

## J. P. MUNROE '02 SPEAKS ON "RECONSTRUCTION"

Tells Third Term Men of The International, Socialistic and Labor Questions Which Have Been Outcome of the War,—Last War Issues Lectures of The Term

## ENGINEERS HAVE GREAT OPPORTUNITY

James Phinney Munroe, '82, lectured Monday to the upper-classmen of the War Issues course on the subject of reconstruction. All the men at the Institute were invited to attend the lecture, which was the last one of the present term. Mr. Munroe is one of Technology's most prominent graduates, and talked thoroughly and knowingly on the status on which reconstruction at home and abroad must be accomplished in regard to Socialism, the labor question, international relations and the other modern war problems.

Mr. Munroe said that the close of the war has seen a great change in conditions due to the overcoming of organized brute force by unorganized right and justice. The task before the world had just begun with the termination of the war, he stated. Reconstruction, according to Mr. Munroe, must be modern and permanent, and it is up to the young men to do it right. He went on to say that this is the day of new things and great opportunities are opened to engineers. The lecturer praised the work and spirit of the men of Technology in the war and went on to say that they had established a nation-wide reputation for the Institute which must be lived up to by all future graduates.

The United States is just as unprepared for peace now as it was for war in 1917, he said, but demobilization will be accomplished just as surely as the war was won. The physical reconstruction of Europe is our next important problem, the lecturer explained. He told of the immense role played by

(Continued on page 3)

## MAY LOSE STATE AID

New Law Affects Massachusetts Scholarships at the Institute—May Be Entirely Discontinued—Those Granted Last Summer Will Be Good During Next Term

Technology may be deprived of all aid formerly given in the form of scholarships by the state of Massachusetts as the result of a law recently passed in the state legislature. Just what the eventual result will be to the Institute has not yet been determined and Dean Burton stated that at present there was no information as to whether or not the money already granted would be taken away. It is certain, however, that until some definite decision is reached, all new state scholarships will be held up. Regarding those which were granted state scholarships last summer, the following announcement has been made: "Students who last summer were awarded whole or half state scholarships, will be credited with full or half tuition at the Institute for the balance of the term. These same students will be credited with full or half tuition for the first period of next term."

Try-outs for those men who wish to take part in the novelty acts in connection with the musical clubs will be held in room 10-250 tonight at 6. All men who can sing or entertain in any way should be present.

THE TECH circulation department needs managers for publicity, distribution and sales. Competition for these positions is now open. All men interested should hand in their name and vacation address at the Tech office or report to Scott Wells before leaving the Institute for the Christmas recess.

## TECH SHOW PROGRESSES

Many Positions In Cast Open To Freshman Competition—Smoker Will Be Held January 10

The management of the Tech Show now has some scenarios in prospect, but more are wanted. Remember the greater the number of writings to choose from, the better chance of a record breaking Show. Complete scenarios are desirable, but merely suggestions for situations will be most acceptable, and due credit will be given for any incorporation.

Concluded on page 4

## TRACK WORK CONTINUES

Winter Schedule Partially Arranged

Practice on the outdoor wooden track on the athletic field started on Monday. The track was laid last week by the members of the track team, as the Institute could not furnish any men to do it. Coach Kanaly wishes to thank all men who helped to lay the track, for without it, there could be no practice, and no winter season. The weather conditions were also favorable, as the snow cleared off, and the bed of the track could be arranged better.

Coach Kanaly said that the coming winter season has the outlook of being one of the most successful in the history of the Institute. There will be no vacation at the end of January this year, so that the track men will be able to practice uninterruptedly after Christmas. For that reason, he wishes all men who are out now to lay off completely during the vacation, and get a good rest. The biggest event will be the B. A. A. meet, which will take place the first Saturday in February. Lowell High school has challenged a freshmen team to a meet, and arrangements are under way to hold meets with Phillips Andover Academy and possibly Lynn high school according to Coach Kanaly. The real opening of the season will be next term, but the men will continue to practice the rest of this term, so as not to get stale. Coach Kanaly expects a lot more men to come out after January 1st than are out now, as a number of men are expected from the S. A. T. C. and the Junior freshmen will turn out quite a few men.

