TECHNOLOGY SMOKER PROVES BIG SUCCESS

School Spirit Awakened. Naval Aviation Band Plays. Mr. Beaugard Leads Songs. Smokes and Eats Distributed

PRESIDENT MACLAURIN SPEARS

Technology turned itself loose last night, when over 1300 students attended the largest smoker ever held at the Jeanette. Speeches were delivered by the leading members of the student staff, and music was rendered by the Naval Aviation Band stationed at Technology. Enthusiasm was at its highest, and the spirit which this event awakened was reinforced with a sense of the propriety in having something so much that as the close of the smoker a strong vision of the most popular of the classes of 1921 and 1922 for the possession of a vote banner.

The affair spread at 4:30 with a warm

by the band. This was followed by a speech from President R. C. Maclellan, in which he expressed the hope that now the S. A. T. C. was to be disbanded the students would immediately get back to normal conditions. He also stated that he thought the experience of the S. A. T. C. would be of the most good amount of good. He then presented the Gold medal to the five members of last year's freshman class who had above the greatest improvement physically since entering the college.

A. L. Benson then gave the shipyard prizes. It is noteworthy that E. F. Stone won both a Civilian and a shipyard prize. The first prize in one group was won by W. C. Wilson, while Frederick W. Gilbert won a prize from each of the three shipyard groups. Next meet Dean Barton, who told the students the activities at Tech-

The New England University will hold a rival to meet today in the Tourney for the baseball game of the season at Harvard. This will be the first time that a Tournament game has been played against New Hampshire College.

The Band of the New England University is expected to complete the exercises of the season this afternoon against New Hampshire College.

Wednesday's news that the S. A. T. C. is to be broken up came like a thunderbolt out of a clear sky, at a time when everyone was resigning himself to the idea that the unit would hold together indefinitely. The first idea that entered everyone's head was what he would do when he received liberty. The second idea that we want to put into his head is that in a few days he will be no longer a member of the S. A. T. C., but a Technology man. It is up to him to act as a Technology man to get the college spirit as quick as possible.

There has been no college spirit or college life here since the war. The whole medal at the mess hall could be combined into one place, and the activities in all the others has dwindled.

Although communications may be published unaltered if requested, the author of the letter is bound to the Tech, assumes no responsibility, however, for the facts as stated not for its opinions expressed.

The Editor-Chief is always responsible for the opinions expressed in the editorial columns, and the Managing Editor for the matter which appears in the news columns.

MASSACHUSETTS INSTITUTE OF TECHNOLOGY
CAMBRIDGE, MASS.

Formation of a class will be sooner than ever in the past era that is opening and in many fields of endeavor young men and women will be most seriously handicapped unless they have been well trained in the application of science to practical affairs. What Thomas A. Edison once a few years ago is expected now: "We have not enough men whose training has been such as to enable them to cope with the actual conditions of life." It is the Massachusetts Institute of Technology I mean it is doing that and meeting the needs of America." No time may be lost in meeting the new needs. The Massachusetts Institute of Technology will admit a new class at the opening of the next term, December 30, 1918, instead of waiting until the fall of next year. As an emergency measure the course required will be condensed and a certificate granted, and the full four years' studies shall be considered as completed.

Order your new
Raynite Top—now

Have its guaranteed protection against rain, snow and hail for the winter motoring season, if possible. At least make sure you will have it for next spring and summer. The top maker is a mighty busy man. He will be unable to fill all the orders offered him.

With new cars impossible to obtain, the millions of used cars must remain in service. So many of these require new tops to make them sightly and serviceable that only those ordered at once can be supplied. Prompt action enables the top maker to plan for labor and materials that will be difficult to obtain later—it is sure getting the top material you should have.

Walls of Company B especially for the occasion and they will be exhibited at next Wednesday's TECH, lack of space preventing their reproduction in the present issue. After Aker's song, which was one of the many hits of the evening, many Henry Dooley, and Freda Britton, in "Old Boy" and "Young Little Quacker Wog."

Mr. Henri F. Bousquet, first song leader of the North Atlantic Squadron from the U. S. S. Pennsylvania, then led the crowd in singing starting with the "Star Spangled Banner," and ending with the "Stein Song." Mr. Bousquet "popped" up the Technology students as they have never been "popped" up before, and their singing was the best ever heard at Technology. Mr. Brown said that the "Star Spangled Banner" was sung the best he had ever heard it.

After the singing, Angora's, violin, cello, and ice cream were served to the enthusiastic crowd.

Writing was led by H. A. Hering, Scott Wells, and E. O'Hearn.

CAPT. BRAINARD'S STORY

(Continued from page 1)

A short time the man becomes hideous in time, to take it as part of the game. The Capt. said that never was he so happy in his life as when he was in artificial conflict. With a few more nips the talk came to an end, and the
