The Slippery Ways Will Grease His Memory

Technology Tennis Team Defeats Williams in Every Match

On account of the shining star the tennis team has made this season, Technology is expected to win the New England Championship for the second year in succession. The team played good tennis. The following is the score: 6-1, 6-4. Kimball, Technology, defeated Pilard, Williams, 6-0, 6-4. Capt. Wei, '18, and Brookmann, '20, defeated Barron, Technology, 6-1, 6-4. Kimball, Technology, defeated Mathews, 6-0, 6-1. Capt. Wei, '18, and Brookmann, '20, defeated Pilard, Williams, 6-1, 6-4.

MAINLY FOR FRESHMEN.

It seems to be a law of nature that ever with the sweet goes the bitter. The rose has its thorns—the Walker Dining service has its grass. In course of time the halcyon spring evenings come, but so do those untidy men and women. They knock over the Horns on the roose and the line in the main dining hall, cannot be helped, but must be borne with, and endured. These are but little patience. There are, however, a few things which tend to lighten the strain on the men in such days as these. Most prominent among these is consciousness of job well done. Those among us who can claim this heart ease are in need of neither sympathy or advice. To them we have nothing more to say.

There are, however, many others who cannot claim this advantage. To these we recommend the conscientiousness of review work. At this stage of the game it is best to forget one's past. Let done. At this stage of the game it is best to forget one's past. Let

WALKER MEMORIAL DINING SERVICE

A LTHOUGH the Walker Memorial dining room was originally intended for the use of a few hundred students, it is now running at several times its intended capacity. With such a strain upon the facilities for cooking and supplying of supplies, it is a marvel that there has been no hitch in the operation, but as yet the large number of students desiring to be fed have been led regularly and efficiently with first class food. It is fortunate that the Army and Navy men here have such a pleasant and cleanly place wherein they may dine, as opposed to the barracuda mess hall under such different conditions. This is especially true when we consider the class of men who are sent to the government schools here, only the best of the Army and Navy being selected to attend these schools.

At each meal hour there is formed a long line of hungry men waiting to be fed. It is quite easy to recognize how rapidly and systematically they eat their dinner and satisfactorily. It is true that in the Walker Memorial dining service we have just one plus in Technology organization—there is the working of the textbooks, the good work in the non-shooting staffs so characteristic of the Institute.

We can not help thinking that had the shipyard men been provided with such an efficient and satisfactory restaurant, their very considerable recruiting agents in the form of free tuition would have been introduced.

In addition to the requirements of the Shipping Board and the War Department, the working of the Walker Memorial is, therefore, a task which we look after with the greatest interest and with a healthy respect for the stamina which is necessary to the making of men. We are therefore enabled to evaluate the efficiency of the cook's work and the quality of the food. Before we close, we would like to say that the shipyard men will be relatively small and contented this summer.

It is the Editor-in-Chief.

2. Life at Belleville, Ill. (Continued from page 1)
4. Six hundred and twenty-two miles an hour for several minutes, when about six miles above the ground. The time was recorded on the propeller and the speed was noted with the aid of a special instrument. The instrument measures the speed of the plane and the time of flight. The plane was flown over a known distance, and the time was recorded. The speed was calculated by dividing the distance by the time. The plane was flown in a straight line at a constant altitude. The instrument used was the DuPont American Speedometer.

where Technology won one point by a
fourth place, and in the broad jump, the
Yale team won three more points by
high jump in the sixth-yard run. These
points were the main result of the meet,
and the competitors were nearly even
in their attempt to capture the two-ponies, where Belleville's "11
inches, to 11 feet, 7 inches," turned
punters, is off a full at the end of the
field. No one else could even touch the
bars when he edges two feet out.

The only double winner was Mills 91.,
who took first place in the 110-yard dash
at the very start and gained at each step
for which they are booked.

Spies and Lies

German agents are everywhere, eager to gather scraps of news about our men, our ships, our munitions. It is still possible to get such information through Germany, where thousands of these fragments of official and unofficial news are pieced together into a wholes which spells death to American soldiers and danger to American democracy.

But while the enemy is most insidious in trying to collect information, and his systems are elaborate, he is not so unscrupulous—and indeed often so very stupid, and would fail to get what he wants if not deliberately handed to him by the carelesslest of loyal Americans.

Do not discuss in public, or write in your diaries, any news of troop movements, nor hints of any change in your own personal duties. Remember that you are engaged in a secret war.