## OFFICERS OF NAVAL AVIATION TO GIVE DANCE IN WALKER

A dance, at which many of the officers of the First Naval District will be guests, is to be given in Walker Memorial Friday evening by the Officers' Club of the Naval Aviation Detachment stationed at the Institute. No pains have been spared in decorating the hall for the occasion. Countless navy banners of every description have been used as well as various bits of aviation apparatus which will be on exhibition during the dance. Unique colored lighting effects will be used to obtain fanciful designs with which to decorate the walls and ceilings which have not as yet been completely refinished by the Stone and Webster workers. Banks of evergreen will divide the spaces between the pillars into booths, which will be used as little compartments in which refreshments will be served.

Ensign Paul C. Warner, president of the Officers' Club, has appointed Ensign Botta as chairman of the committee in charge of the dance. The rest of the committee consists of Ensigns Wood, Bryant, Wigglesworth and Dietrich.

## NAVY UNIT DISBANDED

Entire 250 Men Given Transfers To Inactive Duty In One Day

Some May Arrange With Institute To Live in Barracks—Transportation For Sailors Good Until Midnight December 21—Last Night On Active Duty Takes Form of Entertainment

## WHAT YOU ARE SIGNING FOR

On nearly every bulletin board of the Institute there has been posted a copy of the petition from the undergraduate body to the corporation urging them to levy the student tax this next term.

The student tax was founded by the class of 1917, and was accepted by the corporation to be made compulsory with all classes entering in the fall of 1917 or thereafter.

The total tax for the year was to be eight dollars, to be distributed as follows: \$2.50 for Athletics; \$3.00 for the support of the Walker Memorial; 73 cents for Class dues; 17 cents for Institute Committee; \$1.00 for health insurance; 60 cents for the contingent fund. The payment of this tax was to be divided between the two terms, \$4.00 for each term.

As the Walker Memorial was not open to the students last year, only \$2.50 a term was charged, and this year due to the organization of the S. A. T. C. the tax was omitted entirely.

This next term, however, the Institute will return to its normal conditions, and the money is needed to start the student organization.

If the corporation decides to levy the tax, it will probably be proportioned according to the length of the term, say 22-30 of the total amount, and such items as will not be needed, such as the health insurance, if no doctor can be found, or the Walker Memorial fund, if that building is not ready for occupancy, will be deducted. If the Walker will be ready in March, probably only half of the amount allotted for it will be deducted.

## TECHNIQUE CALLS

Announces Competitors For Positions on Both 1920 and 1921 Book To Be Held Monday, January 6—Trials Open To All Classes

Competitions for positions on the staff of Technique 1920, open to all members of the three lower classes will be held on Monday, January 6, as the result of a vote taken at a meeting of the Technique board last Monday. On the same day, a sophomore competition will be held for the business staff which lacks several business managers and from the men who are successful in this competition, the business manager, treasurer and two associate business managers for Technique 1921 will be chosen.

Technique 1920 announces several vacancies on its original board which include the editors of several departments and two assistant art editors. These must be filled from the present Freshman, Sophomores and Juniors and all men interested in any department of Technique should report for information at the Technique office in the activities building at 6 on Monday, January 6.

In addition to the offices to be filled, the Technique 1920 board has decided to run a competition in order to pick five assistants to the editor-in-chief from each class. It will be the duty of these men to represent their classes on Technique. This policy was adopted in accordance with the principles of the Technique 1920 board to make Technique 1920 a book representative of the entire Institute and not merely the junior and senior classes.

All of the 250 members of the United States naval unit at the Institute received their transfers to inactive duty at the headquarters of the first naval district in the Little building yesterday afternoon. The official announcement that the unit was to be demobilized on Tuesday came last Saturday after various rumors had been circulated among the men. Physical examinations, as required by the navy authorities before a man can be placed on inactive duty, began Saturday afternoon and were finished Monday. The men were required by navy to leave the barracks in building 1 by 2:30 yesterday afternoon but it was possible for those men who so desired to make arrangements with the Institute to occupy a bed there until the end of the term.

Formations and military work for the men went on as usual on Monday, but instead of the usual study room at night, the entire unit was marched to room 10-250. Here some \$25,000 for subsistence during their stay at Technology was signed over to the Institute by the men. It was the original plan to have the men study while waiting to sign their checks, but after all had marched in, the spirit of excitement proved too strong for concentrated work, and Chief MacAnulty, who was in charge of the room at the time, granted permission for some entertainment.

