S. A. T. C. INFORMAL GUARD-MOUNTING

CHICAGO EDITORIAL ON S. A. T. C. IN THE WEST

The informal editorial, which has been taken from the Chicago Herald-American, shows the status of the S. A. T. C. in the western colleges. It points out the need for training students in the military arts.

The student Army Training Corps has proved an interesting experiment. It was a paper scheme, an impulsive motion, not a logical plan. It has not fulfilled the anticipation, but its results have been splendid. It has proved to give growing numbers in military science and in modern subjects. It has worked along lines on the site of a healthy recreation with educational documents.

For technical reasons, non-military students, engineers, students of technical subjects, have been too much a failure. The men who are the best of their educational work in other departments have found that they have little time for study. A good number of men of this sort are already desiring to take this work any work at all. They are discovering how much more satisfactory the regular courses are to them.

"The National Association of State Universities, which has just met in Chicago, recommends a reinforcement of military training in colleges by January 1920, and in the future, the work will be at the college level. The men who are the best of the educational work in other departments have found that they have little time for study. A good number of men of this sort are already desiring to take this work any work at all. They are discovering how much more satisfactory the regular courses are to them.

The demand for technical students is increasing, and the educational work in other departments has been reinforced.

ROUNDS TO LECTURE

Professor Robert S. Eager of the English Department will lecture on "War, Peace, America, and Allied Nations."

his lecture will take place on Thursday, November 15, at 8:30 P.M. in the auditorium of the university. It will be open to the public.

FACULTY MEETING IS HELD ON THE 20TH

No Final Examinations Will Be Held Vacation To Last From December 24th to 30th. One Day For New Year.

SPECIAL COMMITTEE APPOINTED

The length of the holidays and the fact of examinations was determined by a special meeting of the faculty and the president of the university. The first term will end on December 24th, and the second term will begin on December 30th. The S. A. T. C. will not be permitted to take part of the holiday, unfortunately. The first half of the term will be given over to the first half of the vacation, and the other half of the term will be during the Christmas vacation.

S. A. T. C. DISCHARGES UNNECESSARY

There has been a rumor around the city that a course in the S. A. T. C. would be discontinued in the next academic year. The S. A. T. C. has been in existence for some time, and it is not now necessary that it should be discontinued. The S. A. T. C. has been in existence for some time, and it is not now necessary that it should be discontinued.

COLONEL ROBERT T. COLE

received his commission as a second lieutenant in the 9th Infantry in the Spanish-American War in 1918.

EXTRACT FROM LETTER RECEIVED FROM PRESIDENT MACLAURIN, NOVEMBER 20, 1918

"It is of utmost importance to preserve the morale of the men and get them to settle down as quickly as possible to serious academic pursuits. Orders have gone forth from the military authorities to keep the military work very strictly within the hours assigned, and not to impose any kind of duty that will conflict in all with academic requirements. It seems to me that not a day should be lost in placing before the students and faculty a clear understanding of the fact that the return to peace conditions must be made as speedily as possible. The students should understand that the motive before them is now the ordinary academic motive of working for a degree, and the faculty should bend its energies to the task of modifying the courses so as to minimize the difficulties of the transition."
THE TECH

"WHERE DID YOU GET YOUR FACTS?"

T HE spreading of idle rumors in the S. A. T. C. has reached the proportions of a public menace. Excessive reports of the worst sort have gained circulation, regarding the possible time of disbursing of the units, and similar questions. The natural excitement accompanying the slipping of the armistice has grown into restlessness, despite the definite announcement that academic work must now be put first.

It is up to every man in the unit to handle his technical work in a professional manner, regardless of whether the S. A. T. C. may be discontinued; his future career may depend on his present exertions.

Concentration on the job in hand has been badly hampered by the fertile cross of "lairine rumors" which is undermining the morale of the Post. While it is possible that some of these may be strictly true, the majority are trite to trifles whose names are mentioned on the lips of other persons.

The plain duty of every man in the organization to help cut off these careless words, whether starred silly, or with malice aforethought.

If some one can relay such a report on you, come back to him with the answer that exposed the "Huns" propaganda.

"WHERE DID YOU GET YOUR FACTS?" Trust that remark to the man who made it. It will be more effective than any protest or else a rank perversion of some chance remark, let drop from 'the inside.

This sort of thing can be stopped by the men in both the Army and Navy refusing to be gulilified as heretofore. Not notify the individual members of both units to return to a normal state of mind over the work of the Institute on go at once.

Let public opinion once direct against the men who are crusading enough to believe all he says, and thuggish enough to exaggerate, and the present dangerous unrest will quickly disappear.

YOU CHANCE

T HE men in the M. T. Cavitations are offered the chance to make up their noticeable deficit in contributions to the War Chest Fund. Contributions will be accepted at the Bar- ner's Office. Come on, you men who did not give anything at all. Here is your chance to erase the bad name that you have given the Retiation.

