PERO '19 DIES IN SEAPLANE CRASH

The Philadelphia Inquirer

SEAPLANE CRASH

INDIANAPOLIS

Another very large group of men have graduated from the first class of the United States Shipping Board training school for marine engineers at the National Institute of Technology, in the control of the Navy Department, and are now on active duty in the United States Navy. Men who have been trained in this school are now serving in the Navy, and will continue to do so as long as the Navy exists.

One of the graduates, William H. Jones, a native of Illinois, entered the school in 1920 and graduated last year. He has been assigned to the aircraft carrier "Yorktown," which is now operating in the western Pacific. He is one of the 12 pilots who have been trained at the school.

Another graduate, John A. Condon, of Massachusetts, entered the school in 1921 and graduated last year. He has been assigned to the aircraft carrier "Lexington," which is now operating in the eastern Pacific. He is one of the 12 pilots who have been trained at the school.

The third graduate, John B. Reed, of Maine, entered the school in 1920 and graduated last year. He has been assigned to the aircraft carrier "Enterprise," which is now operating in the eastern Pacific. He is one of the 12 pilots who have been trained at the school.

These schools are graduating at the rate of 12 men each month, and will continue to do so as long as the Navy exists. Men who have been trained in this school are now serving in the Navy, and will continue to do so as long as the Navy exists.

The United States Shipping Board has established the United States Training School for Marine Engineers, which is now operating in the United States. Men who have been trained in this school are now serving in the Navy, and will continue to do so as long as the Navy exists.
Publications have been a week around the year by students of the Massachusetts Institute of Technology.

Columns have been added this year in the following order: Babcock, Workman, and Roberts, Visiting Professor of Chemistry. Babcock has been active in the School of Chemistry and has been in charge of the work in that department.

The Symbol of Efficiency, for users of
EXPLOSIVES
EFFICIENCY of methods and the selection of
proper materials will achieve success in any engineering work.

The selection of explosives is a most important
procedure and largely determines the progress of the work,
the safety of employees and affects the cost of
operations.

For the graduate engineer, there is one way to
avoid the improper selection of explosives,—state the conditions
governing prospective blasting operations and ask us for recommendations. You are sure of
obtaining practical data from those having a wide field of
knowledge and therefore knowing the particular explosive
best adapted to your work.

Over 100 years' continuous progress in powder making is an
assurance of the competency and efficiency of DU PONT
EXPLOSIVES in any engineering work.

ONE EXPLOSIVES CATALOG is in circulation. Obtain a copy from your usual Du Pont representative
or apply for recommendations.