The entire unit sent out a call for Meyer Saxe, who since his attempt to sing "Sister Susie's Sewing Smirts for Soldiers" on a challenge at the Technology smoker has become the leading soloist of the navy, and with Purington at the piano, he responded with two songs. The quartet next came forward and entertained with some of the songs which it sang at the Navy smoker.

In the midst of the merriment, Ensign Bailey appeared just as a parody on "Smiles" which belittled the mess hall eggs was being sung. The command "attention" broke up this party for the time being, but after some 700 checks had been signed permission was again granted and the entertainment renewed. After the work of check signing was completed, the study hall closed with songs by the quartet and a general singing of Technology songs. Before the companies fell in to march back to the barracks, Technology cheers were given for all the officers of the unit.

Tuesday morning, the regular routine was interrupted in that the breakfast formation was at 6:15 instead of the usual 6:45. Another formation was held in Dupont court at 7:15, after which a general cleaning up of barracks took place. Sea bag inspection followed and at 10, the entire battalion assembled in

(Continued on page 3)

## LATIN-AMERICAN CLUB TO BANQUET AT WESTMINSTER

The Latin-American Club banquet at the Hotel Westminster next Saturday bids fair to be a great success. It will take place at 7. Most of the Latin-American and Spanish clubs in the vicinity are to take part, but the whole affair is to be under the auspices of the Technology organization. President de Zubiria will act as toastmaster; other officers taking a prominent part in the ceremonies are Vice-President Galt, Secretary Valdez and Treasurer Rodriguez. The meal will consist entirely of Spanish dishes, and all the speeches as well as the conversation will be carried on in Spanish. Music will be provided. As a special feature, the various consuls of the Central and South American countries in Boston will attend. The best ways of promoting interests in the Latin-American republics will be discussed. This dinner is the first of a series of functions the Technology club has planned for this season, and upon its success depends those of the future.

## COMPANY 3 CELEBRATES RELEASE WITH DINNER

Sailors Have Last Get-Together at Hotel Lenox—Entertainment Furnished by Members of Company Under Direction of Student Commander P. B. Bucky—Affair Kept Secret From Other Companies

## ALL OFFICERS OF UNIT ATTEND

Company 3 of the Technology naval unit celebrated its transfer to inactive duty by a dinner, attended by all the naval officers of the unit, given at the Hotel Lenox last night. The affair had been planned for some time and it was originally intended that it should take the form of a last get-together for the men of the company and it was only accidental that the time for dismissal fell upon the chosen date. From the start, the dinner was kept secret from all other companies of the unit so that Company 3 holds the distinction of being the only company to hold a farewell dinner. Company Commander Phillip B. Bucky was in charge of the arrangements and a program of entertainment was given by the members of the company.

Company Commander Bucky acted as toastmaster for the occasion. The officers of the Naval Unit who were present as guests, delivered a few words to the men. The third company adopted a very appropriate coat-of-arms, a spit kit and kivi rampant, surmounted by crossed mop and broom, which was officially recognized at the dinner.

Toastmaster Bucky led the entertainment with a short introductory speech, after which Hayward, Hauber and Jacobson sang ditties, of interest to the men in company three. These parodies were received by the men with loud acclaim. Hedland, Jackson and Hughes followed his with some musical selections, after which the speakers of the evening were in order. Several of the officers delivered short addresses to the gobs. Miles Zoller, commander of the first platoon, spoke next, and after him Jacobson told the men of the activities here, which, he said, need the efforts of every man to help bring them back to their pre-war status. After Technology songs and wild cheering the dinner broke up.

WEDNESDAY, DECEMBER, 18, 1918

**A**THLETICS are dependent entirely this year upon the student tax. Without this source of income all the plans for big track meets with other colleges must be cancelled. The crew must give up its plans for a spring season. Our swimming team, for over two years undefeated, will be unable to defend its reputation.

Furthermore, class dues are received from the tax; the Institute Committee defrays its expenses from funds received from the tax. The failure to levy the student tax this next term spells absolute ruin to many of the organizations which are laying plans for a grand reopening in January.

What are the students of the Institute to do about this?

Shall we stand by and see athletics, class organizations, Institute Committee go to the winds?

Shall we give up all the smokers planned for next term?

Shall we be without a doctor at the Institute to look after the physical welfare of the students?