THE TECH

NEVER before in the history of the Institute has the faculty shown such sympathy for the students who were driven out of their homes by the recent rumors of an impending war. The faculty and the students are now working side by side to save the students from being used as a bait in the political struggle of the world, and to make it clear that the faculty do not sympathize with them. There is little doubt that Technology will have to face this situation, of the world's universal sympathy for the students sooner or later and make a fresh start; that is, begin the term over.

The point is, however, that in the very short time the work was started were made now in January. There would be little objection to this arrangement, as few of the men have put through much more than a superficial smattering of their courses.

NAVAL AVIATION SHOW

As a courtesy and complete climax to the series of lectures given by the men of the army aviation flight, Flight No. 2, this week, on Tuesday evening in Boston, it is requested that copies of the list of the Naval Aviation Detachment, as the last copy in the Armament Institute, be passed out to the students of all the Institute. Please do not crowd, but do see that all leaves are passed out.

There is absolutely no necessity that the students should be crowded. Last week large numbers of students were crowded at the end of this same show. This week the faculty will see that more than a few days interval is allowed before this same show is again repeated.

THE STAFF will give, in good time, the necessary leaflets to every student of the S. A. T. C. The students who are interested in the subject, as has been promised, are not to have an additional expense incurred on the taking of these.

The Institute will be glad to give, in good time, a card to any students who are interested in this subject, subject, and who have the necessary leaflets, by paying the cost of postage at the rate of one cent a copy. Issues mailed to students must now be put first.

THE spreding of idle rumors in the S. A. T. C. has reached the proportions of a public menace. Excessive reports of the worst sort have gained circulation, regarding the possible time of disbursing of the units, and similar questions. The natural excitement accompanying the slipping of the armistice has grown into restlessness, despite the definite announcement that academic work must now be put first.

Col. Cole Evans, MORALE WE KEEP

Charles A. Evans, who has been in the house of Mr. and Mrs. Frederick Hol- lins, of Washington, D. C., since his return from the War, came from Hospital, China, 19 days ago to be married to Miss Viola M. Lincoln, daughter of Mr. and Mrs. William J. Lincoln, of East Boston.

The couple left Cambridge and Worcester early on the 19th, and after Visiting Lincoln College had, and after Viola completed her studies in and by she and her bride will return to Boston.

Viola Koe is a graduate student in the field of English literature. She was graduated from the Tufts University in the field of English literature. She was graduated.

"Yesterday we received a letter from the Post of Honor, 1113 or 260 of the AFRS Engineers, giving particulars of an incident of its personnel of Oct 4. It was lost with artillery fire on Oct 26th to the College Cemetery, Sandwich, do not receive his letters, his connection with he can ask."

"We are over many—our job is a continuous one because it is our duty and we must also be educate ourselves for the high sense of duty that we do.

While there he was much interested in the activities. He was a substitute on his class football team and rowed on the class crew.

1918, was made Associate Editor.

At the time of the reports on "The Tech" (April 4, 1910), and the other publications organized and conducted by him.

Exposiles to Dyes

The evolution from explosives to dyes is the logical development of the dyestuff industry from both a chemical and engineering standpoint.

First, the explosive manufacturer starts with the necessary raw materials. In his manufacture plants he produces the bases which are required. The immense output of his acid plants is at his disposal.

In his chemical factories he manufactures many of his principal intermediates.

He has at his command unaequaled plant and laboratory facilities for the production and development of the intricate by-products of the coking industry, equally useful in the making of military high explosives and in the manufacture of dye intermediates and dyes.

His chemical and engineering organization has had long training in the olefin related explosives industry and is able through the experience gained to overcome difficulties which would be insuperable to others less fortunately situated.

As the world's largest manufacturer of explosives the Du Pont Company enjoys these advantages to an unusual degree. It has already made possible the laying of a broad and secure foundation and the development of dyestuffs of the greatest commercial and industrial importance.

It is the strongest guarantee of the permanency of our understanding and of the final incorporation of the dyestuff industry from foreign domination.
The only way of getting things across to the University Union is through the courtesy of men going over. We urgently ask that those who can take anything from a pair of socks to a trunk over with them to get in touch with us.

JOSEPH WARREN HOMER, JR.
(Continued from page 3)

blown eighty miles south, landing for a few minutes on the north coast of France. He steered home by compass, landing within two miles of his destination. In August he was transferred from Falmouth, England, to a station near Edinburgh, Scotland, and was made third officer of one of the largest airships, a "Virgin" about 600 feet long, and since then had been flying out over the North Sea. Having established a reputation as an all-round naval airship pilot, he was last month sent to London Headquarters where, according to a letter to his father written October 25, he was "taking a course in structure and design of airships," and hoping "to get on to the Staff and feeling "fit as a fiddle."

He was the only son of Joseph Warren and Constance Homer of Brookline. He leaves his parents, two sisters, Mrs. Edwin S. Parker of Jamaica Plain, and Mrs. Richard W. Crocker of Brookline, and hosts of loving friends.

He held his course high o'er the restless deep,
His boon companion was the morning star
He watched; and now the stars his vigils keep-
His flight is winged to where all heroes are.
