; Roli, rc; Mason, qb; Brokaw, rrb; Hurley, lrb; McAuliffe, fb.

#### SHIPYARD DECISIONS POSTPONED

The holiday, or rather holidays which celebrated the joyous news of peace have still further delayed the decision of Mr. Baldwin, the judge, in regard to the award of the prizes for the essays by Technology men about their work in the shipyards last summer. The English Department, of which Professor Pearson is the head, has done its part in sending the essays to the judge, and is now awaiting with interest, as are the participants, the result of the contest. Mr. Baldwin is an extremely busy man, and cannot be blamed for not having given out the results sooner. Professor Pearson expects to have a public award of the prizes to the successful competitors, if circumstances permit. The results will probably be announced beforehand.

#### INSTITUTE EMPLOYEES HEAR MR. PALMQUIST SPEAK

The employees of Technology are organized in a special group to contribute to the United War Work Campaign. Mr. Palmquist addressed them Friday at 12:30 in building one. Mr. Ford has organized a campaign among the clerical forces of the Institute, and has appointed Miss Irwin as the leader, and they are making a generous contribution. The women workers in the mess hall form another group, and are doing their bit toward this worthy object. The men of Stone & Webster are also giving the Technology fund a boost. Altogether the several bodies of the Institute are doing their best to make this a record drive.

#### WAR WORK CAMPAIGN

The publicity committee in the United War Work Campaign have posted on the end of building one, in the Y. M. C. A. hut, and in the main lobby a card upon which there are ten thermometers representing the ten companies and registering the gifts of each company. This enables any company to see at a moment's glance just where they stand in comparison to other companies.

## DU PONT AMERICAN INDUSTRIES

### Explosives to Dyes

The evolution from explosives to dyes is the logical development of the dyestuffs industry from both a chemical and engineering standpoint.

First, the explosive manufacturer starts with the necessary raw materials. In his munitions plants he produces the bases which are required. The immense output of his acid plants is at his disposal. In his chemical factories he manufactures many of his principal intermediates.

He has at his command unequalled plant and laboratory facilities for the production and development of the intricate by-products of the coking industry, equally useful in the making of military high explosives and in the manufacture of dye intermediates and dyestuffs.

His chemical and engineering organization has had long training in the closely related explosives industry and is able through the experience gained to overcome difficulties which would be insuperable to others less fortunately situated.

As the world's largest manufacturer of explosives the Du Pont Company enjoys these advantages to an unusual degree. It has already made possible the laying of a broad and secure foundation and the development of dyestuffs of the greatest commercial and industrial importance.

It is the strongest guarantee of the permanency of our undertaking and of the final emancipation of the dyestuffs industry from foreign domination.

#### TO REMAIN IN S. A. T. C.

Report spread around the members of the S. A. T. C. who had not received their induction papers from their local boards, that they were to get their discharge at an early date. Enquiries at Headquarters elicited nothing concerning this matter. They said that the

only orders that they had received were to the effect that no more men were to be inducted in the S. A. T. C.

A number of men in the S. A. T. C. were expecting to get their transfer to the Officers' Training Camp at Camp Taylor. This however has been cancelled and the men will remain at Technology until further notice.

**FIRESIDE FORUM TO START NEXT WEEK AT Y. M. C. A.**

The Y. M. C. A., this coming Sunday, is to make a new departure in the nature of a Sunday evening forum. The happy phrase "The Fireside Forum" has been chosen as its name. Each Sunday evening, at 6:30, this forum will gather about the large fire place at the hut, and informally discuss the questions of current and vital interest.

The speakers for the next three Sunday evenings will be as follows: November 17th, Mr. G. A. Mirick, former Deputy Commissioner of Education in New Jersey, will speak upon Democracy.

November 24th, Captain John Brainerd will speak upon his experiences at the front.

December 1st, Oriental students at Technology will be in charge. They will probably discuss the industrial and economic problems of the Orient. All members of the Institute will be

cordially welcome at these gatherings. Suggestions for the success of the forums will be gladly received by the Y. M. C. A. secretary.

**BOXING LE SONS**

week in the room next to the grandstand which is now occupied by the infantry squad which guards the governmental experimental enclosure. These men will leave on Monday, so that the room will be open and ready for use by the time the classes begin. An enclosed porch will lead from this room to the locker-room, so that the men will not have to pass outdoors in going from one room to the other. The location of the boxing-room will be very convenient, as the locker-room with its rubbing-board and shower-baths will be next door. There will be steam heat in the room all winter, so the men need have no fear of having a cold room to work in.