Shall the Walker Memorial remain closed because of lack of funds to support it?

The only way to prevent these calamities is to support the petition now being circulated asking the corporation to levy the tax.

You will find copies of this petition posted on nearly every bulletin board. We must have 1000 signatures before Thursday night.

Do your duty! Show the spirit, and sign at once!

### "THIS WAS THE NOBLEST ROMAN OF THEM ALL."

**A**LL Technology may well take pride in the conduct of its naval unit during the past week when, under the strain of excitement brought by its approaching dismissal, it showed no signs of a decaying morale. Credit is most certainly due to these men for restraining themselves at a time when the smallest slip would reflect seriously on the character of the Institute undergraduate body. The spirit of this was contained in a short talk by Admiral Rogers at the Liberty inspection on Saturday when he said "I am glad to see you men standing up so well—your navy training seems to have done you some good." All men in the Institute would do well to continue "standing up well" and carrying on to the end.

### KEEP HARVARD BRIDGE CLEAN.

**T**HE city authorities of Cambridge and Boston should wake up to the fact that the condition of Harvard Bridge is a disgrace to a civilized community. This bridge is one of the main, if not the most important thoroughfares between the two cities, yet it is allowed to be in a state that would disgrace a pig-pen. Now that the street cars do not run across, many people are forced to walk through filth and mud with which it is littered and get splashed by every automobile that goes by. It is time the street departments get to work. The idea of letting the bridge get in such a condition that it was unsafe for traffic and should have to be closed at such a season of the year is absurd. City officials are supposed to look ahead a little.

## PERSONALS

### LIEUTENANT ARTHUR R. KNIGHT

After enjoying a brief furlough with relatives and friends whom he had not seen for over a year, Lieut. Arthur R. Knight, '17, left Sunday night for Washington, D. C., where he is to receive final orders before being sent, with three other lieutenants, to Houston, Texas, to start a school of instruction in night bombardment. Although there are many schools for preliminary and advanced flying in the United States, there is, at the present time, no school of instruction in night bombardment.

Lieut. Knight has been flying over the lines for the past eight months, three of which have been in day and five in night bombing.

While fortunately escaping serious injury, he was for a short time in a hospital in France with minor injuries received in a crash in one air battle. His many friends in this city wish him success in his future work.

Cadet Ashley Leonard of the aviation service, has died at Souther Field, Americus, Ga., of pneumonia, following influenza. He was the son of Mr. and Mrs.

John Wood Leonard of New Bedford, and on his mother's side he is related to Mayor Charles S. Ashley of that city.

Cadet Leonard was twenty-seven years of age, and one of fifteen children, and this is the first death in the family. Upon leaving school he associated himself with the American Woolen Company, and had been with the Boston, Lawrence and New York headquarters of that concern. After the entrance of the United States in the war he went to Princeton, where he took a course in ground work in the aviation course, and upon his graduation in August, went South, where he did much flying in Georgia and Texas. Earlier in his career he had been a member of the National Guard and was a despatch rider in the motor cycle corps, serving on the Border during the Mexican disturbance.

Several members of his large family are located around Boston. A brother, Paul, after his graduation from Technology in the class of '17 remained here for service; another brother, Leonard, is in business here. Of his sisters, Hope is the wife of Percy A. Goodale of Arlington; Sally is at school in Cambridge; Ruth, also located in Cambridge is associated with the Red Cross. Mary L., another sister, is working with Dr. Richard C. Cabot's unit in France.

First Lieutenant Waldo H. Heinrichs, who had been on the "Missing" list for two months, has cabled his father, Dr. J. Heinrichs of Chicago, as follows: "Liberated Nov. 29. Feeling fine. Proceeding to Vichy for further treatment.

Home soon. Love to all and Merry Christmas."

Lieutenant Heinrichs was graduated from Denison University, Ohio, pursued Russian and other special studies at Newton Theological Institution, Newton. For a time he served as a Y. M. C. A. secretary in Hawaii and at the outbreak of the war he went to India on special service for the war work council, American Y. M. C. A. He returned in two years and was the first man accepted for special training for the United States Air Service overseas. His ground studies were taken at Technology, and he went to France with sixty picked flyers to finish training. In service, flying over the Hun lines, he won commendation and promotion. He was wounded and captured shortly after he had escaped death in a motor-cycle smashup. The Red Cross located him at Metz, in a hospital. When the Y. M. C. workers entered Metz they failed to find him, but finally a Red Cross nurse, Miss Julia Chapin of Holyoke, found Heinrichs, and the cable message came as a result.

