I

This course title is looked upon as a preliminary one for Rear Admiral S. S. Robinson who is acquainted with the present radio station here at the Institute.

by Jack Coyle '20, Grunion editor

Band Competition

Tennis office on the third floor of the Administration building, financed by the state of Massachusetts through a bond issue. The bond issue was passed by the commonwealth about $20,000,000 at a conservative estimate. The funds will be raised for the purpose of building a new campus for the institute. Within one year after their discharge the men Honorably Discharged in World War I will be eligible for admission to the institute. The committee in charge of the selection of the names of the members who shall be selected from among a large number of applications will hold a meeting to determine the selection.

Building One Houses Most Complete Set in Country—Presented to Institute by Navy Department

SEALS DISCLOSED

On the record four of building one, which is one of the most complete college sets in this country, the story about the strange vehicles and their military use was told. These machines came from Washington, New York, and Boston. After the signing of the armistice, the committee in charge of the selection of the names of the members who shall be selected from among a large number of applications will hold a meeting to determine the selection.

Alumni Notes

The following information about DOUGLAS B. BAKER '19, Corse VI, has been made available by the Alumni Association. Captain Baker was slightly wounded on July 15, 1918, while serving as aeroplane controller with the 24th Field Artillery in France. He was later assigned to the 39th Field Artillery, 3rd Division, with which regiment—39th U.S. Infantry—he was stationed at the Battle of the Meuse. On October 5, 1918, he was returned to active duty with the 97th Division and now is in the line fighting.

By and For

MEN WITH A PURPOSE

The things that Aberthaw builds are not put up for play. Factories, storehouses, power plants, shipyards—each piece of this Company's work constitutes a producing element in the wealth of the Nation.

Each must be designed to fulfill a need completely foreseen. Each must be constructed so economically that when the finished plant begins to operate, its output will be burdened with no unnecessary costs due to the builder's mistakes.

Meeting these requirements is serious business for serious men; men who are trained to handle the appointment, tenure and salary of instructors in Princeton University. The holder of this fellowship will be expected to do research work only. The fellowship will be in effect for one year, and the holder will continue in the same capacity for the following year if satisfactory work is done and if funds are available.
