The Technology Advisory Council on Engineering and the American Institute of Electrical Engineers have called for an increase in the number of students attending the Institute for the upcoming academic year. The campaign, which has been in progress since last Tuesday, has seen a record-breaking number of students attending the Institute. It was announced that the number of students attending the Institute has surpassed 100, with many more expected to register before the final day. The campaign, which was launched at the beginning of the academic year, has been aimed at increasing the enrollment at the Institute, which is currently at its lowest level in recent years.

The Technology Advisory Council, led by Professor Frank Vogel, head of the Department of Electrical Engineering, notes that the American Institute of Electrical Engineers is desirous of securing trained engineers for general service in the Navy and for auxiliaries in engineering and radio duties. Engineers for general service will, if accepted, be assigned as engineers in the efficient force of the government for special purpose teams of four which must have at least one engineer of the proper grade and qualifications. Engineers for auxiliary service will be assigned for either at a higher rate for special purpose work.

Campaign for Signups to Close

The campaign for signups for Tech 1920 which started yesterday will continue until June 1. The following students have been selected to sign up if they wish their class portfolio continued: E. F. Beach '19, A. H. Balch '19, and T. H. Smith '19, Mayer '19, and Balfour '19, or any other students who wish to sign up. The campaign is being conducted by the American Institute of Electrical Engineers, which has given permission for the use of its facilities at the Institute for the purpose of promoting the campaign.

R. H. Smithwick '21 ................. Assistant Night Editor

College Life at M. I. T.

THE lack of college life in such a school as ours has always been an annoyance to the administrations of this type of educational institution. Various attempts have been made to remedy the evil of producing mechanical men here, but very little change of a permanent nature has resulted. It is true that there is some natural tendency for men to seek relaxation, but in many cases it is little more than the relaxation of the German prisoners for moments of freedom from their work in the German salt mines, and yet our work here is not a man in the Institute who can possibly do more of it later. The situation is perfect, and a mighty big one too. It is quite unlikely, other points without extra charge.

TURNING A MENACE INTO PROFITS

At nook sell some premiums great free screenings have been accumulating recently as dark financial disquiet at the moment.

Avery of these screenings had become a serious menace. In the past, they had been a source of great disturbance and worry. At the time of the change, the situation was entirely different.

The new plan provides that, instead of selling the premiums, they shall be given away free. This change has been made in order to avoid any further disturbance or worry. The premiums will be given away gratis to all persons who are willing to accept them. In this way, the whole system is being converted into a profit-making one, and the old system is being done away with.

Bell, of the company, is said to have been quite pleased with the change. He said that he believed the system would be a great success, and that the premiums would be given away gratis, and transferred for general use.
ENGINEERING COUNCIL TO START BIG CAMPAIGN SOON
(Continued from page 1)
The American Institute of Electrical Engineers, American Society of Civil Engineers, Harvard Architectural Society, and a number of other scientific organizations have been asked to subscribe to or to send to the Committee on Public Health Administration in Rural Districts. Dr. D. R. Hildreth, Dr. E. H. Irwin, President of the Medical Society of Massachusetts, and Mr. William H. Rowland, President of the Massachusetts Institute of Technology, are among the list of subscribers.

A 400-foot "Essential Activities of the Board of Health" will be open to the public at the Boston School of Health, 136 Fitchburg Street, at 2:05 p.m. on May 30, under the direction of Dr. E. T. Casson, Director of Health.