Lieutenant Heinrichs is engaged to Miss Dorothy Peterson of Honolulu, Wellesley, '18.

The marriage of Harriet L. Lathford, daughter of Mr. and Mrs. John Jewell Allen, to Capt. Clarence Kenworthy Reiman '12, Course 10, C. W. S., United States Army, son of Mr. and Mrs. Henry W. Reiman of Newburyport, was solemnized at the home of the bride's parents in Amesbury, Saturday. Capt. and Mrs. Reiman, following a wedding breakfast, left on an automobile trip. groom is engaged in important chemical research work.

## CAN YOU ANSWER "HERE SIR" AND YOUR NAME IS N'T THERE!

The American Red Cross is announcing its Christmas Roll Call. Accompanying it is the information that money is not the object sought, but membership. The support morally, mentally and physically of the bulk of the nation is the goal striven for that the people as a whole may, through their membership in the organization, become actively interested in the great work of relief.

To win a war and win it right, requires more than mere men or money. Unless the forces which are employed in the common cause are intelligently directed, most of the energy expended will be lost. Because of its experience and the facilities afforded it by this and other governments, the American Red

Cross feels itself peculiarly qualified in its own field.

The hand of help which the American Red Cross extends across the sea is the hand of the average American man and woman. No matter where our soldiers may be, whether en route to the battlefield or crawling out of the mud of the trenches the hand is there. It reaches into the hospitals where they lie suffering, gives them medicine and cools their foreheads with the touch of kinship and love. It is the hand of the father, the mother, the sister, the wife and the sweetheart that the sufferer feels. It picks up the mutilated, and as near as man can do makes them whole. And every man, woman and child which

belongs to it is a sinew of its hand.

As our forefathers fought all enemies that this land might be a fit place in which their descendants might live their lives, so are the men now at the front now fighting and dying that future generations may have the freedom and security that we have enjoyed. And that the American people not only as a body but as individuals will fail to back them to the last ounce of their might, is inconceivable.

Last year the names of over twenty million of adult Americans were upon the rolls of the American Red Cross. Through the Christmas Roll Call the twenty million of last year should become the forty million of this.

J. P. MONROE SPEAKS

(Continued from page 1)

American engineers in building railroads, docks, warehouses, etc., in France, Belgium, Poland, and Serbia must also be reconstructed. Some of the mines in France will require three years' work before mining can be resumed, because of the destruction wrought by the Huns. The rehabilitation of wounded soldiers must, he said, be rightly accomplished. Men must be returned to their former positions and given an opportunity to obtain a better education. Men injured in the industries must be cared for by the Federal and State governments in co-operation with the employers.

Mr. Munroe then discussed the problems of reform with which we must deal. Democracy must be made safe for the world, by a free ballot system, the responsibility of the executive to the legislature, the introduction of a budget system, and equitable taxation in all forms of governments.

Socialism, he went on to say, is the next and biggest of our present-day problems. This has been a Socialistic war; the draft, confiscatory taxation, the control of the railroads, telephones, telegraphs, and cables, price fixing, and dictation of business are the dreams of the extreme Socialist, he said, and yet we have accepted them without a murmur. Socialism is going to be a fact in the future, but, he explained, do not imagine that Socialism means Bolshevism or anarchism; "Socialism is an honest and amiable thing, having a place in the world, and is a process to which the world is gradually moving."

Another important problem closely connected with the last is that of Capital vs. Labor. Labor and wage conditions are abnormal, he said, and the problem of bringing down high prices

(Concluded on page 4)

NAVY UNIT DISBANDED

(Continued from page 1)

Dupont court and was dismissed until 2:30 with permission to go anywhere, and instructions to take all navy gear as far from the Institute as possible.

At the Little building in the afternoon, the men were given their full pay up to date, together with transportation to their homes. In ordinary cases, the transportation must be used within 48 hours after it is issued, but because of the fact that many men will remain at the Institute to finish the term and by so doing would be forced to pay their own way home, Admiral Rogers, commandant of the unit, was able to arrange to have all transportation issued to the Technology men good up to midnight on December 21.

