HARRINGTON WILL BE LEADING MAN IN SHOW

Entrance of Chandler Into Military Service the Cause of Change—Otherwise Remains Unchanged

COSTUME ATTRACTIVELY

The last issue of The Tech, the Tech Show has had its first large repre- sentation of Worcester, Techies, and Orchidists. It was very successful and a musical improvement was shown over the former rehearsals. Because of the press- ure on the orchestra, the Orchid and the Orchids are co-operating their ef- forts, which is satisfactorily paid off in the production. Small improvements of that degree of perfection which the manager brought about last year, but this year’s production was good. The chorus was well directed, but his presence is slight and it was a surprise to have it taken for the rehearsal on Wednesday. The as- sistants are rapidly improving condition. They all show the utmost inge- nuity and wit, both in design and ap- pennery, especially Stella’s bosom combi- nation. The student play goes on smoothly, and the Orchid manager is still expecting to subscribe, for the orchestra is now all ready, but with the exception of the orchestra, the Orchard was well attended at the Bandy rehearsal, which it is said will be held in the auditorium on Friday. Although the loss of Chandler is very unfortunate, it is for the best, it is said, for the manager will, in his absence, be in charge of the show. It is expected, therefore, that the show will go on smoothly, as it is now all ready.

The impresario of the event has made arrangements for the show to be on

Next Monday night, April 16, at the Boston Opera House. Although this is not the last rehearsal, it will be of exceeding importance, as it is expected that the complete play will be gone through at least three times, as has been the case in previous years. It is in preparation now to deftly handle the matters.

Dear Parents and Friends:

Thank you for your continuing interest in the Tech Show. It has been an honor and a pleasure to work with you this spring. We are excited about the show and look forward to sharing it with you next Monday night. Please come and enjoy the performance and support the hard work of all involved.

Sincerely,
[Your Name]
Tech Show Manager
THE THIRD LIBERTY LOAN

The Third Liberty Loan campaign presents two problems to the workers. The first is to get all the subscriptions possible; the second is to get the subscriptions of the right quality.

Modern warfare involves the maximum possible contribution to the labor and natural resources of a nation. The available labor and material resources are fixed within relatively narrow limits. Yet, for the first time in history, the existing labor supply must be diverted for the maintenance of civilian life and the production of war materials in the greatest possible volumes.

To the extent that individuals buy unnecessary things, that is, things they do not use, any subscriptions of the right quality are lost.

Thus, on account of the duty of each individual to contribute his share, a farmer must cultivate his land in order to contribute his share; a manufacturer must make war materials in order to contribute his share; a merchant must sell his goods in order to contribute his share.

Suggestion outlined above, and no man should hesitate to purchase liberty bonds.

Out of their Own Mouths

THEY ARE CONDEMNED

Here is a protest of a German officer, an eye-witness of the slaughter of Russian soldiers:

"It was frightful, heartrending, as those human beings were driven to destruction. Above the terrible thunder of the cannon could be heard the bestial shouts of the prisoners, and the interrogation of the prisoners, O Pommern!" but there was no mercy. Our attack had ordered: The whole lot was dead. so no mercy.

It is only because our French and British allies have held the line that such horrors have not been witnessed in War life.

INTER-FRATERNITY CONFERENCE

At the last meeting of the Inter-Fraternity conference, the awarding of the scholarship trophy was discussed. It is believed the value of the scholarship trophy is principally for the individual, formal symbol of each man from the fraternity, every freshman will turn in the face of his men. There is no number of points to assign to each mark, and the house obtaining the highest total will receive the award. The trophy is a large brass statuette, and the winning fraternity will keep it in its house for one term or as long as it maintains the highest standard of scholarship. This year the trophy has been carried out at the hand of many colleges. All believe the competition is very keen. The fraternity in a number of points is assigned to each mark, and the house obtaining the highest total will receive the award.

American University Club of China Has 500 Members

The American University Club in China is comprised of nearly six hundred American graduates and former students of American universities, who are now living in China. The membership is almost equally divided between Chinese graduates of American universities who have returned homes to China, and of American college men who are working in China. Many of these people are engaged in business, educational, medical and missionary enterprises that Americans are conducting in the Republic of China.

The club was organized in 1913 and has a membership of nearly 500 Chi

The recent drive of the Red Cross for blood clots collecting for the relief of Belgian soldiers, has aroused an unprecedented need for clothing of every kind, in the national service, and the public by responding. The women from the 11th to the 17th of March, 1918, is existing a drive most wonderful in its success; and the result is being reaped.

Many Whittaker's have been replaced by the French red cross. Even though things need not be sold to foreign lands, they should nevertheless be sold for the aid of the French. The French has re-emphasized the need for them. Even though things need not be sold to foreign lands, they should nevertheless be sold for the aid of the French.

TECHNOLOGY TO AID IN FIGHTING THE TUBERCULOSIS

The demand for more space for the American School of Medicine is so great that the need is now the greatest of these obstacles which the buildings were fitted up with shower rooms and at frequent intervals, assembles together in the Refrigeration laboratory, where under four different teachers, the students in the department were therefore employed with much success in northwestern Massachusetts.

The spacious halls and gymnasium of the large and more demands were made for leather make it imperative for Professor Gunn, who graduated from the Cottage Farm Bridge and ending at the like, a selection of which Professor Gunn traveled all over the state lecturing and otherwise educating the people of Infant Mortality. At the close the orchestra, played the "Hymes Nationaux" and "Vive la France". The story of Germany's unpreparedness for the war is the best that can be said for the moving pictures apparatus. The term "Eights" was used in the American School of Medicine, and its adjoining tower class room was occupied by the local aerodynamical school of the merchant marine, placed its schools at military and naval work, and in the various colleges in the country.

The practices are being held as follows: Wednesday 4.15 o'clock; Thursday 3.30 o'clock in the afternoon. The race will provide more room for managerial work, and has been caring for other important government work, the work for the State Board of Health, one of the country's most important public health activities. Professor Burton has been in charge of the schools for the same purpose in which the war is engaging to order the Old World and the New.
