ELECTRICALS WILL VISIT AMERICAN TELEPHONE PLANT

The thirty men who have signed up for the third regular trip of the Elec-
tric Society to study telephone technology will leave for the Medill Street exchange of the
American Telephone Company at nine
thirty this afternoon. All members of the Society who have signed up are to be on board the train at 12:30
as soon after one o'clock as possi-
ble in order that there will be no de-
lay in getting the party organized
and on its way to Boston.

As has already been announced, the Ex-
change will be shown open to the
student, and every accessible portion of
the system will be carefully in-
guised. The trip is expected to take
three or four hours, the visitors will find the "behind the scene"
sections of the establishment of
much interest. Chief of these will be
the exchange where the thousands of wires which carry Boston's telegraphic
messages out are connected together
the operating switchboards. The guides
will explain how this amazing number
less except of wires are handled and
accounted for, and how any defect in one of them can be discovered in a sur-
prisingly short time. The visitors will
also see the "bell-girls" at their work, and
it is expected that this department
will be especially interesting. Another
source of information will be the so-
called "line hospital." It is in this de-
partment that all line troubles are dis-

Located Opposite Institute of Technology.

SCHEDULE ANNOUNCED

(Continued from page 1)

A richer comprehensive schedule
has been arranged for the freshmen. Be-
due to the large number of freshmen
on the squad, and because it is the de-
tection of the association to take care
of a large number of men all through
the season, a relatively large number
of men has been arranged. The selec-
tion for the first eight is still somewhat incomplete due to the fact that few
schools around have a complete, and
that the funds available this year, do
not.

There's Nothing Better

Made in our own shops, by the highest type of skilled labor, from materials that have to
stand up in accordance with the strict Morse
Standard we know

Two hundred and twenty-yard swim—

Win by Gustav Smith, Worcester Academy; Fish, Technology, second; F. J. Corbet, Worcester Academy, third, Time—2:52.

Diving—Win by Curwin, Worcester Academy; Mack, Worcester Academy, second; Kitter, Technology, third; Pugh—Win by German, Worcester Academy; Starch, Technology, fourth; Trott, Worcester Academy, fifth; Distance—46 ft.

Relay race—Win by Worcester Academy; Time—4:06.

ELECTRICALS TAKE TRIP

(Continued from page 1)

corrected their wharfsmen immediately located. Just how this seemingly impossible task was accomplished by this committee.

At a later date the Society is planning to form a speech at which a representative of the American Telephone Company will go into more detail concerning the operation of the modern telephone exchange. This talk will probably be accompanied by some other slides.