FATE OF S. A. T. C. BARRACKS  
NOT AS YET DETERMINED

For some time rumors have been current as to the disposal of the S. A. T. C. barracks on the Institute property. Among the different ideas that have been advanced, two seem to have more or less weight. The first is that some of the barracks, at least, will be kept and will be used as activities buildings. The other plan is that the U. S. Naval Aviation Detachment is to be housed there until that school is closed. This, however, means that the barracks will again be vacant before spring.

Work of dismantling the barracks has already begun. The beds and mattresses which are no longer being used are being taken to the Quartermaster's Depot by the quartermaster department of the S. A. T. C. In a short time no furnishings will remain in the barracks and they will be empty and ready for whatever use the government sees to put them to.

involves effective co-operation between employer and employee. This is full of complexities regarding efficiency, markets, transportation, wage standards, the unemployed, economic situation of women, agriculture, and international relations.

Last and greatest of all is the question of religion. We entered the war, Mr. Munroe said, on a religious basis of standing up for justice and the right. Human fellowship is at the basis of all good, and is greater than armies, submarines, and zeppelins. To gain leadership men must learn to deal with men in action. All look to the engineer for leadership, and the next fifty years will see a great constructive struggle for efficiency, democracy and civilization. The old things are gone and Technology men must devise new ones and take a leading part in reconstruction. Mr. Munroe concluded with the words—"Every one of you is in Class A, and no exemption!"

Mr. Munroe is a manufacturer by profession, and is widely known for his activity on behalf of vocational education. He was born in Lexington in 1862, and twenty years later was graduated from Technology. From 1882 to 1889 he was secretary of the faculty at Technology, resigning to become a member of the firm of James S. Munroe & Co. In 1910 he became president and treasurer of the Munroe Felt and Paper Company.

He is secretary of the Institute Corporation, of which he is a life member, and for nine years was managing editor of the Technology Review. He has been prominent in many historical and industrial societies, and is a member of several prominent clubs. He is the author of "The Educational Ideal," "A Sketch of the Munroe Clan," "Adventures of an Army Nurse," "New Demands in Education," "The New England Conscience," and has been a contributor to many education periodicals.

At the beginning of the war Mr. Munroe was appointed to the M. I. T. Committee for National Service, of which he became chairman. He worked incessantly at Washington to place Technology men where they were most needed, and in November, 1917, resigned because of more urgent work. He was one of the three laymen appointed by President Wilson to the Federal Board for Vocational Education, and in February, 1918, he was appointed a member of the Committee on Education and Special Training.

**TECH SHOW PROGRESSES**  
(Continued from page 1)

porated into the final plot. As in past years the show will be a musical comedy, although there will be no extravagance in costume or setting, it is not to be thought that from this, the show will be done on a cheap scale. As a matter of fact, scenario writers will have as broad a scope if not broader than in former years.

The Kommer's Smoker will be held Friday, Jan. 10. It is desirable if not imperative to have the scenarios in by that time. Completed books are not expected at this date, and as the choice will be made on the merits of the scenarios alone, the successful author will be given ample opportunity to develop his plot later. In making plots for the show it is well to remember that the following stars will be at the Institute: "Freddie" Britton, Wallace Frazier, E. W. Booth, Kenneth Akers, Christopher Nelson, and J. S. Coldwell, last year's

premier danseuse. The management of the show has naturally been depleted on account of the war and particular opportunities are now available for men wanting to get in on this thing. The business department needs freshmen assistants, also the publicity and stage departments are in need of men from the freshmen class and perhaps some Sophomores. Those in charge of the show realize fully that the academic work will not be any lighter than usual this year, and plans are now maturing whereby a system of general efficiency will ease up on the work of the prospective candidates.

In the musical line songs and dances of all varieties can be used; the same is true of lyrics. This year there ought to be some particularly good songs, as the material for these and the men capable of writing them is larger than usual.

Announcements for the requirements of the cast, chorus and the ballet will be made as soon as the scenario has been chosen. Every one ought to be interested in the show, as it is distinctly a Technology Affair, and they can show this interest by attending the Smoker, Jan. 10, the first big undergraduate event of the next season.

