British educators meet at Technology

Sir Henry Miers Speaks To Assembly On "The Organization Of Engineering Education In Great Britain."

JOHN F. HAYFORD PRESIDES

The program as arranged by Professor A. E. Brown was held yesterday with a session at the Institute. Professor, John H. Hapgood, president; Professor C. M. Stoughton, vice-president; and Dr. S. C. Mead, secretary, were present. The meeting was called to order at the Institute.

T. H. A. HOLT MEETING

The customary Senior Portfolio will be held last Saturday night at 6:30 in Room 210. It is suggested that the activities listed on these should be distributed among the members and that not more than 2 or 3 of the activities should be used by each student. It is further suggested that each student submit his portfolio to the board. Competition for assistant editorships will be open to anyone, and it is expected that the volume of the paper will be increased by the additional personnel.

British educators meet at Technology

The musical clubs are proving themselves to be a source of great joy and amusement, with the added interest of their activities being of a social nature. The clubs have been functioning for some time now, and there is a good deal of interest in their work. Most of last year's staff and cast have returned to their old places, and there is every indication that the musical club will continue to flourish.

Despite the fact that every member of the M. L. A. S. is not in technology at present, a meeting was called for Tuesday, December 9th at 6:30 in Room 210, and all activities are present. The activities listed on these should be distributed among the members and that not more than 2 or 3 of the activities should be used by each student. It is further suggested that each student submit his portfolio to the board. Competition for assistant editorships will be open to anyone, and it is expected that the volume of the paper will be increased by the additional personnel.

SOCIAL LIFE AT THE INSTITUTE.

The idea of the Army and Navy running dances is a very good one. There never has been enough social life here, and it is high time to start the ball rolling. The Dominant dances last year were the first thing of the kind. That they were well appreciated there is not a doubt. This sort of thing will not interfere with the studies because the men here will get some recreation of the kind whether the Institute runs it or not. It would not be a bad move if some Monday night proseus and freese talks were started. There are any number of good men who are always glad to come and talk to Technology men, and when there are prospects of elder and doughnuts, there is generally a good crowd out. The Walker Memorial will be open soon, and All Technology Females held there would be mighty popular. Anything that can be suggested that will tend to get the men together where they will know one another better deserves consideration.

A USELESS ORGANIZATION.

The Inter-fraternity conference held an informal meeting Tuesday night and as usual they were half a year behind the times. They granted the Fraternity permission to begin rushing with out stopping to consider that about half the Fraternities have been rushing men ever since school began and some during the summer. The Inter-fraternity Conference has amounted to nothing in the past nor has it ever accomplished anything worth mention. The Institute is fortunate in being free from any complicated rushing regulations over which it would be a function of the Committee to stand the jealons guard, nor do any of the Fraternities seem to have any anxiety to be bound down bery. The merit is that the Institute has no need for the Committee and would not miss it if it should go out of existence.

Now that the men are together in the barracks it will be well to hand out election papers for the class elections, as it will be much harder for the men to see each other when they are distant from the courts. The elections should come as the very beginning of next term so that the officers can get things going again.

How about having Technology going into inter-collegiate baseball? It was decided that crew should be made a major sport at the Institute and football is a sport that we would not take too much outside time during the training season. There is plenty of material at the Institute every year for a good team.

THE TECH regrets to announce the resignation of Maxwell K. Brunnick '21, as Circulation Manager. He expects to remain away from the Institute until next fall because of ill health. THE TECH takes this opportunity to express its appreciation of Mr. Brunnick's services, and hopes that he will be with us again next year.

PERSONALS.

In the last issue of THE TECH a letter appeared telling of the expectations of the Tech women. The following picture of Mr. was taken recent.

CAPT. G. B. SMITH '18

TECH FIELD ON FRIDAY

The Technology Women's Association held its first meeting of the year Friday afternoon at 4:30. The purpose of this meeting was to nominate Mrs. Richard's birthday. The presidency was then given to Prof. Robert H. Richards, the first woman student at Technology and it was always appreciated there is not a doubt. This sort of thing will not be held behind.

NATIONAL DIRECTOR EXPLAINS WORK OF THE S. A. T. C.

The first authoritative statement of the main duties of organization and the student-organization of the Student Armed Training Corps in five hundred American Colleges was made by its national director, President Elwood McInnis of the American University Association, December 6th at the Harvard Military School. In his address, President McInnis stated the difficulties that lie in the way of a successful organization and showed that it was obvious that the present state of the country in regards of any organized body for the time bein. The full text of the speech will be published in the December 31st issue of THE TECH.

Order your new Raynite Top—Now

Have its guaranteed protection against rain, snow and hail for the winter motoring season, if possible. At least make sure you will have it for next spring and summer. The top maker is a mighty busy man. He will be unable to fill all the orders offered him.

With new cars impossible to obtain, the millions of used cars must remain in service. So many of these require new tops to make them sightly and serviceable that only those ordered at once can be supplied. Prompt action enables the top maker to plan for labor and materials that will be difficult to obtain later—its insurers getting the top material you should have.

RATYNTITE

In selecting a top material, remember the reputation of the manufacturers and the protection Raynite Fabrikoid is a tal. A product of E. I. du Pont de Nemours & Co. Wilmington, Delaware, It is the only top and curtain material specifically guaranteed for one year, during which time we warrant it not to leak, crack or peel. Made in single and double textures and built to last the life of the car, it retains its shape, color or material. Our guarantee is a mighty busy man. He will be unable to fill all the orders offered him.