**SIXTY-SIX MEN WILL TRY FOR GLEE CLUB HONORS**

Sixty-six men will report at the first rehearsal of the Glee club next term as the result of the try-outs for the musical clubs held in room 10-250 last Thursday and Friday nights. No report of the results from the competitions for the Banjo or Mandolin clubs have been announced as yet. The Glee club will hold two rehearsals the first week of next term and the Mandolin and Banjo clubs, one week. After that each club will hold two rehearsals weekly until the first concert which will take place February 1.

The men who will report to the first Glee club rehearsal are—H. R. Rorr, the leader; A. G. Ahern, E. L. Akery, K. F. Akers, E. C. Clark, F. G. Davidson, L. B. Doris, W. T. Honiss, C. S. Knight, S. E. Nichols, A. M. Perkins, A. V. Tiley, J. S. Ward, W. A. Cauldwell, C. C. Carvan, R. S. Drury, R. Hogan, W. A. Heeps, K. Jetter, L. A. Lloyd, W. E. Luke, H. F. Richards, P. L. Riley, J. T. Rule, G. S. Safford, A. W. Skilling, R. G. Stall, E. R. Thomas, R. C. Bishop, J. H. Chadwick, K. P. Coachman, W. J. Coughlin, J. R. Daesen, H. C. Fish, R. L. Gove, J. Greenblatt, H. A. Grosseup, C. D. Grover, S. E. Lunden, O. E. Mowry, L. Pelkus, A. W. Peterson, J. F. Robinson, B. F. Rogers, A. C. Rund, H. W. Smith, V. E. Stevenson, A. K. Trimble, F. C. Vogel, O. G. Williams, J. R. Bartholomew, L. W. Conant, H. R. Couch, H. O. Davidson, A. H. Fletcher, E. R. Herman, A. S. Houghton, W. Kessick, J. L. Liecny, T. H. Peimey, F. B. Tausig, W. Wirt, C. H. Greenwatt, R. Hughes, R. Bradley.

**COURSE IN JOURNALISTIC ENGLISH WILL BE DISCONTINUED TEMPORARILY**

The course in journalistic English, which was at one time given at the Institute and which could be taken in place of the regular Freshman English course, will not be given this year according to an announcement made by Professor Henry G. Pearson, head of the English department. Professor Pearson stated that while it was not the intention of the English department to drop this course definitely, the present schedule for Freshman English which is to include a subsidiary course in European history absolutely forbids the introduction of journalism to replace the regular course this year. However, if a sufficient number of men are willing to take a journalistic course, which would occupy about two recitation hours weekly, it will be given with the understanding that no first year credits will result from it. Professor Pearson's idea of such a course for next term includes a series of lectures by the dean and professors of the Institute to inform men, and especially Freshmen, of the activities in and about Technology.

**BOSTON AUTHORS' CLUB VISITS TECHNOLOGY**

The Boston authors' club visited Technology on Friday and were entertained by Professor and Mrs. E. B. Spear. Following an inspection of the buildings, the club adjourned to room 10-275, where Dr. H. P. Talbot delivered an address of greeting. An illustrated talk on gas warfare by Professor Spear formed the principal part of the afternoon's program. An exhibition gas mask drill was given by Corporal Maguire. During the inspection of the buildings, the visitors expressed great interest in an exhibit of early editions in the library which were prepared by Professor Bigelow. Basil King, president of the authors' club, presided at the meeting. Tea was served in the Emma Rogers room.

**There's Nothing Better**

Made in our own shops, by the highest type of skilled labor, from materials that have to stand up in accordance with the strict Morse Standard we know

**Morse-made Suits and Overcoats \$20 to \$75**

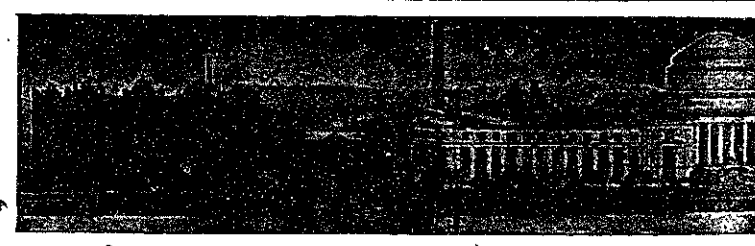

Represent an unequalled value backed by sixty-six years of untarnished reputation.

Adams Square *Leopold Morse Co.* Boston Mass.
